

ASX ANNOUNCEMENT

ASX: CDE | 28th October 2026

QuantumAI Secure Trade Mark Registered in Australia

- QuantumAI Secure name and logo registered as an Australian trade mark (No. 2636106) in Classes 36 and 38
- CDE to develop quantum secure messaging app addressing concerns of messaging being fed into Large Language Models (LLMs) by popular social media platforms
- Registration covers electronic funds and digital asset transfer services, and secure data transfer and secure email services
- Protection runs from 16 March 2026 to 16 March 2036, renewable thereafter

Codeifai Limited (ASX: CDE) ("Codeifai" or "the Company") advises that IP Australia has registered the QuantumAI Secure trade mark, comprising the QuantumAI Secure name and shield logo, in the name of the Company.

The registration was granted on 26 October 2026 following examination and completion of the two month opposition period. It takes effect from the filing date of 16 March 2026 and remains in force until 16 March 2036.

About QuantumAI Secure

QuantumAI Secure is a secure self-service platform for quantum secure file transfers and payments, using lattice-based post-quantum encryption designed to resist both classical and quantum computing attacks. Features include payment-locked file sharing, secure messaging workflows and two factor authentication. Codeifai acquired the QuantumAI Secure technology in February 2026, as announced to ASX on 16 February 2026.

CDE's research indicates that Consumers are becoming concerned that global, social media first platforms such as Meta's messenger and WhatsApp can feed messages into AI Large Language Models (LLMs) in the channels. Users in markets where Apple has leading market share (US, Germany, Canada, Australia and the UK) are considered to be top prospects for a new messaging platform which offers quantum secured messaging where the users messages are not being fed into LLMs.

The same consumer product can be utilized by businesses in the financial services, healthcare, and legal fields who look for a privacy first solution.

A messaging product that deploys a code stack that's private and fully in control by the business will give confidence that this product is confidential and not hackable by third parties.

Scope of registration

The trade mark is registered in two classes:

- Class 36: electronic transfer of crypto assets; electronic transfer of cryptocurrency; electronic funds transfer; funds transfer services; management of transferable securities
- Class 38: secure email services; secure electronic mail services; data transfer and data transfer services; wireless transfer of data via wireless application protocols

The registration gives the Company exclusive rights to use the QuantumAI Secure brand in Australia for these services and supports enforcement against confusingly similar marks.

Chairman John Houston said: *"We are pleased to have this Trade Mark registered so that the Quantum AI Secure product can now be deployed with additional features and market applications such as Quantum Secured messaging."*

This announcement has been authorised by the Board of Codeifai Limited.

About Codeifai Limited

Codeifai is a self-service SaaS company by design and by strategy, operating at the intersection of artificial intelligence, post-quantum cryptography, and serialised data technology. The Company enables brands, manufacturers, and enterprises to connect deeper, faster, and more securely.

The world's security is fragile, and data needs organisation and analysis. CDE's technology can change that.
