

Data#3 guides to strong 1H FY27 earnings growth

BRISBANE, 1 October 2026: Australia's leading IT services and solutions provider, Data#3 Limited (ASX: DTL) announces that it has experienced a strong start to FY27, with gross sales and earnings ahead of expectations.

Gross Profit for the first half is expected to be more than 15% ahead of 1H FY26, and consolidated net profit before tax for the first half of FY27 is expected to be more than 40% up on the first half of FY26 profit before tax of \$33.5 million, which was impacted by the previously announced Microsoft incentive changes.

The final interim result remains subject to the execution and timing of forecast business through to 31 December 2026, completion of the interim accounts and audit review.

The first half result is expected to be positively impacted by some one-off, larger transactions, increased activity across Infrastructure and Software Solutions, and timing of planned investment spend. It also includes approximately \$1.5 million of interest income above expectation, driven by favourable cash flow timing in Q1 FY27.

Based on the first half performance, which includes the benefit of some significant and non-recurring items, in addition to current forecasts for the second half, net profit before tax is expected to be skewed to the first half for FY27. We expect to deliver sustained earnings growth for the full year as planned.

The Company will provide a business update at the upcoming 2026 AGM on 28 October 2026.

Data#3 expects to release its 1H FY27 results and announce the interim dividend on 22 February 2027.

Approved for distribution by the Data#3 Limited board.
