QUARTERLY ACTIVITIES REPORT

Quarter ended 30 September 2026

Heavy Minerals Limited (ASX: HVY) (Heavy, HVY or the Company) presents its Quarterly Activities Report for the quarter ended 30 September 2026. The quarter saw the Company's maiden Ore Reserve take effect and the Port Gregory Pre-Feasibility Study released to market, while Front End Loading Stage 3 engineering study work continued at Kanmantoo.

Key highlights

- **Maiden Ore Reserve and PFS delivered.** The Port Gregory Ore Reserve took effect on 8 July 2026 and the Pre-Feasibility Study was released to market on 29 July 2026: 85.5 Mt at 4.43% THM for 3.3 Mt of contained garnet, a 24-year mine life and a post-tax NPV of A$322.8 million.
- **Kanmantoo FEL-3 progressed.** Front End Loading Stage 3 continued to advance the engineering definition required for a Final Investment Decision, across both the 50,000 tpa and 100,000 tpa (two-train) cases priced by IHC Mining.
- **Product qualification continued with prospective distributors.** Representative product samples were prepared for qualification and testing.
- **Funding sequenced behind the studies.** Project funding discussions continued across bonds, debt, royalties and prepay structures. The Company continued to draw on previously announced facilities for operational funds.
- **Continued access to previously announced facilities.** A$1,728,000 remained unused under the Acuity Capital ATM facility at quarter end.
- **Annual General Meeting.** The Notice of Annual General Meeting was released to ASX on 28 October 2026; the meeting will be held on 30 November 2026.

Commentary from Executive Chairman, Mr Adam Schofield

"The September quarter delivered the Company's maiden Ore Reserve and the release of the Port Gregory Pre-Feasibility Study to the market, the culmination of the work completed by AMC Consultants, IHC Mining and Mining Insights. At Kanmantoo, FEL-3 study work continued across both the 50,000 and 100,000 tonne per annum plant configurations as we move toward a Final Investment Decision under our agreement with Kantra Copper Limited (ASX: KAN, formerly Hillgrove Resources Limited). With the Port Gregory study now complete, project funding discussions can be advanced against completed technical work. We thank shareholders for their continued support and look forward to seeing them at the Annual General Meeting on 30 November 2026."

Adam Schofield, Executive Chairman

Port Gregory Garnet Project

Pre-Feasibility Study and maiden Ore Reserve

The consultants' reports were signed in early July 2026. The maiden Ore Reserve took effect on 8 July 2026 and the Pre-Feasibility Study was released to market on 29 July 2026. The outcomes below are drawn from that announcement.

Table 1: Port Gregory PFS outcomes, as released 29 July 2026

Measure	Result
Maiden Ore Reserve (Probable)	85.5 Mt at 4.43% THM for 3.3 Mt contained garnet
Mine life	24 years
Post-tax NPV (real, 8% discount rate)	A$322.8 million
Post-tax IRR	47.6%
Development capital (incl. owner's costs)	A$122.1 million
NPV to development capital	2.64x
EBITDA (life of mine)	A$1.34 billion
Peak funding requirement	Approximately A$89.5 million

Source: ASX announcement 29 July 2026, Port Gregory Garnet Project Pre-Feasibility Study. The production target and the forecast financial information derived from it are underpinned by the Ore Reserve and, to a lesser extent, by Inferred Mineral Resources representing approximately 5.7% of mill feed. Refer to that announcement for the full material assumptions.

Mineral Resource

The Port Gregory Garnet Project hosts a JORC (2012) Mineral Resource of 166 Mt at 4.0% Total Heavy Minerals (Measured 126 Mt at 3.8%, Indicated 20 Mt at 6.5%, Inferred 20 Mt at 2.9%) for 5.9 Mt of contained garnet, reported at a 2% THM cut-off. The estimate is unchanged from that last reported to ASX on 10 July 2023.

Kanmantoo Hard Rock Waterjet Garnet Project

The Company's Kanmantoo operations are underpinned by a binding Tailings Processing Agreement with Kantra Copper Limited (ASX: KAN), executed on 27 January 2026, over the tailings stream at the Kanmantoo Copper-Gold Mine. The Company will recover Hard Rock Almandine Waterjet Garnet from Kantra’s live tailings stream and the Kanmantoo Tailings Storage Facility. Initial production is targeted at 50,000 tonnes per annum, with potential to scale to 100,000 tonnes per annum subject to permitting and Final Investment Decision.

Front End Loading Stage 3

FEL-3 study work continued through the quarter, advancing the engineering definition required to support a Final Investment Decision across both the 50,000 tpa and the 100,000 tpa (two-train) plant configurations priced by IHC Mining, with final selection subject to that decision.

Red Hill Garnet Project

Following receipt of the QXRD assay results reported in the June quarter, the Company continued planning toward a Mineral Resource estimate under the JORC Code 2012 Edition.

Corporate

Customer engagement and market development

Distribution discussions continued with potential distributors and end-users across the waterjet and abrasive-blast garnet markets, with representative product samples prepared for qualification and testing. These discussions are exploratory and non-binding: no commercial terms have been agreed, no binding offtake quantities or pricing have been settled, and no counterparty selection has been made.

Project-build funding

Securing construction funding for the Kanmantoo and Port Gregory projects remained a principal corporate priority. In order of the Company's preference, the instruments under evaluation are bonds; debt funding; royalties; prepay and offtake-linked structures; and potentially government grant programmes and equity. Discussions remain preliminary and non-binding. No counterparty selection has been made, no binding terms have been reached, and no quantum or closing date is presently disclosable. The Company will update the market in accordance with its continuous-disclosure obligations.

Business development

During the quarter the Company commenced due diligence on a potential industrial minerals acquisition. There is no certainty that any transaction will proceed.

Cash and working capital

The Company closed the quarter with A$39,000 in cash. Net cash used in operating activities was A$342,000, comprising staff costs of A$107,000, administration and corporate costs of A$228,000 and interest and other costs of finance of A$7,000. Net cash used in investing activities was A$167,000, comprising exploration and evaluation expenditure of A$164,000 and property, plant and equipment of A$3,000. Net cash from financing activities was A$511,000, comprising A$80,000 from the issue of equity securities, A$369,000 from the exercise of options and A$80,000 of royalty funding, less A$5,000 of transaction costs and A$13,000 of repayments.

Table 2: Summary of Appendix 5B cash flows (A$'000)

Appendix 5B item	Current quarter	Year to date (3 months)
1.9 Net cash used in operating activities	(342)	(342)
2.6 Net cash used in investing activities	(167)	(167)
3.10 Net cash from financing activities	511	511
4.1 Cash at beginning of period	37	37
4.6 Cash and cash equivalents at 30 September 2026	39	39
7.3 ATM facility, limit and amount drawn	**2,000 / (272)**	**-**
7.5 Unused financing facilities at quarter end	1,728	-
8.7 Estimated quarters of funding available	3.5	-

Source: Appendix 5B lodged with this report. No figure in this table is derived or estimated.

The Company continued to access previously announced facilities: the Tranche 2 Royalty Funding Programme and the Acuity Capital At-the-Market (ATM) facility. The ATM facility has a limit of A$2,000,000, of which A$272,000 was drawn at quarter end, leaving A$1,728,000 unused. 3,290,000 Collateral Shares are held by Acuity Capital under the facility. Use of the facility is at the Company's discretion. During the quarter the Tranche 2 Royalty Funding Programme received A$80,000 of royalty funding. On 18 August 2026 the Company announced an ATM Raise.

Payments to related parties during the quarter totalled A$107,000, being directors' salaries, fees and superannuation included in operating cash flows (Appendix 5B item 6.1). Related-party payments within investing activities (item 6.2) were A$5,000, being consultancy services provided by a non-executive director relating to the Port Gregory Project.

Annual General Meeting and securities

The Notice of Annual General Meeting and Proxy Form, a Letter to Shareholders and a Proposed issue of securities (Appendix 3B) were released to ASX on 28 October 2026, following the Update to Date of Annual General Meeting released on 21 October 2026. The Annual General Meeting will be held on 30 November 2026. The Appendix 3B notified a proposed issue of up to 6,750,000 unquoted performance rights, expiring 4 years from grant date with vesting conditions, as a remuneration incentive, subject to shareholder approval at the Annual General Meeting on 30 November 2026 (proposed issue date 1 December 2026). The material terms are set out in the Notice of Annual General Meeting.

Tenements

The Company's interests in its principal tenements were unchanged during the quarter. No tenements were granted, surrendered or forfeited, and no applications changed status between 30 June 2026 and 30 September 2026, as reflected in the Schedule of Tenements below.

Events after the end of the quarter

- 2 October 2026: Annual Report to shareholders, Corporate Governance Statement and Appendix 4G released.
- 2 October 2026: Reinstatement to Quotation.
- 5 October 2026: "Red Hill Moves to Maiden Resource - Garnet Dominates Samples" released.
- 8 October 2026: Date of AGM and Closing Date for Director Nominations released.
- 9 October 2026: Proposed issue of securities (Appendix 3B) released.
- 20 October 2026: Notification regarding unquoted securities, Application for quotation of securities, s708A Notice and Change of Directors' Interest Notices released.
- 21 October 2026: Update to Date of Annual General Meeting released.
- 28 October 2026: Notice of Annual General Meeting/Proxy Form, Letter to Shareholders and Proposed issue of securities released.

Outlook for the December 2026 quarter

- Progression toward a Final Investment Decision on Kanmantoo on completion of FEL-3.
- Advancement of project-build funding discussions against the completed Pre-Feasibility Study.
- Red Hill Mineral Resource estimation work.
- Continued distributor qualification and market-development activity.
- Annual General Meeting on 30 November 2026.

Authorisation

This announcement has been authorised for release by the Board of Heavy Minerals Limited.

About Heavy Minerals Limited

Heavy Minerals Limited (ASX: HVY) is an Australian listed industrial mineral exploration and development company. The Company's projects are prospective for industrial minerals including but not limited to garnet, zircon, rutile and ilmenite.

The Company owns 100% of the Port Gregory Garnet Project in Western Australia, which hosts a Mineral Resource of 166 Mt at 4.0% THM containing 5.9 Mt of garnet. The Pre-Feasibility Study released on 29 July 2026 reports a maiden Probable Ore Reserve of 85.5 Mt at 4.43% THM for 3.3 Mt of contained garnet, a 24-year mine life and a post-tax NPV of A$322.8 million.

The Company has entered into a Binding Tailings Processing Agreement with Kantra Copper Limited (ASX: KAN) to produce garnet from the Kanmantoo Copper Mine tailings in South Australia, with a target production rate of 50,000 tonnes per annum and the potential to expand to 100,000 tonnes per annum. The Kanmantoo Garnet Exploration Target was reported to ASX on 9 March 2026 in the announcement "Kanmantoo Garnet Exploration Target".[1]

The Company also owns 100% of the Red Hill Garnet Project in Western Australia, where a Mineral Resource estimate is being defined, and holds a 70% interest in the Inhambane heavy mineral sands project in Mozambique. The Red Hill Exploration Target was reported to ASX on 4 May 2023 in the announcement "Red Hill Assay Results - Exploration Target Revised".[2]

The Inhambane Mineral Resource was reported to ASX on 6 December 2021 in the announcement "Mineral Resource Increased at Inhambane to 90 Mt at 3% THM".[3]

The Company confirms that it is not aware of any new information or data that materially affects the information included in those announcements. An Exploration Target is conceptual in nature; there has been insufficient exploration to estimate a Mineral Resource and it is uncertain that further exploration will result in the estimation of a Mineral Resource.

Competent Person statements

Mineral Resources

The information in this report that relates to the Port Gregory Mineral Resource estimate, the Inhambane Inferred Mineral Resource and the Red Hill Exploration Target is based on, and fairly represents, information and supporting documentation prepared, compiled and reviewed by Mr Greg Jones (FAusIMM), who is a Non-Executive Director of the Company and a full-time employee of Mineral Technologies. Mr Jones is a Fellow of the Australasian Institute of Mining and Metallurgy and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being reported on, to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Jones has reviewed this report and consents to the inclusion in the report of the matters based on his information in the form and context in which they appear.

Ore Reserves

The information in this report that relates to the Port Gregory Ore Reserve estimate is based on, and fairly represents, information prepared under the direction of Mr Adrian Jones, a full-time employee of AMC Consultants Pty Ltd and a Member of the Australasian Institute of Mining and Metallurgy. Mr Jones is the

[1] Kanmantoo Garnet Exploration Target, ASX announcement 9 March 2026. https://heavyminerals.com/announcements/20260308-kanmantoo-garnet-exploration-target-6A1315298.pdf

[2] Red Hill Assay Results and Exploration Target - Revised, ASX announcement 4 May 2023. https://heavyminerals.com/announcements/20230504-red-hill-assay-results-exploration-target-revised-6A1148783.pdf

[3] Mineral Resource Increased at Inhambane to 90 Mt at 3% THM, ASX announcement 6 December 2021. https://heavyminerals.com/announcements/20211205-mineral-resource-increased-at-inhambane-to-90mt-at-3pc-thm-6A1067130.pdf

Competent Person for the Port Gregory Ore Reserve estimate and has sufficient experience relevant to the style of mineralisation, type of deposit and open pit mining methods under consideration to qualify as a Competent Person as defined in the JORC Code (2012). Mr Jones consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

Exploration Targets

The information in this report that relates to Exploration Target estimates is based on and fairly represents information and supporting documentation prepared, compiled and reviewed by Mr Robert Wason BSc (Hons) Geology, MSc (Mining Geology), a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Wason is an employee of Mining Insights. Mr Wason has sufficient experience relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Wason consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears.

Previously reported estimates

The Company confirms that it is not aware of any new information or data that materially affects the information included in the announcements referred to in the About Heavy Minerals Limited section of this report, and that all material assumptions and technical parameters underpinning those estimates continue to apply and have not materially changed.

Forward-looking and cautionary statements

The potential quantity and grade of an Exploration Target is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource and it is uncertain that further exploration will result in the estimation of a Mineral Resource.

The Port Gregory production target referred to in this report is underpinned by the Company's maiden Ore Reserve and, to a lesser extent, by Inferred Mineral Resources representing approximately 5.7% of mill feed. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources, or that the production target or the forecast financial information derived from it will be realised.

This report contains forward-looking statements concerning the Company's plans for its projects, including the pathway to a Red Hill Mineral Resource estimate, completion of Kanmantoo FEL-3 and progression toward a Final Investment Decision, project-build funding, product distribution and qualification, and the outlook for the December 2026 quarter. Forward-looking statements are based on assumptions and judgements of management regarding future events and results, and involve known and unknown risks, uncertainties and other factors, many of which are outside the control of the Company. Actual results may differ materially. Investors should not place undue reliance on forward-looking statements, which speak only as at the date of this report. The Company does not undertake to update them except as required by law or by the ASX Listing Rules.

Schedule of Tenements

Table 3: Interests in mining tenements at 30 September 2026

Project	Tenement	Registered Holder	Status	Area (Ha)	Expiry	Interest 30 Jun 26	Interest 30 Sep 26

6.1	Aggregate amount of payments to related parties and their associates included in item 1	107
6.2	Aggregate amount of payments to related parties and their associates included in item 2	5

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

Item 6.1: Directors' salaries, fees and superannuation. Item 6.2: Consultancy services provided by a non-executive director relating to the Port Gregory Project (capitalised to exploration and evaluation expenditure).

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (At-The-Market Facility)	1,053	80
7.4	**Total financing facilities**	**1,053**	**80**

7.5	**Unused financing facilities available at quarter end**	1,053

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

The Company has an At The Market Facility (ATM) with a total facility limit of $1,053,000 ($80,000 drawn during the quarter; $840,000 drawn down in total). 3,290,000 Collateral Shares are held by Acuity Capital under the facility. The facility was topped up during the quarter following shareholder approval at the FY26 Annual General Meeting (Notice of Meeting dated 25 November 2025). Use of the facility is at the Company's discretion.

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(342)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(164)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(506)
8.4	Cash and cash equivalents at quarter end (item 4.6)	38
8.5	Unused finance facilities available at quarter end (item 7.5)	1,053
8.6	Total available funding (item 8.4 + item 8.5)	1,091
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	2.2

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: The Company operating cash outflows have reduced, and the Company is completing an in house engineering study for its Kanmantoo Garnet project which does not require significant expenditure ahead of potentially making an FID and raising build capital.

8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
Answer:	The Company will continue raising via its At-the-Market (ATM) Facility and its Tranche 2 Royalty programme in the coming quarters. The Company also has its full Listing Rule 7.1 and 7.1A capacity available. In parallel, project-build funding for the Kanmantoo and Port Gregory projects is being discussed across bonds, debt funding, royalties, prepay and offtake-linked structures, and potentially government grant programmes and equity.
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
Answer:	Yes, based on the explanation in 8.8.2.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2026

Authorised by: By the Board of Heavy Minerals Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
