ATTURRA SELECTS ACTIVEPORT'S SOFTWARE TO SCALE ITS CLOUD & COMPUTE OFFERING

Activeport' Software will power Atturra's self-service client portal for network, cloud, compute and GPU services for AI inference.

Activeport Group Ltd (ASX:ATV) ("Activeport" or "the Company") is pleased to announce that it has signed a three-year agreement with Atturra Limited (ASX:ATA) (**Atturra**) to deliver a new orchestration platform that will automate and scale Atturra's network, cloud, compute and GPU for Inference-as-a-Service offering, helping Atturra bring new AI and compute capacity to market faster through a self-service digital experience.

Highlights

- Atturra (ASX:ATA), has signed for Activeport's network, compute and GPU orchestration software.
- Activeport will deliver Atturra's digital on-demand platform and portal, enabling Atturra clients to purchase, provision and manage network, cloud connectivity, compute and GPU services provided by Atturra.
- This is intended to give Atturra a way to manage the ordering and provisioning of selected GPU and AI inference services through the platform.
- The initial term is three years, comprising an upfront customisation payment plus recurring annual licence fees for software and provisioned services.

The platform will bring together Activeport's network overlay orchestration and automation software capabilities to support a unified, self-service on-demand experience across Atturra's connectivity, compute and cloud services.

Once implemented, the new Atturra Network-as-a-Service (NaaS) platform will enable clients, partners and internal teams to quote, order, provision, manage and monitor services in real time through a fully branded digital environment. It is designed to streamline manual processes, improve service delivery and provide Atturra with a scalable foundation for expanding its digital services portfolio either directly or through white-label, multi-tenanted partners. Termination clauses are common to contracts of these types including termination for breach, change of ownership and insolvency.

Activeport's Michael Glynn said:

"We are delighted to welcome Atturra as an Activeport client. This signing brings together two ASX-listed technology companies with a shared focus on software-driven service automation to improve the client experience." Glynn continued, *"Activeport's orchestration software will provide Atturra with a scalable platform for automating connectivity, cloud services and Atturra's own cloud, compute, GPU and Inference-as-a-Service offering, reducing operational complexity and enabling a more seamless, self-service experience for its clients and partners."*

This agreement is a strong validation of Activeport's technology and its ability to win established, ASX-listed technology service providers as clients and to grow with them as they scale offerings to meet rising enterprise demand.

About Atturra: Atturra is an ASX-listed advisory and IT solutions company offering capabilities across cloud, managed services, network services, cybersecurity, business applications, data and artificial intelligence.

About Activeport: Activeport Group Ltd (ASX: ATV) delivers network automation and orchestration software to telecommunications, data centre and IT markets worldwide. Headquartered in Perth, with operations across Australia, Europe and India, Activeport turns existing infrastructure into scalable, automated, revenue-generating digital platforms.
