

CIVMEC SECURES A\$220+ MILLION IN NEW CONTRACT AWARDS AND EXTENSIONS

Civmec Limited ("Civmec" or the "Group") is pleased to advise that it has recently secured a series of new contract awards and extensions with a combined value exceeding A\$220 million. The awards reflect the Group's continued success in converting its pipeline of opportunities in the critical minerals sector and reinforce its strategic focus on diversifying the order book, while underscoring the strength of its long-standing relationships with Tier-1 clients. The new contracts and extensions are expected to be delivered across FY27 and FY28.

Wagerup Gallium Project

Civmec is pleased to announce that it has been awarded the construction contract for the gallium production plant at Alcoa's Wagerup Alumina Refinery in Western Australia.

The gallium project brings together government and industry partners from Australia, Japan and the United States. Following a final investment decision in July 2026, a groundbreaking ceremony was held in August 2026 to mark the start of construction.

Civmec will deliver the multidisciplinary construction of the plant's process facilities, including civil, structural, mechanical, piping, and electrical and instrumentation works, along with the process building, tanks, laboratory and supporting infrastructure. Civmec will support Alcoa through commissioning. The project is expected to support up to 200 local construction jobs.

The award builds on Civmec's growing presence in Western Australia's critical minerals processing sector, complementing the Company's long history of building process plants for a variety of commodities across the resources sector since its inception.

Commenting on the award, Civmec's Chief Executive Officer Patrick Tallon said:

"We are proud to have been selected to deliver this strategically important facility. The project plays directly to Civmec's integrated, multidisciplinary capability, and it is a privilege to help establish a new, secure source of gallium right here in Western Australia. We look forward to working safely alongside Alcoa and all stakeholders as the plant takes shape."

Other Projects and Contract Extensions

Consistent with Civmec's focus on maintenance services as a pillar of growth, the Group has continued to secure new awards, panel agreement extensions and new orders across its maintenance portfolio, supported by its permanent regional facilities in Port Hedland and Gladstone. Most notably, Civmec has been awarded the Bulk Cargo Terminal works contract at Glencore's Murrin Murrin Operations. The award reflects the Group's continued success in securing maintenance and sustaining capital works from repeat clients. Civmec also continues to participate in early contractor involvement activities across a range of commodities, positioning the business well for upcoming tender opportunities.

These awards take Civmec's Order Book to approximately A\$1.5 billion.

This announcement was authorised for release to the ASX and SGX by the Board of Directors.
