

Receipt of \$1.75 million escrowed sale proceeds from divestment of NT uranium assets to DevEx Resources

Alligator Energy Limited (ASX: AGE, Alligator or the Company) advises that it has received \$1.75 million in escrowed sale proceeds from the disposal of its Northern Territory uranium assets to DevEx Resources Limited (ASX: DEV).

The funds had been held in a third-party escrow account following completion of the sale. Release of the funds follows renewal of the exploration access agreement covering EL24921 and EL24922 at Tin Camp Creek, satisfying the condition for release under the sale agreement.

Receipt of the escrowed funds further strengthens Alligator's cash position as the Company focuses on advancing its Samphire and Big Lake uranium projects in South Australia.

This announcement was authorised for release by the Board of Alligator Energy Limited.
