Bubs organic milk infant formula has been very much go to formula for us as the LO enjoys having it without any issue. It has been gentle to LO tummy and giving us relief as we don't have to look for other options. Healthy, safe and certified formula.

Bubs organic milk formula was overall a good milk option, with eye catching packaging, it was toddler approved immediately, and we had fuss free drinking. It was also extremely easy to make up and measure

Bubs Organic Baby Formula has been wonderful for our baby. It was gentle on their tummy, easy to digest, and we've noticed a happy, settled baby after feeds. The quality ingredients gave us confidence, and we couldn't be happier with the results. We highly recommend Bubs Organic to other parents.

I tried this with my 11 month old child. They are used to a different type of formula but aren't usually fussy, and they loved it. I was surprised by the smell of the formula when I opened it. It didn't have that chemical smell that some formulas have. It mixed easily with water and my baby took the bottle happily. Afterwards; my baby was comfortable and seemed full, happy and content. We used the formula until the tin ran out and my baby was happy using it. I wish I had heard about this formula sooner! If I have any more kids, or if my friends have children, I will certainly be recommending this formula to use. I was extremely happy with it.

We've been using Bubs Organic Milk Infant Formula for a few days now and it's been a great fit. My little one actually likes the taste, which makes feeding time so much easier and less fussy. I also really appreciate how convenient it is to carry when we're travelling, the packaging is lightweight and easy to pack, and it mixes smoothly on the go. Knowing it's certified organic gives me peace of mind too. Overall, it's a reliable, clean formula that works well at home and on trips.

To be honest, I was a little nervous trying a new formula, but Bubs Organic Milk Infant Formula really surprised me in the best way. From the moment I opened the tin, it felt premium and thoughtfully made. It mixes smoothly, and there's no strong smell, which was a big plus for me.

Bubs Organic Milk Infant Formula has been a great addition to my children's diet and liquid intake. My sons have had a positive reaction to the formula by itself, and have also enjoyed it for the added nutrients it contains, in smoothies and a few other recipes that require milk.

Pämela B. Perth, WA 4 reviews

My baby was initially resistant to formula, but with a little perseverance, she really enjoyed the Bubs Organic Milk Infant Formula. We had no reactions whatsoever and she would get to the point where she appeared excited to consume this. Well worth a re-buy from my point of view.
