

2 October 2026

CFO APPOINTMENT

Mach7 Technologies Limited (“Mach7” or the “Company”) (ASX: M7T), a healthcare software company providing a broad set of enterprise imaging solutions for modern, AI-enabled healthcare environments, today announces the appointment of Interim Chief Financial Officer Shawni Hadfield as CFO, effective immediately.

Shawni Hadfield has been appointed CFO after acting in the role since May 2026. Ms Hadfield is a senior finance leader with prior CFO experience and deep expertise across SaaS financial management, capital markets, restructuring and business operations. Having led both finance and operations, she brings a whole-of-business perspective that extends well beyond finance, with a practical focus on optimising performance and commercial outcomes. She has a strong track record of helping scale high-growth SaaS businesses, accelerating Annual Recurring Revenue (ARR), improving profitability and building robust finance and operational capability within lean organisations.

Mach7 CEO and Managing Director Teri Thomas said: “Since joining Mach7 as VP Commercial Excellence in late 2025, Shawni has made a significant contribution to the business. Functioning in the Interim CFO role, she has demonstrated her strategic abilities, strengthened the connection between the sales, support and finance functions and provided continuity and disciplined execution across the Company’s financial and operational activities. Shawni has played an important role in shaping strategic priorities and supporting their translation into clear operational metrics and actions. I look forward to working closely with her as we execute Mach7’s next phase of sustainable growth.”

Released on authority of the Board.

About Mach7 Technologies

Mach7 Technologies (ASX: M7T) provides enterprise imaging software that helps healthcare organizations manage, access and share diagnostic imaging data across complex environments. The Mach7 platform includes a Vendor Neutral Archive (VNA), the eUnity Enterprise Diagnostic Viewer and an expanding suite of Flamingo modules, expanding capabilities across workflow, interoperability and data management to support a more complete view of the patient record. Together, these capabilities help healthcare organizations build a unified, longitudinal patient record that integrates diagnostic imaging with broader clinical data. Designed for interoperability and scale, Mach7 is increasingly aligned with leading cloud ecosystems such as

Amazon Web Services (AWS) and Oracle Cloud Infrastructure (OCI), helping customers modernize imaging infrastructure and prepare for AI-enabled clinical workflows. Mach7 serves healthcare organizations worldwide, including integrated delivery networks, national health systems and specialist imaging providers. Visit mach7t.com for more information.
