Principal Activity

The principal activities of the Group during the financial year were mineral exploration and evaluation.

Operating Results

The Company reported a net loss of \$1,863,018 for the financial year (2025: \$4,161,753 loss).

Included in this amount is reversal of the impairment of exploration expenditure of \$21,559 (2025: impairment expense of \$2,302,927), share based payment expenses of \$165,598 (2025: \$191,207) and project due diligence expenses of \$196,229 (2025: \$178,717).

Dividends Paid or Recommended

The directors do not recommend the payment of a dividend and no amount has been paid or declared by way of a dividend to the date of this report.

Significant Change in State of Affairs

During the year there were no significant changes in the state of affairs of the Group other than as disclosed in this report or in the financial report.

Events Since the end of the Financial Year

On 4 July 2026, a total of 8,000,000 performance rights lapsed unvested.

On 2 October 2026, the Company entered into a Convertible Loan Agreement with an unrelated investor. Under the terms of the agreement, the lender has provided funding of \$350,000 to the Company of which \$297,000 has been received in cash at the time of lodging these accounts. The loan is unsecured and bears interest at 8% per annum. Subject to receipt of shareholder approval, the loan will convert at the election of the lenders into shares at a 50% discount to the share issue price in relation to the Company's next placement or rights issue completed after entering into the agreement provided that the conversion price must not be less than A\$0.0005 per Share. If shareholder approval is not received within 6 months from entering into the agreement the loan (including accrued interest) is to be repaid in cash. The Convertible Loan Agreement is also conditional upon the Company completing a placement or rights issue and the Company holding cash of not less than \$1,000,000 following completion of the placement or rights issue.

On 2 October 2026, the Company entered into a Deed of Variation with Goldshore Investments Pty Ltd to extend the repayment date of all amounts owing to them to 31 December 2027. On the same day, the Company entered into a Deed of Variation with European Lithium Ltd extending the due date for amounts owing to them to 31 December 2027.

On 5 October 2026, the Company entered into a second deed of variation with Galo Capital Limited (Galo) regarding the deferred project acquisition payment term for the payment of US\$320,000 which was due on or before 22 September 2026. The parties agreed that US\$50,000 is to be paid by 5 October 2026 and the balance of US\$270,000 is to be paid on or before 31 January 2027. The Company subsequently made payment of US\$50,000 to Galo on 5 October 2026.

No other matters or circumstances have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the Company, the results of those operations or the state of affairs of the Company in financial years subsequent to 30 June 2026.

Environmental Regulations

The Company is aware of its environmental obligations with regards to its exploration activities and ensures that it complies with all regulations when carrying out any exploration work.

Likely Developments and Expected Results

Disclosure of information regarding likely developments in the operations of the Company in future financial years and the expected results of those operations is likely to result in unreasonable prejudice to the Company. Therefore, this information has not been presented in this report.

Review of Operations

Projects

Tanzanian Uranium Projects

The Manyoni Uranium Project tenements are located in the Republic of Tanzania (pop. 65 million), Africa, approximately 100km northwest of the capital city of Dodoma (pop. 765,000). The location of the uranium project at Manyoni is shown in Figures 1 and 2.

Upgrade of MRE to JORC 2012 Compliance

Following the completion of an extensive core drilling program in 2024, together with the acquisition of supporting geotechnical data, Moab has upgraded the historical Mineral Resource Estimate (“MRE”) to JORC Code (2012) compliance. This upgrade was announced to the ASX on 23 September 2025. Snowden Optiro was responsible for preparing the updated MRE.

New Mineral Resource Estimate

Snowden Optiro has prepared an updated classified Mineral Resource Estimate using information supplied by Moab. The MRE covers the extents of the **Area A and Area C1** mineralised zones (Figure 3) and includes deeper mineralisation in Area A extending to approximately **10 metres below surface**.

This deeper mineralisation has been classified as **Inferred**, reflecting the lower level of geological confidence and reduced data density relative to the near-surface mineralisation. Drilling has not yet closed off the deeper mineralisation.

Deposit	Classification	Cut-off	Tonnes	Grade	Metal
		U308 ppm	Mt	U308 ppm	U308 Mlbs
A	Indicated	100	10.24	156	3.52

Metallurgical Testwork

A program of metallurgical testwork is planned to be done in Australia and is being expanded from an initial mineralogy and physical characterisation study to include preliminary U3O8 leach tests. This preliminary work is intended to guide a more comprehensive program of testwork that utilises the metallurgical samples collected from the 2024 drill program. The results of this work will help to guide future drilling into areas where U3O8 metallurgical recovery is optimal.

Project Status

The Company plans to undertake mineralogical test work on core samples as part of a broader metallurgical testwork program, aimed at identifying an appropriate beneficiation pathway. The outcomes of this work are expected to inform the potential development strategy for the project.

Following completion of metallurgical testwork the Company intends to undertake a Scoping Study.

AuKing Tenements

The Company has expanded the tenement holding at Manyoni with the acquisition of four additional prospecting licenses from AuKing Ltd (refer ASX announcements dated 16 October 2024 and 25 March 2025). These tenements host known uranium prospects, previously drilled by Uranex Ltd (refer Fig 3 prospects E, F and G).

The extent of historic drilling in the four recently acquired tenements is shown in figure 3. This drilling was focussed on a series of palaeochannels which are part of a broader northwest trending palaeo-drainage system in central Tanzania that is prospective for palaeochannel uranium deposits. On 30 June 2010 Uranex NL, the tenement owner at that time, announced pre-JORC 2012 Mineral Resource estimates for prospects E, F and G (refer ASX announcement dated 12 March 2024).

Moab believes that acquisition of the AuKing tenements enhances the potential to define additional uranium resources through a program of step-out and validation drilling, similar to the program completed at Manyoni in 2024.

Octavo

The Octavo tenement located in southern Tanzania, 30kms northwest of Rosatom's Nyota uranium deposit was relinquished in July 2025.

REX Uranium-Vanadium Project

Moab relinquished the REX Uranium-Vanadium Project on 1 September 2025.

Highline Copper-Cobalt Project (Moab 100% interest)

The Highline Copper-Cobalt Project is located within the Goodsprings Mining District, in the Clark County of Nevada, USA.

Historically, copper and cobalt mineralisation has been mined at the Highline Mine principally from an adit measuring 300 ft in length and an associated winze and stope (Source: Moab Prospectus dated 23 June 2022). Production from the mine totalled 447 tons of copper ore at about 35% Cu, the highest in the district.

The Company continues to evaluate available project data to identify additional exploration opportunities, including assessing the potential consolidation of its tenement position in the area.

Project Acquisitions

On 9 October 2025 the Company announced the proposed acquisition of an interest in the Sasare Copper Gold Project in Zambia via the acquisition of 100% of Imbas Mining Pty Ltd which owns the right to acquire 80% of the Sasare Copper and Gold Project. On 28 January 2026, the Company announced that it would not be proceeding with the acquisition as a result of the Company not being satisfied with the outcome of its due diligence investigations.

In addition to advancing the Company's uranium interests at Manyoni in Tanzania Moab maintains an active project acquisition strategy focusing on gold and energy metals opportunities in Africa and Western Australia. A number of potential projects were investigated during the year.

CAA Mining (Moab 9.06% interest)

Moab holds 2,727,273 fully paid shares in CAA Mining Limited (**CAA Mining**). CAA Mining is an unlisted UK-incorporated exploration and development company focused on lithium and gold in Ghana, Africa. The Company continues to monitor its investment in CAA Mining.

Competent Person

The information in this report regarding Tanzanian, USA and Western Australian Projects as it relates to exploration results and geology was compiled by Mr Geoff Balfe who is a Member of the Australasian Institute of Mining and Metallurgy and a Certified Professional.

Mr Balfe is a consultant to Moab Minerals Limited. Mr Balfe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Balfe consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Corporate

Shareholder Meetings

On 25 November 2025, the Company held its annual general meeting (**AGM**) of shareholders. All resolutions were carried at the AGM.

Placement

On 10 July 2025, the Company completed a placement of 141,000,000 ordinary shares with existing shareholder European Lithium Ltd (ASX: EUR) to raise funds of \$141,000 (**Placement**).

Loan

On 10 July 2025, the Company announced that it had entered into a short-term loan with European Lithium Ltd (ASX: EUR) for \$500,000. The loan is unsecured and accrues interest at 10% per annum and is repayable on 1 February 2027. On 8 December 2025, the Company announced that it had entered into a second short-term loan with EUR for \$600,000. The loan is unsecured and accrues interest at 10% per annum and is repayable on 4 December 2026. On 4 May 2026, the Company entered into a third short-term loan with EUR for \$200,000. The loan is unsecured and accrues interest at 10% per annum and is repayable on 31 December 2027. As at 30 June 2026, the balance owing to EUR is \$1,300,000 plus accrued interest.

Security Movements

On 11 July 2025, the Company issued 141,000,000 shares to EUR in respect to the Placement.

On 9 September 2025 a total of 19,999,994 unlisted options (\$0.03 each) expired unexercised.

On 21 September 2025, a total of 64,000,006 unlisted options (\$0.03 each) expired unexercised.

On 4 November 2025, the Company issued 132,851,178 shares upon the vesting of performance rights (refer to ASX announcement released 23 September 2025 for the published MRE).

On 2 December 2025, the Company issued 41,666,666 unlisted options (\$0.008 each expiring 5 December 2027) to Goldshore Investments Pty Ltd as resolved at the AGM. On the same day, the Company issued 2,046,279 unlisted options (\$0.016 each expiring 4 July 2027) and 16,370,236 performance rights (subject to vesting conditions) to the vendors who facilitated the Linx transaction following receipt of approval at the AGM. On the same day, the Company issued 8,185,118 fully paid shares upon the vesting of 8,185,118 performance rights.

Key Risks

The business, assets and operations of the Company are subject to certain risk factors that have the potential to influence the operating and financial performance of the Company in the future. The Board aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of these risks are, however, highly unpredictable and the extent to which the Board can effectively manage them is limited.

A summary of the key risk areas of the Company are listed below:

- Future capital requirements and associated dilution risk
- Accessibility risk including land access and compensation, tenement title, native title, private land considerations
- Exploration and development risk including no defined resources, resource estimates, results of studies, metallurgy consideration

- Operational risks including loss of key personnel, reliance on agents and contractors, environmental risks, regulatory compliance
- Macro risks including climate risk, downturn in the resources industry, commodity prices and demand, Ukraine conflict
- Other risks including new project acquisition and royalties

Further details on the above risks can be found in the prospectus the Company lodged with ASIC and the ASX dated 23 June 2022 and the cleansing prospectus the Company lodged with ASX dated 9 July 2024.

Remuneration Report (Audited)

This report details the nature and amount of remuneration for each key management person of the Company in accordance with the requirements of the Corporations Act 2001 and its regulations. The information provided in this remuneration report has been audited as required by Section 308(3c) of the *Corporations Act 2001*.

The remuneration report is set out under the following main headings:

- A Remuneration Policy
- B Details of remuneration
- C Equity Instrument disclosures relating to key management personnel
- D Other related party transactions
- E Employment contracts of key management personnel

A Remuneration Policy

The performance of the Company depends upon the quality of its directors and executives. To prosper, the Group must attract, motivate and retain appropriately skilled directors and executives. To this end, the Group embodies the following principles in its remuneration framework:

- Provide competitive rewards to attract high caliber directors and executives;
- Establish appropriate performance hurdles against which performance is measured in arriving at executive's remuneration levels;
- Align the interests of executives with those of shareholders; and
- Ensure total remuneration is competitive by market standards.

Remuneration Committee

The Board of Directors is responsible for reviewing and recommending compensation arrangements of directors, the managing director and the executive team and no separate remuneration committee has been appointed.

The Board assesses the appropriateness of the nature and amount of emoluments of such officers on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high-quality board and executive team.

Non-Executive Director Remuneration

It is the Board's policy to remunerate Non-Executive Directors at market rates for comparable companies for time, commitment and responsibilities.

The Company's constitution and the ASX Listing Rules specify that the aggregate remuneration of non-executive directors shall be determined from time to time by a general meeting. An amount not exceeding the amount determined is then divided between the directors as agreed. The latest determination was at the Annual General Meeting held on 28 November 2006 when shareholders approved an aggregate remuneration of \$300,000 per annum. The amount of aggregate remuneration sought to be approved by shareholders and the manner in which it is apportioned amongst directors is reviewed from time to time.

Non-executive directors are normally remunerated by way of fees in the form of cash. Non-executive directors may also be issued options or performance rights (subject to performance criteria if appropriate) from time to time as approved by shareholders in general

DIRECTORS' REPORT

meeting.

Executive Remuneration

Managing Directors' services are provided to the Company on a consultancy basis with remuneration and terms stipulated in individual consultancy agreements.

Executive remuneration and other terms of engagement are reviewed by the Board as required having regard to the performance, relevant comparative information and expert advice (if required).

The Board's remuneration policy attempts to align executive remuneration with shareholder interests and to retain appropriately qualified executive talent for the benefit of the Company. The main principles of the policy are:

- Remuneration reflects the competitive market in which the Company operates,
- Individual remuneration should be linked to performance criteria if appropriate, and
- Executives should be rewarded for both financial and non-financial performance.

Additional Information

There is a link between variable remuneration of executives and Group performance. The Group performance over the past 5 years is as follows:

Year ended 30 June	2026 \$'000	2025 \$'000	2024 \$'000	2023 \$'000	2022 \$'000
Net loss attributable to equity holders of the parent	(1,929)	(4,161)	(1,288)	(6,376)	(459)
Closing share price	\$0.0015	\$0.001	\$0.003	\$0.013	\$0.011

Voting and comments made at the Company's 2025 Annual General Meeting

The Company's remuneration report for the 2025 financial year was approved at the Annual General Meeting (**AGM**) of Shareholders. The Company did not receive any specific feedback at the AGM or throughout the year on its remuneration practices.

B Details of Remuneration

The remuneration report details the remuneration arrangements for those persons having authority and responsibility for planning, directing and controlling the major activities of the Company and the Group, directly or indirectly, including any director (whether executive or otherwise) of the Company.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The financial report of Moab Minerals Limited (**Moab** or the **Company**) and its controlled entities (together the **Group**) for the financial year ended 30 June 2026 was authorised for issue in accordance with a resolution of the directors on 5 October 2026.

Moab is a public company incorporated in Australia whose shares are publicly traded on the Australian Securities Exchange. The Company's registered office and principal place of business is Level 1, 2A/300 Fitzgerald Street, North Perth, Western Australia, 6006. The nature of the operations and principal activities of the Group are described in the Directors' Report.

1. SUMMARY OF MATERIAL ACCOUNTING POLICIES

a) Basis of preparation

The financial statements are general purpose financial statements prepared in accordance with the requirements of the *Corporations Act 2001*, and Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards (**AIFRS**). Compliance with AIFRS ensures that the financial report, comprising the financial statements and notes thereto, complies with International Financial Reporting Standards (**IFRS**). The Company is a for-profit entity for the purpose of preparing the financial statements.

The financial report has been prepared on a historical cost basis, except for the revaluation of certain financial instruments to fair value. Cost is based on the fair value of the consideration given in exchange for assets. The Company is domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

The accounting policies set out below have been applied consistently to all periods presented in the financial report except where stated.

b) Going Concern

The consolidated financial statements of the Group have been prepared on a going concern basis which contemplates the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

For the year ended 30 June 2026 the Group incurred a loss after income tax of \$1,863,018 (30 June 2025: \$4,161,753) and net cash outflows from operating activities of \$721,737 (30 June 2025: \$1,144,114), the Group had a working capital deficit of \$2,559,321 (30 June 2025: \$1,215,777 deficit) with cash on hand of \$166,424 (30 June 2025: \$94,378).

As at the date of lodging this report, the Group had cash on hand of approximately \$228k (after making payment of US\$50,000 to Galo and noting that \$53k additional funding is expected to be received in respect to the convertible loan note entered into on 2 October 2026). The Group has no means of generating revenue and has no current available borrowing facilities. Our current liquidity resources raise substantial doubt about our ability to continue as a going concern unless we raise additional capital to meet our obligations in the near term.

The Group's ability to continue as a going concern and to continue to fund its planned activities is dependent on various initiatives, including raising further capital, continued support from related party creditors and reducing operational costs.

If these initiatives are not achieved, this will indicate a material uncertainty that may cast significant doubt about the Group's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business. The financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or liabilities that might be necessary should the Group not continue as a going concern.

The Directors believe that it is reasonably foreseeable that the Group will continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report after consideration of the following factors:

- The Group requires additional capital for its next phase and continues to seek funding options which it is confident it will obtain;
- As set out in Note 24, subsequent to balance date, the Company has entered into a Convertible Note Agreement with an unrelated investor that will provide funding of \$350,000 to the Company;
- The Company has reached agreement with numerous creditors to defer payment of outstanding amounts until such time as the Group has sufficient funds to do so;

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- As set out in Note 9, Goldshore Investments Pty Ltd and European Lithium Ltd have agreed to extend the due dates for repayment of all amounts owing to them to 31 December 2027; and
- Ability to realise certain of the Group's financial assets through the sale of its unlisted shares.

c) Principles of Consolidation

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases. A list of controlled entities is contained in Note 21 to the financial statements.

All inter-group balances and transactions between entities in the Group, including any unrealised profits or losses, have been eliminated on consolidation. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with those adopted by the Parent Entity.

d) Adoption of new and revised standards

Standards and Interpretations applicable to 30 June 2026

In the year ended 30 June 2026, the Directors have reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to the Company and effective for the reporting periods beginning on or after 1 July 2024. As a result of this review, the Directors have applied all new and amended Standards and Interpretations that were effective as at 1 July 2025 with no material impact on the amounts or disclosures included in the financial report.

New accounting Standards and Interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2026 reporting periods and have not been early adopted by the Group.

Title	Summary of expected impact on the Group	Application date of standard	Application date for the Group
AASB 18 Presentation and Disclosure of Financial Statements	The amendments is to improve the comparability of financial performance between entities including: ▪ Income and expenses must be classified in the statement of profit or loss into one of five categories – investing, financing, income taxes, discontinued operations and operating (this is a residual category if income and expenses are not classified into any of the other categories) ▪ Two new mandatory subtotals – operating profit or loss, and profit or loss before financing and income taxes ▪ Strict rules for labelling, aggregation and disaggregation of items in the financial statements ▪ New disclosures about management-defined performance measures ▪ Amendments to the presentation requirements for interest income and expenses, and dividend income in the statement of cash flows.	1 January 2027	1 January 2027

There are no other standards that are not yet effective and that would be expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions.

e) Operating segments

An operating segment is a component of an entity that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity), whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available. Management will also consider other factors in determining operating segments such as the existence of a line manager and the level of segment

information presented to the board of directors.

Operating segments have been identified based on the information provided to the chief operating decision makers – being the executive management team.

Operating segments that meet the quantitative criteria as prescribed by AASB 8 are reported separately. However, an operating segment that does not meet the quantitative criteria is still reported separately where information about the segment would be useful to users of the financial statements.

f) Foreign currency translation

Foreign currency transactions and balances

All foreign currency transactions occurring during the financial year are recognised at the exchange rate in effect at the date of the transaction. Foreign currency monetary items at reporting date are translated at the exchange rate existing at reporting date. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined.

Exchange differences are recognised in the profit or loss in the period in which they arise except those exchange differences which relate to assets under construction for future productive use which are included in the cost of those assets where they are regarded as an adjustment to interest costs on foreign currency borrowings.

Functional and presentation currency

Items included in the financial statements of each of the companies within the Group are measured using the currency of the primary economic environment in which they operate (the functional currency). The consolidated financial statements are presented in Australian dollars, which is the Company's functional and presentation currency.

Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- income and expenses for each statement of profit or loss and other comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities are recognised in other comprehensive income. When a foreign operation is sold, a proportionate share of such exchange differences is reclassified to profit or loss, as part of the gain or loss on sale where applicable.

g) Cash and cash equivalents

Cash and short-term deposits in the statement of financial position comprise cash at bank and in hand and short-term deposits with a maturity of three months or less. For the purposes of the Statement of Cash Flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

h) Trade and other receivables

Other receivables

These amounts generally arise from transactions outside the usual operating activities of the Group. They do not contain impaired assets and are not past due. Based on the credit history, it is expected that these other balances will be received when

due.

Impairment of trade receivables and other debtors

Collectability and impairment of trade receivables and other receivables are assessed on an ongoing basis. The Group applies a simplified approach in calculating forward-looking expected credit losses (ECLs). Therefore, the Group does not track changes in credit risk but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to customers and the economic climate.

i) Investments and other financial assets

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under AASB 15.

In order for a financial asset (debt instrument) to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Financial assets at fair value through other comprehensive income

For equity investments at "fair value through other comprehensive income", gains or losses arising from changes in fair value are recognised in other comprehensive income, until the security is disposed of, at which time the cumulative gain or loss previously recognised in other comprehensive income is transferred to accumulated losses and is not recycled through profit or loss.

Impairments in debt securities are recognised based on management's expectation of losses in each investment ("expected credit loss" model).

All equity investments must be measured at fair value under AASB 9.

j) Trade and other payables

Trade payables and other payables are initially recognised at fair value and subsequently carried at amortised cost and represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid. They arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services.

k) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can

be made of the amount of the obligation.

When the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability.

When discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost.

l) Employee leave benefits

Wages, salaries, sick leave and other short term benefits

Liabilities for wages and salaries, including non-monetary benefits, accumulating sick leave and other short term benefits due to be settled within 12 months of the reporting date are recognised in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled.

Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date.

Consideration is given to expected future wage and salary levels, experience of employee departures, and periods of service. Expected future payments are discounted using market yields at the reporting date on high quality corporate bonds with terms to maturity and currencies that match, as closely as possible, the estimated future cash outflows.

m) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

n) Revenue recognition

Interest income

Revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

o) Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

p) Earnings/(loss) per share

Basic earnings/(loss) per share is calculated as net result attributable to members of the Parent, adjusted to exclude any costs of servicing equity (other than dividends) and preference share dividends, divided by the weighted average number of ordinary shares, adjusted for any bonus element.

Diluted earnings/(loss) per share is calculated as net result attributable to members of the Parent, adjusted for:

- costs of servicing equity (other than dividends);
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- other non-discretionary changes in revenues or expenses during the period that would result from the dilution of potential ordinary shares; divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

q) Exploration and evaluation expenditure

Expenditure on acquisition, exploration and evaluation relating to an area of interest is carried forward at cost where rights to tenure of the area of interest are current and:

- it is expected that expenditure will be recouped through successful development and exploitation of the area of interest or alternatively by its sale and/or
- exploration and evaluation activities are continuing in an area of interest but at reporting date have not yet reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest. Where uncertainty exists as to the future viability of certain areas, the value of the area of interest is written off to the profit and loss or provided against.

Impairment

The carrying value of capitalised exploration and evaluation expenditure is assessed for impairment regularly and if after expenditure is capitalised, information becomes available suggesting that the recovery of expenditure is unlikely or that the Group no longer holds tenure, the relevant capitalised amount is written off to the profit or loss in the period when the new information becomes available.

r) Share-based payment transactions

The Group provides benefits to its employees, consultants and brokers, whereby, at the discretion of the Board, these personnel are from time to time issued with share purchase options as part of their total remuneration package and/or render services in exchange for rights over shares.

The cost of these share-based payments is measured by reference to the fair value of the equity instruments at the date at which they are granted using a Black-Scholes pricing model. The equity instruments are generally subject to performance and/or service vesting conditions and their fair value is recognised as an expense, together with a corresponding increase in other reserve equity over the vesting period, ending on the date on which the relevant employees become fully entitled to the award (the vesting date). No expense is recognised for equity instruments that do not ultimately vest because of non-market performance or service conditions have not been met. Any market vesting conditions are considered as part of the fair value.

The dilutive effect, if any, of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

s) Significant accounting estimates and judgements

In applying the Group's accounting policies management continually evaluates judgments, estimates and assumptions based on experience, including expectations of future events that may have an impact on the Group. All judgments, estimates and assumptions made are believed to be reasonable based on the most current set of circumstances available to management. Actual results may differ from the judgments, estimates and assumptions.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Significant judgments, estimates and assumptions made by management in the preparation of these financial statements are outlined below:

Share-based Payment Transactions

The Company measures the cost of equity-settled transactions by reference to the fair value of the equity instruments at the date at which they are granted. The fair value of unlisted equity-settled share options granted is determined using a Black-Scholes option pricing model taking into account the terms and conditions upon which the instruments were granted. The fair value of listed equity-settled share options granted is based on the fair value of performance rights granted with non-market vesting conditions is valued on the Company's share price at the grant date.

Exploration and Evaluation Assets

The Group's accounting policy for exploration and evaluation assets is set out in Note 1(q). The application of this policy requires management to make certain judgements and estimates as to future events and circumstances the assessment of whether economic quantities of reserves have been found and the point at which exploration and evaluation assets should be transferred to mine development properties. The determination of an area of interest also requires judgement.

Deferred Taxes

Potential future income tax benefits have not been brought to account at 30 June 2026 because the Directors do not believe that it is appropriate to regard realisations of future income tax benefits as probable.

2. SEGMENT REPORTING

AASB 8 *Operating Segments* requires operating segments to be identified based on internal reports that are regularly reviewed by the Chief Operating Decision Maker (**CODM**) to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. In the case of the Group the CODM is the executive management team and all information reported to the CODM is based on the consolidated results of the Group as one operating segment, as the Group's activities relate to mineral exploration.

b) Tax Losses

The Group has tax losses arising in Australia of approximately \$19,980,710 (2025: \$19,743,012) that are available for offset against future taxable profits.

Potential future income tax benefits arising from tax losses have not been brought to account at 30 June 2026 because the directors do not believe it is appropriate to regard realisation of the future income tax benefits as probable. These benefits will only be obtained if:

- assessable income is derived of a nature and of amount sufficient to enable the benefit from the deductions to be realised;
- the Company continues to comply with the conditions for deductibility imposed by law; and
- no changes in tax legislation adversely affect the realisation of the benefit from the deductions.

- (a) On 2 December 2025 the Company issued 41,666,666 unlisted options to Goldshore Investments Pty Ltd (Goldshore), an entity controlled by Managing Director Mr Malcolm Day. The options were issued in respect to the partial conversion of the loan owing to Goldshore and were approved by shareholders at the AGM held on 25 November 2025.

	Number of Options	Grant date	Expiry Date	Exercise Price	Fair value at grant date	Vesting date
Options issued to Goldshore	41,666,666	25 November 2025	5 December 2027	\$0.008	\$0.002	25 November 2025

The fair value of the equity-settled share options granted is estimated as at the date of grant using the Black and Scholes model taking into account the terms and conditions upon which the options were granted.

	Assumptions
Number options issued	41,666,666
Dividend yield	0.00%
Expected volatility	100%
Risk-free interest rate	3.88%
Expected life of options	2 years
Exercise price	\$0.008

The expected life of the options is based on historical data and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the actual outcome. No other features of options granted were incorporated into the measurement of fair value. For the year ended 30 June 2026, an amount of \$18,978 has been recognised in the financial report as an expense.

- (b) On 28 June 2024, the Company issued 90,000,000 unlisted performance rights to Directors of the Company as approved by shareholders at the Company's GM held on 28 May 2024. The performance rights have the following vesting conditions:
- 45,000,000 vest upon Moab defining a JORC Code 2012 compliant resource of at least 15Mlb at least 130ppm U308 within 24 months from completion being 4 July 2026 (**Milestone 1**), and
 - 45,000,000 vest upon the achievement of either Moab completing:
 - a positive pre-feasibility study concluding that the Manyoni Project is economically and technically feasible and with a minimum NPV10 of at least US\$200 million; or
 - defining a JORC Code 2012 resource of at least 40Mlb at least 130ppm U308 within 36 months from the date of completion being 4 July 2027 (**Milestone 2**).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

On 4 November 2025, the Company issued 4,000,000 shares to consultants of the Company upon the vesting of Consultant Milestone 1.

For the year ended 30 June 2026, management resolved that the probability of achieving Milestone 2 and Milestone 3 was less than 50% and accordingly the previous expense recognised in relation to Milestone 2 and Milestone 3 was reversed. For the year ended 30 June 2026, a net amount of \$3,223 had been recognised in the financial report as an expense taking with the value per right based on the share price at the date of approval. In total, a vesting expense of \$5,628 was recognised for performance rights issued to consultants.

(d) On 2 December 2025, the Company issued 16,370,236 performance rights and 2,046,279 unlisted options (\$0.016 each expiring 4 July 2027) to an advisor of the Company following receipt of shareholder approval at the AGM held on 25 November 2025.

The performance rights are subject to the following vesting conditions:

- 8,185,118 vest upon the achievement of Milestone 1, and
- 8,185,118 vest upon the achievement of Milestone 2.

Name	Number of performance rights	Grant Date	Expiry Date	Value per right at reporting date	Vesting Condition

The fair value of the equity-settled share options granted is estimated as at the date of grant using the Black and Scholes model taking into account the terms and conditions upon which the options were granted.

	Assumptions
Number options issued	2,046,279
Dividend yield	0.00%
Expected volatility	95%
Risk-free interest rate	4.163%
Expected life of options	3 years
Exercise price	\$0.016
Grant date share price	\$0.0008

The performance rights were valued based on the Company's share price at the grant date.

On 4 November 2025, the vesting conditions associated with Milestone 1 were met. On 2 December 2025, the Company issued 8,185,118 fully paid ordinary shares in the Company to the advisor upon the vesting of Milestone 1.

The issue of the performance rights to the advisor were in relation to the acquisition of Linx (refer note 15) and as such the valuation assumptions of these performance rights are the same as the performance rights issues to vendors. For the year ended 30 June 2026, an amount of \$38,490 has been recognised in the financial report as an expense with the value per right based on the share price at the acquisition date of Linx.

15. ACQUISITION OF ASSETS

On 4 July 2024, the Company announced the completion of the acquisition of 81.85% of the issued capital of Linx Resources Pty Ltd (**Linx**) and its subsidiaries comprising Oryx Resources Ltd (**Oryx**) and Katika Resources Ltd (**Katika**) which is the registered holder of three mineral prospecting licenses comprising the Manyoni Uranium Project and the Octavo Uranium Project, both located in Tanzania. Since the acquisition, the Company's shareholding in Linx has increased to 96.08% (refer note 7).

Consideration for the acquisition comprised:

- \$360,000 for the repayment of Linx shareholder loans;
- Issue of the following securities to the shareholders of Linx:
 - 81,851,178 fully paid ordinary shares at a fair value of \$0.003 per share (**Consideration Shares**).
 - 20,462,793 unlisted options at an exercise price of \$0.016 and an expiry date 4 July 2027 (**Consideration Options**) (i).
 - 163,702,356 performance rights which will convert into fully paid ordinary shares in the Company upon satisfaction of the following milestones (**Performance Rights**) (ii)
 - 81,851,178 upon Moab defining a JORC Code 2012 compliant resource of at least 15Mlb at least 130ppm U308 within 24 months from completion being 4 July 2026 (**Milestone 1**), and
 - 81,851,178 upon the achievement of either Moab completing:
 - a positive pre-feasibility study concluding that the Manyoni Project is economically and technically feasible and with a minimum NPV10 of at least US\$200 million; or
 - defining a JORC Code 2012 resource of at least 40Mlb at least 130ppm U308 within 36 months from the date of completion being 4 July 2027 (**Milestone 2**).

The fair value of the Consideration Shares, Consideration Options and Performance Rights, together with the fair value of the net assets of the consolidated group of Linx, Oryx and Katika has been used to record the value of exploration and evaluation assets on initial recognition in accordance with the Group's accounting policies:

18. RELATED PARTY TRANSACTIONS

On 20 September 2024, the Company announced that Goldshore Investments Pty Ltd (Goldshore), a related party to Managing Director Malcolm Day, agreed to provide the Company with a short-term unsecured loan facility of \$750,000 on arms' length terms. During the year ended 30 June 2025, the Company entered into an agreement with Goldshore to convert \$250,000 of the debt owing into equity at a conversion price of \$0.003 per share. Shareholder approval for this transaction was received at the AGM held on 29 November 2024 and the Company subsequently issued 83,333,333 shares to Goldshore on 5 December 2024. The loan incurs an interest rate of 10% per annum calculated on a daily basis and is repayable on 31 December 2026. On 2 December 2025, the Company issued 41,666,666 unlisted options (\$0.008 each expiring 5 December 2027) to Goldshore in respect to the partial conversion of the loan amount owing to Goldshore following receipt of shareholder approval on 25 November 2025. Mr Malcolm Day is a Director of Goldshore.

On 11 July 2025, the Company completed a placement with European Lithium Ltd (ASX: EUR) (note 11). Mr Malcolm Day is a Director of EUR.

On 10 July 2025, the Company announced that it had entered into a short-term loan with EUR for \$500,000. The loan is unsecured and accrues interest at 10% per annum and is repayable on 1 February 2027. On 8 December 2025, the Company announced that it had entered into a second short-term loan with EUR for \$600,000. The loan is unsecured and accrues interest at 10% per annum and is repayable on 4 December 2026. On 4 May 2026, the Company entered into a third short-term loan with EUR for \$200,000. The loan is unsecured and accrues interest at 10% per annum calculated on a daily basis and is repayable on 31 December 2027. As at 30 June 2026, the balance owing to EUR is \$1,300,000 plus accrued interest (note 9). Mr Malcolm Day is a Director of EUR.

19. FINANCIAL INSTRUMENTS

a) Material accounting policies

Details of the material accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which revenues and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 1 to the financial statements.

b) Financial risk exposures and management

The main risks the Company is exposed to through its financial instruments are credit risk, foreign currency risk, interest rate risk, and liquidity risk.

c) Credit risk exposures

Credit risk represents the loss that would be recognised if the counterparties default on their contractual obligations resulting in financial loss to the Company. The Company has adopted the policy of only dealing with creditworthy counterparties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company measures credit risk on a fair value basis.

d) Interest rate risk

The Group is exposed to movements in market interest rates on cash. The policy is to monitor the interest rate yield to ensure a balance is maintained between the liquidity of cash assets and the interest rate of return. The entire balance of cash for the Group of \$166,424 (30 June 2025: \$94,378) is subject to interest rate risk. If interest rates had moved, with all other variables held constant, post tax results and equity would have not been material.

e) Liquidity risk

The Company manages liquidity risk by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities. Surplus funds are generally only invested in short-term bank deposits.

f) Net fair value

The carrying amount of financial assets and liabilities recorded in the financial statements represents their respective fair values determined in accordance with the accounting policies disclosed in Note 1 of the financial statements.

g) Foreign currency risk

The Group operates internationally and is exposed to foreign exchange risk arising from commercial transactions. The Group converted assets and liabilities into the functional currency where balances were denominated in a currency other than the Australian dollar.

The Group also has transactional currency exposures. Such exposure arises from sales or purchases by an operating entity in currencies other than the functional currency.

On 4 July 2026, a total of 8,000,000 performance rights lapsed unvested.

On 2 October 2026, the Company entered into a Convertible Loan Agreement with an unrelated investor. Under the terms of the agreement, the lender has provided funding of \$350,000 to the Company of which \$297,000 has been received in cash at the time of lodging these accounts. The loan is unsecured and bears interest at 8% per annum. Subject to receipt of shareholder approval, the loan will convert at the election of the lenders into shares at a 50% discount to the share issue price in relation to the Company's next placement or rights issue completed after entering into the agreement provided that the conversion price must not be less than A\$0.0005 per Share. If shareholder approval is not received within 6 months from entering into the agreement the loan (including accrued interest) is to be repaid in cash. The Convertible Loan Agreement is also conditional upon the Company completing a placement or rights issue and the Company holding cash of not less than \$1,000,000 following completion of the placement or rights issue.

On 2 October 2026, the Company entered into a Deed of Variation with Goldshore Investments Pty Ltd to extend the repayment date of all amounts owing to them to 31 December 2027. On the same day, the Company entered into a Deed of Variation with European Lithium Ltd extending the due date for amounts owing to them to 31 December 2027.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

On 5 October 2026, the Company entered into a second deed of variation with Galo Capital Limited (Galo) regarding the deferred project acquisition payment term for the payment of US\$320,000 which was due on or before 22 September 2026. The parties agreed that US\$50,000 is to be paid by 5 October 2026 and the balance of US\$270,000 is to be paid on or before 31 January 2027. The Company subsequently made payment of US\$50,000 to Galo on 5 October 2026.

No other matters or circumstances have arisen since the end of the half-year which significantly affected or may significantly affect the operations of the Group, the results of those operations, or the state of affairs in future financial years.

Basis of Preparation

This Consolidated Entity Disclosure Statement (CEDS) has been prepared in accordance with the Corporations Act 2001. It includes certain information for each entity that was part of the consolidated entity at the end of the financial year.

Determination of Tax Residency

Section 295 (3A) of the Corporation Acts 2001 defines tax residency as having the meaning in the Income Tax Assessment Act 1997. The determination of tax residency involves judgement as there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency. It should be noted that the definitions of 'Australian resident' and 'foreign resident' in the Income Tax Assessment Act 1997 are mutually exclusive. This means that if an entity is an 'Australian resident' it cannot be a 'foreign resident' for the purposes of disclosure in the CEDS.

In determining tax residency, the consolidated entity has applied the following interpretations:

- Australian tax residency - The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance in Tax Ruling TR 2018/5.
- Foreign tax residency - Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in determining tax residency and ensure compliance with applicable foreign tax legislation.

DIRECTORS' DECLARATION

In the opinion of the Directors of Moab Minerals Limited:

1. the financial statements and notes of the Group are in accordance with the *Corporations Act 2001*, including:
 - a. giving a true and fair view of the Group's financial position as at 30 June 2026 and of its performance for the year ended on that date; and
 - b. complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and *Corporations Regulations 2001*.
2. the financial statements and notes also comply with the International Financial Reporting Standards as disclosed in note 1.
3. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
4. the information disclosed in the attached consolidated entity disclosure statement is true and correct.
5. This declaration has been made after receiving the declarations required to be made to the directors in accordance with sections 295A of the *Corporations Act 2001* for the financial year ended 30 June 2026.

This declaration is signed in accordance with a resolution of the Board of Directors made pursuant to s.303(5) of the *Corporations Act 2001*.

INDEPENDENT AUDITOR'S REPORT

To the Members of Moab Minerals Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Moab Minerals Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2026, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes to the financial statements, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 30 June 2026 and of its financial performance for the year then ended; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* ("the Code") that are relevant to audits of the financial report of public interest entities in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 (b) in the financial report, which indicates that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material Uncertainty Related to Going Concern*, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matter	How our audit addressed the key audit matter
Exploration and evaluation expenditure Refer to Note 7	
In accordance with AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i>, the Group capitalises exploration and evaluation expenditure and as at 30 June 2026, had a capitalised exploration and evaluation expenditure balance of \$5,439,931. Exploration and evaluation expenditure was determined to be a key audit matter as it is important to the users' understanding of the financial statements as a whole and was an area which involved significant audit effort and communication with those charged with governance.	Our procedures included but were not limited to the following: – Obtaining an understanding of the key processes associated with management's review of the carrying value of exploration and evaluation expenditure; – Considering the Directors' assessment of potential indicators of impairment in addition to making our own assessment; – Obtaining evidence that the Group has current rights to tenure of its areas of interest; – Considering the nature and extent of planned ongoing activities; – Substantiating a sample of expenditure by agreeing to supporting documentation; and – Examining the disclosures made in the financial report.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2026, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and
- the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*, and

for such internal control as the directors determine is necessary to enable the preparation of:

- (a) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- (b) the consolidated entity disclosure statement that is true and correct and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON THE REMUNERATION REPORT

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the Directors' Report for the year ended 30 June 2026.

In our opinion, the Remuneration Report of Moab Minerals Limited for the year ended 30 June 2026 complies with Section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with Section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
