

21 October 2026

ASX Announcement

Quarterly Activities Report

Kingfisher Mining Limited (**ASX:KFM**) ("**Kingfisher**" or the "**Company**") is pleased to present the quarterly activities report for the period ending 30 September 2026.

Highlights for the September Quarter.

- ① Reported significant Copper Blow copper-gold drilling results, including
 - **26m @ 2.57% Cu and 0.75g/t Au from 73m and**
 - **43m @ 1.32% Cu and 0.32g/t Au** from surface, further extending mineralisation and supporting ongoing resource development activities.
- ① Reported high-grade silver-lead-zinc drilling results from the Allendale Project, including
 - **9m @ 8.05% Pb+Zn and 17.9g/t Ag from 64m.**
- ① Reported the Company's maiden drilling results from Stephens Trig confirming significant silver-lead-zinc mineralisation, including
 - **5m @ 7.4% Pb+Zn and 10g/t Ag from 79m including 2m @ 17.5% Pb+Zn and 24g/t Ag.**
- ① Received drilling approvals for the next Copper Blow drilling program, with planning and preparations now in the final stages ahead of commencement. The program is designed to expand known copper-gold mineralisation and test priority geophysical targets identified through recent geological and geophysical reviews.
- ① Subsequent to quarter end, the Company secured commitments to raise approximately \$2.25 million to accelerate exploration activities at Copper Blow and across its wider Broken Hill portfolio

Broken Hill Project, NSW

During the quarter, Kingfisher's exploration activities focused on advancing its Broken Hill Project portfolio through the interpretation and evaluation of drilling results reported from the Copper Blow, Allendale and Stephens Trig prospects. The results further demonstrated the prospectivity of the Company's copper-gold and silver-lead-zinc assets and continue to support the advancement of a pipeline of projects with potential to leverage existing mining and processing infrastructure within the Broken Hill region.

Work completed during the period included ongoing geological modelling, target generation, geophysical review and drill planning activities aimed at progressing the Company's portfolio of copper-gold and silver-lead-zinc opportunities. Planning and preparations for the next phase of drilling at Copper Blow also advanced during the quarter, with drilling approvals received and final preparations underway ahead of a follow-up drilling program.

The Company's exploration strategy continues to be supported by the Mining and Processing Cooperation Agreement with Broken Hill Mines (see ASX: KFM "KFM & Broken Hill Mines Enter Mining & Processing Agreement" dated 4 March 2026). The agreement provides a framework for evaluating development opportunities across the Company's Broken Hill Project portfolio, including the potential utilisation of existing regional mining and processing infrastructure to reduce development costs and accelerate project advancement.

QUARTERLY ACTIVITIES

Copper Blow Copper-Gold Project (EL9840), Broken Hill, NSW (75% KFM: 25% BHM) During the quarter, the Company reported assay results from its recent reverse circulation drilling program at Copper Blow (see ASX: KFM "High-Grade Copper Intercepts at Copper Blow" dated 14 July 2026). The results included some of the highest-grade copper-gold intersections returned from the project to date and confirmed the continuation of broad zones of shallow copper-gold mineralisation within the North Zone.

Figure 1 Copper Blow - collar locations

(See ASX:KFM - 'High-Grade Copper Intercepts at Copper Blow' 14 July 2026).

Significant results reported during the quarter include:

- 26m @ 2.57% Cu and 0.75 g/t Au from 73m, incl. 13m @ 4.07% Cu and 1.20 g/t Au from 75m (26CBRC_081).
- 43m @ 1.32% Cu and 0.32 g/t Au from 0m, incl. 17m @ 2.46% Cu and 0.60 g/t Au from 16m (26CBRC_080).
- 58m @ 0.67% Cu and 0.15 g/t Au from 165m, incl. 11m @ 1.01% Cu and 0.27 g/t Au from 167m (26CBRC_082A).

Full assay results, including drill hole collar information and significant intersections, are presented in Table 1 of Appendix 1.

Figure 2 North Zone 26CBRC_080 and 26CBRC_081 Section A

Figure 3 North Zone - 26CBRC_082A Section B

The drilling extended high-grade sulphide mineralisation and demonstrated continuity both along strike and at depth. The results also reinforced the prospectivity of the broader Copper Blow trend and support further assessment of priority geophysical targets identified through recent geological and geophysical reviews.

Following receipt of the drilling results, the Company continued geological modelling, target generation and technical review activities aimed at supporting future exploration. These activities refined a pipeline of priority exploration targets, including several high-priority geophysical anomalies identified through recent geological and geophysical reviews. Planning and preparations for the next phase of drilling are now well advanced, with drilling approvals received and final preparations underway ahead of a follow-up drilling program in the coming quarter.

Figure 4 Copper Blow Magnetics

Figure 5 Broken Hill Projects Location plan

Stephens Trig Drilling Program (Ag-Pb-Zn) (EL9842 – 75% KFM : 25% BHM).

The Stephens Trig Prospect is located approximately 15 kilometres north of Broken Hill, New South Wales, and represents one of the largest poorly exposed Broken Hill-type (BHT) mineralised systems outside the main Line of Lode. Situated beneath shallow alluvial cover within a low-relief river valley system, the prospect is defined by a 1.5-kilometre-long lead-zinc geochemical anomaly and hosts multiple zinc-rich mineralised horizons.

As previously reported, the Company completed its maiden reverse circulation (RC) drilling program at Stephens Trig, comprising 5 RC holes for 584 metres. The program represented the first drilling undertaken at the prospect in almost a decade and was designed to improve geological understanding of this underexplored silver-lead-zinc system.

During the quarter, the Company reported assay results from the first drilling undertaken at Stephens Trig in almost a decade (see ASX: “High-Grade Silver-Lead-Zinc Mineralisation Confirmed at Stephens Trig” dated 1 September 2026). The results successfully validated historical mineralisation and confirmed the presence of significant high-grade silver-lead-zinc mineralisation within the broader Broken Hill-style mineralised system.

Significant results reported during the quarter included:

- **5m @ 7.4% Pb+Zn** and 10g/t Ag from 79m, incl. **2m @ 17.5% Pb+Zn** and 24g/t Ag from 79m (26STRC_018) and
- **4m @ 3.2% Pb+Zn** and 11g/t Ag from 67m, incl. **1m @ 8.3% Pb+Zn** and 36g/t Ag from 70m (26STRC_018).
- **4m @ 2.7% Pb+Zn** and 4g/t Ag from 82m, incl. **1m @ 5.2% Pb+Zn** and 2 g/t Ag from 83m (26STRC_019).
- **1m @ 9.3% Pb+Zn** and 40 g/t Ag from 85m and **1m @ 1.5% Pb+Zn and 198 g/t Ag** from 111m (26STRC_020)

Full assay results, including drill hole collar information and significant intersections, are presented in Table 2 of Appendix 1.

The drilling confirmed the continuity of mineralisation along strike and at depth, while also demonstrating a strong association between high-grade lead-zinc mineralisation and elevated silver grades. The results provide important validation of the historical exploration dataset and further enhance the prospectivity of the broader Stephens Trig mineralised corridor beneath shallow cover.

Subsequent work during the quarter focused on integrating the drilling results with historical geological and drilling data to refine the geological model, assess the broader scale potential of the mineralised system and identify priority targets for follow-up exploration. Stephens Trig has emerged as a significant addition to the Company's growing portfolio of high-grade silver-lead-zinc opportunities within the Broken Hill district.

Figure 6 Stephens Trig - Collar locations

Figure 7 Cross Section A (+/- 20m)

Allendale Drilling Program (Ag-Pb-Zn) (EL9842 – 75% KFM : 25% BHM)

The Allendale Project is located approximately 40 kilometres north of Broken Hill and represents one of the Company's key silver-lead-zinc exploration assets within its broader Broken Hill portfolio. The prospect extends over a prospective 2.5-kilometre strike length and is hosted within complexly deformed metasedimentary rocks of the Broken Hill Group, which host structurally controlled high-grade silver-lead-zinc (Ag-Pb-Zn) mineralisation.

As previously reported, the Company completed its maiden reverse circulation (RC) drilling program at Allendale comprising 9 RC holes for 802 metres. The program was designed to validate historical drilling results, improve the Company's understanding of the geological controls on mineralisation and assess the broader scale potential of the mineralised system.

During the quarter, the Company reported assay results from the drilling program which confirmed the presence of significant high-grade silver-lead-zinc mineralisation and successfully validated historical exploration results (see ASX: "Drilling Confirms High-Grade Lead-Zinc-Silver Mineralisation at Allendale" dated 18 August 2026). The results demonstrate continuity of mineralisation along strike and at depth and further support the prospectivity of the broader Allendale mineralised trend.

Significant results reported during the quarter included:

- ① **9m @ 8.05% Pb+Zn** and 17.9 g/t Ag from 64m, incl. **5m @ 10.37% Pb+Zn** and 23.2 g/t Ag from 65m and
- ① **4m @ 6.12% Pb + Zn** and 22.7 g/t Ag from 78m incl. **1m @ 12.53% Pb + Zn** and 30.1 g/t Ag from 81m (26ADRC_052)
- ① **7m @ 3.32% Pb+Zn** and 7.9 g/t Ag from 37m, incl. **3m @ 5.42% Pb+Zn** and 13.2 g/t Ag from 38m (26ADRC_050).

- ① **7m @ 1.90% Pb + Zn** and 5.9 g/t Ag from 5m incl. **4m @ 2.49% Pb + Zn** and 6.5 g/t Ag from 8m (26ADRC_054)
- ① **2m @ 5.63% Pb + Zn** and 41.5 g/t Ag from 38m incl. **1m @ 9.51% Pb + Zn** and 61 g/t Ag from 54m (26ADRC_051)
- ① **4m @ 2.27% Pb + Zn** and 5.5 g/t Ag from 18m incl. **1m @ 7.41% Pb + Zn** and 6.6 g/t Ag from 20m (26ADRC_053)

Full assay results, including drill hole collar information and significant intersections, are presented in Table 3 of Appendix 1.

Figure 8 Allendale - Collar locations

The results confirmed the presence of high-grade mineralisation from near-surface through to depth and provide further evidence of the continuity of mineralisation within the Allendale system. The drilling has contributed valuable geological information that will support ongoing interpretation and assessment of the broader mineralised trend.

Subsequent work during the quarter focused on integrating the drilling results with historical exploration datasets to refine the geological model, assess the continuity and geometry of the mineralised lodes and identify priority targets for follow-up exploration. Allendale remains one of the Company's highest-priority silver-lead-zinc projects and forms an important component of the Company's broader Broken Hill growth strategy.

Figure 9 Cross Section 6503140N (+/- 20m)

Wellington Copper-Gold Project (EL 8971) Macquarie Arc, NSW, (100% KFM): Located within the Macquarie Arc and hosted by favourable volcanic stratigraphy, the Wellington Project is strategically positioned approximately 15km from the significant Boda-Kaiser porphyry copper-gold deposits. Geological and geophysical reviews remain focused on identifying key magnetic signatures characteristic of large-scale porphyry copper-gold systems that may be concealed beneath shallow cover.

Planning for a targeted airborne geophysical survey continued during the quarter. The survey is designed to refine exploration targeting and assist in generating the first drill targets within the project area. The Company continues to advance planning for the survey, with completion anticipated as soon as practicable.

Figure 10 Location plan Wellington project
 (Total metal endowment from Harris et al 2020, Alkane 2024, Regis 2023 and Evolution 2023)

Corporate

The Company closed the quarter with \$0.876M in cash, details are provided in the Appendix 5B report. Together with Kingfisher's shareholding in Black Cat Syndicate Ltd (BC8:ASX) and Dreadnought Resources Limited (DRE:ASX), the Company's cash and listed investments currently stand at approximately \$1.984M based on the BC8 and DRE closing prices on 30 September 2026. Payments reported in Section 2.1(d) of the Appendix 5B for exploration and evaluation during the quarter totalled \$0.226M. Payments reported in Section 6 of the Appendix 5B, which relate to Directors and include Director fees and superannuation during the quarter totalled \$0.092M.

Capital Raise

Subsequent to the end of the quarter, the Company announced a placement to raise approximately \$2.25 million (before costs) through the issue of new fully paid ordinary shares at an issue price of \$0.075 per share.

Funds raised are intended to support the advancement of exploration activities at the Company's Copper Blow Project, including upcoming drilling programs designed to expand known copper-gold mineralisation and test priority geophysical targets identified through recent geological and geophysical reviews. The funds will also support regional exploration activities across the Company's broader Broken Hill Project portfolio.

The placement significantly strengthens the Company's funding position and provides flexibility to accelerate exploration programs across its portfolio of copper-gold and silver-lead-zinc assets.

This announcement has been authorised by the Board of Directors of the Company.

About Kingfisher Mining Limited

Kingfisher Mining Limited (ASX:KFM) is a mineral exploration company committed to increasing value for shareholders through the acquisition, exploration and development of mineral resource projects throughout Australia. The Company's NSW tenure covers approximately 640km² with a portfolio of early stage and advanced Copper-Gold and Silver-Lead-Zinc projects, over 3 proven mining districts.

Information Sources

The information contained in this announcement related to the Company's past exploration results is extracted from, or was set out in, the following ASX announcements which are referred to in this Quarterly Activities Report:

- The report released 25 July 2025 'Strategic Acquisition of Precious and Base Metals Portfolio'
- The report released 4 March 2026 'KFM & Broken Hill Mines Enter Mining & Processing Agreement'
- The report released 14 July 2026 'High-Grade Copper Intercepts at Copper Blow'
- The report released 18 August 2026 'Drilling Confirms High-Grade Lead-Zinc-Silver Mineralisation at Allendale'
- The report released 01 September 2026 'High-Grade Silver-Lead-Zinc Mineralisation Confirmed at Stephens Trig'

Forward-Looking Statements

This announcement may contain forward-looking statements which involve a number of risks and uncertainties. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and assumptions based on currently available information. Should one or more of the risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. No obligation is assumed to update forward-looking statements if these beliefs, opinions, and estimates should change or to reflect other future developments.

8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	876
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.7
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 21 October 2026

Authorised by: By the Board of Kingfisher Mining Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
