ClearVue Establishes Hong Kong Regional Office to Support Growth

New regional headquarters and product showroom strengthens ClearVue's presence across the Greater Bay Area and Southern China.

3 November 2026 – **Perth, Australia** – Smart building materials company **ClearVue Technologies Limited (ASX: CPV | OTCQX:CVUEF) (ClearVue** or **the Company)** is pleased to announce the establishment of its Hong Kong regional office and product showroom, strengthening its commercial presence in the Greater Bay Area and Southern China.

Located at Suites 903A and 904A, Empire Centre, 68 Mody Road, Tsim Sha Tsui East, Kowloon, the facility provides ClearVue with a permanent regional base to support existing relationships, advance commercial opportunities and demonstrate its building-integrated photovoltaic (BIPV) technologies.

The establishment of the Hong Kong office follows increasing regional interest in energy-generating building materials, supported by Hong Kong's focus on sustainable construction, energy efficiency and building decarbonisation.

EXPANDING REGIONAL COMMERCIAL OPPORTUNITIES

ClearVue continues to advance its collaboration with LandVac following the September 2026 deployment of its single-glazed insulating photovoltaic window technology at a hotel in Macau.

The project provides an opportunity for real-world measurement and verification (M&V) of the technology's energy generation and thermal performance.

ClearVue is currently progressing 15 regional project opportunities with design proposals submitted for all of them.

The Company's local presence will support closer engagement with developers, building owners, architects, engineers and government stakeholders, with the objective of converting these opportunities into commercial contracts.

DEDICATED REGIONAL TEAM AND PRODUCT SHOWROOM

ClearVue's Hong Kong operations are supported by Business Development Manager Edward Hui and R&D team members Stanley Chan and Jane Yu, with Non-Executive Director Andrew Lau providing strategic oversight at Board level.

The office incorporates a working product showroom featuring ClearVue's Vision Glass, Cladding and Balustrade solutions, enabling visitors to experience the Company's technology firsthand.

OFFICIAL OPENING

The office will be formally opened on Wednesday 4 November 2026, followed by an industry and stakeholder reception on Friday 6 November.

The events will bring together representatives from InvestHK, LandVac, regional industry partners and other stakeholders.

Chief Executive Officer and Managing Director Doug Hunt said:

"Hong Kong is an important market for ClearVue, both commercially and strategically. Our Macau deployment, growing regional project pipeline and relationships with industry partners have reinforced the value of establishing a permanent presence in the region.

With our local team and working showroom now established, we are better positioned to engage directly with customers, progress project opportunities and support our longer-term growth ambitions."

Authorised by the Board of ClearVue Technologies Limited.

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV; OTCQX: CVUEF) is an Australian technology company that integrates solar technology into building façade and rooftop surfaces to provide renewable energy generation and offset the operational carbon footprint of buildings. The Company's advanced, patented glass technology preserves glass transparency maintaining building aesthetics while generating energy.

ClearVue has extended solar energy-generation to vision glass, cladding, spandrel, balustrade, and skylight solutions. These solutions can offset operational energy requirements significantly contributing to the net zero building.

ClearVue's integrated solar façade is revolutionising the way buildings are designed, constructed, and renovated. Experience how building façades will become a major contributing factor to reducing operational carbon by visiting ClearVue at www.clearvuepv.com.
