# QUARTERLY REPORT
# For the period ended 30 September 2026
30 October 2026

## Main features

- **Sales revenue of $0.5 million**
- **Production of 0.04 Pje**
- **Unrestricted cash of $0.53 million at 30 September**
- **Accepted Qld Govt offer of prospective SW Qld tenement adjoining existing holdings**

## Managing Director's comment

*"South-east Australian energy markets have continued to affirm the value of well-located gas reserves and resources, such as Vintage possesses and of local oil production. The addition of a new tenement, prospective for both gas and oil, adjoining our existing southwest Queensland acreage stands to consolidate the strategic merit of our portfolio for near-term energy needs. Vintage's most significant activity in the quarter was work to secure the pre-requisites for our drilling plans in the current financial year. These plans, comprising the drilling of two new gas production wells leverage the grant funding provided by the South Australian government in June and target un-accessed gas to increase supply. This task is ongoing and of the highest priority."*

| Key figures | 3 months to 30 Sep '26 | Prior qtr Jun '26 | Qtr on qtr change | FY27 to date | FY26 to date | FYTD change |
|---|---|---|---|---|---|---|
| **Sales revenue** $'000 | **521.5** | 584.9 | *-11%* | **521.5** | 902.8 | *-42%* |
| **Sales gas** PJ | **0.04** | 0.05 | *-20%* | **0.04** | 0.07 | *-43%* |
| **Production** PJe[1] | **0.04** | 0.05 | *-20%* | **0.04** | 0.08 | *-50%* |
| **Unrestricted cash** $ million | **0.53** | 1.34 | *-60%* | **0.53** | 1.56 | *-66%* |

Zero lost time injuries were recorded during the period.

This release has been authorised on behalf of the Vintage Energy board by Mr. Neil Gibbins, Managing Director.

## Important information, dates, terms and abbreviations:

**Forward looking statements:** information on forward looking statements contained in this report provided on the final page of this report.
**Dates:** unless specified otherwise the term "the quarter" relates to the 3 months ended 30 September 2026 and dates and period quoted refer to that time in the 2026 calendar year e.g. "October" refers to October 2026.
**Terms and abbreviations:** this report may use terminology or abbreviations used in the oil and gas industry. A glossary of such terms is provided for reference at the back of this report.

[1] Petajoule equivalent: comprises sales gas and gas liquids.

## Finance

### Cash and net debt

Total cash and cash equivalents at quarter's-end was $3.16 million, inclusive of restricted cash of $2.63 million provided, and reserved, for the drilling of gas production wells under the SA Government grants ($2.5 million) and security deposits. Unrestricted cash at 30 September was $0.53 million compared with $1.34 million at 30 June 2026.

Net cash from operating activities was an outflow of $0.72 million. In comparison, the prior quarter recorded a corresponding inflow of $2.26 million inclusive of a non-recurring inflow of $2.5 million from receipt of the aforementioned government grant of $2.5 million.

Cash flow elements compared with the previous quarter included:

- receipts from customers of $0.50 million ($0.56 million in the prior quarter);

- production expenditure of $0.22 million ($0.12 million in the prior quarter);

- lower staff costs; $0.39 million, 20% lower than the prior quarter figure of $0.49 million, and

- admin and corporate costs of $0.39 million ($0.25 million in the prior quarter).

Borrowings, net of unrestricted cash, were $9.47 million at 30 June compared with $8.66 million at the beginning of the period.

## Sales

| | 3 months to 30 Sep '26 | Prior qtr Jun '26 | Qtr on qtr change | FY27 to date | FY26 to date | FYTD change |
|---|---|---|---|---|---|---|
| **Sales revenue** $'000 | **521.5** | 584.9 | *-11%* | **521.5** | 902.8 | *-42%* |
| **Sales volume** | | | | | | |
| **Sales gas** TJ | **39.7** | 42.7 | *-7%* | **39.7** | 73.3 | *-46%* |
| **LPG** tonne | **-** | - | - | **-** | - | - |
| **Condensate** bbls | **180.4** | 420.6 | *-57%* | **180.4** | - | *100%* |

Sales revenue of $0.52 million was recorded for the quarter, 11% lower than the prior quarter revenue of $0.58 million.

The reduction in revenue is attributable to lower gas production and condensate sales. Discussion of factors contributing to the quarter's production is provided following under the headings 'Production' and 'Operations'.

As previously advised, sales revenue reported in respect of supply from the Vali gas field comprises sales attracting cash payment and sales for which cash payment has been prepaid. From 1 July 2023, production and sales figures include gas produced under contractual agreement towards consideration for processing and transportation. The financial value of this gas is accounted as non-cash generating sales revenue.

## Production

| | 3 months to 30 Sep '26 | Prior qtr Jun '26 | Qtr on qtr change | FY27 to date | FY26 to date | FYTD change |
|---|---|---|---|---|---|---|
| **Total production** PJe | **0.04** | 0.05 | *-20%* | **0.04** | 0.08 | *-50%* |
| **Sales gas** TJ | **39.4** | 45.2 | *-13%* | **39.4** | 73.2 | *-46%* |
| **LPG** tonne | **13.6** | 16.0 | *-15%* | **13.6** | 19.2 | *-29%* |
| **Condensate** bbls | **171.8** | 194.7 | *-12%* | **171.8** | 155.6 | *10%* |

Vintage share of production for the quarter was 0.04 PJe, compared with 0.05 Pje in the prior quarter. Production of sales gas accounted for 95% of total production.

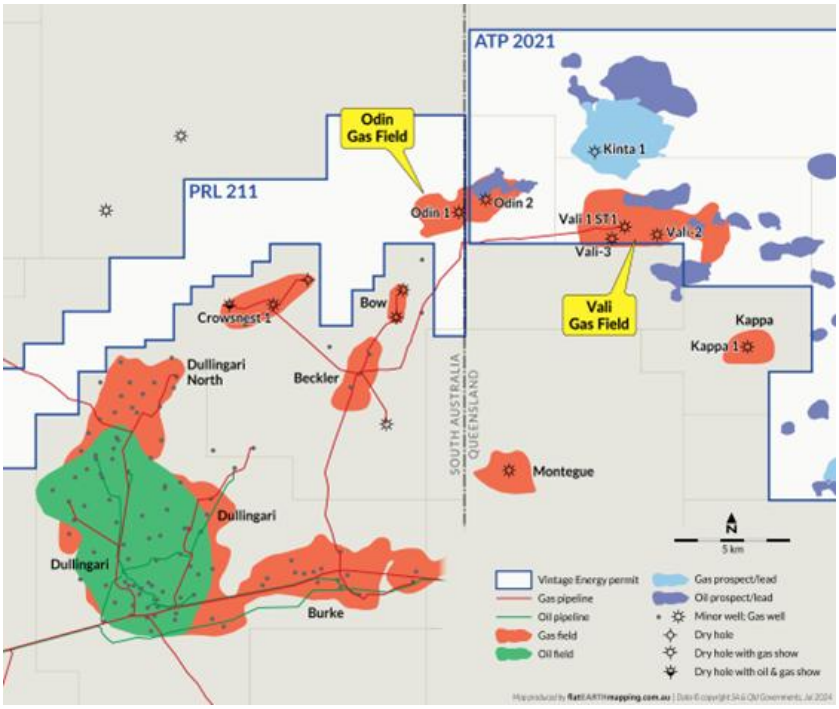

Further discussion of the performance of the Vali and Odin gas fields during the quarter is provided under the heading 'Operations' following.

## Operations

### Southern Flank gas fields

### Cooper/Eromanga Basins, Queensland and South Australia

**Odin and Vali gas fields, PRL 211 and ATP 2021 Cooper Basin**

### Odin gas field

PRL 211 & ATP 2021

Vintage 50% and operator, Metgasco Ltd 25%, Bridgeport (Cooper Basin) Pty Ltd 25%

**Asset overview**

The Odin gas field straddles the South Australian – Queensland border, falling within PRL 211 in South Australia and ATP 2021 in Queensland. Vintage is the Operator of both licences, conducting operations through two joint ventures of identical composition.

Odin is located in close proximity to the South Australian Cooper Basin Joint Venture's gas production infrastructure at Beckler, Bow and Dullingari. The field was discovered by the PRL 211 joint venture in 2021 and appraisal production from Odin-1 commenced in September 2023. Odin-1 has been completed to produce from the Epsilon, Toolachee and Patchawarra formations, supplying gas to Pelican Point Power (a wholly owned subsidiary of ENGIE Australia) under contract to December 2026.

A second well, Odin-2, successfully appraised the north-eastern section of the field in ATP 2021 in June 2024 and was subsequently completed and connected.

**Activity**

Odin-1 and Odin-2 produced for 91.0 and 57.1 days respectively during the quarter, compared with 83.2 and 72.0 days in the June quarter. Time offline in the quarter is attributable to flow and buildup cycling of Odin-2 (shut-in from September awaiting access for maintenance) and maintenance activity at Odin-1. Average daily metered raw gas production for the quarter for days online was 1.07 MMscf/d compared with 1.29 MMscf/d for the prior quarter. Elevated line pressures were experienced in the quarter due to downstream third-party maintenance activities.

## Vali gas field

### ATP 2021

### Vintage 50% and operator, Metgasco Ltd 25% and Bridgeport (Cooper Basin) Pty Ltd 25%

**Asset overview**

The Vali gas field is located in Queensland, adjacent to the Queensland-South Australia border. Vali is undergoing a long-term production appraisal program with gas produced being supplied to AGL Energy under a supply agreement to December 2026.

Vali was discovered by Vali-1 ST1 in January 2020 and successfully appraised by Vali-2 and Vali-3.

The field has three wells, completed and connected to the Moomba gas gathering network for supply to the eastern Australian domestic energy market.

**Activity**

Vali-1 produced for 56.3 days during the quarter, flowing from the Patchawarra Formation. Downtime related predominantly to well cycling operations to optimise gas deliverability. The Vali facility performed reliably, recording availability of 99.99%.

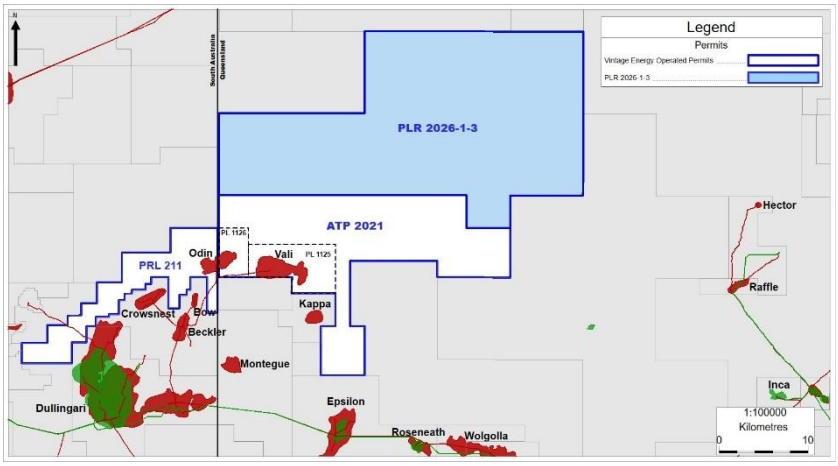

Operations at Vali-2 and Vali-3, deferred during the March and June quarters, were further delayed throughout the September quarter, as the field continued to be inaccessible by road due to persisting wet weather events. As a consequence, employment of surfactant injection at Vali-3 to aid dewatering and facilitate increased gas flow did not occur. It is expected to occur once vehicular access is re-established.

The average raw gas production rate from Vali for the days online during the quarter was 0.36 MMscf/d compared with 0.40 MMscf/d for the June quarter.

## PLR 2026-1-3

### Vintage preferred tenderer

**Location of PLR 2026-1-3**

Subsequent to the end of the quarter the Queensland Government announced Vintage Energy as the preferred tenderer for oil and gas exploration gazettal tenement PLR 2026-1-3. Vintage has accepted the gazettal offering.

PLR 2026-1-3 is a 639 square km gazettal area located immediately north of the Vintage-operated ATP 2021 licence area containing the Vali gas field.

PLR 2026-1-3 is assessed to be prospective for oil and gas, with 9 oil prospects and 4 gas prospects having been identified, all of which are covered by 3D seismic. Once awarded, the permit will have a 6-year term and a work program commitment of 3 wells in the first 3 years. Vintage anticipates funding the commitment through farm-out. Award of title is subject to conclusion of a land-use agreement with traditional land-holders.

## Bonaparte Basin, Northern Territory

### EP 126

### Vintage 100%

**Asset overview**

The Bonaparte Basin is a frontier basin in the north of the Northern Territory with a proven hydrocarbon system. Several large gas fields have been discovered offshore (undeveloped Contingent Resources of 2.7 Tcf in Petrel, Tern and Frigate and the Black Tip field, which entered production in 2009). The onshore Weaber Gas Field (RL-1, Advent Energy 100%), and surface bitumen seeps, provide direct evidence of a working petroleum system in the Keep Inlet Sub-Basin.

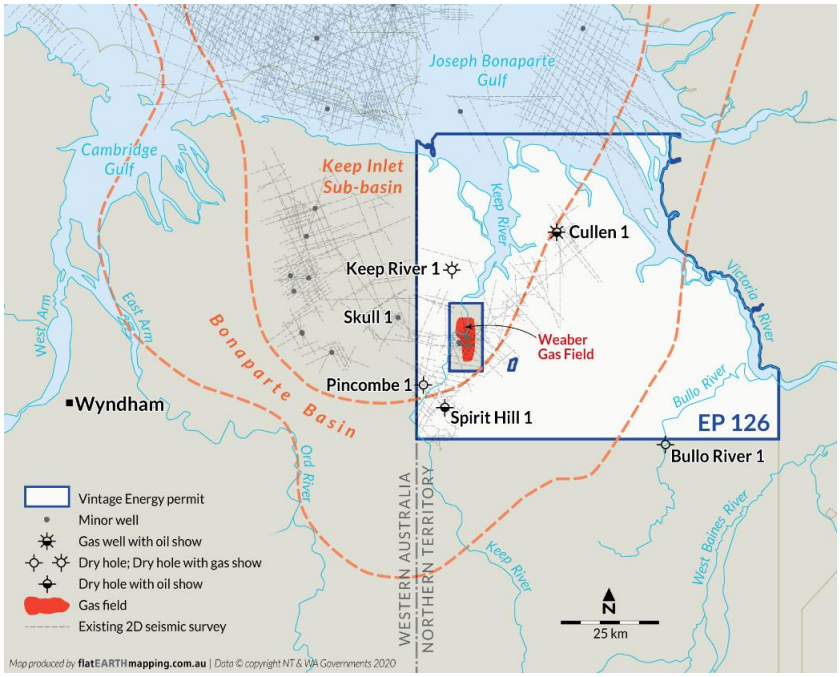

EP 126 is a low-cost entry with excellent exploration potential encompassing an area of 6,716 km$^2$, hosting multiple play types, with potential for large volumes of gas and oil. The permit contains Cullen-1 a well drilled, cased and suspended in 2014, after encountering a 1,000 metre fractured carbonate sequence with good gas shows. Oil shows were recorded from shallower formations. The company's intent in acquiring and retaining the permit is to conduct testing operations on Cullen-1.

Work in the permit has been suspended since 2019 pending resolution of discussions with the Northern Territory government in relation to its declaration at that time of approximately 50% of the permit, including the Cullen-1 well site, as a 'Reserved Area'.

However, expectations onsite activities may resume, subject to regulatory approvals, have recently been encouraged. Vintage has committed to submitting an Environmental Management Plan and Well Operations Management Plan for well testing as commitments in the current permit year.

A Heads of Agreement for the supply of gas that could be produced from Cullen-1 was signed with Vault Energy in April 2026. Vault Energy is an Australian energy company utilising advanced technologies to transform surplus energy into computing resources. The Heads of Agreement commits Vintage and Vault to work exclusively together on a gas sales agreement or other commercial arrangement for the supply of gas from the well. The Heads of Agreement is subject to a number of conditions, including initial test results from the well indicating a commercially viable outcome for both parties.

**Location of EP 126, Bonaparte Basin, Northern Territory**

**Activity**

Vintage and Vault Energy collaborated on modelling of commercial options for gas that could be produced from Cullen-1 following extended test flows.

Work on the preparation of an environment management plan application for testing activities at Cullen-1 continued.

# Otway Basin, South Australia

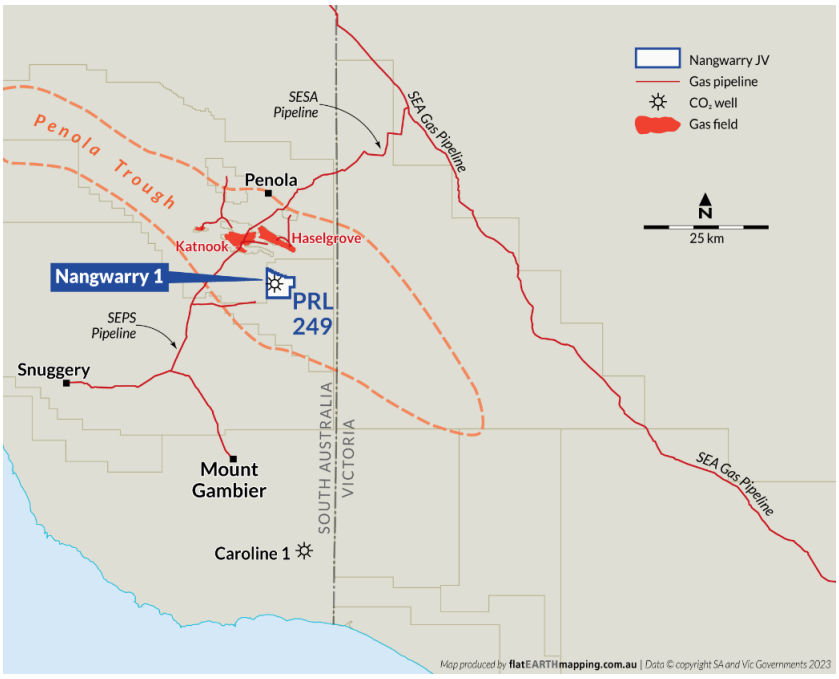

## PRL 249 (ex-PEL 155)

Vintage 50%, Otway Energy Pty Ltd 50% and operator

**Asset overview**

PRL 249 contains the Nangwarry gas field, discovered in January 2020. On testing, Nangwarry-1 produced raw gas (~93% $CO_2$, ~6% methane and ~1% nitrogen), at flow rates of 10.5-10.8 MMscfd, measured through a 48/64" choke at a flowing wellhead pressure of 1,415 psi over a 36-hour period[2].

**Location of PRL 249 and Nangwarry-1, Otway Basin, South Australia**

The Nangwarry resource is assessed to have the volume, quality, and reservoir properties for an economic, significant and long-life food-grade $CO_2$ production asset.

Recoverable $CO_2$ sales gas and Contingent Resources of gas hydrocarbons at Nangwarry have been independently assessed and were announced to the ASX on 12 July 2021. Recoverable $CO_2$ sales gas was assessed at the Best Estimate level as 25.9 Bcf gross and 12.9 Bcf net to Vintage. 2C Contingent Resources of gas hydrocarbons were assessed to be 1.6 Bcf gross and 0.8 Bcf net to Vintage.

These volumes are considered sufficient to provide a multi-decade feedstock source for production of food or industrial grade $CO_2$, a required input for a wide range of sectors including hospitality, food and beverage manufacture, protected horticulture, chemical, cold storage, medical device and other manufacturing. Nangwarry is considered analogous to the nearby Caroline gas field which provided local supply of naturally occurring $CO_2$ for 49 years until depletion in 2017.

Vintage is seeking an outcome which will recognise the economic value of the Nangwarry resource. Commercialisation of the resource will require processing of raw gas and liquefaction for transport to market and storage. To this end, the joint venture has been assessing plant requirements, project viability and market options.

**Activity**

The operator continued engagement on plant supply and construction options, and with potential end-users.

[2] ASX announcement 2 June 2021

## Galilee Basin, Queensland

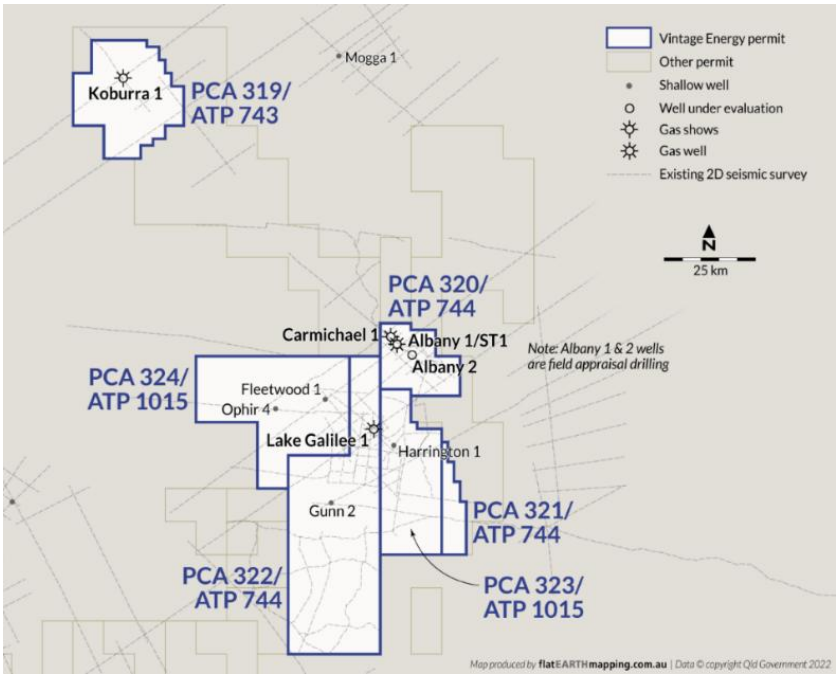

### ATPs 743, 744, 1015 ("Deeps") | PCA's 319 - 324

Vintage 30%, Comet Ridge Ltd 70% and operator

**Asset overview**

The Galilee Basin is a lightly explored gas province in proximity to market and the proposed Galilee-Moranbah pipeline. In 2017, Vintage acquired a 30% participation in the Deeps sandstone reservoir sequence of ATP 744, ATP 743 & ATP 1015 (all strata commencing underneath the Permian coals (Betts Creek Beds or Aramac coals) with the main target being the Lake Galilee Sandstone sequence).

**Location of ATPs 743, 744, 1015 ("Deeps") | PCA's 319 - 324 Galilee Basin, Queensland**

The Deeps was tested in 2019 by Albany-1, which recorded the first measurable gas flow from the Galilee Basin, flowing at 230,000 scf/d from the top 10% of the target reservoir without stimulation. Albany-2 was drilled and hydraulically stimulated. Albany-1 was side-tracked but not flow-tested due to the cessation of operations during the Covid pandemic.

**Activity**

There was no significant activity during the quarter to report.

## North Gawler Craton, Ackaringa Basin, South Australia

### EL 7122 and 7123

### Vintage 100%

Vintage holds 100% interests in the exploration licence areas (ELs 7122 and 7123) in the northern Gawler Craton in the Ackaringa Basin South Australia. The two tenements were acquired in April 2026 following competitive tender. have been identified, as prospective and priority targets for lithium, uranium and sedimentary copper.

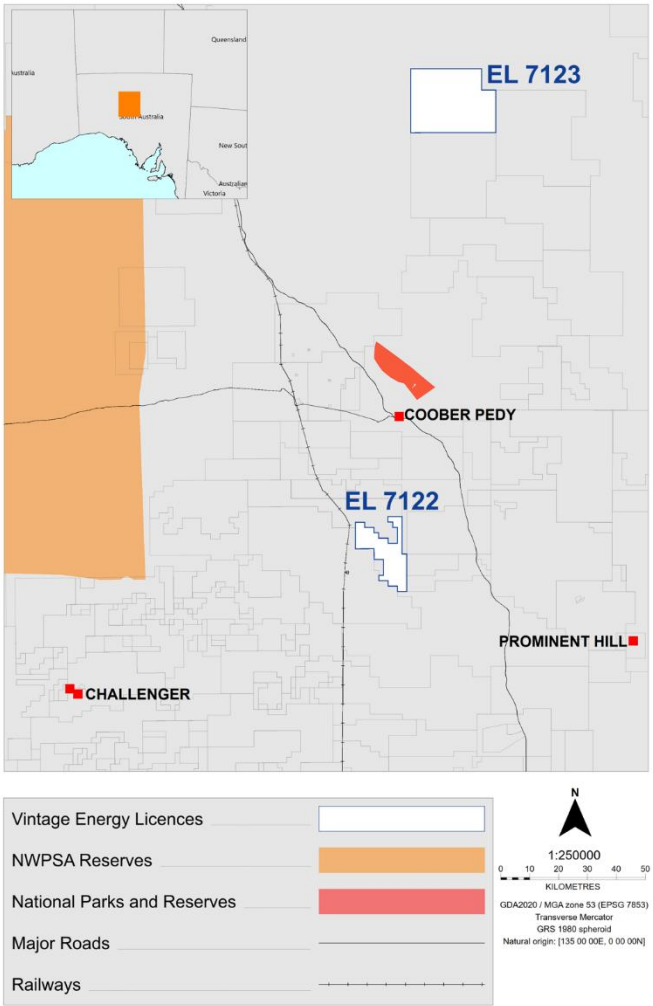

Vintage's successful submission was premised on application of the "source–migration–trap" model, a cornerstone of oil and gas exploration, now being adapted to mineral systems. By combining this framework with AI-driven analysis, the company aims to identify zones where metals have been mobilised, transported and concentrated into potentially economic deposits.

The application for the submission represents a natural extension of Vintage's strategy and expertise across the broader energy sector, targeting minerals critical to electrification, battery storage and future energy security.

EL 7123 (formerly ERA 002016) is considered highly prospective for lithium-rich brines and uranium, including both unconformity-style and roll-front deposits, supported by evidence of deep-sourced fluid migration and favourable basin architecture. EL 7122 (formerly ERA 002014) presents additional upside for lithium brines and sedimentary copper, where structural complexity may enable fluid trapping and concentration.

There was no significant activity during the quarter in relation to EL 7122 and EL 7123.

**Location of EL 7122 & EL 7123**

## Equity

The company had 2,440,335,788 ordinary shares on issue at the end of the quarter.

## Related parties

Payments to related parties, as disclosed at Item 6.1 in the company's cash flow report attached to this report (Appendix 5B) was $122,000 being remuneration and superannuation.

## Top 20 Shareholders

# Forward looking statements

This document may include forward looking statements. Forward looking statements include, but are not necessarily limited to, statements concerning Vintage's planned operational program and other statements that are not historic facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward looking statements. Although Vintage believes its expectations reflected in these are reasonable, such statements involve risks and uncertainties, and no assurance can be given that actual results will be consistent with these forward-looking statements. Vintage confirms that it is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning this announcement continue to apply and have not materially changed.

# Glossary

## Terms and abbreviations for resources and reserves as per the SPE-PRMS

| | |
|---|---|
| **PRMS** | Petroleum Resources Management System. Reserves and Resources are defined by the Society of Petroleum Engineers ('SPE'), American Association of Petroleum Geologists ('AAPG'), World Petroleum Council ('WPG') and the Society of Petroleum Evaluation Engineers ('SPEE'). The detail of the PRMS is available as a download from the website of the SPE: www.spe.org<br>The petroleum resources classification framework is illustrated below: |
| **Prospective Resources** | Those quantities of petroleum estimated, as of a given date, to be potentially recoverable from undiscovered (hypothetical) accumulations by application of future development projects. The categories of decreasing certainty are Low, Best and High Estimates. |
| **Contingent Resources** | Those quantities of petroleum are estimated, as of a given date, to be potentially recoverable from known accumulations, but the applied project(s) are not yet currently mature enough for commercial development due to one or more contingencies. The categories of decreasing certainty are Low, Best and High estimates. |
| **1C** | Low estimate of Contingent Resources. |
| **2C** | Best estimate of Contingent Resources. |
| **3C** | High estimate of Contingent Resources. |
| **Reserves** | Those quantities of petroleum anticipated to be commercially recoverable by application of development projects to known accumulations from a given date forward under defined conditions. The categories in decreasing certainty are Proved, Probable and Possible. |
| **1P, Proved** | Proved reserves (deterministic or probabilistic). |
| **2P, Proved and Probable** | Proved plus Probable reserves (deterministic or probabilistic). |
| **3P, Proved, Probable and Possible** | Proved plus Probable plus Possible reserves (deterministic or probabilistic). |
| **P10 Probabilistic Estimate** | From the probabilistic method there is a less than 10% cumulative probability that quantities estimated would ultimately be exceeded. |

## General terms and abbreviations that may appear in this report

| | |
|---|---|
| **2D** | Two dimensional; usually referring to a seismic survey with a coarse grid of orthogonal lines. |
| **3D** | Three dimensional; usually referring to a seismic survey with a fine grid of orthogonal lines. |
| **ASX** | Australian Securities Exchange. |
| **ATP** | Authority to Prospect which is an exploration licence in Queensland. |
| **B** | Billion $10^9$, or 1,000 million. |
| **bbl** | One barrel of crude oil contains 42 US gallons (or 34.97 imperial gallons, or, 159 litres). |
| **Bcf** | Billion cubic feet. |
| **Boe** | Barrels of oil equivalent. Natural gas is converted to barrels of oil equivalent generally using a ratio of approximately 6,000 cubic feet of natural gas as an amount equivalent to one barrel of oil. |
| **Bopd** | A liquid flow rate expressed in barrels of oil per day. |
| **Condensate** | A liquid hydrocarbon phase that is slightly lighter than and with less calorific content than crude oil. More usually occurs in association with natural gas. It is gaseous at reservoir conditions but will condense from gaseous vapour to a liquid at the lesser temperature and pressure at standard surface conditions. |
| **EP** | Exploration Permit for petroleum as in the Northern Territory. |
| **GJ** | Gigajoule. A joule is a measure of heating value. 1 GJ is equal to 1 x $10^9$ joules. |
| **Km** | Kilometres. |
| **$Km^2$** | A square kilometre. |
| **LPG** | Liquified petroleum gas such as butane or propane. |
| **m** | Metres |
| **M** | 1,000 |
| **MM** | Millions $10^6$ |
| **Net pay** | The thickness of reservoir considered to be gas or oil bearing and capable of contributing to production into the wellbore. Usually there will be several cutoff parameters including a porosity minimum, a shale maximum and a water saturation maximum. |
| **PCA** | Potential Commercial Area as used in Queensland |
| **PEL** | Petroleum Exploration Licence as used in South Australia. |
| **PJ** | Petajoule. A joule is a measure of heating value. 1 PJ is equal to 1 x $10^{15}$ joules |
| **PRL** | Petroleum Retention Licence as used in South Australia |
| **Resources** | The term "Resources" as used herein is intended to encompass all quantities of petroleum (recoverable and unrecoverable) naturally occurring on or within the Earth's crust, discovered and undiscovered, plus those quantities already produced. |
| **scf/d** | A flow rate in standard cubic feet per day. |
| **TCF** | Trillion cubic feet of gas. |
| **TJ** | Terajoule; a joule is a measure of heating value. 1 TJ is equal to 1 x $10^{12}$ joules |
| **YOY** | Year on year |

| 4.3 | Net cash from / (used in) investing activities (item 2.6 above) | (33) | (33) |
| 4.4 | Net cash from / (used in) financing activities (item 3.10 above) | (58) | (58) |

| Consolidated statement of cash flows | | Current quarter $A'000 | Year to date (3 months) $A'000 |
|---|---|---|---|
| 4.5 | Effect of movement in exchange rates on cash held | | |
| **4.6** | **Cash and cash equivalents at end of period** | **3,160** | **3,160** |

| 5. | Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts | Current quarter $A'000 | Previous quarter $A'000 |
|---|---|---|---|
| 5.1 | Bank balances | 531 | 1,341 |
| 5.2 | Call deposits * | 30 | 30 |
| 5.3 | Bank overdrafts | | |
| 5.4 | Other (grant funds & security deposits) * | 2,599 | 2,599 |
| **5.5** | **Cash and cash equivalents at end of quarter (should equal item 4.6 above)** | **3,160** | **3,970** |

*Amount is restricted. Item 5.4 includes $2,500,000, being the Company's 50% share of $5,000,000 government grants received and held in separate bank accounts that can only be used on drilling projects specified in the grant agreements once matching funds have been sourced and joint venture approvals and other necessary approvals are obtained. The grant amount has been excluded from the calculation at item 8.1 below, as the funds are quarantined and cannot be utilised for operating activities except as specified in the grant agreements.

| 6. | Payments to related parties of the entity and their associates | Current quarter $A'000 |
|---|---|---|
| 6.1 | Aggregate amount of payments to related parties and their associates included in item 1 | 122 |
| 6.2 | Aggregate amount of payments to related parties and their associates included in item 2 | |

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

| 7. | **Financing facilities**<br>*Note: the term "facility' includes all forms of financing arrangements available to the entity.*<br>*Add notes as necessary for an understanding of the sources of finance available to the entity.* | **Total facility amount at quarter end $A'000** | **Amount drawn at quarter end $A'000** |
|---|---|---|---|
| 7.1 | Loan facilities | 10,000 | 10,000 |
| 7.2 | Credit standby arrangements | | |
| 7.3 | Other (please specify) | | |
| 7.4 | **Total financing facilities** | **10,000** | **10,000** |
| 7.5 | **Unused financing facilities available at quarter end** | | |
| 7.6 | Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. | | |

As announced to the market 14 June 2022, a $10 million debt facility from PURE Resources Fund has been drawn down. Initial term: 48 months from first draw down, extended to 31 January 2028, as announced 4 March 2026. Interest rate: 11.0%, reducing to 8.5% once certain operational cash flow conditions are met. Security: first ranking security over Vintage assets, where joint venture arrangements permit. Financial covenants include: requiring a minimum of $1.5 million cash in the bank. Early repayment provisions use a sliding scale penalty of 1.5% to 1.0% of the funds.

| 8. | **Estimated cash available for future operating activities** | **$A'000** |
|---|---|---|
| 8.1 | Net cash from / (used in) operating activities (item 1.9) | (719) |
| 8.2 | (Payments for exploration & evaluation classified as investing activities) (item 2.1(d)) | (24) |
| 8.3 | Total relevant outgoings (item 8.1 + item 8.2) | (743) |
| 8.4 | Cash and cash equivalents at quarter end (item 4.6) ** | 531 |
| 8.5 | Unused finance facilities available at quarter end (item 7.5) | |
| 8.6 | Total available funding (item 8.4 + item 8.5) | 531 |
| 8.7 | **Estimated quarters of funding available (item 8.6 divided by item 8.3)** | 0.7 |

*Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.*

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: The company expects that it will continue to have the current level of net operating cash flows for the time being.

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The Company is discussing funding options with parties including refinancing, farm-out and asset sales and purchases. The company is confident a positive outcome will be achieved in the timeframe required.

| | |
|---|---|
| 8.8.3 | Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis? |
| Answer: The company expects to be able to continue its operations and to meet its business objectives as a result of outcomes from the above discussions. | |
| *Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.* | |

** Difference between item 8.4 and item 4.6 reflects amounts that are restricted. Refer item 5.1.

## Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2026

Authorised by: By the board
(Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
