No Ore Reserves have currently been defined on the Pinnacles JV Gold Project, nor the Wallbrook Gold Project. There has been insufficient exploration and technical studies to estimate an Ore Reserve and it is uncertain if further exploration and/or technical studies will result in the estimation of an Ore Reserve. The potential for the development of a mining operation and sale of ore from the Pinnacles JV Gold Project or the Wallbrook Gold Project has yet to be established.

Conceptual Design Only

NSW MINERALS PROJECT

- / Over 7,500km² of prospective tenure
- / First mover advantage allows for regional scale exploration targeting with one of the largest pegging exercises in NSW history
- / Exploration for a range of minerals

Gold - Copper – LCT – Tin - Tungsten

- / LCT pegmatites are associated with highly fractionated, reduced S-type Silurian granites that often also host tin and tungsten mineralisation
- / The Wagga-Omeo Zone (WOZ) – host to extensive emplacement of Silurian granites and tin mining operations and occurrences
- / Hence WOZ is determined to be highly prospective for LCT pegmatites and associated tin mineralisation
- / The WOZ extends ~700km in a north-south direction and averages ~80km east-west

NSW MINERALS PROJECT

7,500KM² “MEGA PEG”

- / A review of open file geology and whole-rock geochemistry confirmed that much of the exploration ground granted in southern NSW is underlain by reduced, fractionated, peraluminous S-type granites
- / Southern Geoscience Consultants have completed the interpretation and targeting exercise covering the project area
- / Numerous high priority target zones have been identified that are considered prospective for gold, copper, LCT pegmatites and tin mineralisation
- / The targeting exercise reviewed geological and geophysical data with the aim being to identify mineralisation “signatures”
- / These signatures, in conjunction with structural setting, structural complexity, dilatational settings (faults/shear zones) and proximity to known mineral occurrences identified the priority target zones
- / Field crews to continue ground truthing and orientation sampling of priority targets
