ASX RELEASE

Cortical Dynamics selected for Mayo Clinic Platform Accelerate — October 2026 cohort

MEDIA RELEASE

PERTH, Australia — 29 October 2026 — BPH Energy Limited (ASX: BPH) is pleased to announce investee company Cortical Dynamics Limited, a medical device and health technology company developing advanced AI enhanced perioperative patient monitoring technology for hospitals, surgery and clinicians, today confirmed it has been selected to participate in the October 2026 cohort of Mayo Clinic Platform Accelerate.

Mayo Clinic Platform Accelerate works with digital health companies over a structured program providing access to Mayo Clinic Platform data and capabilities, and engagement with Mayo Clinic experts. Details of the October 2026 cohort are available on the Mayo Clinic Platform cohort landing page: https://newsnetwork.mayoclinic.org/discussion/mayo-clinic-platform-accelerate-welcomes-its-largest-cohort-of-digital-health-companies/

Cortical Dynamics is advancing two products: BARM 2.0 and CORDYAN ™: BARM 2.0 measures what happens to a patient's brain under anaesthesia and CORDYAN™, a perioperative software platform intended to give hospital teams predictive information across the surgical pathway.

Through the program, the Company intends to further validate and refine its approach to perioperative monitoring and prediction, and to test how its technology performs against data environments at scale.

> *"Participation in Mayo Clinic Platform Accelerate gives us access to expertise and data capabilities that are directly relevant to the questions we are working through, and we intend to use the program to sharpen the evidence base behind both products."*
>
> — Ashley Zimpel, Chief Executive Officer, Cortical Dynamics Limited

Cortical Dynamics will provide further updates on its participation in due course.

About Cortical Dynamics Limited

Cortical Dynamics Limited develops advanced brain monitoring technology for use in surgery and critical care. Its BARM™ 2.0 monitor and single-use BarSensor™, together with the CORDYAN™ software platform, are designed to give anaesthetists and hospital care teams clearer information about a patient's brain state during and around surgery.
