ASX ANNOUNCEMENT

ASX: CDE | 29th October 2026

ProtectCode on Amazon Marketplace, new Canva app, costs held

Key Highlights

- New ConnectQR app released on the Canva Apps Marketplace on 1 September 2026
- ConnectQR app for ChatGPT and Claude built and now in directory review
- ProtectCode™ listed on AWS Marketplace, can be purchased through customers' AWS account
- QuantumAI Secure trademark registered by IP Australia
- Cost controls maintained, with staff costs steady on the June quarter
- ConnectQR user accounts reach 8,753 with no direct sales force

Overview

During the quarter, Codeifai took its self-service products beyond its own websites and into the platforms where customers already work. Canva released a new ConnectQR app on its Apps Marketplace in September. Since quarter end, the Company has developed ConnectQR as an app for ChatGPT and Claude, now in review with both platforms, and listed ProtectCode on AWS Marketplace. Every one of these channels feeds the same self-service products, tiers and pricing, with no marginal acquisition cost and no direct sales force.

QuantumAI Secure (www.quantumaisecure.com.au), ConnectQR (www.connectqr.ai) and ProtectCode, with its BrandReporter supply chain module (www.protectcode.io), are each sold through dedicated websites, so the Company can sell each product repeatedly at low incremental cost, the core economic advantage of the self-service SaaS model. The free ConnectQR tier continues to acquire users organically and internationally. The Company's focus is converting that engaged user base into paid ConnectQR tiers, ProtectCode and BrandReporter.

ConnectQR in ChatGPT and Claude

Subsequent to quarter end, on 12 October 2026, the Company announced that it had developed ConnectQR as marketplace connector also known as an app for ChatGPT and Claude. ConnectQR has been submitted to the ChatGPT app directory and the Claude Connectors Directory and is in each platform's review process.

How it works

- A user asks ChatGPT or Claude in plain language for a QR code, for example "make a QR code for my café menu that I can change later". ConnectQR creates the code inside the conversation.
- No account is needed to start. Saving a code prompts sign-in, and a new ConnectQR account can be created at that step.
- With an account, users can create dynamic codes with short URLs and scan tracking; find, rename, pause and restyle codes; and view scan analytics by country, city, operating system, browser and content type, all without leaving the conversation.
- Accounts created through ChatGPT or Claude sit on the same self-service tiers and pricing as web sign-ups.

Why it matters

- **Discovery is moving to AI assistants.** A growing share of users now ask an assistant to do a task rather than search for a tool to do it. When a user asks ChatGPT or Claude for a QR code, ConnectQR can be the tool that does the work, rather than one link in a page of search results.
- **Scale of audience.** OpenAI reports that ChatGPT reaches 1.2 billion people each week (5 October 2026), and Anthropic reports more than 300,000 business customers for Claude. These are platform figures, not ConnectQR's addressable market, but they show the size of the audience in which ConnectQR will be found once listed.
- **One build, several assistants.** ConnectQR is built on the Model Context Protocol (MCP), the open standard ChatGPT and Claude both use to connect to outside apps. The same integration can be extended to other assistants that adopt the standard at little additional development cost.
- **Dynamic codes lead to paid tiers.** A dynamic code keeps working after it is printed, and the user returns to edit, manage and track it. That ongoing need is what ConnectQR's paid tiers are built around.
- **No acquisition cost.** The channel adds users without paid advertising or a sales team, consistent with the Company's self-service model.

ConnectQR on the Canva Apps Marketplace

Building on the original ConnectQR integration, Canva released a new ConnectQR QR Codes app on the Canva Apps Marketplace on 1 September 2026, following Canva's app review and security process. Canva users can add static and dynamic QR codes directly into designs such as packaging, posters, menus and business cards, and update the destination of a dynamic code after it is printed or published. The app is free to install on any Canva plan, and dynamic codes lead to ConnectQR's paid tiers for code management, editing and analytics. Canva reported more than 265 million monthly active users at the end of 2025.

ProtectCode™ on Amazon Marketplace

Subsequent to quarter end, on 27 October 2026, the Company announced that ProtectCode had been listed on Amazon's AWS Marketplace, the Amazon Web Services catalogue through which AWS customers find, buy and manage software.

How it works

- ProtectCode is listed as a SaaS product. An AWS customer can subscribe from the listing and pay through its existing AWS account, with charges appearing on its AWS bill.
- Once subscribed, customers integrate ProtectCode into their ERP, warehouse and packaging line systems through the same public REST API available at www.protectcode.io.

Why it matters

- **Removes the procurement hurdle.** ProtectCode's buyers are brand owners and manufacturers. For these companies, setting up a new software supplier through procurement, legal and finance often takes longer than the decision to buy. Buying through AWS Marketplace uses a supplier relationship the customer already has.
- **Low cost of sale.** AWS charges a 3% listing fee on public SaaS subscriptions. The Company pays for the channel only when it makes a sale.
- **Timing.** Demand for serialised, unit-level codes is building ahead of the GS1 Sunrise 2027 target for 2D barcode scanning at retail point of sale and the EU Digital Product Passport. AWS Marketplace places ProtectCode where enterprise buyers already purchase software as they plan for these changes.

As announced on 15 June 2026, ProtectCode is also sold through its own website at www.protectcode.io. ProtectCode provides serialised, unit-level QR codes that turn each product into a connected asset, capturing first-party consumer data and enabling product integrity monitoring, aligned to GS1 Digital Link, the EU Digital Product Passport and traditional export markets.

QuantumAI Secure Trademark Registered by IP Australia

Further to the Company's Quarterly Activity Report of 30 April 2026, which advised that a trademark application for QuantumAI Secure had been lodged with IP Australia, and the subsequent acceptance of that application on 16 May 2026, the Company announced on 28 October 2026 that the trademark (No. 2636106) has been registered by IP Australia 16 March 2026

Registration gives the Company exclusive rights to use the QuantumAI Secure mark in Australia for the registered classes of goods and services 36; 38, strengthening its intellectual property position in the quantum secure communications and payments market.

ConnectQR Self-Service Traction

ConnectQR is the free entry point to the Connect platform, offering dynamic and static QR codes, branded landing pages and real-time scan analytics, and serving as the on-ramp to the Company's paid ConnectQR tiers, ProtectCode and BrandReporter.

Self-service traction (internal analytics):

- Cumulative user accounts: 8,753 as of 28 Oct. 26 (7,313 at 30 July 2026)
- Global reach: sign-ups and usage span the United States, Australia, India, the Philippines and other markets, achieved through fully self-service acquisition.

Subsequent to quarter end, user accounts reached 8,541 at 8 October 2026, as announced on 12 October 2026, and 8,753 on 28 October 2026

Conversion is the priority. Work under way includes targeted email campaigns to free users who have reached their free code allowance, better tracking of sign-up and post-sign-up activity, and a simpler email verification step to reduce drop-off at sign-up.

Cash Flow and Costs

Please read the detailed 4C Annexure for details.

On 22 July 2026 the Company completed a placement of 110 million shares at $0.007 to sophisticated and professional investors, raising $770k before costs, for product development, business development and working capital.

Payments to related parties and their associates of $42k (Item 6.1 of the Appendix 4C) comprise directors' fees and salaries.

Commentary

John Houston, Executive Chairman said: *"This quarter we put our products where customers already are. ConnectQR has a new app in Canva and is in review to go inside ChatGPT and Claude, and enterprise customers can buy ProtectCode on AWS Marketplace through an account they already hold. None of these channels needs a sales team, and we have held costs steady while building them. Our job now is conversion, turning these users into paying subscribers, and we will report on that each quarter."*

About Codeifai Limited (ASX: CDE)

Codeifai Limited (ASX: CDE) is a self-service SaaS company by design, by strategy. The company sells and operates high-margin, self-service SaaS platforms at the intersection of artificial intelligence, post-quantum cryptography, and serialised data technology. Our platforms enable brands, manufacturers, enterprises, and end users to connect deeper, faster, and securely with their customers, supply chains, and data, with the AI and security infrastructure to protect it. The world's security is fragile, and data needs organisation and analysis. CDE's technology can change that.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Capital raise	-	-
7.2	Loan facilities (including bank overdraft)	2,925	925
7.3	Other (ATM facility)	130	0
7.4	**Total financing facilities**	3,055	925

7.5	**Unused financing facilities available at quarter end**	2,130

76 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

Answer:

Note to item 7.2 (above)

In Q3 2024 Codeifai signed a Loan Facility Agreement to provide up to $2 million in additional working capital with Harbour Capital Opportunities Fund Pty Limited ("HCOF"). Under the Loan Facility Agreement, Codeifai will be able to draw down $250,000 per month. The funding facility provides the Company with additional financial flexibility to focus on growing revenues from its Self-services SaaS AI analytic driven ConnectQR business. Shareholder approval for the HCOF Loan Facility was received at the Company's Annual General Meeting (AGM) dated May 8th 2025.

The company entered into a loan facility with J F Houston Holdings Pty Limited (JFH) for A$750,000 as reported at the last Quarter 4C. Interest is payable on amounts advanced under the facility at a reference NAB facility rate plus 19%. The loan and interest are repayable by CDE in 12 months unless repaid earlier, extended by mutual agreement or converted into shares. At the end of the Quarter $750k has been drawn under the facility. The loan has now been extended until 31 December 2026 and further shareholder approval for conversion will be sought if required.

In addition the Company has a further loan of $175,000 from Flannery Foundation Pty Limited, bearing an interest rate of 25% pa.

Note to Item 7.3 (above)

The Company established an "At-The-Market" (ATM) equity-based facility with Dolphin Corporate Investments (DCI) on 2 November 2023, currently capped at 130m shares (just under 5% of the shares on issue). The facility's capacity depends on share price and available capacity during the request and option exercise period, fluctuating over time. The Company cannot sell shares above the number of shares issued to DCI at any time which is currently 130m, or request DCI to exercise options above the nominated floor price. DCI may choose to decline or partially exercise options to buy shares.

The ATM is considered a "sold contingent option," activated by the Company and subject to DCI's discretion. To align with Australian Accounting Standards and ensure transparency, the Company has reported ATM facility availability in item 7.3, reflecting conditions precedent for the funding.

8.	Estimated cash available for future operating activities	$A'000
8.1	Net cash from / (used in) operating activities (item 1.11)	(521)
8.2	Cash and cash equivalents at quarter end (item 4.6)	376
8.3	Unused finance facilities available at quarter end (item 7.5)	2,130
8.4	Total available funding (item 8.2 + item 8.3)	2,506
8.5	**Estimated quarters of funding available (item 8.4 divided by item 8.1)**	4.8

Note: if the entity has reported positive net operating cash flows in item 1.9, answer item 8.5 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.5.

8.6 If item 8.5 is less than 2 quarters, please provide answers to the following questions:

8.6.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

8.6.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.6.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.5 is less than 2 quarters, all of questions 8.6.1, 8.6.2 and 8.6.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 29 October 2026

Authorised by: The board of Directors

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on

its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – e.g., Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
