Company Secretary

ABOUT AMERICAN TUNGSTEN AND ANTIMONY LIMITED

American Tungsten and Antimony Limited (ASX: AT4, OTCQB: ATALF) is advancing critical mineral development in Tier-1 US jurisdictions, with a strategic vision to become a vertically integrated, conflict-free supplier to Western economies.

Its flagship Antimony Canyon Project in Utah, USA, is one of the country’s largest and highest-grade undeveloped antimony systems, historically mined but never subjected to modern exploration. The Tennessee Mountain Tungsten Project in Nevada and the Dutch Mountain Project in Utah further strengthen AT4’s position in critical minerals, adding scale and diversification within Tier-1 jurisdictions.

With a proven leadership team and active government engagement, AT4 is strategically positioned to lead the resurgence of antimony and tungsten supply from reliable Western sources.
