Supplementary Product Disclosure Statement

Betashares Capital Limited (**Betashares**) makes this announcement in relation to the following exchange traded fund quoted on the AQUA market of the ASX (**Fund**):

ASX Code	Fund
CLDD	Betashares Cloud Computing ETF

Betashares announces that it has issued a Supplementary Product Disclosure Statement dated 2 October 2026 (**SPDS**) for the Fund. The SPDS supplements the Product Disclosure Statement dated 12 February 2021.

The SPDS provides information about upcoming changes to Betashares Cloud Computing ETF (**CLDD**) that will take effect following the close of ASX trading on 4 November 2026 (**Effective Date**).

CLDD currently aims to track the performance of the Indxx Global Cloud Computing Index (**Index**), before taking into account fees and expenses. The Index provides exposure to companies in the cloud computing industry.

From the Effective Date, the Fund will commence tracking a new index, the Solactive Global Ex-Australia Software Index. This change is designed to capture developing opportunities in the broader technology sector. By moving from a cloud computing index to a broader global software index, the Fund will provide investors with more contemporary and diversified exposure to a wider portfolio of leading software companies operating in areas with potential for growth.

As a result, the Fund's name will change to Betashares Global Software Industry ETF.

The total management fees and costs of the Fund will remain unchanged at 0.67% p.a. of net asset value. From the Effective Date, these will be charged as a single management fee, with any expenses normally incurred in operating the Fund paid by the Responsible Entity out of its own resources.

There are otherwise no changes to CLDD's features.

The SPDS is attached and is also available at CLDD's product page at www.betashares.com.au.

2.1.3 About the Index

The index sponsor is Solactive AG ("Index Provider"), a leading global provider of index solutions.

To be eligible for initial inclusion in the Index, a security must meet certain criteria, including:

- Be listed in a developed market (ex Australia) or certain emerging markets (further described in the Index methodology)
- Be identified by the Index Provider as a company that designs and licenses computer software products.

Each security is weighted in the Index by its float adjusted market capitalisation, with a maximum weight of 10% per security (at each rebalance).

The Index holds a maximum of 50 securities at each rebalance.

The Index is rebalanced quarterly, normally as at the close of the first Wednesday in February, May, August and November.

The Index is a net total return index, which means that it reinvests cash dividends on the relevant ex-dividend date (the date on which the relevant shares no longer come attached with the right to receive the declared dividend) and adjusts for an Index security's country of incorporation withholding rate.

The nature and method of calculation of the Index may change from time to time.

Further information about the Index can be found on the Fund's product page at www.betashares.com.au.

Neither the Responsible Entity nor any other company in the Betashares group has any control over, or responsibility for, the composition, calculation or availability of the Index. The Index Provider is not a related company of the Responsible Entity.

Past performance information about the Index is available from various sources, including stockbrokers, financial information websites and major data providers such as Bloomberg or Reuters. Any past performance information about the Index does not take into account fees, costs or taxes that may be incurred as a result of investing in the Fund. Past performance of the Index is not a reliable guide to future performance of the Index or the Fund.

A listing of the Fund's portfolio holdings, updated daily, will be available at www.betashares.com.au.

For more information on recoverable expenses, please see section 3.3.3 in the "Additional Explanation of Fees and Costs" section below.

² This figure reflects the indirect costs incurred by the Fund for the previous financial year ended 30 June 2026. For more information on the calculation of indirect costs, see "Indirect costs" in the "Additional Explanation of Fees and Costs" section below.

³ This figure reflects the estimated transaction costs incurred by the Fund for the previous financial year ended 30 June 2026 and may include the Responsible Entity's reasonable estimates where the Responsible Entity was unable to determine the exact amount or information was not available at the date of this PDS. This estimate is net of transaction costs for which the Responsible Entity reimburses the Fund out of the application and redemption fees it receives from Authorised Participants, as described in section 3.3.6. For more information on transaction costs and the application and redemption fees payable by Authorised Participants, see "Transaction costs" and "Application and redemption fees for Authorised Participants" in the "Additional Explanation of Fees and Costs" section below.

⁴ In-kind applications and redemptions are only available if agreed by the Responsible Entity. Additional contribution and withdrawal fees may apply in the case of a cash application or redemption as agreed with the Responsible Entity from time to time.

⁵ An Authorised Participant is a participant in relation to a financial market (or which has engaged a participant to act on its behalf) which has entered into an agreement with the Responsible Entity in relation to Unit applications and redemptions. For an explanation of the contribution fees and withdrawal fees (also referred to in this PDS as application fees and redemption fees) please see section 3.3.6 "Application and Redemption Fees for Authorised Participants" in the "Additional Explanation of Fees and Costs" section below. Unitholders who are not Authorised Participants may be charged a redemption fee if they redeem Units pursuant to their right to redeem in the special circumstances described in section 5.6 - see "Additional Explanation of Fees and Costs" section below for more information.

⁶ While the Fund does not charge a buy-sell spread, as it is traded on a securities exchange, investors may incur a bid-offer spread when trading on the exchange.

Certain additional costs may apply. See the "Additional Explanation of Fees and Costs" section below for more information.

Each fee set out in this table may in some cases be negotiated with wholesale clients. For more information, refer to the explanation of "Differential fees, rebates and related payments" in the "Additional Explanation of Fees and Costs" section below.

All fees and costs in the table above include Goods and Services Tax (GST) net of any reduced input tax credits and any applicable stamp duty and are shown without any other adjustment in relation to any tax deduction available to the Responsible Entity or the extent to which any tax deduction may be passed on to unitholders.

Section 3.2 is deleted and replaced with the following:

⁶ Assumes the \$50,000 is invested for the entire year and the \$5,000 investment occurs on the last day of the year and therefore the fees and costs in this example are calculated using the \$50,000 balance only.

Section 3.3 "Additional Explanation of Fees and Costs"

Sub-sections 3.3.3, 3.3.4 and 3.3.5 are deleted and replaced with the following:

3.3.3 Recoverable expenses

The recoverable expenses represent the operating expenses incurred in the operation of the Fund. The Fund's Constitution allows all properly incurred expenses to be recovered from the Fund and does not place any limit on the amount or types of expenses that can be recovered.

The expenses normally incurred in the day to day operation of the Fund include custodian, fund administration, unit registry, ASX and audit costs (other than transaction costs described above). These expenses normally incurred and charged to the Fund will be paid by the Responsible Entity out of its own resources while this PDS is current. The Responsible Entity may withdraw or replace this PDS at any time.

The estimated recoverable expenses incurred by the Fund for the previous financial year ended 30 June 2026 were 0.10%. The recoverable expenses normally incurred by the Fund that will apply for the current financial year (adjusted to reflect a 12 month period) will be 0.00% p.a. of the Fund's Net Asset Value, as these expenses will be paid out of the Responsible Entity's own resources as and when they arise.

Extraordinary expenses are expenses that are not normally incurred in the day to day operation of the Fund and are not necessarily incurred in any given year. They may include costs associated with holding unitholder meetings, changing the Fund's constitution, or defending or pursuing legal proceedings. Extraordinary expenses will not be paid out of the Responsible Entity's own resources. Any such expenses will be recovered from the Fund and reflected in its Net Asset Value per Unit. The Responsible Entity, as at the date of this PDS, reasonably estimates that the extraordinary expenses of the Fund that will apply for the current financial year (adjusted to reflect a 12 month period) will be nil.

3.3.4 Indirect costs

Indirect costs are any amounts that we know or where required, reasonably estimate, will reduce a Fund's returns that are paid from the Fund's assets (other than the management fee, recoverable expenses, and transaction costs described elsewhere in this section) or that are paid from the assets of any interposed vehicle (such as an underlying fund) in which the Fund may invest.

The management fees and costs figure disclosed in Table 3.1 includes indirect costs of nil, which is the Responsible Entity's estimate of the amount incurred by the Fund for the previous financial year ended 30 June 2026.

3.3.5 Transaction costs

The Fund incurs transaction costs, such as brokerage, clearing costs, transactional custodian fees, and other transaction fees associated with buying and selling the Fund's assets. Transaction costs are an additional cost to investors and are not included in the management fees and costs shown in Table 3.1.

Transaction costs reduce the Fund's Net Asset Value. How and when they are paid varies depending on the type of transaction cost. Certain costs, eg brokerage, are added to or deducted from the amounts payable from the Fund's assets or receivable by the Fund at the time of settlement in respect of investments purchased or sold for the Fund. Other costs, eg transactional custodian fees, are invoiced and paid from the Fund's assets according to a regular monthly or quarterly cycle.

The Responsible Entity, as at the date of this PDS, reasonably estimates that the net transaction costs of the Fund for the current financial year (adjusted to reflect a 12 month period) will be approximately 0.02% p.a. of the Fund's Net Asset Value or \$10 for every \$50,000 you have in the Fund. These net transaction costs represent estimated total gross transaction costs of 0.04% p.a. minus the estimated transaction costs for which the Responsible Entity reimburses the Fund out of the application and redemption fees it receives, as described in section 3.3.6. These net transaction costs are borne by the Fund.

The transaction costs estimate shown in the fees and costs summary in Table 3.1 is shown net of any amount for which the Responsible Entity reimburses the Fund out of the application and redemption fees it receives from Authorised Participants.

The amount of these costs can be expected to vary from year to year depending on the volume and value of transactions undertaken.

4 Risks

Section 4.3 is deleted and replaced with:

4.3 Technology sector risk

Software-focused companies face intense competition and rapid technological change, which may result in short product cycles and the rapid obsolescence of the products and services they develop and commercialise. These companies are often heavily dependent on intellectual property rights and may be adversely affected by the loss, impairment or infringement of those rights. There can be no assurance that software-focused companies will be able to adequately protect their intellectual property from misappropriation or that competitors, domestically or internationally, will not develop products or services that are substantially similar or superior, or that can be offered at lower cost.

The share prices of software-focused companies may fluctuate significantly due to competitive pressures, changing customer demand, aggressive pricing, rapid technological developments, short product cycles, limited addressable markets, talent and resourcing constraints, and significant research and development expenditure on products or services that may not achieve commercial success.

In addition, many software-focused companies collect, process and store significant volumes of sensitive data and may be targets of cybersecurity incidents, data breaches or other malicious attacks. Such events may result in financial loss, reputational damage, litigation, regulatory action or operational disruption. Software-focused companies may also be particularly affected by changes in laws and regulations relating to privacy, data protection, cybersecurity, artificial intelligence and the use of data.

Section 4.7 is deleted and replaced with:

4.7 Concentration risk

A significant percentage of the Fund's Index will comprise of securities exposed to the software industry sectors. Additionally, a significant percentage of the Fund's underlying Index may be comprised of securities from a small group of countries. The Fund has material exposure to the US.

At times, the software industry and countries the Fund has material exposure to may underperform other industries/countries, causing a greater impact on the value of the Fund's Units than would be the case if the Index were more broadly diversified over numerous industry sectors/countries.

6 Additional Information

In section 6.3, the reference in the first row to Indxx, LLC is replaced with Solactive AG.

In section 6.9, the third paragraph is deleted and replaced with:

The Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the Fund. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the Fund constitutes a recommendation by Solactive AG to invest capital in the Fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in the Fund.
