

3. Potable water and wastewater

Potable water and wastewater

End-to-end engineering and asset management of water and wastewater services

Water infrastructure and service specialists

From the design and construction of water and wastewater infrastructure, to a full range of metering services, we work with Australia's leading water utilities.

500km+

of water pipeline installed annually

25+

Years of experience providing domestic metering services across Australia

We specialise in design, civil, structural, electrical, mechanical, control engineering and specialist metering services.

We are collaborative by nature and thrive on delivering water projects and programs that are complex and technical. Our clients have peace of mind that we have a deep and inherent understanding of essential service provision and the governance framework that surrounds the water industry.

Our capabilities are extensive and we are committed to excellence, safety, quality, innovation and sustainability.

Water Infrastructure

Service Stream offers design, civil, structural, electrical, mechanical, control engineering and specialist field resources:

- Concept and detailed design and drafting
- Hydraulic engineering
- Pump stations
- Treatment plant upgrades
- Emergency storage
- Pressure management
- Mains renewals
- Pipelines
- Regulating structures
- Mechanical / electrical
- Condition assessment

Consumer and domestic services

Our dedicated specialist teams provide end-to-end metering and associated field services including:

- Contestable metering installations
- Meter reading field services
- Meter connection services
- Meter accuracy testing
- Smart-meter network deployments
- Plumbing and appliance retrofitting
- Asset replacement programs - installation/exchange
- Customer service
