8.6 If item 8.5 is less than 2 quarters, please provide answers to the following questions:

8.6.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: The Company expects its operating cash flows to fluctuate as it continues to manage its existing operations and pursue business development opportunities.

Management remains focused on improving operational efficiency, implementing cost control measures, and developing additional revenue opportunities through its ongoing business activities and strategic commercial initiatives.

The Company will continue to monitor its operating expenditure and working capital requirements, with a view to improving its overall cash flow position.

8.6.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: Yes. Subsequent to the quarter end, the Company successfully secured and received AUD 200,000 in loan funding to support its ongoing operations and working capital requirements. This additional funding has strengthened the Company's short-term liquidity position and demonstrates its ability to secure financial support when required.

The Company has previously demonstrated its ability to access capital markets to support its business activities and continues to actively assess funding options, including potential equity capital raisings and other financing arrangements. Management believes that its established capital-raising experience, together with its ongoing engagement with potential funding sources, provides a reasonable basis for pursuing additional funding as required.

While no assurance can be given that further funding will be secured, the Company remains committed to prudent cash flow management and will continue to monitor its working capital requirements and evaluate appropriate funding opportunities to support its ongoing operations and business objectives over the coming quarters.

8.6.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes. The Company expects to be able to continue its operations and pursue its business objectives, supported by its existing cash resources, the additional AUD 200,000 loan funding received subsequent to the quarter end, and its ongoing capital management initiatives.

The additional funding has strengthened the Company's short-term liquidity position, while management continues to focus on prudent cash flow management, operational cost control, and the development of business opportunities to support its long-term growth.

Furthermore, the Company's demonstrated ability to access capital markets, together with its ongoing assessment of potential equity capital raisings and other financing arrangements, provides a basis for management's expectation that the Company can continue to support its operational and working capital requirements.

The Company will continue to closely monitor its financial position and pursue appropriate funding opportunities as required, recognising that future funding remains subject to availability and prevailing market conditions.

Note: where item 8.5 is less than 2 quarters, all of questions 8.6.1, 8.6.2 and 8.6.3 above must be answered.
