ASX Announcement
30 October 2026

SECURED KEY PURCHASE ORDER

Range International Limited (ASX: **RAN**) (**Company**) manufacturer of Re>Pal™ 'zero-waste' plastic pallets, is pleased to announce it has received a key purchase order from a new client.

In the Quarterly Activities report and Appendix 4C for the September Quarter released on 27 October 2026, the Company announced that:

> "After the end of the quarter, the Company has progressed a number of pipeline opportunities as follows:
>
> - A major Indonesian 3PL with two clients, one being a state-owned enterprise operating throughout Indonesia, and the other a large Indonesian private company, has been successfully testing a variety of Re>Pal's pallets. These clients are looking to replace their entire wooden pallet fleet over time. Consequently, one of them has advised us that it will issue a PO for 500 pallets to expand its testing program, with the prospect of a further PO for 35,000 pallets in late Q4 or early Q1 2027, and more significant orders later in CY27. The 3PL has indicated that the 2027 order volume will require us to source a significant quantity of raw materials, as the required pallets for this project alone are over 3 times our FY25 record pallet sales. In addition, we will need to acquire a new mould and welding table to fulfil the order in 2027 and 2028, at an estimated cost of $US100,000. The free cash flow generated from these orders would eliminate the need to enter into funding arrangements for the rental pallet production discussed below. The initial PO for 500 pallets may be issued in the first half of November, with the delay due to the approval processes state-owned enterprises must complete."

The Company is now pleased to announce that confirmation of the Purchase Order (PO), from a state-owned enterprise operating throughout Indonesia, for an initial 500 pallets was received during the evening on October 29 2026, significantly earlier than we anticipated. This PO is for immediate manufacture, delivery, and payment.

We are optimistic that we can plan production effectively to ensure smooth fulfillment of the large 3PL PO for 35,000 pallets while also satisfying existing sales and rental orders from other clients. At the new Surabaya factory, we can scale quickly with flexible staffing, the 4 extruder lines, and by running one, two, or three shifts, five, six, or seven days a week. We believe the large PO will be forthcoming in the next few weeks, as the client has indicated they want delivery as soon as possible, preferably close to year-end. If the larger PO is received and executed, the impact would be to increase our forecast production in Q4 from 33,654 pallets to at least 49,254 pallets, and the balance of the 3PL order will be completed in addition to our other production in Q1 2027. Whilst there is no certainty that these POs will be received, for the reasons noted above, the Company remains confident that these will be secured in the near term.

Furthermore, following successful delivery of this first large order, the Company believes that it will be able to continue to build on the momentum to significantly larger POs during FY 27.

This announcement has been approved for release by the Board of the Company.
