TITOMIC SECURES AU\$752,000 IN NEW U.S. ORDERS ACROSS DEFENSE AND ENERGY

HUNTSVILLE, AL – Titomic Limited (ASX: TTT), a global leader in cold spray additive manufacturing and advanced coatings, is pleased to announce that its wholly owned U.S. subsidiary, Titomic USA, Inc., has secured four new contracts totaling US\$534,000 (AU\$752,000) across the U.S. defense, research and energy sectors.

The awards, include an advanced coatings study and testing program for a Tier-1 defense prime, a TKF™ 623 system, a TKF™ 523 system and a TKF™ 523 Tactical system.

Titomic USA has received a new contract from an existing Tier-1 U.S. defense customer to conduct trial sprays and testing of multiple advanced metallic and hard coating materials. The program includes deposition and mechanical testing of titanium alloy, high-strength steel, aluminum alloy and wear-resistant coating systems. The program is targeted for completion by the end of November 2026 and represents another opportunity to demonstrate Titomic Kinetic Fusion™ (TKF)™ cold spray technology for demanding defense applications.

Titomic USA has also secured an order from a major global energy technology company for a TKF™ 623 medium-pressure cold spray system. The system is scheduled for delivery by the end of 2026 and expands the deployment of TKF™ cold spray technology within the energy sector.

The awards also include the sale of a TKF™ 523 system to an energy and defense company, further expanding the deployment of Titomic Kinetic Fusion™ (TKF)™ cold spray technology across strategic U.S. markets.

A further contract has been received from a U.S. defense research organization for a TKF™ 523 Tactical configuration, with delivery targeted by the end of November 2026. Designed around portability and deployability, the TKF™ 523 Tactical platform extends cold spray capability beyond traditional fixed manufacturing environments and supports the growing requirement for flexible, point-of-need manufacturing, repair and sustainment solutions.

Together, the four contracts represent US\$534,000 (AU\$752,000) in new U.S. orders demonstrate accelerating demand for Titomic's technology across defense, research and energy applications. The awards span the breadth of Titomic's U.S. offering - from advanced coating development and material testing to the delivery of production and deployable cold spray systems. With these latest wins, Titomic has secured nine new orders in the United States totaling US\$6.1 million (AU\$8.7 million) in just four weeks.

Jim Simpson, CEO and Managing Director of Titomic, said:

"These new orders reinforce the commercial momentum we are seeing in the United States and demonstrate the diversity of our addressable markets. Importantly, our growth is extending beyond individual system sales into research, testing, coatings and application development, creating multiple pathways for customers to adopt Titomic technology for build and repair. We remain focused on converting our expanding technical engagements into commercial programs and establishing Titomic as a trusted manufacturing and sustainment partner across defense, aerospace, energy and other critical industries."

This announcement has been authorized for release by Titomic's Board of Directors.

ABOUT TITOMIC LIMITED

Titomic Limited (ASX: TTT) is a leading Advanced manufacturing company with global operations specializing in large integrated solutions for industrial- scale metal additive manufacturing, coating, and repairs using its patented kinetic fusion cold spray (Titomic Kinetic Fusion™) technology. Titomic Kinetic Fusion™ cold spray solutions provide OEM production and R&D services to the global Aerospace, Defense, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all its Titomic Kinetic Fusion™ cold spray AM activities from its Huntsville, Alabama Global Headquarters, as well as through local presence in the Australia and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit www.titomic.com.

FORWARD LOOKING STATEMENTS

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates", "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercializing technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
