NRW MINING

OUR PROJECTS

A Leading Provider of Mining Services

NRW Mining is one of Australia's leading mining contractors, with proven capability to safely deliver mining projects that meet timeframes and budgets. NRW Mining has become the contractor of choice for many of Australia's leading resource companies.

With a fully mobile workforce and an extensive list of plant and equipment, NRW Mining has demonstrated comprehensive experience in developing and operating mines in remote locations throughout Western Australia, South Australia and Northern Territory. Significant works have been undertaken in the iron ore, gold, diamond, and lithium sectors.

Scope of Mining Contractor Services

NRW's scope of work on mining projects typically includes:

- mine planning
- clearing and grubbing
- topsoil removal
- drill and blast
- load and haul
- haul road maintenance
- ROM and waste dump maintenance
- crusher feed
- product haulage
- rehabilitation

NRW has successfully managed and operated plant hire and maintenance mining contracts with a dedicated team of specialised project personnel including dedicated project managers, engineers and supervisors.

NRW Mining Capabilities

NRW has a long history in providing mining services for pit development and access road establishment. Having worked on various mine developmental projects NRW has been responsible for the following components:

- clearing existing vegetation
- removal, haulage and stockpile of topsoil
- foundation preparation
- bulk earthworks
- road construction
- process plant earthworks

- conveyors earthworks
- stacker and reclaimer earthworks
- tailings storage facility construction
- related ancillary works
- drainage installation
- pit development
- topsoil re-spread
- landscaping and rehabilitation

NRW Plant for Mining Projects

NRW has a dedicated Plant Department providing support, assistance and cost efficient strategies to both our Mining and Civil Divisions. NRW's extensive range of plant, owned and leased, is fit for purpose and maintained to the highest standards by experienced maintenance personnel. The Plant Department has the systems and processes in place to effectively mobilise plant to a project wherever it is required nationally or internationally.

A detailed listing of current plant is available by contacting us [here](#).
