WHITEHAWK SELECTED BY BELL FEDERAL SYSTEMS TO PURSUE U.S. FEDERAL GOVERNMENT OPPORTUNITIES UNDER NASA'S US\$60 BILLION SEWP VI PROGRAM

Highlights

- **Selected by Bell Federal Systems (BFS) to pursue U.S. Federal Government opportunities:** WhiteHawk has been selected and onboarded into the NASA network to support opportunities under BFS's NASA Solutions for Enterprise-Wide Procurement (SEWP) VI Category C prime contract.
- **Introduced by U.S. partner Knowledge Preservation (KP):** The selection follows an introduction by WhiteHawk's New York based partner, demonstrating the partner-led growth strategy in action.
- **Expanded access across U.S. Federal Government procurement channels:** NASA SEWP VI provides a government-wide procurement framework for technology products and services, with ordering scheduled to commence from 1 November 2026.
- **Opportunity to pursue multiple requirements:** SEWP VI provides a 10-year contracting channel through which WhiteHawk can pursue multiple opportunities as US Government agencies identify their requirements and BFS, as prime contractor, coordinates relevant requests for quotation (RFQs).

Sydney, NSW and Virginia, USA - WhiteHawk Limited (ASX: WHK) ("WhiteHawk" or "the Company") is a cybersecurity solutions and services company providing automated cyber risk assessment, monitoring and mitigation solutions, mobile application security and AI governance capabilities to help governments, enterprises and critical infrastructure organisations identify, manage and mitigate cyber and digital risks.

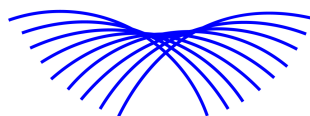

NASA SEWP VI Partnership

WhiteHawk was introduced to Bell Federal Systems (BFS) by its U.S. partner, Knowledge Preservation (KP), a specialist in information governance and data management.

BFS, a NASA SEWP VI Category C prime contract holder, selected WhiteHawk to pursue relevant U.S. Federal Government procurement opportunities. NASA SEWP is an established government-wide procurement program used by U.S. Federal civilian and defence agencies to acquire technology products and services. SEWP VI, the next generation of the program, has a reported aggregate procurement ceiling of US\$60 billion over 10 years across three categories (A, B and C).

Under the proposed arrangement, BFS will identify and coordinate relevant Requests for Quotation (RFQs) within the scope of the program, with WhiteHawk preparing technical and commercial responses for BFS to submit as prime contractor. Any resulting work will be subject to the relevant procurement process and the successful award of individual orders.

The partnership provides WhiteHawk with an additional route to market through an established U.S. Federal Government procurement channel. The US\$60 billion program ceiling represents the broader procurement framework and does not represent revenue contracted to, or forecast for, WhiteHawk.

About the Partners

Bell Federal Systems (BFS). BFS is a U.S. small business federal government contractor and a NASA SEWP VI Category C prime contract holder. Category C provides a procurement pathway for mission-based IT services and solutions across U.S. Federal Government agencies, including cybersecurity, cloud services, AI and machine learning (ML), data analytics and AI governance. Under the partnership, BFS intends to identify relevant federal agency opportunities, coordinate the submission of proposals through its prime contract, and work with WhiteHawk to deliver solutions where WhiteHawk's capabilities align with agency requirements. Any resulting work will be subject to applicable procurement processes, proposal selection and the award of individual orders.

Knowledge Preservation (KP). KP is a U.S. specialist in information governance and data management. Its expertise includes information governance frameworks, records retention and regulatory compliance, data privacy, defensible data disposal, and knowledge management strategies that help organisations protect, organise and retain access to critical information. These capabilities complement WhiteHawk's cybersecurity and AI governance offerings, particularly in helping organisations manage information-related risks, strengthen compliance and protect sensitive data.

CEO Comment

WhiteHawk Chief Executive Officer, Adrian Vallino, said:

"Being selected by Bell Federal Systems is a meaningful step for WhiteHawk and a strong example of our partner-led growth strategy in action. SEWP VI provides us with an additional route to pursue U.S. Federal Government opportunities through an established prime contractor, leveraging our existing cybersecurity and AI governance capabilities without having to navigate every procurement process independently."

"I would like to thank Knowledge Preservation, whose introduction helped bring this opportunity forward, and Bell Federal Systems for selecting WhiteHawk as a partner. Our focus now is on identifying the opportunities that best match our strengths, making considered decisions about where to bid, and maximising our chances of converting those opportunities into orders."

Forward-Looking Statements

This announcement contains forward-looking statements, including statements regarding future procurement and partnership opportunities, potential customer engagements, the commencement of SEWP VI ordering and the Company's future commercial prospects. Forward-looking statements are based on current expectations and assumptions and are subject to risks, uncertainties and other factors, many of which are outside the Company's control. Actual outcomes may differ materially from those expressed or implied by these statements. The Company does not undertake to update any forward-looking statement except as required by law or the ASX Listing Rules.

This announcement has been authorised for release by the Board of Directors.
