ASX ANNOUNCEMENT **30 October 2026**

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 30 SEPTEMBER 2026

HIGHLIGHTS

- **Scorpion continues to progress expedited pathway to development and processing of Old Prospect Gold Deposit**
- **Updated open pit optimisation released post-quarter end identifies 314,565 tonnes at 1.6 g/t Au for 16,159 oz from two open pits at Old Prospect North and South**
- **New optimisation at $6,000/oz results in 203% more gold than earlier scoping study completed in 2024**
- **Significant exploration and expansion potential at Old Prospect exists in Exploration Target outside of current MRE with mineralisation open along strike and at depth**
- **Mining lease application M20/568 has progressed to the "Right to Negotiate" stage**
- **Scorpion has granted Andel Resources Pty Ltd the option to enter into a Right-to-Mine Agreement in relation to Old Prospect**
- **Andel is a related party of Gylden Resources, the owners of the Kirkalocka Processing Plant and surrounding Kirkalocka Gold Project where Old Prospect's material will be processed**
- **Scorpion has built the largest landholding along the Dalgaranga–Big Bell shear corridor which remains largely untested by exploration**
- **Assessment of regional consolidation and complementary project acquisition opportunities continues**

Scorpion Minerals Limited (ASX:SCN) (**Scorpion**, **SCN** or **the Company**) is pleased to present its Quarterly Activities Report for the period ended 30 September 2026.

Commenting on the September quarter, CEO Michael Fotios said: "*During the September quarter, our work centred on advancing the development opportunity at Old Prospect, culminating in the updated open pit optimisation announced after quarter end. Using a gold price assumption of A$6,000/oz, the optimisation provides a strong foundation for further mining studies, supported by an existing resource with 72% of contained gold in the higher-confidence Indicated category.*

Importantly, our agreement with Andel provides a pathway to processing at Kirkalocka, while progress on the Mining Lease application represents another important step towards development.

Alongside this work, we see considerable exploration upside, with high-grade historical drilling results and mineralisation remaining open along strike and at depth. Our focus remains on progressing Old Prospect's development pathway while testing opportunities to grow the resource."

Exploration & Development Portfolio Summary

Pharos Project, WA (SCN: 100%)

The Pharos Project is 100% owned by Scorpion and covers an area of approximately 900km^2 located 60km northwest of Cue in the Murchison Mineral Field, Western Australia (refer Figures 1 and 2). The project includes the Old Prospect Gold Deposit (refer Table 1) and the Mount Mulcahy Copper Deposit (refer Table 2), and is prospective for gold, lithium, tungsten, PGE-Ni-Cu, iron ore and VMS hosted Cu-Zn-Ag Au mineralisation.

Updated Open Pit Optimisation at Old Prospect

During the quarter, Scorpion commissioned an updated open pit optimisation study for Old Prospect, the results of which were released post-quarter end (refer ASX release 21 October 2026).

The updated open pit optimisation was revised using a gold price of A$6,000/oz to constrain the near-surface portion of the existing Mineral Resource Estimate at Old Prospect. Other relevant parameters and assumptions are detailed in the relevant ASX announcement. The purpose of the open pit optimisation is to demonstrate the reasonable prospects for eventual economic extraction (RPEEE) as defined in the 2012 JORC Code, as well as provide a basis for further scoping and mining studies.

The new pit optimisation completed at a gold price of A$6,000/oz contains a total of **314,565 tonnes at 1.60 g/t Au for 16,159 oz**, from single open pits at each of Old Prospect North and South (refer Figures 3 and 4). This represents an increase of 203% from a previous pit optimisation and scoping study completed in April 2024 (refer OZZ ASX release dated 9 April 2024) which assumed a gold price of A$3,000/oz.

Significant potential exists for expansion outside of the existing MRE, with mineralisation remaining open north-south along 650m of strike and at depth down dip/plunge. The Company has released an Exploration Target of **1.0 – 3.0 million tonnes grading at 1.5 – 2.0 g/t Au**[1] (refer ASX release 6 May 2026).

The Company has made share-based payments to its primary drilling contractor in consideration for future drilling work (refer ASX release 14 February 2025), with approximately $172,000 available to be applied to future invoices.

Andel Right-to-Mine Agreement and Pathway to Processing

Scorpion has entered into a binding option agreement (**Option Agreement**) with Andel Resources Pty Ltd (**Andel**) in relation to the Old Prospect tenements (refer ASX release 18 May 2026 and figures 1 and 2). Andel is a related party of Gylden Resources Pty Ltd (**Gylden**), the current owners of the Kirkalocka Processing Plant and surrounding Kirkalocka Gold Project, located approximately 70km south of Mount Magnet in Western Australia and only 200km from the Old Prospect tenements.

[1] The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource. Further details of the assumptions used in estimating the Exploration Target are included in the Company's ASX release dated 6 May 2026.

Andel and Gylden are owned by an affiliate of global investment firm Värde Partners (refer ASX release dated 29 October 2025). The Option Agreement grants Andel (or its nominee) the exclusive right to enter into a Right-to-Mine agreement (**RTM Agreement**) under which Andel will procure, manage and fund the provision of services to mine, process and transport gold bearing ore extracted from the Tenements (**RTM Option**).

Andel has paid Scorpion an option fee of $2,000,000 (plus GST) in consideration for granting the RTM Option (refer ASX release 9 June 2026). The option is exercisable by Andel for a period of one year from the date of execution, subject to the satisfaction/waiver of various conditions precedent. Full details of the Option Agreement and RTM Agreement are included in the Company's release dated 18 May 2026.

The Exploration Target includes oxide, transitional and sulphide mineralisation in a steep west-dipping and north-plunging zone with a strike of about 700 metres at surface. The Exploration Target only includes the wireframed Old Prospect mineralisation at a cutoff of 0.1 g/t Au tested by historic RC and DDH drilling (refer Figures 3 and 4).

Old Prospect Mining Lease Application

Scorpion has entered into a binding option agreement with Ozz Resources Limited (ASX:OZZ) to acquire a 100% interest in the Old Prospect tenements and related mining information (refer ASX release 23 December 2025). Approval from OZZ shareholders for the transaction was received in April 2026, allowing exercise of the option to proceed on an unconditional basis at Scorpion's election.

OZZ has submitted a Mining Lease Application (M20/568) over the previous Old Prospect tenements (refer ASX release 20 April 2026). The application has progressed through the objection period into the "Right to Negotiate" stage with Native Title Parties. Scorpion is working with OZZ to progress the application, with OZZ to prepare an updated mining study.

Scorpion has planned a total of 56 holes of infill and extensional drilling to test interpreted mineralisation to a depth of 170 metres below surface, with approximately 5,000 metres of reverse circulation (RC) drilling and 2,000 metres of diamond tails (refer ASX release 20 April 2026). Together with the updated pit optimisation, the results from this programme will inform an updated Mineral Resource Estimate and Mining Scoping Study.

Next Steps and Planned Activities

Key areas of focus over the coming months will include:

- *Heritage surveys*
- *Infill and extension RC drilling at Old Prospect to Middle Bore trend*
- *Mining studies and lodgement of a mining proposal*
- *Diamond drilling to test the mineralisation down plunge at depth and collect material for geotechnical/metallurgical assessment/test work.*
- *Follow-up RC drilling of selected regional targets – approx. 1500 metres*
- *Detailed (1:5000 scale) geological mapping*
- *50m line spaced Airborne Magnetic Survey – EIS co-funded*
- *Detailed lithostructural Interpretation utilising detailed mapping and air magnetics*

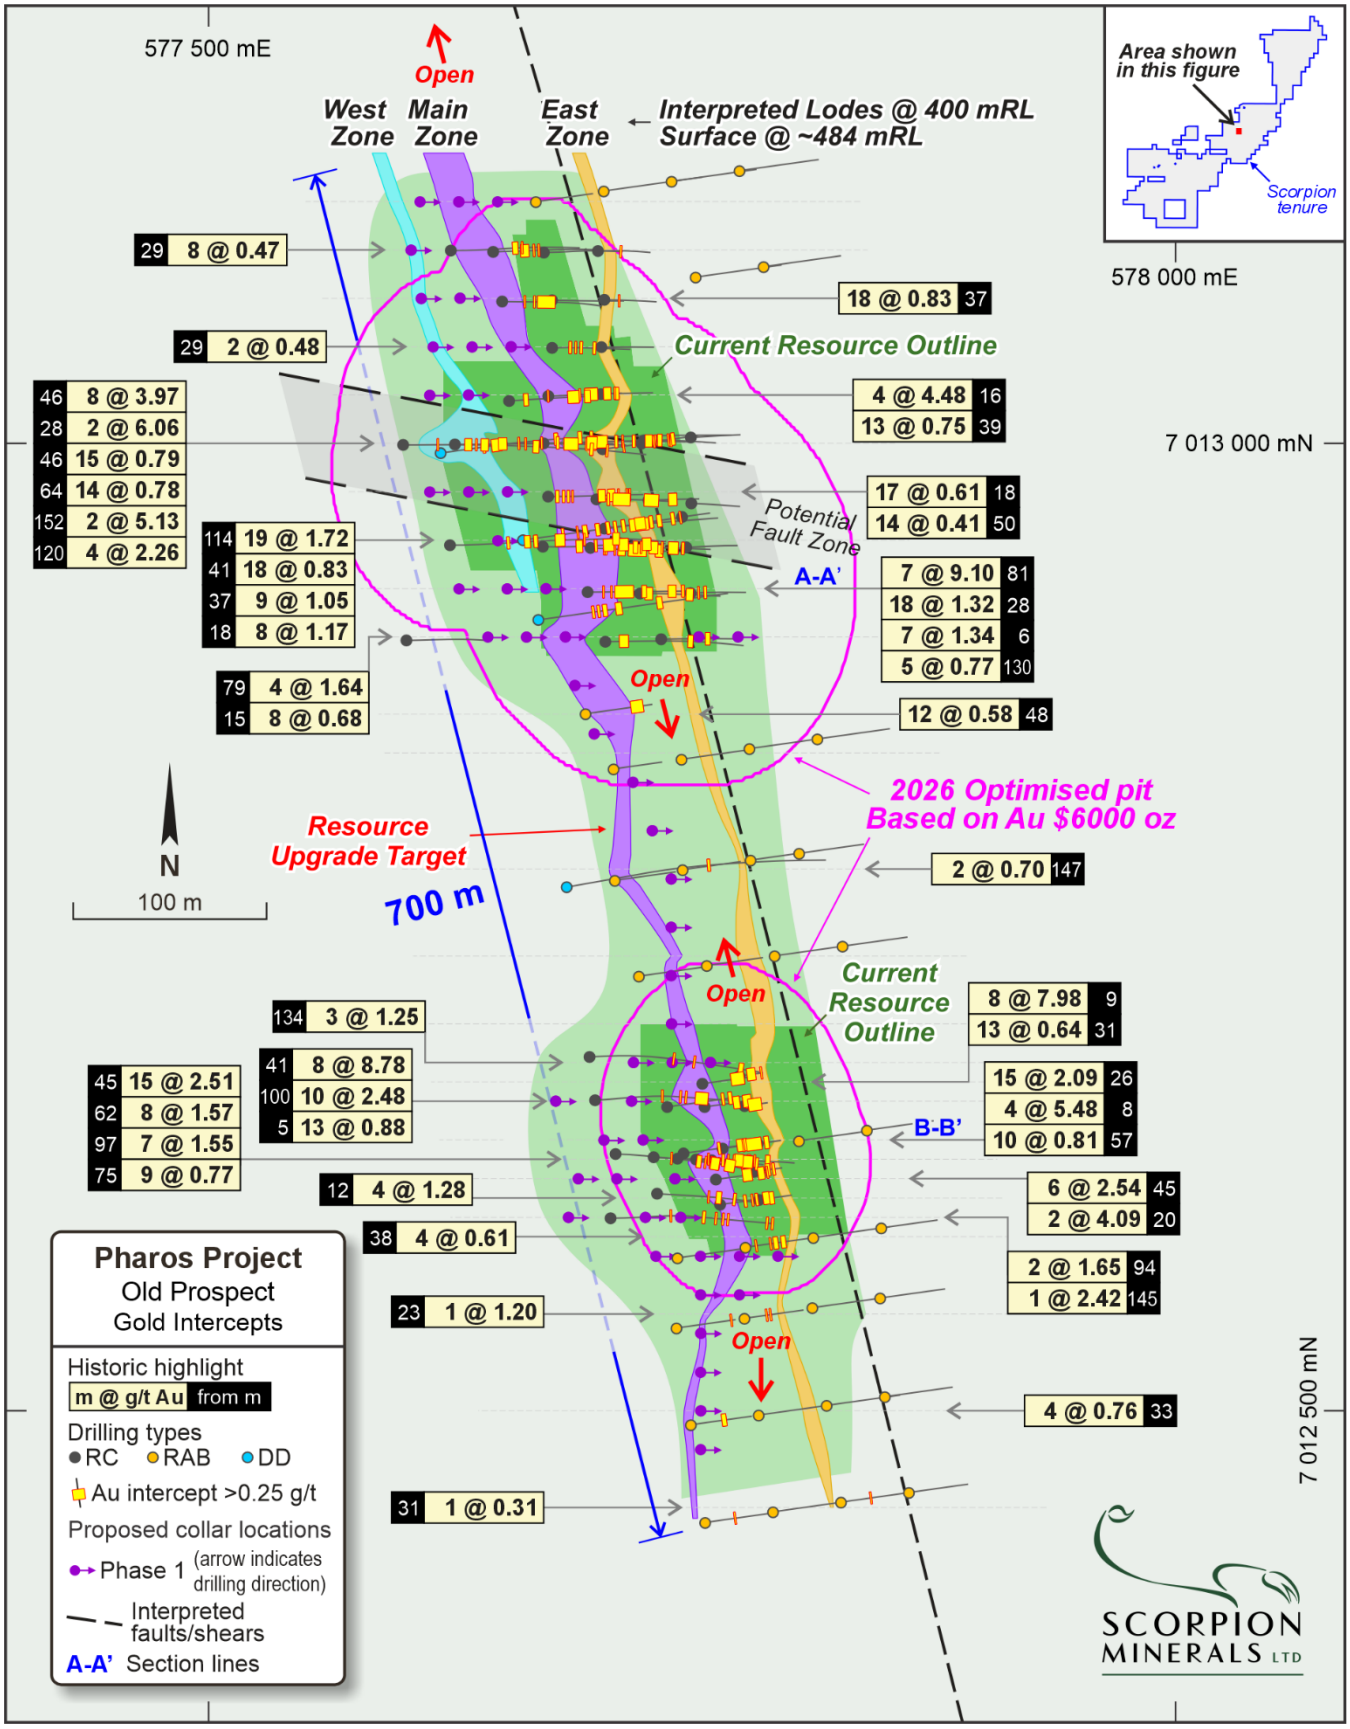

Figure 3: Old Prospect updated open pit optimisation and significant intercepts plan

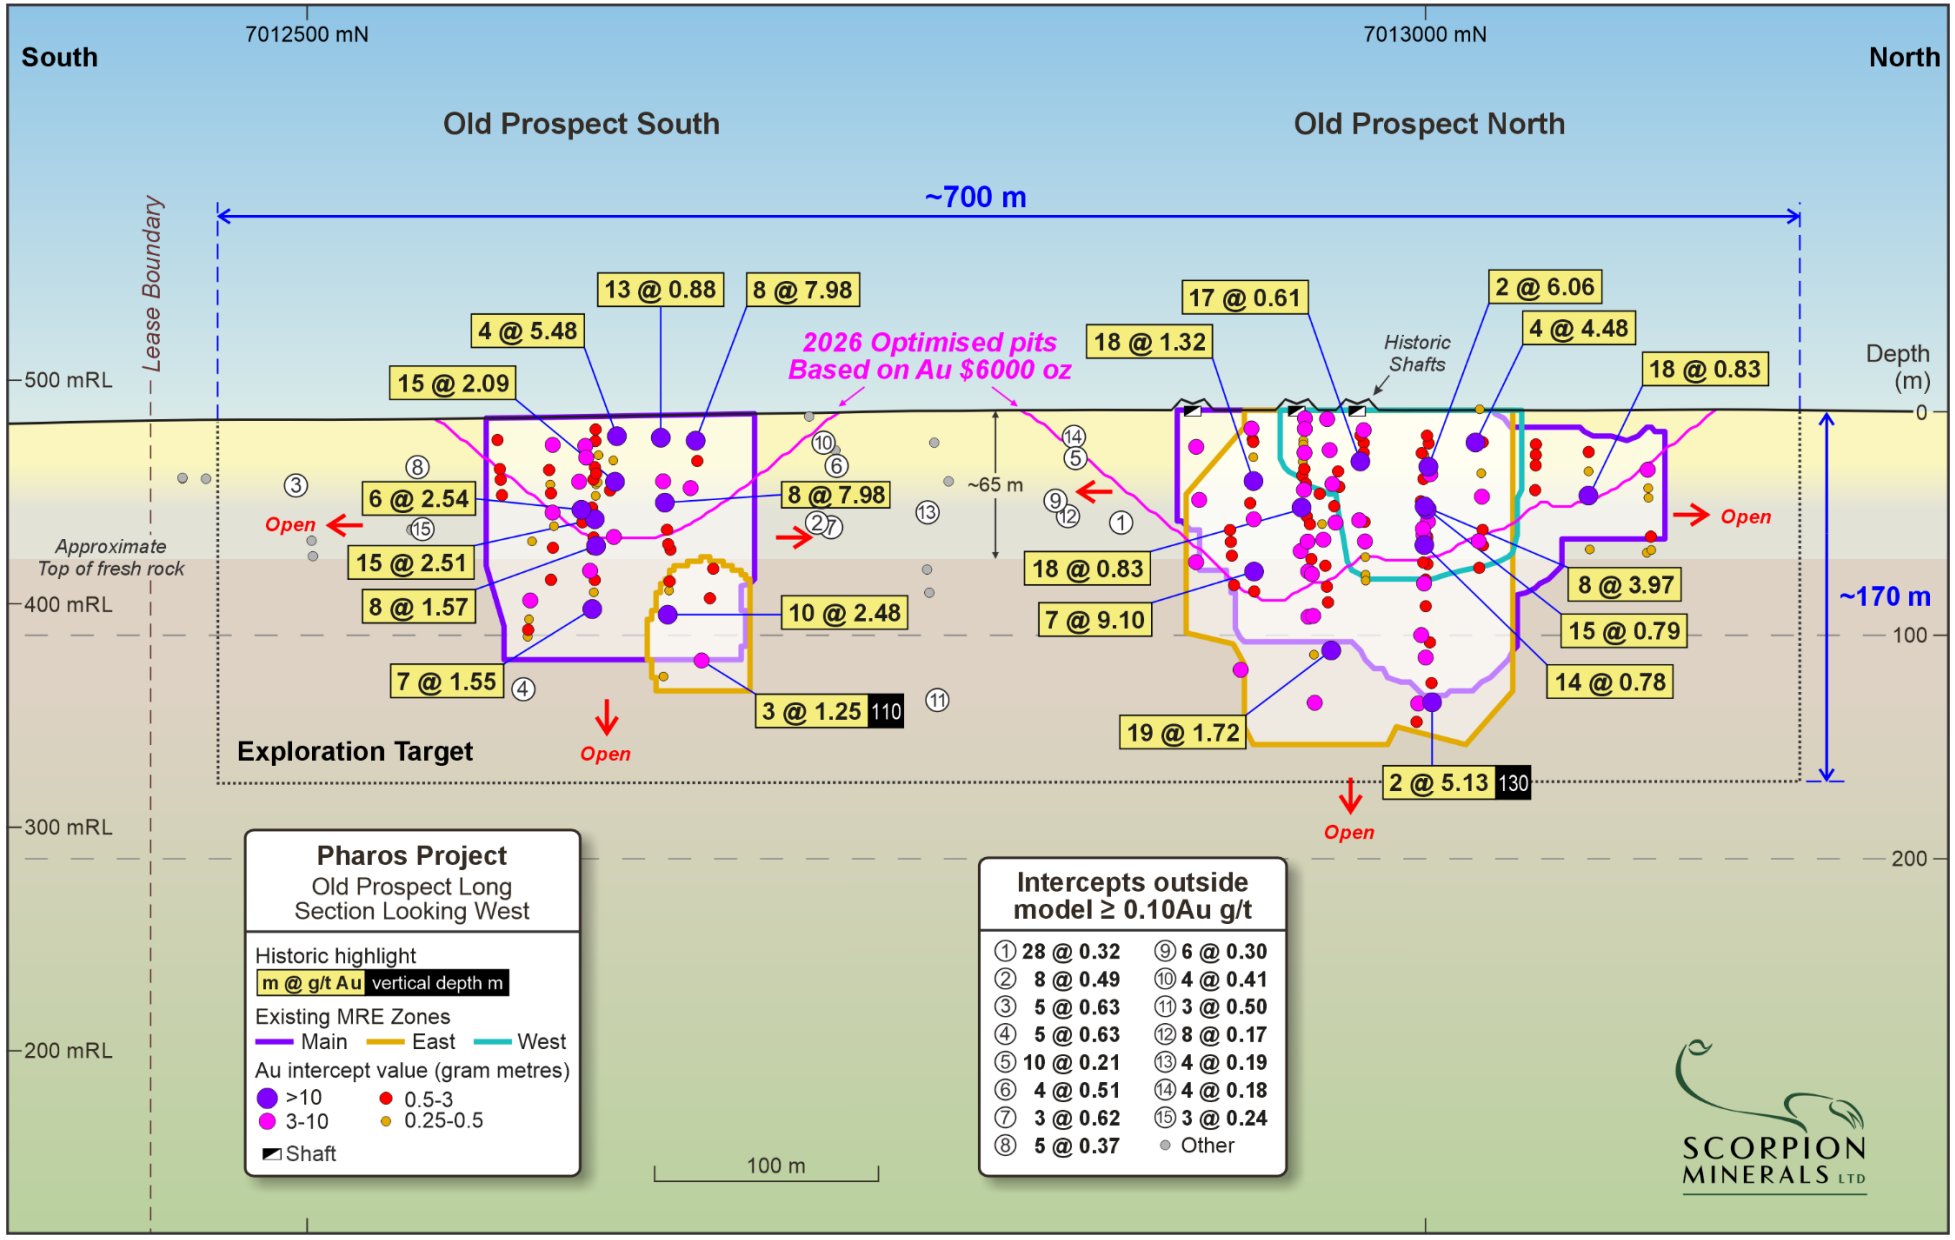

Figure 4: Old Prospect Long Section (looking west) with updated optimised pits

Kirkalocka, WA (SCN: 100%)

In conjunction with its activities with Gylden and Andel, Scorpion has been granted three exploration licences to the south-east of the Kirkalocka Processing Plant, covering 111km^2. These tenements provide further scale to the Company's regional exploration strategy, covering prospective stratigraphy on the eastern side of the greenstone belt north and south along strike from gold soil anomalies identified by previous explorers. No active field work was undertaken during the September quarter.

Jungar Flats JV, WA (SCN: earning to 70%)

Scorpion has entered into a binding farm-in and joint venture heads of agreement ("Heads of Agreement") with a wholly owned subsidiary of E79 Gold Mines Ltd ("E79") to acquire a majority stake in the Jungar Flats Gold Project (ASX release 14 February 2025). The Heads of Agreement provides for Scorpion to earn up to a 70% interest in the project by expending $3 million over a 5-year period including cash consideration and expenditure milestones.

The Jungar Flats project covers an area of about 700km^2 and abuts Scorpion's 100% owned Pharos Project to the east for a total holding of approximately 1600km^2 (refer Figure 1).

The JV agreement creates a cohesive project that is the largest holding in the region straddling a strike of about 60km along the Dalgaranga–Big Bell shear corridor and prospective NW trending. The main corridor remains untested and to the south hosts the Big Bell gold mine (Westgold) and is adjacent to the recent Never-Never and Pepper high-grade gold discoveries at Dalgaranga (Spartan). The area is primarily prospective for gold, however potential also exists for copper and lithium mineralisation.

Scorpion has finalised plans for a 37,200 line-kilometre airborne geophysics survey (magnetics and radiometrics) covering 1,850 km^2 at Pharos and the Jungar Flats JV tenements (refer Figure 1). A successful application has been made for funding under the Co-funded Geophysics Program, part of the Western Australian government's Exploration Incentive Scheme (EIS) (refer ASX release 29 April 2026).

Scorpion also plans to obtain additional high-resolution satellite imagery to cover the entire Pharos Project and the JV tenements. The imagery will be provided by Aerometrex with a capture area of 1,780km^2 at 11cm image resolution and a 1m elevation model.

The co-funded regional magnetic survey and subsequent lithostructural analysis outlined above will cover all of the JV tenements and provide vital information for target generation. Priority heritage survey areas have been defined in the Cap Lamp to Middle Bore trend, and a survey request is in the process of being lodged. A maiden RC drilling program is being developed to test advanced targets at Middle Bore.

Mt Mulcahy Copper Prospect, WA (SCN: 100%)

During the quarter, the Company continued to assess various options to unlock the value of the Mt Mulcahy Copper prospect within the Company's 100% owned Pharos Project in WA.

Scorpion continues to work through multiple options to progress Mt Mulcahy in a strengthening copper market. Further details on the Mt Mulcahy strategy will be provided in due course.

Mt Mulcahy summary – strategic copper asset in a prime location

An existing copper resource has been defined within the South Limb Pod zone of **647,000 tonnes @ 2.4% copper, 1.8% zinc, 0.1% cobalt and 20g/t Ag** (refer Table 2). A review has highlighted the potential scale of the copper-rich Volcanogenic Massive Sulphide (VMS) horizon which extends over 13.5km long and remains open along strike. Multiple untested VTEM conductors have bene located within the VMS horizon corridor to a depth of only 300m, with the horizon below this depth untested.

Previous exploration completed by Scorpion and others prior to 2014 included geological mapping, soil geochemistry, air magnetics, airborne VTEM survey (effective to about 300 metres depth only), percussion drilling (open hole and reverse circulation), diamond drilling and resource modelling/estimation.

A total of 85 holes have been completed for 10,304m from surveyed access to test South Limb Pod and West Copper (2 holes). Historic shallow percussion drilling has only tested to a maximum of 50 metres below surface (mbs) and was ineffective in locating sulphide mineralisation. These percussion holes have been used, where logging is available, to map the extent of the sediment hosted Volcanogenic Massive Sulphide (VMS) mineralisation around the Mt Mulcahy Syncline.

Mt Mulcahy is interpreted to be in a similar geological setting to Golden Grove with copper dominant mineralisation within a sediment hosted VMS horizon. At Mt Mulcahy historic exploration has been conducted along a 13.5km long zone to a depth of only 50 mbs apart from South Limb Pod and West Copper where drilling has tested to about 250 mbs. This compares to Golden Grove where several recent orebody discoveries along the 16km long VMS corridor are blind and/or extend to depths of up to 2200 mbs.

Corporate

Listing Rule 5.3.5 disclosures

Payments of approximately $36,000 were made to related parties and their associates during the quarter for directors' fees, company secretarial fees and superannuation.

This announcement has been authorised by the board of directors of the Company.

About Scorpion Minerals Limited

Scorpion Minerals Limited (ASX:SCN) is an Australian mineral exploration and resource development company with a focus on creating wealth for shareholders through the discovery of world-class deposits, over a diversified range of minerals. Our current efforts are centred on our Pharos Project located in the Murchison Province of Western Australia.

Pharos Project

The Pharos Project consists of approximately 900 square kilometres of granted tenure, located approximately 50 km northwest of the regional centre of Cue in the Murchison Mineral Field. The project is easily accessible from the Great Northern Highway by the sealed Jack Hills Mine access road and by unsealed roads. Scorpion holds a 100% interest in the project and a binding option to acquire the Old Prospect tenements within the project.

The Pharos Project is prospective for gold, lithium, VMS-hosted Cu-Zn-Ag Au, iron ore and PGE-Ni-Cu mineralisation, and contains the Old Prospect gold deposit and Mt Mulcahy copper deposit. The 'Old Prospect North' and 'Old Prospect South' zones of mineralisation contain a combined JORC 2012 Indicated and Inferred Mineral Resource Estimate of 312,395 tonnes @ 2.15 g/t Au for 21,632 oz Au (refer Table 1). The 'South Limb Pod' zone of mineralisation at Mt Mulcahy contains a JORC 2012 Measured, Indicated and Inferred Resource of 647,000 tonnes @ 2.4% copper, 1.8% zinc, 0.1% cobalt and 20g/t Ag (refer Table 2).

Competent Persons Statement 1

The information in this report that relates to Exploration Results, Exploration Targets and Mineral Resources at the Mt Mulcahy and Pharos Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Mining and Metallurgy. Mr Fotios is CEO of Scorpion Minerals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. Mr Fotios consents to the inclusion of the information in the form and context in which it appears.

Competent Persons Statement 2

The information in this report that relates to the Mt Mulcahy Mineral Resource is based on information originally compiled by Mr Rob Spiers, an independent consultant to Scorpion Minerals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Fotios. This information was originally issued in the Company's ASX announcement "Maiden Copper-Zinc Resource at Mt Mulcahy", released to the ASX on 25 September 2014. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

Forward Looking Statements

Scorpion Minerals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Scorpion Minerals Limited, its Directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever.

This announcement may contain forward-looking statements that are subject to risk factors associated with exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimate.

7.4	**Total financing facilities**	2,500	1,275

7.5	**Unused financing facilities available at quarter end**	1,225

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

The Company has an unsecured loan agreement with a syndicate of lenders. The facility limit is $2,500,000, interest rate is 8% p.a.

In addition to the above, the Company has made a successful application for co-funding of an airborne magnetic survey to the value of $196,505 (refer ASX release 29 April 2026). The Company has also previously issued shares to a drilling contractor as consideration for future drilling services (refer ASX 14 February 2025), with approximately $172,000 remaining available to be applied to future drilling invoices.

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(806)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(806)
8.4	Cash and cash equivalents at quarter end (item 4.6)	668
8.5	Unused finance facilities available at quarter end (item 7.5)	1,225
8.6	Total available funding (item 8.4 + item 8.5)	1,893

8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	2.3

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
Answer: N/A	
Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.	

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2026

Authorised by: By the Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
