ASX Release

2 November 2026

Operational update - Mana Gold Mine

Perenti Limited (**ASX: PRN**) ('Perenti') advises that as announced by Endeavour Mining (LSE: EDV, TSX: EDV, OTCQX: EDVMF), the access ramp leading to two of the three underground portals at the Mana mine in Burkina Faso has partially subsided, restricting access to those portals.

No-one was harmed during the incident, however underground mining activities at all three active portals at Mana have been suspended to allow for detailed geotechnical analysis and ramp remediation work to be assessed. The third mining portal, Wona, remains accessible and pending the geotechnical analysis may be used to restart mining activities at Mana.

Underground Mining Services Burkina Faso SARL ('UMS'), a joint venture between Barminco and Dynamic Mining Supply provides underground services at Mana. The UMS team will continue working closely with Endeavour who have stated they are actively evaluating options to mitigate the impact of the incident on Mana's production, including the restart and acceleration of mining activities in the Wona portal.
