

QUARTERLY ACTIVITIES REPORT September 2026

Discovery Alaska Limited (ASX: DAF) ("the Company") is an Australian based mineral exploration company with a 100% interest in the Boulder Creek Gold-Silver Project in Idaho, USA (20 BLM claims), an option to acquire a 100% interest in Idaho State Lease E600117, a 100% interest in the Chulitna Project in Alaska, USA, and a 100% interest in the recently acquired Cuddingwarra Gold Project located near Cue, Western Australia.

The Company provides the following update for the Quarter;

Exploration Activities

Cuddingwarra Gold Project

The Company executed a binding Share Purchase Agreement ("SPA") to acquire the strategic Cuddingwarra Gold Project, located near Cue, Western Australia.

The Cuddingwarra Gold Project comprises eight (8) Prospecting License applications covering an area of 13.86km² in a significant land position neighboring the historical Cuddingwarra Gold Mine and other major gold producers and projects, including Westgold Resources and Caprice Resources, and is proximal to regional processing infrastructure.

The binding SPA is subject to standard conditions, including obtaining shareholder approval, grant of all the prospecting licences and completing a capital raising.

Figure 1. Cuddingwarra Gold Project Location

DISCOVERY alaska

The Cuddingwarra Gold Project sits immediately adjacent to Westgold Resources Cue gold mining operations and within trucking distance of the Tuckabianna gold mill (capacity 1.4Mtpa), and approximately 50km north of Ramelius Resources Mt Magnet gold mines and Checkers gold mill (capacity 1.9Mtpa).

The Project lies within 7km of highly fertile and prospective greenstone terrain along the Cuddingwarra Gold Trend, which has historical gold production from 16 open pits, and covers analogous greenstone stratigraphy and structural corridors to those hosting adjacent high-grade deposits.

The western sequence of greenstones within the project area is concealed beneath calcrete, with limited historical exploration works being conducted. More recent fieldwork has identified widespread outcrop and gold occurrences in quartz reefs within this western greenstone sequence.

Past explorers (Caprice Resources, Big Bell Gold Operations) identified anomalous areas that remain completely untested below surface.

Gold mineralisation in the area is structurally controlled along NNE shear zones and NE-trending splays of the Cuddingwarra Shear Zone, analogous architecture that localises major deposits at Westgold's adjoining operations.

DISCOVERY alaska

The Project area is untested below surface, and following grant of the prospecting licences, the Company will reference the past exploration works conducted by recent explorers in the area to prepare an exploration plan to target the high-priority structural corridors. The exploration works may include systematic surface geochemistry (soil and rock chip sampling) to refine drill target areas, first-pass air-core drilling to test beneath cover sequences and confirm mineralised trends, and follow-up RC drilling of identified gold anomalies.

Boulder Creek Gold-Silver Project

The Boulder Creek Gold-Silver Project is located ~90km southwest of Boise in Idaho, USA, and comprises twenty BLM claims held by the Company (100% interest), and an option to acquire a 100% interest in Idaho State Lease E600117 ("ISL") - which comprises 640 acres and is located adjacent to the BLM claims.

The Company conducted necessary site preparation and access works, permitting requirements, water sourcing, and is ready for drilling operations to commence (subject to drilling contractor availability) at the Boulder Creek Gold-Silver Project in Idaho, USA – located ~90km southwest of Boise and near the historical mining town of Silver City.

The Company recently completed the necessary drill program planning works, albeit following a delay due to the "Big Grass" bushfire that occurred in the area during July and August, and is now awaiting arrangements with a drilling contractor to conduct the drilling works.

The Company is targeting the historical drilling sites completed by Nerco, Inc. between 1985 - 1987 that identified anomalous gold and silver zones, and which were supported by recent site visits and positive rock sample results from the historic sites.

Figures 3-4. Boulder Creek Au-Ag Project – Site Preparation Works for Drilling

The project is prospective for epithermal high grade vein hosted gold-silver and disseminated gold-silver, and lies within a prospective area containing several historical sites.

New Project Opportunities

The Company is reviewing additional mineral project opportunities and has conducted due diligence over projects that may complement the Company's current exploration activities.

Chulitna Gold Project (Alaska, USA)

The Chulitna Project is located on State of Alaska public lands, and is not subject to any Native Title claims, native lands, or native claimant groups. The project lies approximately 250km north of Anchorage and close to the major Parks Highway, which runs mostly parallel to the State-owned Alaska railroad. The project area comprises 15.5km² (24 claims) centred on the Partin Creek gold prospect. The Company is reviewing its strategy for the project.

Placement

The Company received firm commitments from sophisticated and professional investors to raise \$900,000 (before costs) through the issue of 100 million fully paid ordinary shares at an issue price of A\$0.009 per share.

The Placement is being conducted in two tranches, and shares issued will rank equally with existing fully paid ordinary shares.

- Tranche 1: shares were issued pursuant to the Company's existing placement capacity under ASX Listing Rule 7.1 (6,585,000 shares)- these funds are included in the Appendix 5B;
- Tranche 2: ~93,415,000 shares will be issued subject to shareholder approval pursuant at the Company's Annual General Meeting ("AGM"), to be held on 23 October 2026.

The Placement was Company led. Advisors coordinating the Placement will receive a capital raising fee equal to 1% of the gross proceeds raised under the Offer and they and/or Nominees will be issued 27,000,000 unlisted options with an exercise price of \$0.02 and expiring 3 years from the date of issue (subject to shareholder approval). The options will be issued at \$0.00001 each.

DISCOVERY alaska

Funds raised under the Placement will be applied towards exploration works at the Company's projects, acquisition of the Cuddingwarra Gold Project, costs of the Placement, and general working capital purposes.

Corporate

The Company had cash reserves of \$263,000 (as at 30 September 2026) and is maintaining prudent financial management.

The Company proposes to issue 80,000,000 shares to vendors in relation to the acquisition of the Cuddingwarra Gold Project, subject to shareholder approval pursuant at the Company's Annual General Meeting ("AGM"), to be held on 23 October 2026.

Additional ASX Disclosure Information
