# SEPTEMBER 2026 QUARTERLY ACTIVITIES REPORT

## ANNOUNCEMENT TO THE AUSTRALIAN SECURITIES EXCHANGE

## 30 OCTOBER 2026

## HIGHLIGHTS

### High-Grade Mabilo Copper and Gold Project – Philippines

- **JV Partners Remain Committed to Development Start-up:** RTG Mining and its Philippine partner - TVI Resource Development (Phils.) Inc. ("TVIRD"), are committed to a Final Investment Decision ("FID"). Mt. Labo continues to engage with the relevant Philippine mining authorities and is working as quickly as possible to address outstanding requests. While government processes remain slow, the Company remains focused on resolving these matters during the next quarter, which would position Mt. Labo to commit to development of the Mabilo Project.

- **Site Preparations Underway and Shortened Development Timeline**: Following FID, operational start-up of Stage 1, a Direct Shipping Operation ("DSO") is expected approximately eight months later, reflecting an expedited development schedule that has been reduced from the original nine-month estimate. Tree cutting has already commenced on lots, and the office and general administrative buildings are nearing completion of construction.

- **New Drilling Campaigns at the Mabilo Project Commenced**: Infill drilling of the high-grade chalcocite material for Stage 1 operations commenced during the quarter. Intercepts further identified potential for extensions to the chalcocite both north and south. Further drilling will be conducted following the sterilisation and geotechnical validation drilling, which is also planned to during the next quarter.

- **Development Activities at Mabilo Project Ramping Up**: In preparation for the commencement of Stage 1 operations, development activities including camp construction, increased community engagement and employment, cutting of secondary growth trees and coconut trees in Lot 20 and the construction of a new temporary office facility occurred.

- **Strong Upfront Cashflow**: Stage 1 targets the high-grade Supergene Chalcocite material at a ***reserve grade of approximately 21% Cu***, with current commodity prices supporting strong early cashflow from start-up.

- **Strong Copper Market Supports Mabilo Project Economics:** Copper prices remain elevated above US$6.00/lb, supported by structural supply deficits, tightening concentrate markets and sustained long-term demand from electrification, AI infrastructure and the global energy transition. These favourable market conditions continue to strengthen the economics of the Mabilo Project.

- **Low-Risk Initial Development:** Stage 1 of the Project comprises a DSO operation, with no processing plant construction required and development activities primarily limited to a pre-strip program.

- **Funding Secured for Stage 1 Start-up:** Binding term sheet for finance and offtake executed for start-up of Stage 1 high-grade (21% Cu) DSO:
    - Mt. Labo has entered into a strategic partnership with ***Glencore International AG ('Glencore')***, one of the largest natural resource companies in the world, to finance 100% of the planned capital expenditure for Stage 1 of the Mabilo Project.
    - Mabilo DSO operation will access the primary source of ore being the **0.104 Mt of supergene chalcocite material at an average reserve grade of 20.7% Cu, expected to produce approximately 25,200 tonnes of copper, with an additional 52,900 ounces of gold from other products.**
    - Glencore has reconfirmed their commitment to working with Mt. Labo on the Mabilo Project financing and offtake and has been supportive of the development plans.

## Chanach Gold and Copper Project – Kyrgyz Republic

- RTG holds a majority stake (90%) in the high-grade Chanach Gold and Copper Project ("Chanach Project") in the Kyrgyz Republic.

- Chanach continues to demonstrate clear potential to host both a high-grade, large Copper – Gold Porphyry-Skarn system, combined with a high-grade epithermal gold system.

- Follow-up field work commenced during the quarter with drilling and channel sampling activities.

- Diamond drilling targeted infill and extension drilling of the epithermal gold vein system and the high-grade skarns. By the end of the quarter, 16 holes for 1,730m had been completed.

- 55m of trenching was also completed during the quarter mainly targeting extensions to the epithermal gold system. A further 194m of trenching is planned for next quarter.

- The remainder of the drilling (approx. 250m) and further trenching will be completed next quarter. Assay results are also expected next quarter.

## Corporate Summary

- Cash and liquid assets as of 30 September 2026 were A$6.7 million.

RTG Mining Inc. (**ASX:RTG, TSX:RTG**) ("RTG" or "the Company") is pleased to provide its quarterly activities report for the period ended 30 September 2026.

RTG holds a 40% interest in Mt. Labo Exploration and Development Corporation ("Mt. Labo") which owns the near-term development and high-grade Mabilo Copper and Gold Project in the Philippines, together with a 2% Net Smelter Royalty and a loan of approximately US$27M, to be repaid out of the proceeds of the Stage 1 DSO.

## SUMMARY OF OPERATIONS

## PHILIPPINES INTERESTS – THE MABILO COPPER AND GOLD PROJECT

### Aligned JV Focus: Committed to DSO Start-up in the Near Term

RTG continues to work closely and collaboratively with its joint venture partner, TVIRD, maintaining a clear focus on progressing the Project towards start-up. While the pace of development progress remains dependent on government processes, both parties are working proactively to address outstanding requirements and prepare for development.

Importantly, the Mabilo Project has a significant advantage, with the first phase being a DSO operation, with limited capital expenditure requirements. In respect to the Stage 1 development, Mt. Labo has executed a binding finance and offtake term sheet to fund 100% of the planned capital expenditure. The Stage 1 development is underpinned by the **primary source of ore being the 0.104Mt of supergene chalcocite material at an average reserve grade of 20.7% Cu. Drilling is also underway to test extensions to the north of the high-grade supergene chalcocite material.**

***Glencore Financing Agreement***

As previously reported (see ASX announcement dated 6 March 2025), Mt. Labo entered into a strategic partnership with Glencore to finance 100% of the planned capital expenditure for Stage 1 of Mabilo. The secured financing facility provides for a total of up to US$30M (in three-tranches), on attractive terms, for the development of Stage 1 of the Mabilo Project as well as working capital requirements:

- *Tranche A (for US$3.5M) provides early funding flexibility to fund Stage 1 Project land acquisition (or reimburse at this stage), with limited conditions precedent;*
- *Tranche B provides US$21.5M for the balance of development of Stage 1 of the Project together with any working capital needs; and*
- *Tranche C provides US$5.0M for any additional working capital purposes subject to consent of both parties*

With important financing milestones now in place, Mt. Labo remains focused on finalising the coconut tree felling permits required before a commitment to development. While permitting continues to progress slowly through government processes, RTG and TVIRD's senior management meet fortnightly to address outstanding requirements and advance start-up planning.

### Mabilo Project: *Background Summary*

Mt. Labo has secured the Mining Permit, the successful Final Award in the SIAC matter, won the Setting Aside action of Galeo Equipment Corporation ('Galeo') in Singapore and has executed the binding debt finance and offtake term sheet to fund 100% of the planned capital development budget for start-up of Stage 1 of the Mabilo Project.

- The Villar Family, our partner in the Mabilo Project, is one of the most prominent families in the Philippines and RTG is pleased to partner with them in the development of the Mabilo Project, which is a significant mining project for the country.

- RTG will have 40% of Mt. Labo; a 2% net smelter royalty; RTG's loans to Mt. Labo, currently in the order of US$27 million (A$39.1 million), will be repaid early out of the proceeds of Stage 1, the DSO, subject to customary requirements to address liquidity and ongoing operations of Mt. Labo and repayment of external debt to finance Stage 1 of the Project.

- Mt. Labo received written confirmation in May 2020 that the MGB approved the consolidation of the current Mineral Production Sharing Agreement No. MLC-MRD-459 for the Nalesbitan Project to include the Mabilo Project, having already secured an approved Declared Mine Feasibility Study and Environmental Clearance Certificate for the Project.

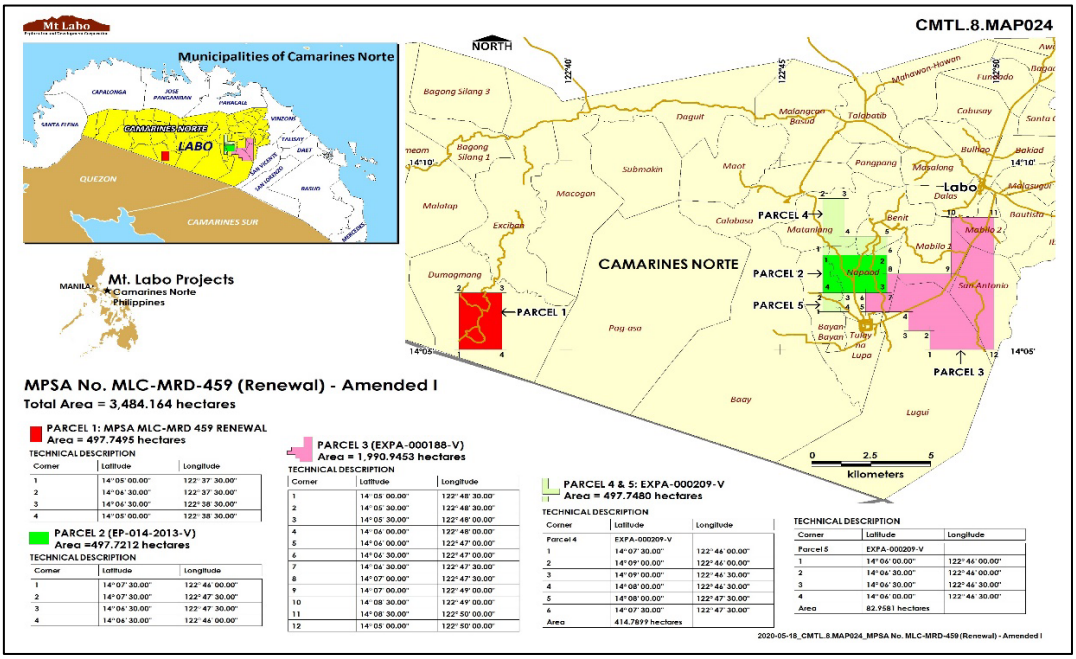

***Figure 1: Consolidated MPSA Showing Included Parcels of Land***

## Exploration and Development Activities

### *Resource Extensions*

Diamond infill drilling of the chalcocite orebody was conducted during the quarter. Four holes were drilled, all intercepting the chalcocite on the expected horizon with widths comparable to previous resource drilling. Interpretation of the drilling also highlighted the potential for chalcocite extensions to the north and south. No assays had been returned by the end of the quarter.

Two (2) sterilization holes in the waste dump area have also been completed. As expected, neither hole intercepted any mineralisation or potentially mineralised units, confirming the waste dump is suitably located.

Continued sterilization drilling along with geotechnical validation drilling, grade control drilling and chalcocite resource extension drilling will be conducted in the coming quarters.

An important follow-up drilling program will be undertaken in due course on the porphyry target located under volcanic cover between the South Mineralised Zone and the East Mineralised Zone and extension drilling of the skarn system along strike, with additional infill drilling in the inferred material.

The porphyry target is well supported by mineralized porphyry veins (b-veins) that have been intercepted in the resource drilling, combined with increasing intensity of calc-silicate alteration and the trending of metallogenic vectors.

***Development Activities***

Development activities at the Mabilo Project continue to ramp up. In preparation for the commencement of Stage 1 operations, development activities including camp construction, increased community engagement and employment, cutting of secondary growth trees and coconut trees in Lot 20 and the construction of a new temporary office facility occurred.

***Picture 1-3: Mabilo Project Development Activities***

***Mabilo Mineral Resource***

**Table 1 - Total Mabilo Resource at 0.3 g/t Au Cut-off Grade**

Mineral Resource Estimate Results - Reporting at 0.3 g/t Au lower cut-off - Mabilo South and North Deposits

| Classification | Weathering | Million Tonnes | Cu % | Au g/t | Ag g/t | Fe % | Contained Au ('000s Oz) | Contained Cu ('000s t) | Contained Fe ('000s t) |
|---|---|---|---|---|---|---|---|---|---|
| Indicated | Oxide + Supergene | 0.78 | 4.1 | 2.7 | 9.7 | 41.2 | 67.1 | 32.1 | 320.8 |
| Indicated | Fresh | 8.08 | 1.7 | 2.0 | 9.8 | 46.0 | 510.5 | 137.7 | 3,713.7 |
| **Indicated** | **Total All Materials** | **8.86** | **1.9** | **2.0** | **9.8** | **45.6** | **577.6** | **169.8** | **4,034.5** |
| Inferred | Oxide + Supergene | 0.05 | 7.8 | 2.3 | 9.6 | 26.0 | 3.5 | 3.7 | 12.3 |
| Inferred | Fresh | 3.86 | 1.4 | 1.5 | 9.1 | 29.1 | 181.5 | 53.3 | 1,121.8 |
| **Inferred** | **Total All Materials** | **3.91** | **1.5** | **1.5** | **9.1** | **29.0** | **184.9** | **57.0** | **1,134.1** |

*Note: The Mineral Resource was estimated within constraining wireframe solids based on the mineralised geological units. The Mineral Resource is quoted from all classified blocks above a lower cut-off grade 0.3 g/t Au within these wireframe solids. Differences may occur due to rounding*

***Mabilo Mineral Reserves***

Mineral Reserves are quoted within specific pit designs based on Indicated Resources only and take into consideration the mining, processing, metallurgical, economic and infrastructure modifying factors.

**Table 2 - Probable Mineral Reserve Estimate**

| Ore | | | | | | | Waste | Strip Ratio |
|---|---|---|---|---|---|---|---|---|
| **Class** | **Type** | **Mt** | **Fe %** | **Au g/t** | **Cu %** | **Ag g/t** | **Mt** | |
| Probable | Gold Cap | 0.351 | 40.1 | 3.11 | 0.38 | 3.26 | 77.713 | 10.0 |
| | Supergene | 0.104 | 36.5 | 2.20 | 20.7 | 11.9 | | |
| | Oxide Skarn | 0.182 | 43.6 | 2.52 | 4.17 | 19.9 | | |
| | Fresh | 7.155 | 45.9 | 1.97 | 1.70 | 8.73 | | |
| **Total Probable Ore** | | **7.792** | **45.5** | **2.04** | **1.95** | **8.79** | | |

The November 2015 Resource estimation provided by CSA classified the Resource for the Mabilo Project as Indicated and Inferred. Only Indicated Mineral Resources as defined in NI 43-101 were used to establish the Probable Mineral Reserves. No Reserves were categorised as Proven.

## KYRGYZ REPUBLIC INTERESTS – THE CHANACH PROJECT

RTG holds a 90% interest in the Chanach Project.

**Highlights of the Chanach Project include:**

- Existing high-grade JORC compliant Inferred Mineral Resource of 2.95 Mt @ 5.11 g/t Au for **484,000 ounces of Au** and 17.23 Mt @ 0.37% Cu for **64,000t of Cu[1] (141.1 Mlbs Cu)** from only limited drilling to date.
- Favourable acquisition cost of US$3.65 / ounce of Gold and US$0.0063 / pound of copper.
- 4,300m of diamond drilling successfully completed during 2025 field season - assays continued to **highlight strong copper-gold potential across multiple zones** within the Chanach Project area.
- A three-year renewal of the Exploration Licence has been finalised and granted. The Exploration Licence was issued by the State Committee of Industry, Energy and Subsoil Use of the Kyrgyz Republic.

The Chanach Project is located in the prolific southern Tien Shan metallogenic belt, which runs more than 1,500 km from Uzbekistan through to China and hosts one of the world's largest open pit gold mines, Muruntau (175 Moz[2]) with production believed to be in the order of 2 million ounces per annum[2].

The Chanach Project has extensive outcropping mineralised geology with high-grade gold veins from surface and significant gold and copper Inferred Mineral Resources. Trenching and sampling was completed in previous years, with the 3DIP and 2DIP programs undertaken during the last field season. The Chanach Project area is highly prospective for world class epithermal gold, porphyry copper-gold and polymetallic skarn deposits already identified.

[1] The Mineral Resource estimates were originally compiled and announced by White Cliff Minerals Ltd ("WCN") on 30 May 2018, in accordance with the JORC Code, 2012 and was last disclosed in WCN's March, 2019 quarterly report on 30 April 2019 - https://www.asx.com.au/asxpdf/20190430/pdf/444pg6f8t5ln5t.pdf

[2] Wilde, A. and Gilbert, D. 2000. Setting of the giant Muruntau Gold Deposit: Implications for ore genesis. In: (Ed.) Gordon Lister, Geological research for the exploration industry, Journal of the Virtual Explorer, Electronic Edition, ISSN 1441-8142, volume 1, paper 1, doi:10.3809/jvirtex.2000.00004

To date the limited exploration activities have defined an Inferred Mineral Resource of **2.95 Mt @ 5.11 g/t Au for 484,000 ounces of Au and 17.23 Mt @ 0.37% Cu for 64,000t of Cu**.

***Figure 2: Chanach Project Location***

## Exploration and Development Activities[3]

Field work commenced during the quarter with drilling and channel sampling activities.

Diamond drilling targeted infill and extension drilling of the epithermal gold vein system and the high-grade skarns. By the end of the quarter 16 holes for 1,730m had been completed.

In addition, 55m of trenching was also completed during the quarter mainly targeting extensions to the epithermal gold system. A further 194m of trenching is planned for next quarter.

The remainder of the drilling (approx. 250m) and further trenching will be completed during the current quarter. Assay results are also expected Q4 2026.

[3] This report contains information extracted from ASX market announcements reported in accordance with JORC Code, 2012 Edition. Further details, including JORC Code, 2012 Edition reporting tables, where applicable, can be found in the ASX announcements lodged by RTG on 1 September 2025 and 30 September 2025. Copies of these announcements are also available on the Company's website (https://www.rtgmining.com/drilling-continues-to-unlock-chanach-copper-gold-exploration-potential/ and https://www.rtgmining.com/drilling-highlights-chanach-copper-gold-exploration-and-resource-potential/)

***Picture 4-5: Chanach Project Exploration Activities***

The 2025 field season drilling hit strong results which will be followed up in the 2026 field season, these include:

- ***59.9m @ 0.67% Cu from 9.6m in Hole DD25-01 in Copper Intrusion Area***
- ***3.4m @ 15.3g/t Au from 754.4m in Hole DD25-03 in Copper Intrusion Area***
- ***1.8m @ 7.51g/t Au from 773.2m in Hole DD25-03 in Copper Intrusion Area***
- ***3.1m @ 6.54g/t Au from 791.7m in Hole DD25-03 in Copper Intrusion Area***
- ***3.7m @ 12.47g/t Au from 174m in Hole DD25-07 in Eastern Skarn Area***
- ***4.5m @ 1.76g/t Au and 1.06% Cu from 32.8m in Hole DD25-07 in Eastern Skarn Area***
- ***7.8m @ 11.65g/t Au from 41m in Hole DD25-09 in Central Skarn Area***
- ***6.05m @ 9.23g/t Au from 31.4m in Hole DD25-11 in Gold Vein Resource Area***
- ***1.7m @ 0.63% Cu from 242.9m in Hole DD25-12 in Copper Intrusion Area***
- ***25.9m @ 0.49% Cu from 62.1m in Hole DD25-13 in Copper Intrusion Area***
- ***5.4m @ 0.57% Cu from 263.4m in Hole DD25-13 in Copper Intrusion Area***

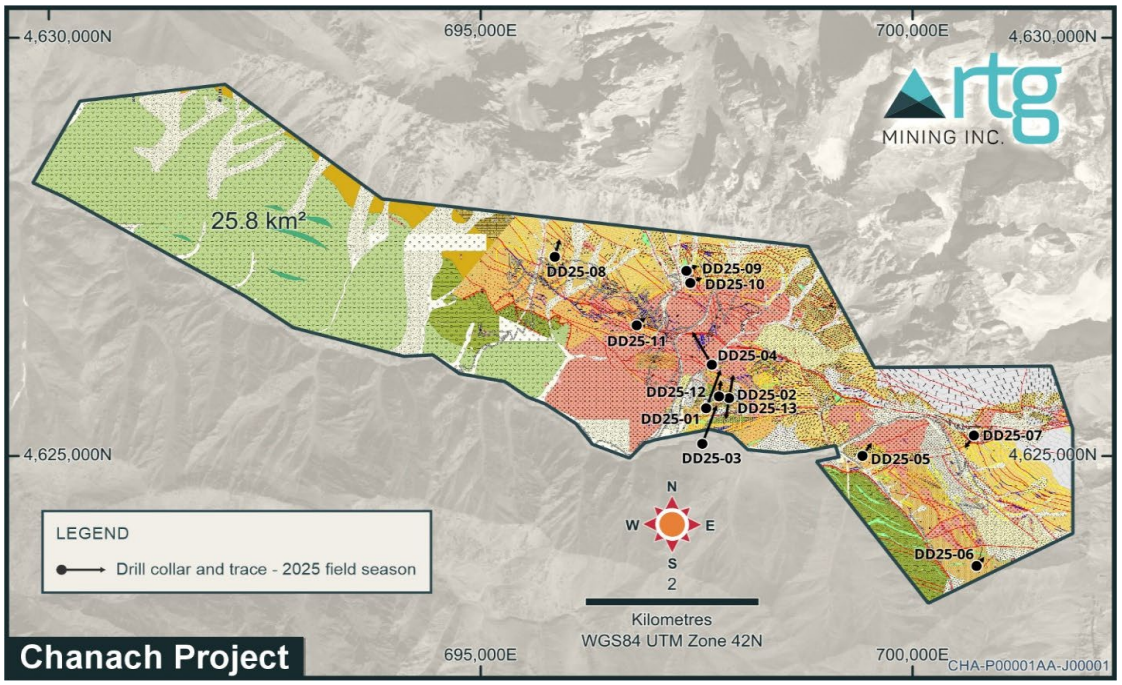

***Figure 3: Tenement Map showing 2025 Drill Hole Locations***

## BOUGAINVILLE – THE PANGUNA PROJECT OPPORTUNITY

RTG is the nominated development partner with the joint venture company established by the SMLOLA and Central in the Landowner proposal with respect to the redevelopment of the Copper-Gold Panguna Project located in the Central Region of the island of Bougainville, within the Autonomous Region of Bougainville, PNG. RTG owns just under 70% of Central, with additional loans to Central that can be converted to increase our interest. The proposal, being led by the SMLOLA, is a landowner initiative and will be subject to the success or otherwise of the SMLOLA in securing a role in the redevelopment of the mine and the minerals which are owned by the landowners exclusively represented by the SMLOLA.

The President has recently announced a non-binding contracting arrangement with Lloyds Metals and Energy Limited which we understand is being discussed between all the relevant parties, including landowners.

RTG and the landowners continue to engage with the Toroama Government to discuss how the Company can assist in their future plans for Bougainville, BCL and their people.

## CORPORATE SUMMARY

Cash and liquid assets as at 30 September 2026 were A$6.7 million.

During the quarter, payments to related parties of the Company totalled US$181,771 for Directors' remuneration, which included salary, fees and superannuation.

## ABOUT RTG MINING INC

RTG Mining Inc. is a mining and exploration company listed on the main board of the Toronto Stock Exchange and the Australian Securities Exchange. RTG is currently focused primarily on progressing the Mabilo Project to start-up having received a mining permit for the Project, with a view to moving quickly and safely to a producing gold and copper company.

RTG also has several exciting new exploration opportunities in Kyrgyzstan and is considering further new business development opportunities.

RTG has an experienced management team which has to date developed seven mines in five different countries, including being responsible for the development of the Masbate Gold Mine in the Philippines through CGA Mining Limited. RTG has some of the most respected international institutional investors as shareholders including Equinox Partners and Franklin Templeton.

## CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

The Toronto Stock Exchange has not reviewed nor does it accept responsibility for the accuracy or adequacy of this press release, which has been prepared by management.

This announcement includes certain “forward-looking statements” within the meaning of Canadian securities legislation including, among others, statements made or implied relating to the interpretation of exploration results, accuracy of mineral resource and mineral reserve estimates, parameters and assumptions used to estimate mineral reserves and mineral resources, realization of mineral reserve and mineral resource estimates, estimated economic results of the Mabilo Project, future operational and financial results, including estimated cashflow and the timing thereof, estimated expenditures, expansion, exploration and development activities and the timing thereof, including expectations regarding the DSO, plans for progressing Stage 2 development, completion of a debt funding package, the negotiation of contracts for start-up works and offtake arrangements, RTG’s objectives, strategies to achieve those objectives, RTG’s beliefs, plans, estimates and intentions, and similar statements concerning anticipated future events, results, circumstances, performance or expectations. All statements, other than statements of historical fact, included herein, are forward-looking statements. Forward looking statements generally can be identified by words such as “objective”, “may”, “will”, “expected”, “likely”, “intend”, “estimate”, “anticipate”, “believe”, “should”, “plans”, or similar expressions suggesting future outcomes or events. Forward-looking statements involve various risks and uncertainties and are based on certain factors and assumptions. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from RTG’s expectations include uncertainties related to fluctuations in gold and other commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of mineral deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and estimated economic return; the need for cooperation of government agencies in the development of RTG’s mineral projects; the need to obtain additional financing to develop RTG’s mineral projects; the possibility of delay in development programs or in construction projects and uncertainty of meeting anticipated program milestones for RTG’s mineral projects and other risks and uncertainties as discussed in RTG’s annual report for the year ended December 31, 2025 and detailed from time to time in our other filings with the Canadian securities regulatory authorities available at www.sedarplus.ca. The forward-looking statements made in this announcement relate only to events as of the date on which the statements are made. RTG will not release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this announcement except as required by law or by any appropriate regulatory authority.

## QUALIFIED PERSON AND COMPETENT PERSON STATEMENT

The information in this release that relates to Exploration Results and Mineral Resource Estimates of the Chanach Project is based upon information compiled, reviewed and approved by Elizabeth Haren who is a Qualified Person under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("**NI 43-101**") and a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' who is a Member and Chartered Professional of the Australian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Elizabeth Haren is employed by Haren Consulting Pty Ltd and is a consultant to RTG. Elizabeth Haren has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person and a Qualified Person for the purposes of NI 43-101. Elizabeth Haren consents to the inclusion in the release of the matters based on her information in the form and the context in which it appears.

The information in this release that relates to Exploration Results during the 2025 Field Work and Mineral Resource Estimates of the Chanach Project is based upon information compiled, reviewed and approved by Viktor Zabolotny who is a Qualified Person under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("**NI 43-101**") and a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' who is a Member and Chartered Professional of the Australian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Viktor Zabolotny is employed by BW Three Holdings Ltd and is a consultant to RTG. Viktor Zabolotny has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person and a Qualified Person for the purposes of NI 43-101. Viktor Zabolotny consents to the inclusion in the release of the matters based on his information in the form and the context in which it appears.

The information in this release that relates to Mineral Resources is based on information prepared by or under the supervision of Mr Aaron Green, who is a Qualified Person and Competent Person. Mr Green is a Member of the Australian Institute of Geoscientists and is employed by CSA Global Pty Ltd, an independent consulting company. Mr Green has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and to qualify as a "Qualified Person" under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). Mr. Green has verified the data disclosed in this release, including sampling, analytical and test data underlying the information contained in the release. Mr Green consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Mineral Reserves and Mining is based on information prepared by or under the supervision of Mr Carel Moormann, who is a Qualified Person and Competent Person. Mr Moormann is a Fellow of the AusIMM and is employed by Orelogy Consulting, an independent consulting company. Mr Moormann has sufficient experience that is relevant to the type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and to qualify as a "Qualified Person" under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). Mr Moormann has verified the data disclosed in this release, including sampling, analytical and test data underlying the information contained in the release. Mr Moormann consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Metallurgy and Processing is based on information prepared by or under the supervision of David Gordon, who is a Qualified Person and Competent Person. David Gordon is a Member of the Australasian Institute of Mining and Metallurgy and is employed by Lycopodium Minerals Pty Ltd, an independent consulting company. David Gordon has sufficient experience that is relevant to the type of process under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and to qualify as a "Qualified Person" under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). David Gordon has verified the data disclosed in this release, including sampling, analytical and test data underlying the information contained in the release. David Gordon consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

The information in this release that relates to areas outside of exploration results, Mineral Resources, Mineral Reserves and Metallurgy and Processing is based on information prepared by or under the supervision of Mark Turner, who is a Qualified Person and Competent Person. Mark Turner is a Fellow of the Australasian Institute of Mining and Metallurgy and is employed by RTG Mining Inc, the Company. Mark Turner has sufficient experience that is relevant to the information under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and to qualify as a "Qualified Person" under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). Mark Turner has verified the data disclosed in this

release. Mark Turner consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

The information in this release based on historic and public information on the Panguna Project has been compiled and reviewed by Mark Turner, who is a Qualified Person and Competent Person. Mark Turner is a Fellow of the Australasian Institute of Mining and Metallurgy and is employed by RTG Mining Inc, the Company. Mark Turner has sufficient experience that is relevant to the information under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" and to qualify as a "Qualified Person" under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). Mark Turner consents to the inclusion in the release of the matters based on his information in the form and context in which it appears.

For the ASX Feasibility Study announcement including JORC tables please refer to the RTG Mining website (www.rtgmining.com) and on the ASX, under announcements (www.asx.com.au).

## Appendix 1 – Schedule of interests and location of Tenements

|---|---|---|
| 6.1 | Aggregate amount of payments to related parties and their associates included in item 1 | 181,771 |
| 6.2 | Aggregate amount of payments to related parties and their associates included in item 2 | - |

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

+ See chapter 19 of the ASX Listing Rules for defined terms.

| 7. | **Financing facilities**<br>*Note: the term "facility' includes all forms of financing arrangements available to the entity.*<br>*Add notes as necessary for an understanding of the sources of finance available to the entity.* | **Total facility amount at quarter end $US** | **Amount drawn at quarter end $US** |
|---|---|---|---|
| 7.1 | Loan facilities | - | - |
| 7.2 | Credit standby arrangements | - | - |
| 7.3 | Other (please specify) | - | - |
| 7.4 | **Total financing facilities** | - | - |
| 7.5 | **Unused financing facilities available at quarter end** | | - |
| 7.6 | Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. | | |
| | Description of loan facility in 7.1 above: N/A | | |

| 8. | **Estimated cash available for future operating activities** | **$US** |
|---|---|---|
| 8.1 | Net cash from / (used in) operating activities (item 1.9) | (966,201) |
| 8.2 | (Capitalised exploration & evaluation classified as investing activities) (item 2.1(d)) | - |
| 8.3 | Total relevant outgoings (item 8.1 + item 8.2) | (966,201) |
| 8.4 | Cash and cash equivalents at quarter end (item 4.6) | 4,718,246 |
| 8.5 | Unused finance facilities available at quarter end (item 7.5) | - |
| | Adjusting: Term deposit not considered cash and cash equivalents but will contribute to future funding | - |
| 8.6 | Total available funding (item 8.4 + item 8.5 + adjusting entry) | 4,718,246 |
| 8.7 | **Estimated quarters of funding available (item 8.6 divided by item 8.3)** | 4.88 |
| | *Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.* | |
| 8.8 | If item 8.7 is less than 2 quarters, please provide answers to the following questions: | |
| | 8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not? | |
| | Answer:<br>N/A | |

+ See chapter 19 of the ASX Listing Rules for defined terms.

| | |
|---|---|
| 8.8.2 | Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful? |
| Answer: N/A | |
| 8.8.3 | Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis? |
| Answer: N/A | |
| *Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.* | |

## Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: **30 October 2026**

Authorised by: **By the Board of Directors**

(Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
