Titomic Awarded €150K Contract by the Royal Netherlands Army to Develop Next-Generation Battle Damage Repair Prototype

Heerenveen, The Netherlands – Titomic Limited (ASX: TTT), a global leader in industrial-scale cold spray additive manufacturing and coating solutions, is pleased to announce that its wholly owned Netherlands subsidiary, Titomic Europe B.V., has been awarded a EUR 150,000 (AUD 242,000) contract by the Royal Netherlands Army to develop a new Battle Damage Repair (BDR) prototype based on Titomic Kinetic Fusion™ (TKF)™ low-pressure cold spray technology.

The award builds upon and expands Titomic's existing relationship with the Royal Netherlands Army following its 2024 procurement of ten TKF™ 523 systems of which nine were subsequently donated to Ukraine. The Ukrainian systems have successfully provided combat damage repair close to the front line providing a critical function to sustain fighting capabilities in a near-peer conflict. The new contract represents a progression from deployment of existing Titomic systems to the development of a new BDR capability specifically addressing the Army's requirement for rapid repair of damaged ground vehicles and weapon systems closer to the point of need. The initial EUR 150,000 award covers prototype design with the program providing a potential pathway to follow-on funding for additional testing, scaling and market deployment of the BDR systems.

The Strategic Defence Innovation Research (SDIR) Challenge for Battle Damage Repair (BDR) is a fast-track procurement initiative launched by the Royal Netherlands Army. The primary objective is to expand the military's capability to rapidly repair damaged ground vehicles and weapon systems as close to the front line as possible, thereby helping field units maintain operational availability and combat endurance during conflict.

For Titomic, the award further advances its position in deployable defense sustainment and demonstrates the growing government use cases for TKF™ technology. Titomic's cold spray systems are designed to enable repair and restoration of critical metallic components at speed without the high heat and residual stresses associated with traditional welding processes, supporting modern warfare's need for distributed maintenance and repair closer to where equipment is operated.

"This award is a notable advancement in Titomic's relationship with the Royal Netherlands Army," said Jim Simpson, Managing Director & CEO of Titomic Limited. "Following the Army's procurement of ten TKF™ 523 systems in 2024 and their subsequent successful deployment to enable battlefield repair activities in Ukraine, we are now working with the Army to develop the next generation of deployable Battle Damage Repair capability. For Titomic, this progression from supplying equipment to working directly with a sovereign defense customer on the development of new capability is significant as it demonstrates the growing relevance of TKF™ for defense organizations seeking capabilities that can return critical assets to service rapidly and closer to the point of need. The operational experience gained from systems already deployed in Ukraine, together with this new development program, provide an exemplary foundation for the broader adoption of Titomic's cold spray technology across varied allied missions."

Delivery of the prototype design is scheduled for December 2026. Subject to successful completion of the design phase, prototype manufacture, testing and future procurement decisions, the program may progress under the fast track SDIR framework to scaling and deployment of the BDR systems on to military vehicles and in the hands of small field units with the Dutch Army as well as NATO allies.

This announcement has been authorized for release by Titomic's Board of Directors.

ABOUT TITOMIC LIMITED

Titomic Limited (ASX: TTT) is a leading Advanced manufacturing company with global operations specializing in large integrated solutions for industrial- scale metal additive manufacturing, coating, and repairs using its patented kinetic fusion cold spray (Titomic Kinetic Fusion™) technology. Titomic Kinetic Fusion™ cold spray solutions provide OEM production and R&D services to the global Aerospace, Defense, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all its Titomic Kinetic Fusion™ cold spray AM activities from its Huntsville, Alabama Global Headquarters, as well as through local presence in the Australia and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit www.titomic.com.

FORWARD LOOKING STATEMENTS

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates", "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercializing technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
