9 SEPTEMBER 2026

TREK METALS TO PRESENT AT RESOURCES RISING STARS INVESTOR CONFERENCE

Trek Metals Limited (ASX:TKM) is pleased to advise shareholders and investors that its Chief Executive Officer, Derek Marshall will be presenting at the Resources Rising Stars Gold Coast Investor Conference, being held on Wednesday 9th September and Thursday 10th September 2026.

Mr Marshall will provide an update on the Company's activities and outlook.

The conference will be live-streamed and shareholders and investors can attend either in-person or virtually via the livestream. There is no charge to attend either the live-stream or in-person event for investors, however registration is essential.

Venue: RACV Royal Pines Resort, Ross St, Benowa QLD 4217
Register: RRS Investor

It is recommended that online investors pre-register prior to the commencement of the presentation.

A full Conference program can be downloaded from here.

Authorised for release by the Board.

TREK METALS

An Emerging New Manganese District in Western Australia?

Christmas Creek, Western Australia

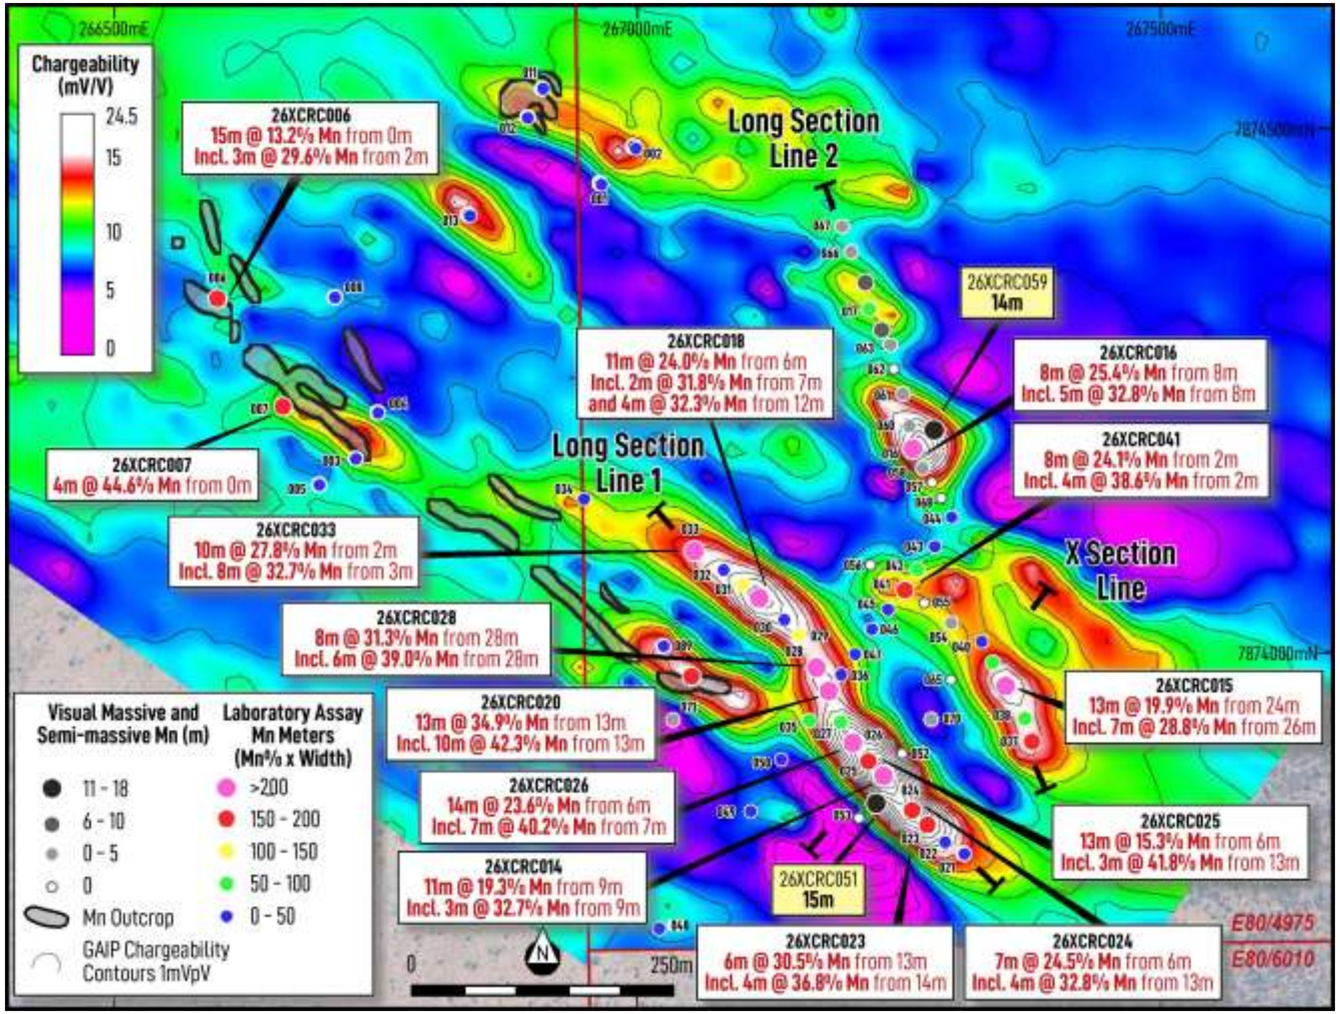
Investor Presentation | RRS Gold Coast | Sept 2026

59.65% Mn
Sample ID OS0063031
56.7% Mn
Sample ID OS0063065

10m @ 42.3% Mn from 13m
in 26XCRC020

Maiden Drilling at Kuro

Chargeability (IP) Targets



https://trekmetals.com.au/announcements/7724003

72 Drill Holes completed in Phase 1 for 4,638m

Best results to date target Induced Polarisation (IP) chargeability highs

Standout intersection

10m @ 42.3% Mn from 13m in 26XCRC020

* Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

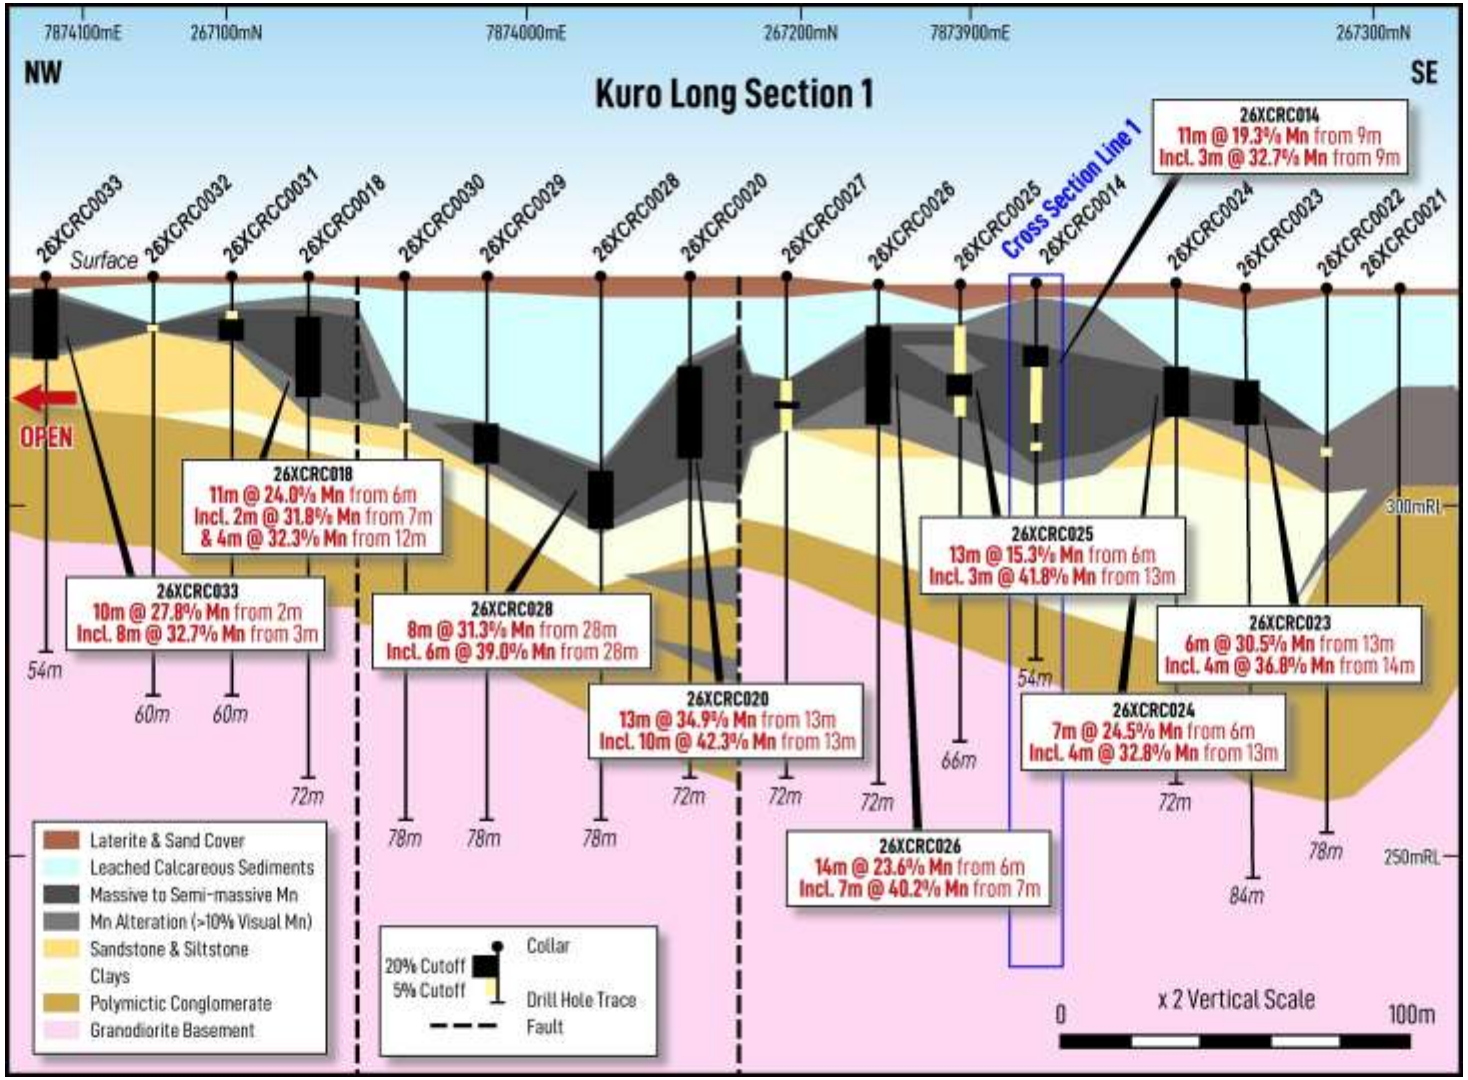
The visually observed manganese mineralisation is not representative of the entire Kuro Prospect, with drilling currently on-going to further assess the distribution of manganese.

Representative drill samples are being routinely collected from the drill rig and will be analysed at ALS laboratories and reported in due course (first batch reported, second batch expected early September, final batch from Phase 1 expected mid-late September).

Refer ASX announcements 29/06/2026 & 23/07/2026 for additional detailed information regarding visual estimates.

Maiden Drilling at Kuro

10m @ 42.3% Mn from 13m



https://trekmetals.com.au/announcements/7724003

Recent holes targeting undercover has returned greatest thickness of Mn*

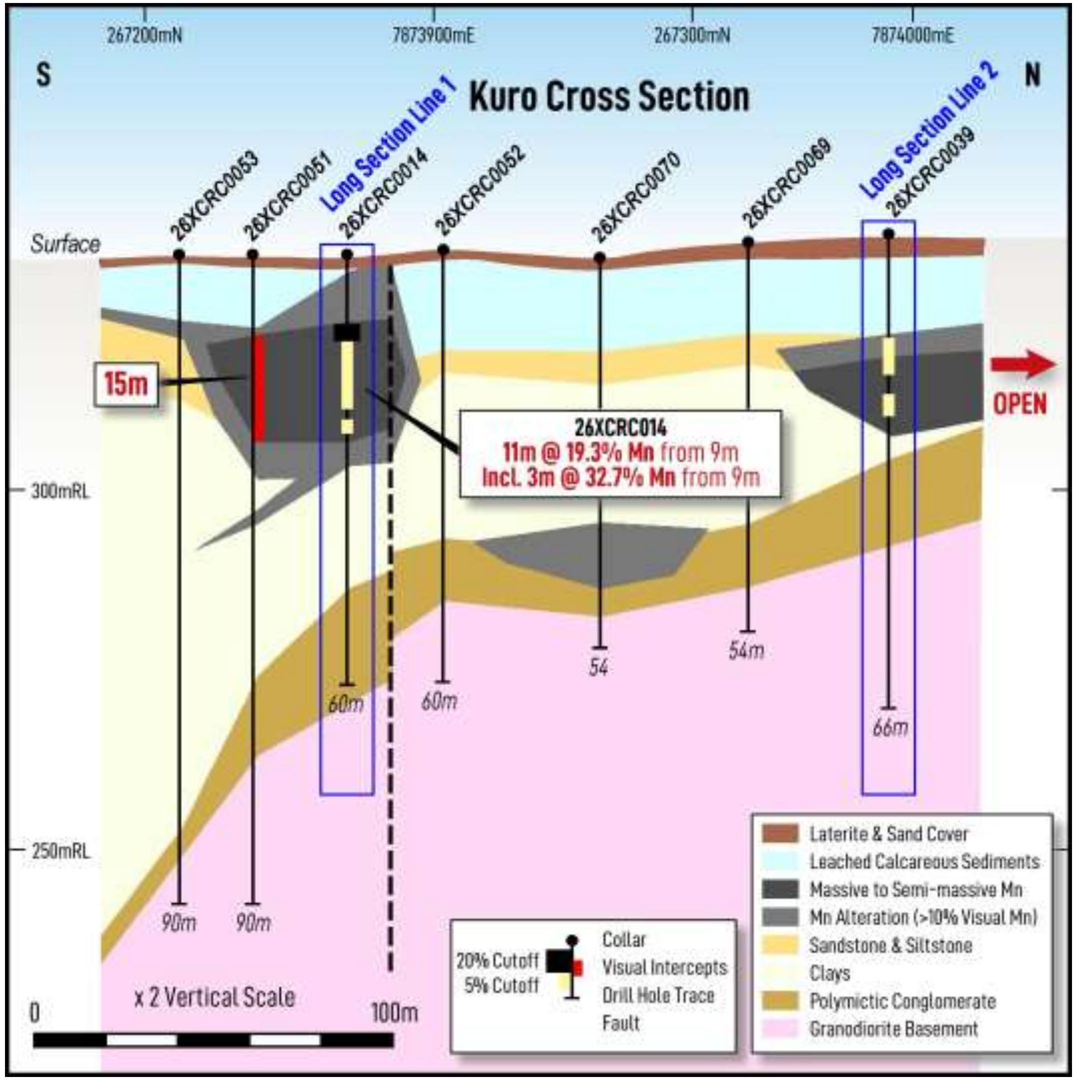
Mn intersections* appear to show thickening adjacent to interpreted faults (similar to Woodie Woodie)

Mn mineralisation* open to the SE, trending into Trek's EL application E80/6010

*Mixed laboratory and visual observations. Third batch of Phase 1 laboratory assays are still pending. Down-hole intervals do not necessarily represent true widths

Maiden Drilling at Kuro

Best Mn* Undercover



https://trekmetals.com.au/announcements/7724003

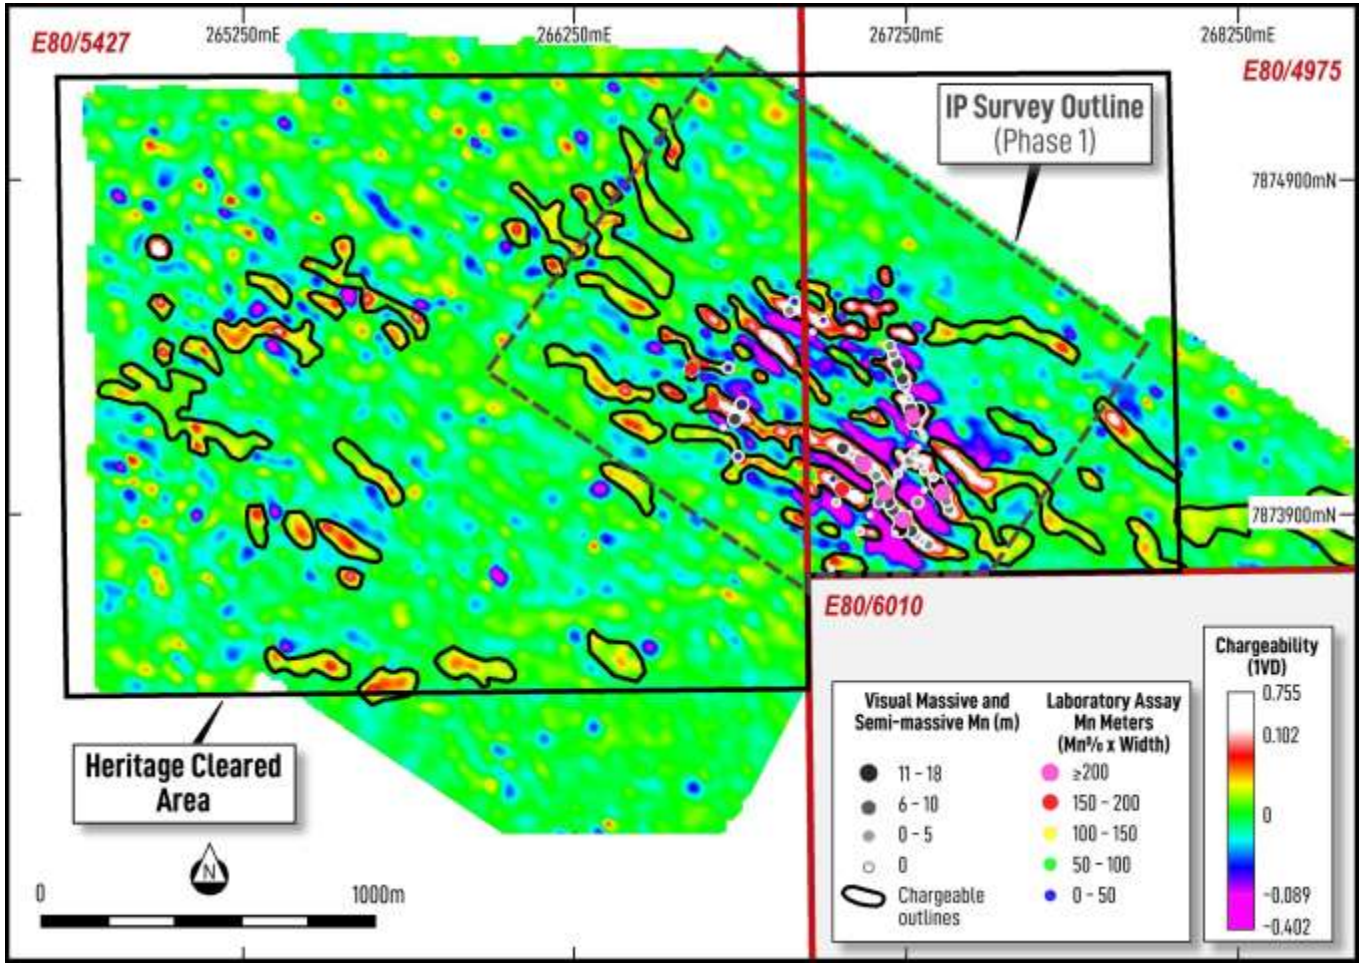
Recent holes targeting undercover has returned greatest thickness of Mn*

Mn intersections* appear to show thickening adjacent to interpreted faults (similar to Woodie Woodie)

Mn mineralisation* open to the SE, trending into Trek's EL application E80/6010

*Mixed laboratory and visual observations. Two thirds of Phase 1 laboratory assays are still pending. Down-hole intervals do not necessarily represent true widths

Kuro Phase 2 Drilling – In Progress
Targeting New Zones



Induced Polarisation (IP) surveying completed over the immediate Kuro extensions

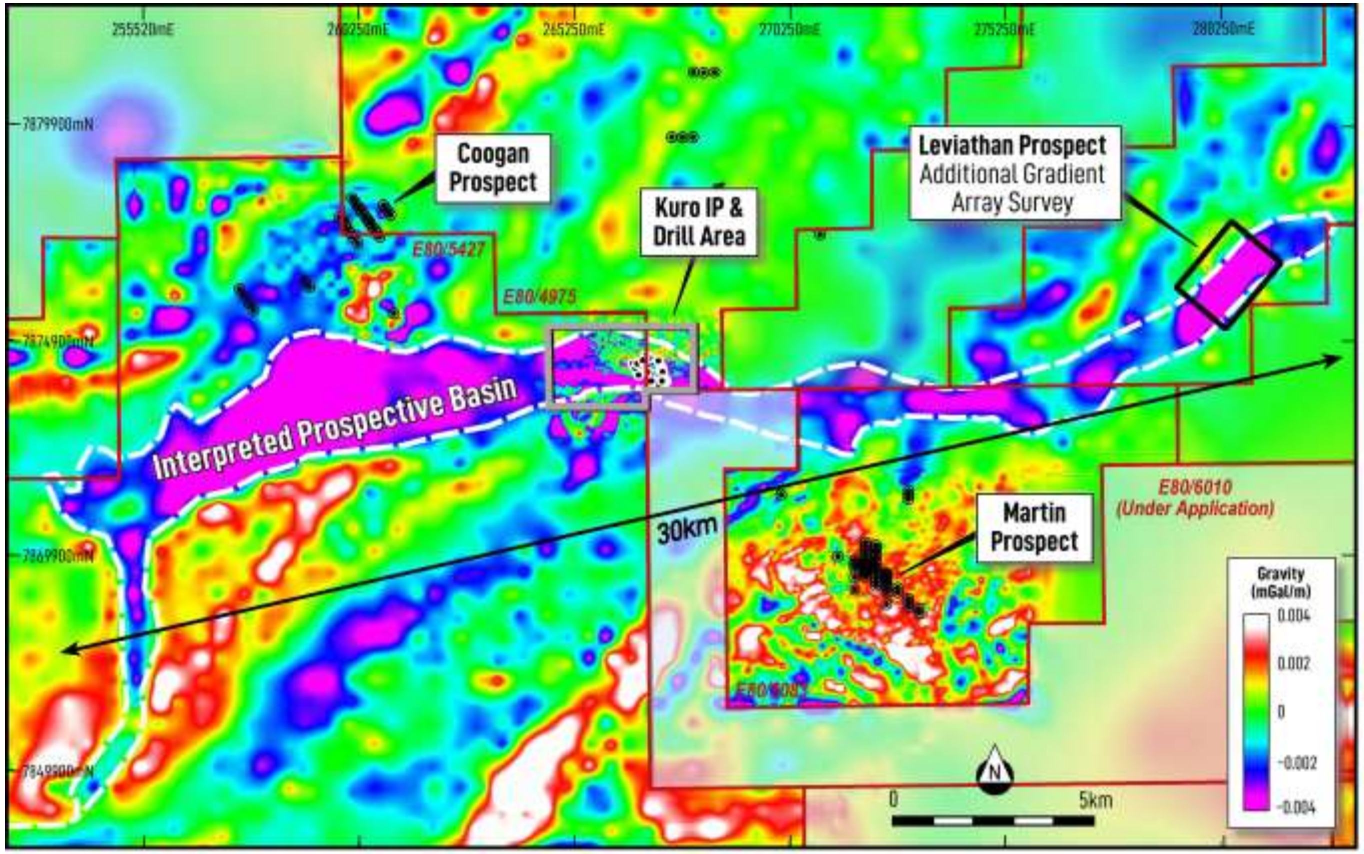
New drill targets identified based on chargeability, conductivity & gravity

2,500m Phase 2 RC drilling recently commenced, targeting scale potential

https://trekmetals.com.au/announcements/7689981

Regional Upside Potential

Interpreted Prospective Basin



30km interpreted extension to the host basin for Kuro Mn discovery

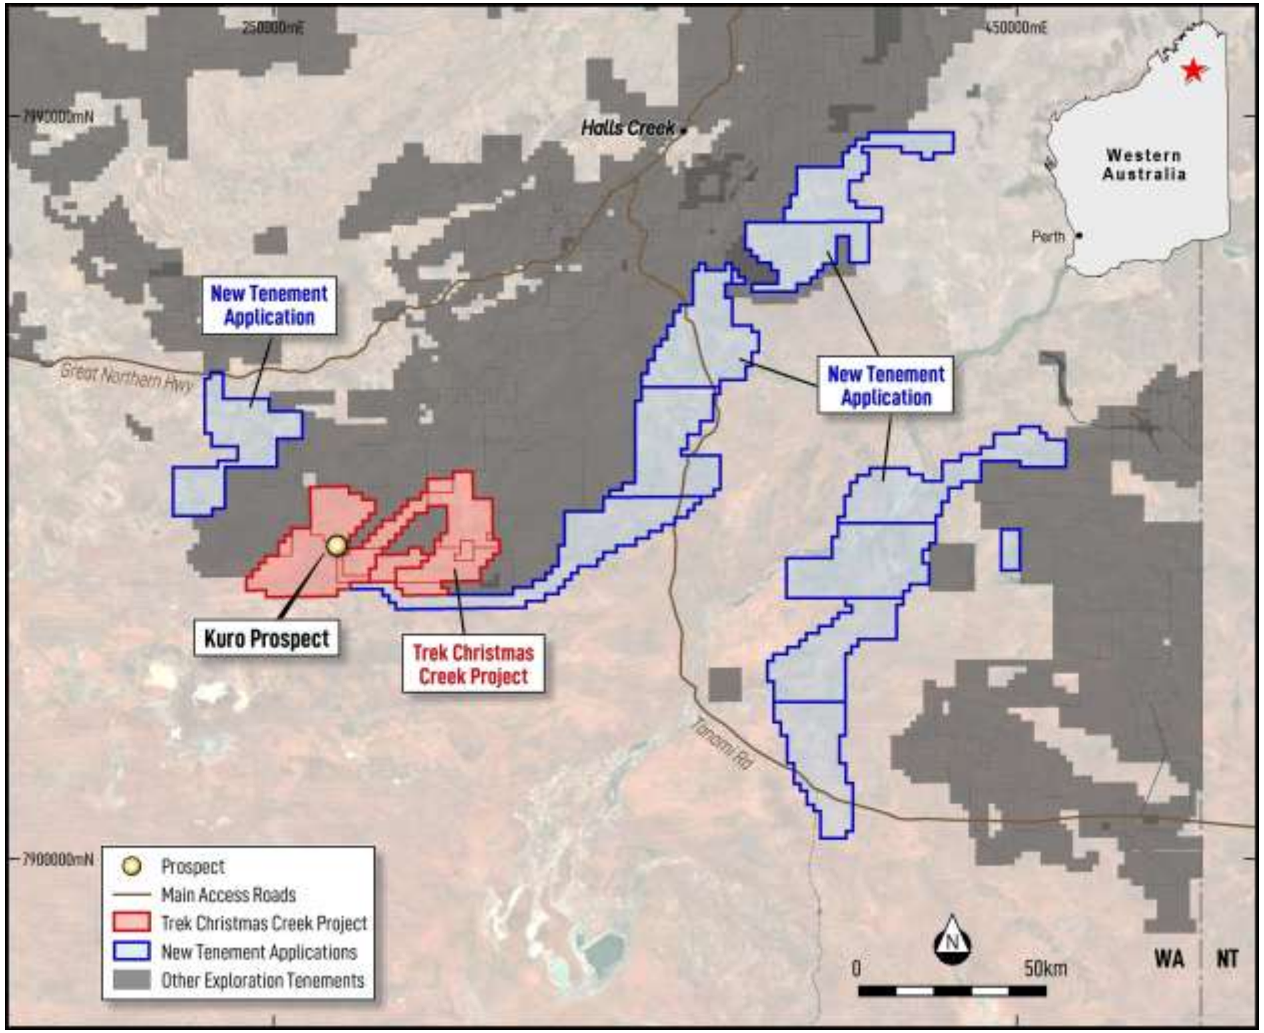
Significant search space to explore for additional accumulations of manganese

Main trend extending to the SE into Trek EL Application E80/6010

https://trekmetals.com.au/announcements/7689981

Regional Upside Potential

A New Manganese District?



https://trekmetals.com.au/announcements/7399456

5,608km^2 of newly pegged belt-scale exploration tenure

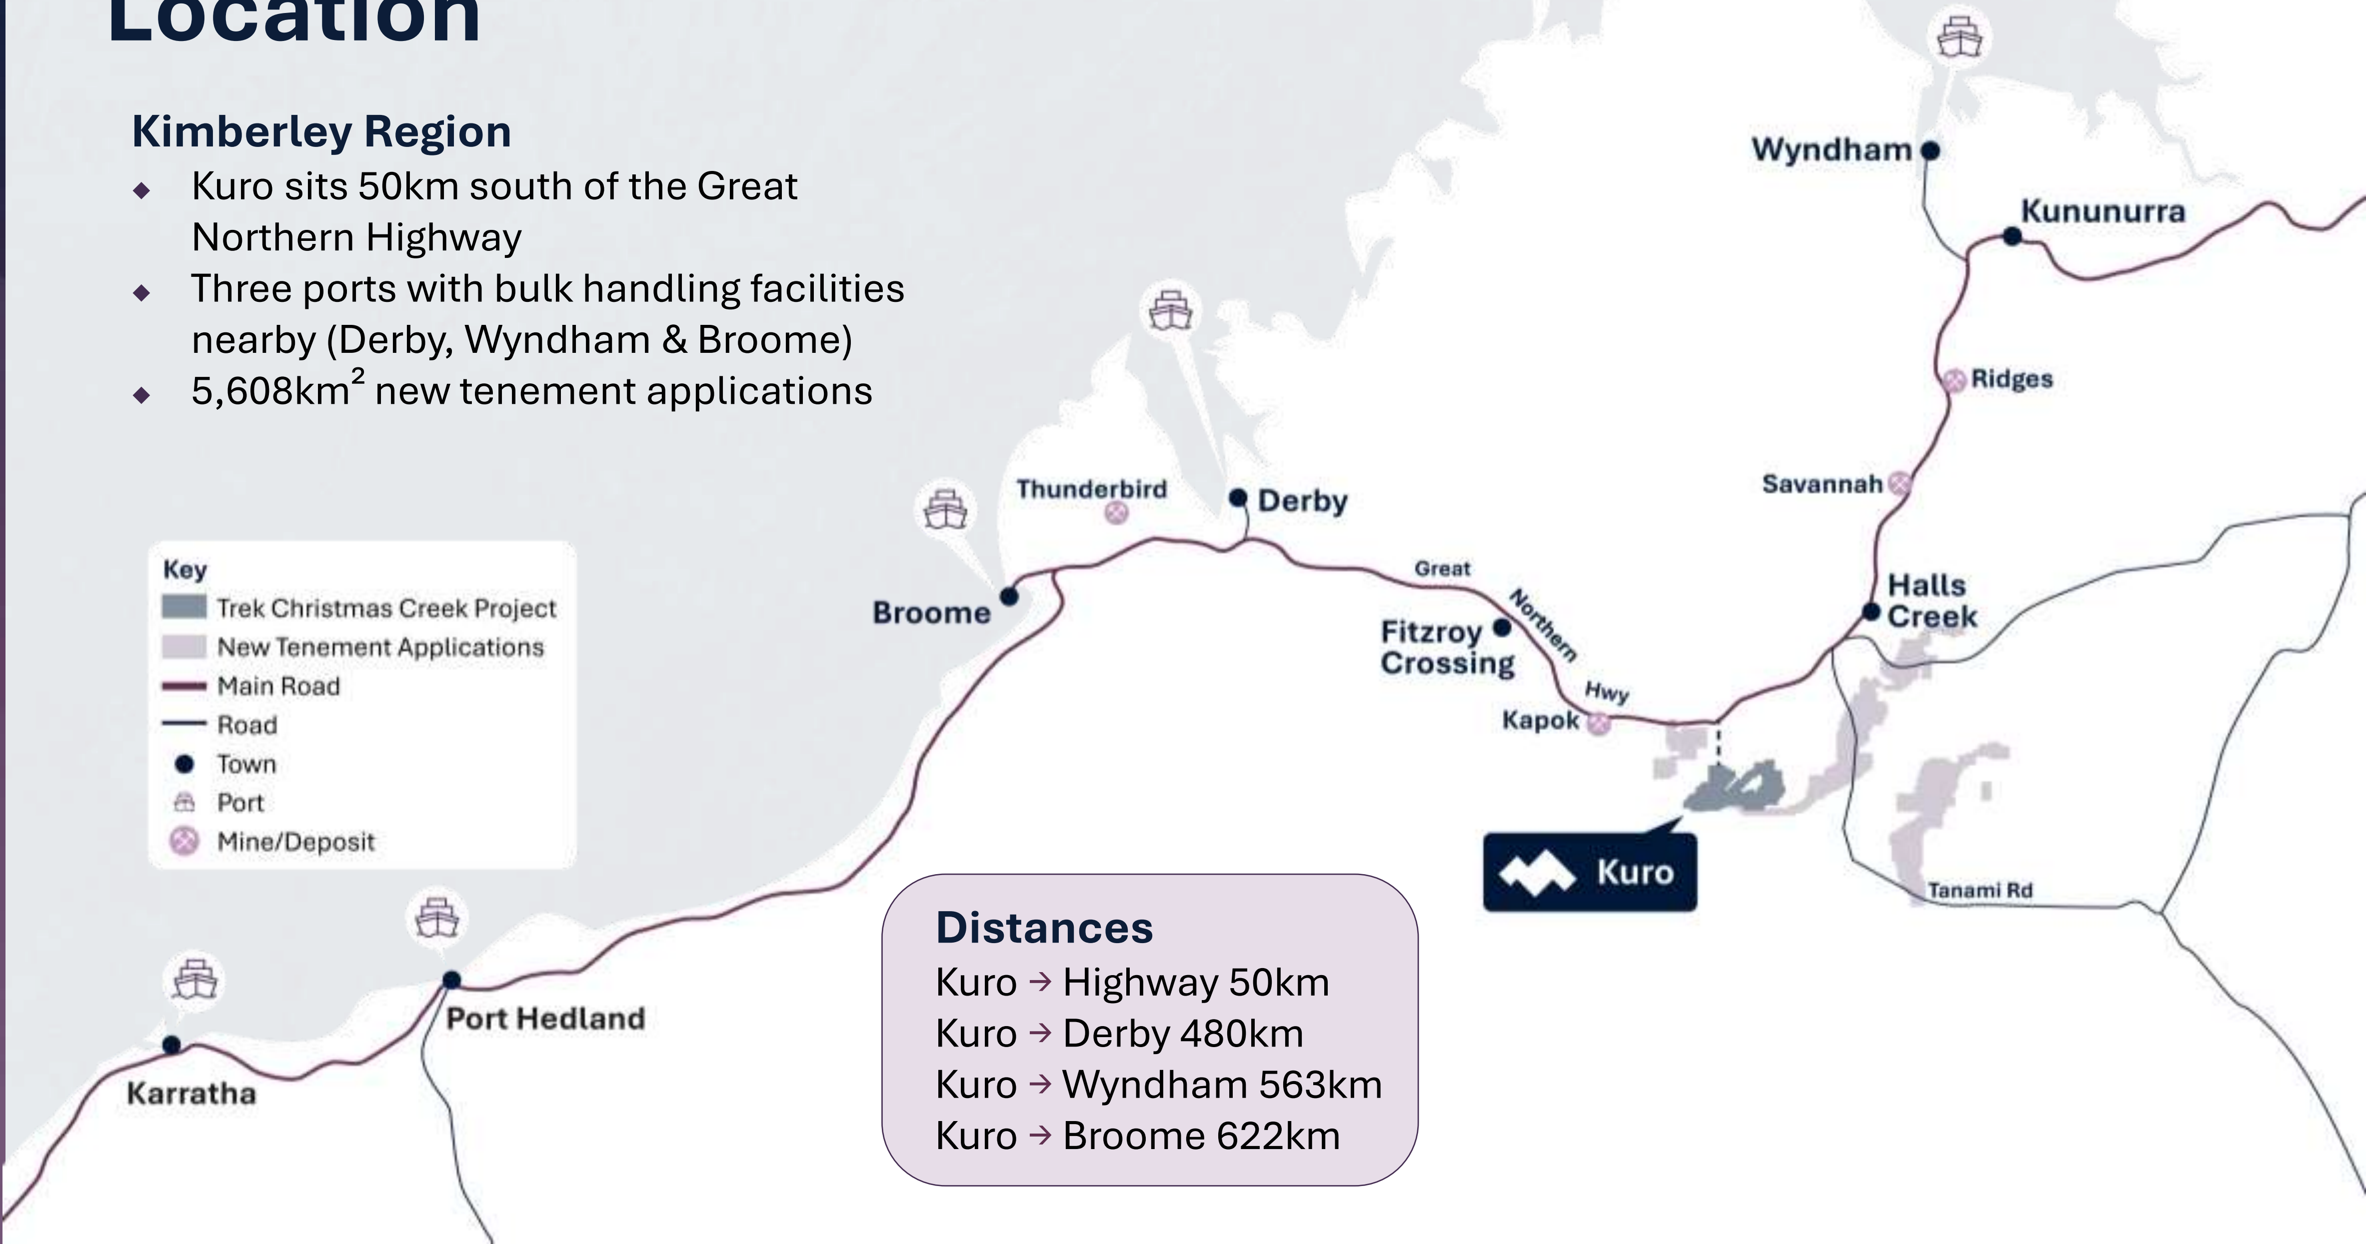
First-mover position in under-explored Proterozoic basin margins

Trek's total exploration landholding in the district now 7,040km^2

Location

Kimberley Region

- Kuro sits 50km south of the Great Northern Highway
- Three ports with bulk handling facilities nearby (Derby, Wyndham & Broome)
- 5,608km^2 new tenement applications



Distances

Kuro → Highway 50km
Kuro → Derby 480km
Kuro → Wyndham 563km
Kuro → Broome 622km

Activity Timeline

CORPORATE SUMMARY

Strong Balance Sheet, Leveraged to Success

Capital Structure

ASX Code	**TKM**.ASX
Share Price (31 Aug 2026)	$0.057
Ordinary Shares	731.17m
Unlisted Options ($0.225 exp 24 Feb 2028)	7.86m

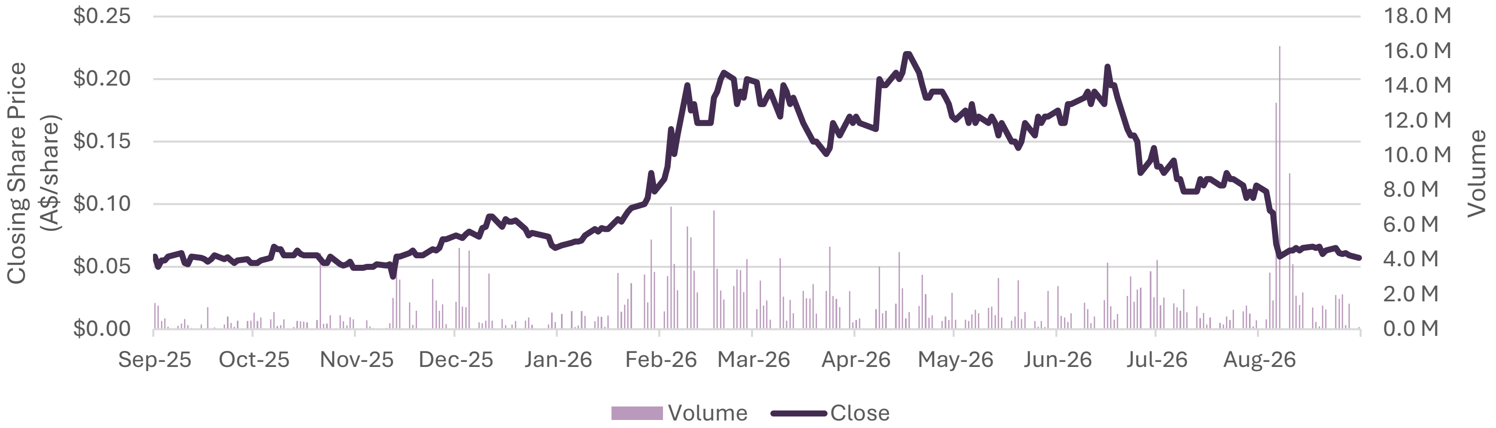
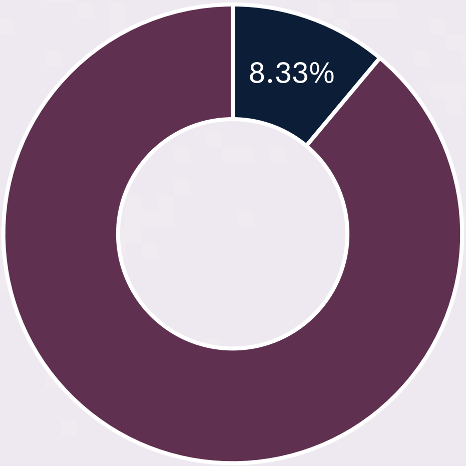
Enterprise Value	$30.01m

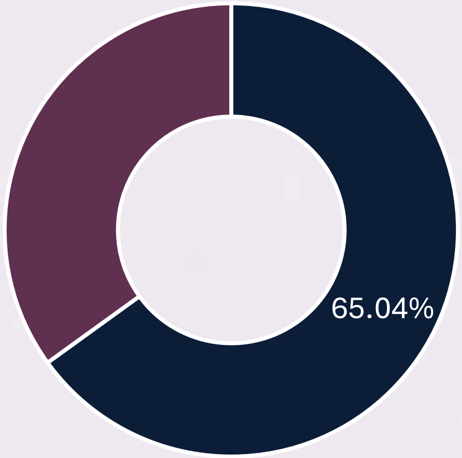
Share Price and Volume



Board & Management



Top 100 Holders



Emerging Manganese Exploration Opportunity

High-grade

Rock chips ~50% Mn, up to 60.1% Mn
Drilling 10m @ 42% Mn from 13m

Premium manganese (>44% Mn) is rare and drives value

Scale potential

750m of high-grade manganese at surface & more undercover

Unexplored 30km interpreted sub-basin hosting the known Mn at Kuro

Clear near-term catalysts

Manganese drilling and geophysical targeting on-going

Designed to test grade, width and depth & provide metallurgical samples

Large, under-explored system

Extensive >1,200km^2 package of highly prospective, under-explored ground

Potential for multiple manganese positions

This presentation prepared by Trek Metals Limited ("Company") does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). To the maximum extent permitted by law, none of the Company its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

Forward Looking Statements

This presentation may contain forward looking statements that are subject to risk factors associated with mineral exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates. This presentation also contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company's actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and assumptions based on currently available information. Should one or more risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. The forward-looking statements are made as at the date of this announcement and the Company disclaims any intent or obligation to update publicly such forward looking statements, whether as the result of new information, future events or results or otherwise.

Competent Person's Statement - Exploration Results

The information in this presentation relating to Exploration Results is based on information compiled by the Company's Chief Executive Officer, Mr Derek Marshall, a competent person, who is a Member of the Australian Institute of Geoscientists. Mr Marshall has sufficient experience relevant to the style of mineralisation and to the type of activity described to qualify as a competent person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Marshall holds or controls share and Performance Rights in the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement which can be found at https://trekmetals.com.au/announcements Mr Marshall consents to the inclusion in this announcement of the matters based on his information in the form and content in which it appears.

Cautionary Statement: * Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations. The visually observed manganese mineralisation is not representative of the entire Kuro Prospect, with drilling currently on-going to further assess the distribution of manganese. Representative drill samples are being routinely collected from the drill rig and will be analysed at ALS laboratories and reported in due course (laboratory assay results are expected progressively). Refer TKM ASX announcement 23/07/2026 for additional detailed information regarding visual estimates.
