Mobile Light Towers

Allight is a market leader in the design, manufacturing and distribution of light towers. From our worldwide headquarters in Perth, Western Australia, we produce up to 1,000 lighting towers a year. Our lighting solutions are used by a range of local industries as well as global clients. Each light tower is designed and manufactured using the most reliable components, with built-in features to ensure optimum productivity and maximum light output on your work platform.

Our Lighting Tower Range

HYBRID AND BATTERY

The Hybrid & Battery range offers a cleaner, quieter alternative to traditional diesel-powered lighting towers. Designed to reduce emissions and noise, these models are ideal for urban projects, low-impact environments and worksites where sustainability matters.

With options powered by battery, solar or hybrid diesel-battery systems, these lighting towers deliver reliable illumination with extended runtimes and minimal maintenance. Smart energy management, silent operation and fast recharge times make this range a practical choice for modern projects.

Silent, efficient and environmentally conscious.

URBAN

The Urbanlighting tower series is designed for durability and safety. These LED lighting towers feature high-efficiency light output, smart safety systems and quiet operation – making them a favourite for construction, infrastructure, mining and agriculture applications. With a powder-coated exterior and a rugged build, the Urban series is built to thrive in challenging conditions while keeping your team safe and your site compliant.

Powerful, quiet and safe.

MINESPEC

When your project demands extended lighting performance in harsh environments, the MineSpec delivers. Each floodlight offers up to 50,000 hours of reliable use with a Perkins water-cooled diesel engine powering extended run times – up to 3.5 weeks on average without refuelling. With optional remote monitoring via smartphone and easy stop/start control, the MineSpec range is ideal for demanding mining and industrial lighting applications.

Economic, tough and easy to operate.

**smartphone monitoring may require extras, customisation, non-standard options or 3rd party connection.*

SUPERSKID LED

The SuperSkid is a heavy-duty lighting solution built for mine pits, large construction sites and remote terrain. Its hydraulic telescopic mast delivers impressive light coverage in hard-to-reach areas while a long-range steel fuel tank ensures continuous operation with minimal downtime. Built tough, it features

a reinforced powder-coated body, advanced safety systems and efficient LED lighting output for superior visibility.

Strong, powerful and long lasting.

To find out which mobile lighting tower is best suited to your project, [contact Allight](#).

WHY ALLIGHT?

**TALK DIRECTLY WITH
THE ENGINEERING EXPERTS**

If customisation requirements are what you are after, we have a team of in-house engineers and technical experts who can work with you to develop bespoke solutions for your requirements.

PREMIUM BUILD SPECIFICATION

We provide Australian made, robust and reliable products for the most challenging and demanding applications. Our in-house engineering team can custom-design and manufacture bespoke equipment to match any specification supplied.

LOW OPERATION AND MAINTENANCE COSTS

We believe in optimising efficiency and reducing downtime to make ownership safe, simple and cost-effective for you. We have refined our product range through design and manufacturing, and by servicing our own equipment, which operates in the harshest conditions. We are proud to manufacture quality products with reduced downtime and energy usage, keeping your operations and maintenance costs down.

BROAD AND FLEXIBLE EQUIPMENT RANGE

We offer an extensive range of mobile light towers, generators and engines to meet and exceed customer expectations in all market segments.

QUALITY CUSTOMER SERVICE AND AFTERMARKET

Our genuine parts and customer service teams are on hand to make sure you can access qualified, professional and highly skilled technicians when you need them most.

STOCK AND MANUFACTURING CAPABILITY

We understand quick turnaround is important to you. That's why our Light Tower stock program provides you with fast access to equipment solutions.
