FAA approves Boeing B737NG Certification Plan

Structural Monitoring Systems Plc ("SMS" or "the Company") (ASX: SMN) advises that the US Federal Aviation Administration (FAA) approved the Boeing B737NG Certification Plan on 29 October 2026.

The plan relates to the Company's Comparative Vacuum Monitoring (CVM) technology for the Boeing 737NG aft pressure bulkhead application.

This approval concerns the Certification Plan. It is not final approval of the CVM application or approval of the B737NG Service Bulletin.

The timing of the FAA's review of the B737NG Service Bulletin remains unconfirmed. SMS is not providing a revised completion date and continues to engage with Boeing on the approval process.

Mr Neville Bassett AM, SMS Chairman, commented:

“Approval of the Certification Plan is a positive step in progressing CVM for the Boeing 737NG application. Further approvals remain outstanding, and we continue to work with Boeing through the certification process.”

This ASX release has been approved for release by Neville Bassett AM, Chairman, on behalf of the Board of Directors.
