archTIS Secures Additional A\$315,000 U.S. Department of Defense Services Contract and Provides Enterprise License Update

HIGHLIGHTS

- **archTIS has been awarded a further A\$315,000 services contract by the U.S. Department of Defense ("DoD") to accelerate NC Protect Roadmap features.**
- **This is the second DoD-funded development contract for NC Protect, following the A\$235,000 contract announced in October 2025 and completed in January 2026.**
- **Enterprise licensing negotiations continue to progress. The Company remains confident of successfully executing a licensing contract. Timing is subject to negotiations between Copper River, Third party Integrators and the US DoD.**
- **The additional services award reflects the DoD's continued investment in NC Protect ahead of the enterprise license but is not required for a license award.**

archTIS Limited (ASX:AR9, OTCQB:ARHLF) ("archTIS" or the "Company"), a global provider of data-centric security solutions for the secure collaboration of sensitive information, is pleased to announce a further A\$315,000 services contract from the U.S. Department of Defense, contracted through Copper River Technologies ("Copper River"), and to provide an update on the Company's enterprise licensing opportunity with the DoD.

Daniel Lai, archTIS Managing Director and CEO, stated: *"Given the recent close of the US DoD fiscal year, I wanted to maintain full transparency and update the market on the continued progress, expansion, and support of our US DoD opportunity. The newly issued development work is not required for initial deployment of an enterprise license, however, is seen as desirable functionality across the warfighter network. That is a clear signal of intent. This along with our participation in negotiations gives us confidence that we will execute a licensing agreement. The remaining step is agreement on how the partners of the US DoD handle delivery, which is a normal part of a deployment at this scale."*

Services contract

The A\$315,000 contract funds development work to continue and accelerate delivery of key NC Protect functionality specified by the DoD for enterprise-scale deployment, including, at a high level, performance at scale within Azure environments, policy administration, and expanded reporting. Work commences immediately. The contract is fixed-price, with revenue to be recognized in FY27 as work is delivered. The contract contains a standard U.S. government termination for convenience clause and no other material conditions.

Enterprise license update and expansion

Negotiations for an enterprise license of NC Protect across the DoD's classified and now unclassified Microsoft 365 environments are progressing. The Company now expects execution this quarter. The revised timing reflects the need to finalize delivery arrangements between Copper River, as contract holder, and the prime systems integrator responsible for the DoD's Microsoft 365 environment. No negative changes have been made to the scope of the opportunity.

No binding enterprise license agreement has been executed. The Company will inform the market in accordance with its continuous disclosure obligations.
