

1TT ADVANCES WOBOARD CARE 109 PRACTICES EXPRESS INTEREST

Provider outreach records interest across all six initial service and location combinations

Thrive Tribe Technologies Limited (ASX: 1TT) ("1TT" or the "Company") reports non-binding expressions of interest from 109 allied health practices for WooBoard CARE across the initial Queensland rollout. The next step is to progress interested practices through verification and onboarding ahead of public launch.

The update follows the Company's 17 September 2026 announcement. CARE's initial rollout remains focused on physiotherapy and psychology across the Gold Coast, Brisbane and Ipswich. The platform is designed to help veterans find providers accepting Department of Veterans' Affairs (DVA) Veteran Cards and new clients, and help participating practices manage veteran enquiries.

Highlights

- **109 practices express interest.** Direct outreach recorded interest from 64 physiotherapy and 45 psychology practices. Each reported DVA registration and capacity to accept new clients; participation remains subject to verification, onboarding and agreed subscription terms.
- **Coverage across the initial rollout.** Interested practices span physiotherapy and psychology in the Gold Coast, Brisbane and Ipswich, providing a recruitment base for the initial provider network.
- **Provider subscription model.** The proposed model combines paid provider listings and enquiry-management tools with free access for veterans. Pricing and subscription terms are being finalised.
- **Next development milestone.** Integration and release testing are targeted for 1 November 2026, subject to approvals and clinical governance input. Public launch remains subject to provider coverage and safety requirements.

Provider engagement across the initial rollout

The 109 interested practices comprise the following location and discipline mix:

- **Gold Coast.** 24 physiotherapy and 17 psychology practices, totalling 41.
- **Brisbane.** 26 physiotherapy and 15 psychology practices, totalling 41.
- **Ipswich.** 14 physiotherapy and 13 psychology practices, totalling 27.

The expressions of interest are non-binding and do not establish contracted customers or revenue. Provider participation remains subject to verification, onboarding and agreement on subscription terms.

Before listing, providers will undergo onboarding and verification, including Ahpra registration checks for relevant practitioners and confirmation of Veteran Card acceptance and new-client capacity. Listing verification does not assess treatment quality or guarantee availability.

Product development and provider value

The MVP is now operational, with veteran accounts, provider search, appointment-request tracking and provider enquiry tools. Platform integration and release testing remain outstanding before public launch.

Crisis support (000, Open Arms and Lifeline) is shown before any search or sign-up.

Next milestone and public launch

1TT is targeting completion of platform integration and release testing by 1 November 2026, subject to final cost approvals and clinical governance input. This is a development milestone, not a confirmed public launch date.

Public launch requires Board approval, at least three verified providers accepting new clients per discipline and location, and a safety framework covering verified crisis routing, provider standards and clinical sign-off by a named registered professional. Service and location combinations will open as these requirements are met.

CARE provides navigation to existing services. It does not provide diagnosis, triage, treatment or clinical advice. Appointment requests are enquiries, not clinical referrals or confirmed bookings.
