SUTTLES COMPLETIONS UNDERWAY

Sabres and Whalers move into final development phase ahead of production

Tulsa, Oklahoma, USA – 24 September 2026 – Brookside Energy Limited (ASX: BRK) (OTC Pink: RDEF) (**Brookside or the Company**) is pleased to announce that completion operations are underway on the Sabres 2-1-1S-3W SXH1 and Whalers 2-1-1S-3W WXH2 wells at the Suttles Pad in the Company's SWISH Area of Interest in Oklahoma's Anadarko Basin.

The commencement of completion operations follows the successful drilling and casing of both wells and marks the final major phase of the Suttles development before the wells are brought into production. The frac spread and associated equipment have been mobilised to location, with water handling and surface systems commissioned and high-pressure frac lines successfully tested. The team has now moved into stimulation operations, with a total of 64 stages planned across the two wells.

Sabres targets the Sycamore Formation and Whalers the Woodford Formation. The two wells will be completed using a continuous zipper-frac program, moving from well to well as the team works through the planned stimulation stages across both laterals.

Following the stimulation program, the wells will progress through drill-out and clean-up operations before commencing flowback. Production facilities are being readied in parallel ahead of first sales.

Brookside holds an approximately 70% working interest in the Suttles development.

Commenting on this announcement, Brookside Managing Director & CEO David Prentice said:

"Both Suttles wells are drilled and cased and we are now into completions. Our focus is on executing the program safely and efficiently, getting every planned stage away as designed and then moving through clean-out and flowback before bringing both wells online.

The team has done a great job getting us to this point. Now it is about finishing the job and delivering two new operated wells into production."

– ENDS –

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is a U.S.-focused oil and gas producer operating in the Anadarko Basin, one of North America’s most productive hydrocarbon regions. The company has built a concentrated position in the SWISH Play, establishing a growing production base alongside a meaningful reserve inventory and drilling runway. Our strategy is simple: grow production, build scale, and return capital, executing disciplined development, maintaining a strong balance sheet, and allocating capital to compound per-share value over time.

GLOSSARY

APO WI	After pay-out working interest
AFIT	After Federal Income Tax
AOI	Area of Interest
BBL	Barrel
BFIT	Before Federal Income Tax
BOE	Barrels of Oil Equivalent
BOEPD	Barrels of Oil Equivalent Per Day
BOPD	Barrels of Oil Per Day
BPD	Barrels Per Day
COPAS	Council of Petroleum Accountants Societies
Development Unit or DSU	Development Unit or drilling spacing unit is the geographical area in which an initial oil and/or gas well is drilled and produced from the geological formation listed in a spacing order. The spacing unit communitizes all interest owners for the purpose of sharing in production from oil and/or gas wells in the unit. A spacing order establishes the size of the unit; names the formations included in the unit; divides the ownership of the unit for the formations into the "royalty interest" and the "working interest;" Only one well can be drilled and completed in each common source of supply. Additional wells may be drilled in a Development Unit, but only after an Increased Density Order is issued by the Oklahoma Corporation Commission.
Force Pooled	The Oklahoma Corporation Commission is authorized to establish well spacing and drilling units covering any common source of supply of hydrocarbons, or any prospective common source of supply. Once the unit is established, the Commission can force pool the interests of all the owners who own interests in that unit and who have not voluntarily joined in the development of that unit.
IP	Initial Production
MBOE	1,000 barrels of oil equivalent
Mcf	1,000 cubic feet
MMBOE	1,000,000 barrels of oil equivalent
NPV ₁₀	The net present value of future net revenue before income taxes and using a discount rate of 10%.
NRI	Net Revenue Interest
PDP	Proved Developed Producing Reserves
Pooling Agreements	The pooling agreements facilitate the development of oil and gas wells and drilling units. These binding pooling agreements are between the Company and the operators
Prospective Resource	Prospective Resources are those quantities of petroleum which are estimated, on a given date, to be potentially recoverable from undiscovered accumulations.
PUD	Proved Undeveloped Reserves
Reserve Categories	These reserve categories are totalled up by the measures 1P, 2P, and 3P, which are inclusive of all reserve types: • "1P reserves" = proven reserves (both proved developed reserves + proved undeveloped reserves). • "2P reserves" = 1P (proven reserves) + probable reserves, hence "proved AND probable." • "3P reserves" = the sum of 2P (proven reserves + probable reserves) + possible reserves, all 3Ps "proved AND probable AND possible."
STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties – oil and gas play in the Anadarko Basin Oklahoma
SCOOP	South Central Oklahoma Oil Province - oil and gas play in the Anadarko Basin Oklahoma
SWISH AOI	Description of Brookside's Area of Interest in the SCOOP Play
TVD	True Vertical Depth
Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil and gas from a tract of property. Working interest owners are obligated to pay a corresponding percentage of the cost of leasing, drilling, producing, and operating a well or unit
