

Exploring the Balkans' Mineral Wealth

Aussie Equities Day 2026

Marina Bay Sands, Singapore | 9 October 2026

Petar Tomašević, Executive Director & CEO

ASX: **YUG**

yugometals.com

General:

The information in this presentation that relates to Exploration Results has been extracted from the Company's previously released ASX announcements, as referenced in the presentation. The Company is not aware of any new information or data that materially affects the information reported pursuant to Listing Rule 5.23. This document has been prepared by and is the sole responsibility of the directors (the "Directors") of the Yugo Metals Limited ("Yugo" or the "Company"). This document is not a Prospectus or offering document and investors should not subscribe for or purchase any shares referred to in this document except on the basis of information in the Prospectus to be published by the Company. The information set out herein is subject to updating, completion, revision, verification and amendment, and such information may change materially. This document does not purport to contain all the information that a prospective investor may require in evaluating a possible investment in the Company and should not be used in isolation as a basis to invest in the Company. This document does not and is not intended to constitute, and should not be construed as, an offer, inducement, invitation or commitment to purchase, subscribe to, provide or sell any securities, services or products of the Company in any jurisdiction or to provide any recommendations for financial, securities, investment or other advice or to take any decision. You are encouraged to seek individual advice from your personal, financial, legal, tax and other advisors before making any investment or financial decisions subscribing for or purchasing any securities. The Directors make no representation or warranty, express or implied, as to the accuracy or completeness of the information or opinions contained in this document. Nothing contained herein should be relied upon as a promise or representation as to the future. None of the Company, or their respective members, directors, officers, employees, agents, affiliates or representatives or advisors nor any other person accepts any obligation or responsibility to advise any person of changes in the information set forth herein after the date hereof. To the fullest extent permitted by law, none of the Company nor their respective members, directors, officers, employees, agents or representatives, nor any other person accepts any liability whatsoever for any errors, omissions or inaccuracies in such information or opinions or for any loss, cost or damage suffered or incurred howsoever arising, directly or indirectly, from any use of this document or its contents or otherwise in connection with the subject matter of this document or any transaction. None of the Company any advisor or person acting on their behalf, shall (without prejudice to any liability for fraudulent misrepresentation) have any liability whatsoever for loss however arising, directly or indirectly, from the use of information or opinions communicated in relation to the Presentation. This document is strictly confidential and is being provided to you solely for your information and for use at the Presentation to be held in connection with the Offering by the Company and may not be reproduced in any form or further distributed to any other person or published in whole or in part, for any purpose. Any failure to comply with this restriction may constitute a violation of applicable securities laws. By reviewing this document, you agree to be bound by these restrictions. No action has been or will be taken to register or qualify shares in the Company, or the Offer, or to otherwise permit a public offering of the Securities in any jurisdiction outside Australia or New Zealand. The securities referred to in this Presentation have not been and will not be registered under the US Securities Act of 1933, as amended, (the "US Securities Act") or under any securities laws of any state or other jurisdiction of the United States and may not be offered, sold, resold, taken up, exercised, renounced, transferred or delivered, directly or indirectly, within the United States. By attending this Presentation and/or accepting a copy of this document, you agree to be bound by the foregoing limitations and, in particular, will be taken to have represented, warranted and undertaken that you have read and agree to comply with the contents of this notice including without limitation the obligation to keep this document and its contents confidential.

Forward Looking Statements:

This presentation contains certain forward-looking statements that reflect the current views and/or expectations of the Company with respect to its business and future events including statements regarding the Company's business and exploration plans. Forward looking statements are based on the then-current expectations, beliefs, assumptions, estimates and forecasts about the mineral properties, business and the markets in which the Company operates. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including: the inherent risks involved in the exploration and development of mineral properties; the uncertainties involved in interpreting drill results and exploration data; the uncertainties respecting historical resource estimates; the potential for delays in exploration or development activities; the geology, grade and continuity of mineral deposits; the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; accidents, equipment breakdowns, title and permitting matters, labour disputes or other unanticipated difficulties with, or interruptions in, operations; fluctuating metal prices; unanticipated costs and expenses; uncertainties relating to the availability and costs of financing needed in the future; commodity price fluctuations; regulatory restrictions, including environmental regulatory restrictions; the Company's ability to identify, complete and/or finance additional acquisitions; or any failure to integrate acquired companies and projects into the Company's existing business as planned. These risks, as well as others, could cause actual results and events to vary significantly. Accordingly, readers should not place undue reliance on forward-looking statements and information. There can be no assurance that forward-looking information, or the material factors or assumptions used to develop such forward-looking information, will prove to be accurate. The Company does not undertake any obligations to release publicly any updates or revisions to any voluntary forward-looking statements, except as required by applicable securities laws. All \$ amounts referred to in this document are Australian Dollars unless otherwise noted.

Yugo Metals at a Glance

An ASX-listed explorer holding 100% of three projects in Bosnia and Herzegovina, on the Tethyan metallogenic belt that runs from the Alps to Iran.

3

projects, all 100% owned

~190 km²

of granted exploration licences

A\$6.3m

cash, no debt (30 June 2026)

3

drill programs running or next in line

Why Bosnia and Herzegovina

10% / 5%

Corporate profit tax of 10% and a 5% royalty on metallic minerals, among the lowest in Europe.

8 + 30 yrs

Exploration licences run up to 8 years; mining licences up to 30 years with extension options.

Producing

Dundee Precious Metals' Vareš operation is in production in-country, proving the permitting path.

Connected

Paved roads to our main prospects, rail and power networks, Sarajevo airport and the port of Bar nearby.

Share price (8 Oct 2026)	5.7c
Market capitalisation	A\$23.5m
Fully paid ordinary shares	413.1m
Listed options (YUGOB)	98.9m
Unlisted options	136.3m
Cash (30 June 2026)	A\$6.3m
Debt	Nil
Top 20 shareholders	50.6%

Three Projects, Three Commodity Stories

DRILLING

GOLDEN HILLS

West | Sinjakovo Project

Au

Ag

Cu

Sb

Gold discovery at the Erak Prospect in first-ever drilling. Drilling continues.

~80 km² licence area

TWIN DRILLING Q4 2026

ST NICHOLAS

North | Sockovac Project

Ni

Co

Au

Ag

Shallow high-grade nickel found in 1969. Twin drilling to verify it is expected this quarter.

~60 km² licence area

FIRST DRILLING

MONTE

East | Cajnice Project

Au

Ag

Cu

Pb

High-grade polymetallic outcrops. First-ever drilling under way.

~50 km² licence area

Golden Hills: A New Gold Discovery at Erak

BEST DRILL RESULT TO DATE

36.1m @ 2.3 g/t Au

including 3m @ 14.5 g/t Au

Hole ERDD006, from 51.8m downhole¹

BEST TRENCH RESULT, NOT YET DRILLED

61m @ 1.5 g/t Au

Surface trench, eastern Erak²

1

First drilling ever at Erak

Every hole drilled has intersected the gold-bearing alteration zone (silica-sericite-pyrite).³

2

Width close to true width

Holes cut the zone at a high angle, so reported widths are close to true widths.³

3

Open in all directions

The zone thickens to the east and down-dip, where drilling is heading next.³

4

Gold, plus by-products

Breccia zones also carry silver, copper and antimony.³

Drilling is building the discovery hole by hole. Three steps take it to a first resource estimate.

01

Drill the trench

A second drill pad sits over the 61m @ 1.5 g/t Au trench. A positive result there would point to more than 400m of mineralised strike.

02

Metallurgy

Metallurgical testwork and a first laboratory concentrate, with flotation testwork the likely focus.

03

Maiden resource

Resource drill-out, then a maiden JORC Mineral Resource estimate, targeted for 2027.

Timing is indicative and depends on drilling results, testwork and permits.

St Nicholas: Shallow, High-Grade Nickel

5.1m @ 6.6% Ni

from 57.9m downhole

14.6m @ 2.8% Ni

from 39.6m downhole

1.5m @ 15.0% Ni

highest-grade interval

9.4m @ 8.2% Zn+Pb

from 41.8m downhole

Historical drilling (1968-1970)¹

Shallow and flat-lying

Twenty historical holes found sulphides 30-80m below surface, dipping gently and open to the south, east and west.¹

Cobalt never assayed

The 1960s program did not test for cobalt, gold or silver. Our twin holes will.¹

Bigger footprint at surface

Yugo sampling defined a 14 km² nickel-cobalt anomaly, and rock chips up to 5.7 g/t Au and 1,330 g/t Ag.²

Ni

Co

Au

Ag

Petrovo licence (St Nicholas) granted in 2026. The historical drilling sits inside it.

1. ASX announcement 19 October 2021 (Prospectus); 1.5m @ 15.0% Ni per ASX announcement 2 June 2026. 2. ASX announcement 21 December 2021.

St Nicholas: Twin Drilling After 56 Years

SOCKOVAC GEOLOGY SECTION (looking north-northwest)

Legend:

- UM Ultramafics (peridotite, serpentinite)
- MS Meta-sediments (slate, calc-silicates)
- CB Carbonate rocks (limestone, dolostone)
- Ni Nickel mineralisation (pentlandite, millerite)
- Structure (inferred)
- Thrust Fault
- Normal Fault

Historical Drillhole (1969-1970)

Hole ID
Ni > 1%
Depth

Planned Drillhole

Hole ID
Depth

Planned holes P_DD_001 to P_DD_003 (black) twin historical holes B-16, B-8 and B-10 (grey).

Twin

three historical holes to confirm grade and thickness

Assay

for nickel, cobalt, gold, silver, zinc and lead

Map

extensions with geophysics

Extend

with step-out drilling toward a Ni-Co resource

Monte: First-Ever Drilling Under Way

Rock-chip grades at surface

1.9 g/t

gold

220 g/t

silver

13.6%

lead

10.5%

copper

Rock chips are selective samples and are not representative of average grade.^{1 2}

What we're testing

Four diamond holes, about 600m in total, at the Majdan (gold-silver) and Pisonica (silver-lead-zinc) prospects. They test whether mineralisation in silicified layers near granite intrusions continues at depth.

Airborne electromagnetic and magnetic surveys mapped alteration zones across the licence.

NOW

Q4 2026

- Golden Hills: assays from continuing Erak drilling
- Golden Hills: drilling under the 61m trench
- St Nicholas: twin drilling starts, the first since 1970
- Monte: first-ever drill results

NEXT

H1 2027

- St Nicholas: twin-hole assays, including first-ever cobalt results
- Golden Hills: metallurgical testwork
- Geophysics at St Nicholas and Golden Hills

TARGET

2027

- Golden Hills: resource drill-out
- Maiden resource estimates for gold (Golden Hills) and nickel-cobalt (St Nicholas)

Indicative timing. Subject to drilling results, testwork, permits and funding.

01

A gold discovery with width

36.1m @ 2.3 g/t Au at Erak, open in all directions, with the best trench still undrilled.

02

High-grade nickel, shallow

Historical intercepts up to 6.6% Ni within 80m of surface. Cobalt never tested.

03

Funded to drill

A\$6.3m cash and no debt at 30 June 2026, after an oversubscribed A\$5m placement.

04

A low-cost jurisdiction

10% company tax, a 5% royalty and an operating mine in-country.
