

Talius and Health Generation enter commercial partnership for CareGen Intelligence

1 October 2026

HIGHLIGHTS

- Talius and Health Generation have entered into a binding commercial partnership to market and deliver CareGen Intelligence™ to the Australian aged care sector
- CareGen combines Talius' sensor technology, SaaS platform, artificial intelligence and reporting capabilities with Health Generation's registered-nurse-led clinical intelligence and support
- Health Generation will lead client acquisition and clinical service delivery, while Talius will provide the technology platform, hardware, installation, technical implementation and ongoing platform support
- Talius will generate upfront technology revenue and recurring software revenue from CareGen deployments, with financial contribution dependent on customer adoption
- The partnership has an initial objective to engage three new customer sites and commission one pilot during the first 12-month measurement period, providing an additional pathway for adoption beyond Talius' existing installed customer base

Talius Group Limited ("Talius" or "the Company") (ASX: TAL) is pleased to announce that it has entered into a binding commercial partnership agreement with Australian aged care consultancy Health Generation Pty Ltd ("Health Generation") to take the co-branded CareGen Intelligence™ offering to market.

CareGen brings together Talius' sensor and visibility technology, Care Intelligence platform, and reporting capabilities with Health Generation's clinical services.

Under the CareGen model, Talius will provide the technology component, including its platform, sensors and other hardware, installation, technical implementation, insights and reporting layer and ongoing platform support. Health Generation will provide the clinical layer, at the level of service selected by each customer, including clinical protocol and escalation pathway design, registered nurse oversight, monitoring, triage, escalation and reporting.

The solution is designed to combine real-time information generated through connected technology with clinically informed monitoring and escalation processes, helping aged care teams identify relevant changes in resident activity and translate those signals into appropriate clinical action.

Health Generation will lead sales, client relationship management and clinical delivery for CareGen, providing Talius with an additional route to market across the Australian aged care sector.

Talius will generate revenue from the supply and implementation of its technology together with recurring wholesale platform subscription revenue as CareGen deployments are secured.

Talius Managing Director and Chief Executive Officer, Pat Howard, said:

"What we like about this partnership is that it brings together two things that aged care providers really need – better insights on the resident and the clinical capability to act on it."

"Talius brings the technology and Health Generation brings deep clinical experience and strong relationships across the sector. Together, that gives us another practical route to market and a way to grow adoption of the Talius platform and recurring software revenue."

Health Generation Chief Executive Officer, Bianca McBride, said:

"Aged care teams are already dealing with huge amounts of information. The challenge is making sure the right information reaches the right people at the right time."

"CareGen combines Talius' real-time technology with our clinical expertise so providers can make better use of the signals they are already seeing and act on them in a more structured way."

Founded in 2018, Health Generation is an Australian aged care consulting and advisory practice supporting state-based and national providers across clinical operations, compliance, quality indicators, AN-ACC funding, training and clinical governance.

A summary of the Commercial Partnership Agreement's material terms is set out in Appendix A.

This announcement has been authorised for release by the Board of Directors of Talius Group Ltd.

About Talius Group Limited (ASX: TAL)

Talius provides a suite of technology enabled care solutions to the aged and disability sectors across multiple verticals, including retirement living, residential aged care, home, and community settings to improve the quality of life, later in life.

Talius' Software as a Service (SaaS) data analytics platform Talius Smart Care combines smart sensors with AI machine learning that delivers automated actions. Talius links awareness, analysis, and action through one platform allowing the care model to move from spot check care to sense-respond care. Nursing staff can switch their focus from data collection to building a human connection. Most importantly, residents benefit from a new era of autonomy and dignity.

Talius helps protect and connect our elderly and people with disabilities with a scalable healthcare technology platform integrated with leading third-party providers to ensure end-to-end solutions for Connected Health.

Appendix A - Material Terms of Commercial Partnership Agreement

Term	Summary
Parties	Talius Group Limited and Health Generation Pty Ltd.
Commencement	1 October 2026.
Initial term	12 months, with automatic renewal for successive 12-month periods unless notice of non-renewal is given in accordance with the agreement.
Combined offering	CareGen Intelligence, a co-branded aged care offering combining Talius technology with Health Generation's clinical intelligence layer.
Talius responsibilities	Supply of the Talius platform, hardware, installation, technical implementation, artificial intelligence and reporting layer and ongoing platform support.
Health Generation responsibilities	Clinical service delivery, at the level of service selected by each customer, including clinical protocols, monitoring rules, escalation pathways, registered nurse oversight, monitoring, triage and reporting. Health Generation will also lead client acquisition and relationship management where it is the contracting party.
Revenue model	Talius will receive revenue from the supply and implementation of its technology and recurring wholesale subscription payments from CareGen deployments. There is no guaranteed minimum revenue and financial contribution will depend on customer adoption.
Sales objective	Health Generation will use reasonable commercial endeavours to engage three customer sites and commission one pilot during the first measurement period, measured outside Talius' existing installed customer base.
Exclusivity	Health Generation is appointed Talius' exclusive clinical intelligence delivery partner for the CareGen combined offering in Australian aged care, subject to agreed carve-outs and performance conditions. Health Generation has reciprocal restrictions on using competing resident-monitoring technology for an equivalent bundled offering.
Talius standalone offering	The exclusivity arrangements apply to CareGen only. Talius remains able to market and sell its platform, hardware and related technology on a standalone basis.
Customer agreements	Health Generation will generally be the contracting party with customers for the combined offering unless otherwise agreed.
Termination / non-renewal	Subject to the notice, breach, performance and transition provisions contained in the agreement.
