16th October 2026

Fiji's Department of Environment ("DOE") Commences Public Consultation on Magma Mines PTE Ltd's Sigatoka Environmental Impact Assessment Report

Dome Gold Mines Limited ("Dome" or "Company") (ASX code: DME) is pleased to announce that the DOE has commenced public consultation of the draft Environmental Impact Assessment report on the Company's wholly owned subsidiary Magma Mines PTE Ltd Sigatoka Iron Sands (magnetite) Project on Special Prospecting Licence (SPL 1495).

The EIA report was submitted to the DOE for review on September 10, 2026. As part of the EIA process under the Environment Management Act 2025, the DOE has commenced a 21-day public review of the report. Members of the public may inspect the report and submit comments until October 30, 2026.

Following the public exposure period the DOE will analyse the report and all comments submitted and determine the next steps in the assessment process.

This Market Release has been approved by the Board of Dome Gold Mines Ltd.

ABOUT DOME

Dome is an Australian mining company that listed on the ASX 22nd October 2013. The Company is focussed on gold, copper, magnetite and industrial sands in Fiji, where it holds three highly prospective exploration tenements. Dome operates in Fiji through its 100% owned subsidiary Magma Mines Pty Ltd.

The company aims to become a major force in the mining industry of Fiji through the discovery and development of mineral resources within its Fijian tenements.

Dome's objective is the completion of its feasibility study at the Sigatoka project allowing it to convert exploration licence SPL1495 into a mining licence and commence production. The Sigatoka mining project would be very low capital cost project, generating quick revenues to allow the development of its other projects.

Sigatoka is a heavy mineral sand project containing abundant magnetite and industrial sands with unique properties. Drilling to establish an initial JORC mineral resource estimate for the project has been completed, and the final stages of a feasibility study are now underway. Commencement of production at Sigatoka by conventional sand mining and wet processing is anticipated.

Dome's other project is the Nadrau project (SPL1452), where additional exploration programs for copper-gold porphyry deposits are planned.

Dome maintains a full-time office and development team in Fiji and its Board and Management team has a wealth of experience in Fiji.
