

Audeara-Powered Auracast Launches in Taiwan as Clinico Orders Convert to Revenue

Highlights

- ▶ Clinico Inc. has launched its Clinico-branded Auracast™ suite in Taiwan, marking the commercial deployment of products supplied under the white-label programs announced by Audeara on 9 March 2026
- ▶ The suite includes the CS Mic+ Auracast™ multifunction audio transmitter and CS Broadcaster Auracast™ audio broadcaster, extending Clinico's portfolio into portable and fixed-location broadcast audio
- ▶ Clinico has donated 20 of their systems — 10 CS Mic+ units and 10 CS Broadcaster units — to Chung Shan Medical University for teaching and campus use
- ▶ The university deployment provides a live institutional reference for Auracast™ in education and demonstrates the scalability of Audeara technology through partner-branded products
- ▶ Audeara has previously announced approximately A\$734,000 in purchase orders across its Clinico programs, comprising A\$570,000 announced in October 2024 and approximately A\$164,000 of introductory Auracast™ program orders announced in March 2026

Audeara Limited (ASX: AUA) ("Audeara" or "the Company") is pleased to advise that Clinico Inc. ("Clinico") has launched its Clinico-branded Auracast™ suite in Taiwan, with the products now deployed in a university environment.

The launch represents the next visible milestone in the Clinico programs announced by Audeara on 9 March 2026. At that time, the Company advised it had received approximately A\$164,000 in introductory purchase orders from Clinico to commence three white-label commercial programs, including two Auracast™-enabled devices and related Clinico-branded ecosystem components.

Those introductory orders have now been fulfilled and shipped, with the Auracast™ products commercially launched by Clinico in Taiwan and deployed into a live university environment.

The launched suite includes the CS Mic+ Auracast™ multifunction audio transmitter and CS Broadcaster Auracast™ audio broadcaster. These products extend Clinico's offering from

personal listening products into portable and fixed-location broadcast audio, creating additional shared-listening use cases across education and other institutional environments.

On 2 September 2026, Clinico publicly announced the donation of 20 Auracast™ systems to Chung Shan Medical University in Taichung, comprising 10 CS Mic+ units and 10 CS Broadcaster units. The systems are intended for teaching and campus activities, giving students and staff access to the technology in a live university environment. Taiwanese media coverage of the handover shows Clinico formally presenting the systems, demonstrating the Auracast™ products and students testing the technology in use.

Clinico Sound Auracast™ Product Suite

Public reporting on the university deployment describes the CS Mic+ as a multifunction audio transmitter that can be used with a microphone to send a teacher or presenter's voice directly to listeners, while the CS Broadcaster can be installed in fixed spaces such as classrooms and meeting rooms so multiple users can receive the same local audio stream. The deployment demonstrates a practical Auracast™ use case in an education setting where distance and environmental noise can affect listening access.

The Taiwan launch builds on an established Audeara–Clinico relationship. Audeara previously announced an initial A\$570,000 purchase order from Clinico in October 2024 and the launch of the Clinico Sound Earbuds CS1 in Taiwan in January 2025. Together with the approximately A\$164,000 of introductory orders announced for the Auracast™ white-label programs in March

2026, Audeara has publicly disclosed approximately A\$734,000 of purchase orders across the relationship.

The 20 systems provided to Chung Shan Medical University were donated by Clinico and are therefore presented as an institutional deployment and reference use case, rather than as incremental sales by Audeara. The Company is not providing additional revenue guidance in connection with this deployment beyond the purchase orders previously disclosed to the market.

Audeara CEO, James Fielding, commented:

“When we announced the Clinico Auracast™ purchase orders in March, the key milestone was commencement of the white-label programs. Seeing those products now launched under the Clinico brand and deployed into a university environment is the progression we want shareholders to see — from development, to order, to product, to real-world use.

“Clinico has deep hearing-health capability in Taiwan and an established distribution footprint. This deployment is a practical reference case for shared audio in education, while also demonstrating how Audeara can scale its technology through partner-branded products and established regional channels.”

This announcement has been authorised by the board of Audeara Limited.
