

Lycopodium Awarded EPCM Contract for Greatland's Havieron Project

PERTH, 21 September 2026

Lycopodium Limited ("ASX: LYL", "Lycopodium" or "the Company"), a global leader in integrated engineering, project, construction and asset management, is pleased to announce it has been awarded the Engineering, Procurement and Construction Management (EPCM) contract for delivery of Greatland Resources Limited (ASX:GGP) Havieron Project in Western Australia.

The contract is valued at A\$49.4 million, with Lycopodium engaged as Project delivery partner responsible for leading the project execution of the preproduction phase, with the scope encompassing project management, engineering and procurement services, coordination and management of trade contractors and suppliers, project controls, and construction and commissioning management as required to support delivery of the project.

Havieron is a high-grade underground gold-copper deposit located in the Paterson Province in the East Pilbara region of Western Australia, approximately 45 kilometres east of Greatland's Telfer gold-copper mine. Greatland will leverage Telfer's existing processing facility and related infrastructure to process the ore mined from Havieron. The Telfer mine is one of the largest gold processing facilities in Australia, comprising two 10 million tonnes per annum (Mtpa) capacity trains.

Delivery of the project has commenced, following receipt of a Limited Notice of Award in early June 2026.

Lycopodium's Managing Director and CEO, Peter De Leo, said: *"Havieron is a world-class, high-grade gold project and we are very pleased to have this opportunity to support Greatland in the development of its Telfer Hub strategy, leveraging the existing processing facilities available at Telfer to mine ore from Havieron."*
