

FBR Completes First Demonstration Build with Current Generation Hadrian® in Australia

Monday, 5 October 2026 – Robotic technology company **FBR Limited (ASX:FBR)** ('FBR' or 'Company') is pleased to advise that it has completed its first demonstration build with a current generation Hadrian® unit, H04, on a residential slab in Lesmurdie, Western Australia.

The build, conducted as a real-world demonstration of Hadrian® capability and performance, marks the first on-site build for H04 in the Australian residential construction sector.

Laying Wienerberger Porotherm blocks, H04 attracted keen interest from onlookers and members of the construction community as it put down its first blocks.

FBR's CEO, Mark Pivac commented:

"We're incredibly pleased to see our Australian-spec Hadrian® system out of the gate and building. We intend to commence Wall as a Service® operations in Western Australia soon, and we are looking forward to showing everyone here in Australia the capability that we demonstrated in the United States."

About FBR Limited

FBR Limited (ASX: FBR) designs, develops and builds dynamically stabilised robots to address global needs in a safer, more efficient and more sustainable way. These robots are designed to work outdoors using the company's core Dynamic Stabilisation Technology® (DST®).

Applications of DST® include Hadrian®, Mantis™ and Firehawk™. Hadrian® is a bricklaying robot that builds structural walls faster, safer, more accurately and with less wastage than traditional manual methods. Hadrian® provides Wall as a Service®, FBR's unique commercial offering, to builders on demand. Hadrian® robots are also available for purchase by order. Mantis™ is a high deposition welding robot for the large-scale metal fabrication industries such as mining, shipbuilding and defence manufacture. Firehawk™ is an autonomous refractory lining robot that removes human labour from the process of lining ladles used in steel production with refractory bricks.
