IMPORTANT INFORMATION

DISCLAIMER

The release, publication or distribution of this presentation in certain jurisdictions may be restricted by law and therefore persons in such jurisdictions into which this presentation is released, published or distributed should inform themselves about and observe such restrictions.

This presentation is for informational purposes only and does not constitute an offer to sell, or solicitation to purchase, any securities. Any failure to comply with these restrictions may constitute a violation of applicable securities laws. In providing this presentation Nordic Resources Limited ("NNL") ACN 647 455 105 and its subsidiaries has not considered the financial position or needs of the recipient. Persons needing advice should consult their stockbroker, bank manager, solicitor, attorney, accountant or other independent financial and legal advisors.

FORWARD-LOOKING STATEMENTS

Various statements in this presentation constitute statements relating to intentions, future acts, events and exploration targets. Such statements are generally classified as "forward looking statements" and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates" and similar expressions are intended to identify forward-looking statements. NNL caution shareholders and prospective shareholders not to place undue reliance on these forward-looking statements, which reflect the view of NNL only as of the date of this presentation. The forward-looking statements made in this presentation relate only to events as of the date on which the statements are made.

GOLD EQUIVALENT

Gold equivalent formula for Kopsa uses US$3,500/oz Au price, US$14,000/t Cu price and US$60/oz Ag price. Recoveries of 88% Au, 89% Cu and 79% Ag. AuEq (g/t) = Au (g/t) + 1.258 × Cu (%) + 0.0154 × Ag (g/t). In the Company's opinion all metals included have reasonable potential to be recovered and sold.

THIRD PARTY AND PEER INFORMATION

This presentation refers to resources, transactions and market valuations of other companies, including estimates reported under NI 43-101. That information is drawn from public sources cited in this presentation and has not been independently verified by NNL. It is provided for comparison only. Peer valuations are struck at the dates shown and will change. Market data (share price, market capitalisation, enterprise value) is at the dates stated on each slide and must be refreshed before release.

COMPETENT PERSONS

The information in this presentation that relates to Exploration Results and Mineral Resources has been extracted from various Nordic Resources ASX announcements and are available to view on the NNL website at www.nordicresources.com or through the ASX website at www.asx.com.au (using ticker code "NNL").

NNL confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

AUTHORISED FOR RELEASE BY THE BOARD OF DIRECTORS OF NORDIC RESOURCES LIMITED.

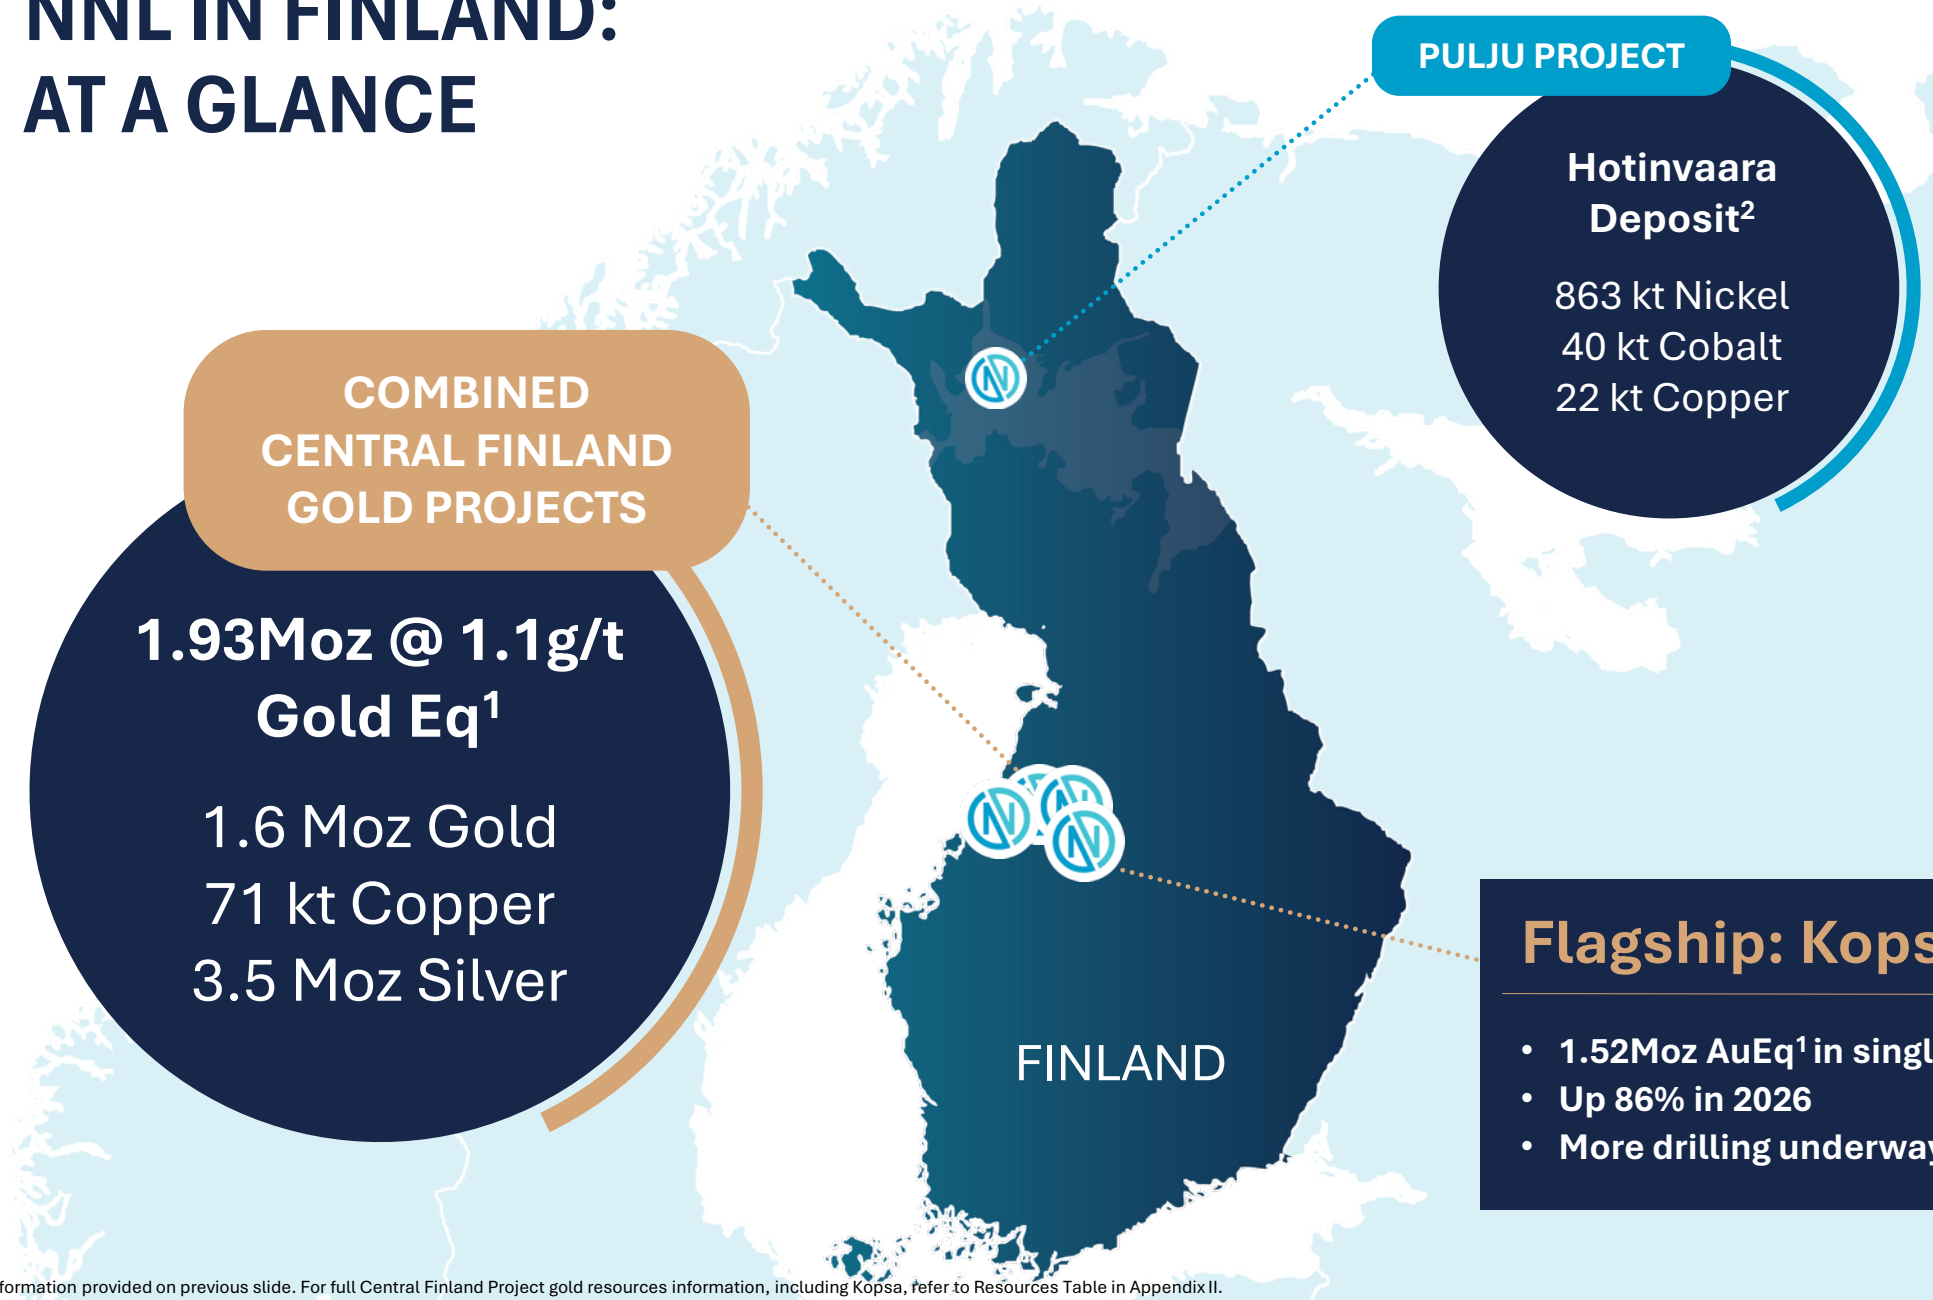

THE INVESTMENT CASE

FIVE REASONS TO OWN NNL

1.93Moz	**Scale in a jurisdiction the majors are buying** @ 1.1g/t gold eq near-surface resources, 80% Measured & Indicated, 3 deposits in central Finland[1].
+86%	**Fast, cheap growth** Kopsa grew from 815koz to 1.52Moz AuEq on 9.6km of drilling. 13km more is underway[2].
90%	**Simple and de-risked** Of Kopsa within 215m of surface. 4:1 strip, 86% Meas/Indicated, 88-90% recoveries[2]. Higher grade starter zone in Measured category from surface, within conditional mining concession[2,3].
A$3.1bn	**A team that has done it before** New director Graham Crew was MD of Rupert Resources, sold to Agnico Eagle for A$3.1bn in 2026. Chairman Malcolm Norris repeating success at Kopsa after Cascabel and Tujuh Bukit.
A$30/oz	**Valuation** EV per resource ounce, vs A$186/oz for TSX-listed Goldsky and A$738/oz for Rupert Resources deal[4].

1 AuEq for the Kopsa Resource was calculated using US$3,500/oz gold price, US$14,000/t copper price and US$60/oz silver price. Recovery factors of 88%, 89% and 79% are applied for Au, Cu and Ag respectively based on 2026 Kopsa metallurgical results. Resultant formula applied is AuEq (g/t) = Au (g/t) + 1.258*Cu (%) + 0.0154*Ag (g/t). In the Company's opinion, the metals in the equivalent calculation (Au,Cu,Ag) have reasonable potential to be both recovered and sold. For full resource information see Company Resources Table in Appendix II.
2 NNL ASX release "Interim MRE Lifts Kopsa to 1.52Moz in an Optimised Pit Shell", 12 October 2026.
3 NNL ASX release "Transformational, Large-Scale Finland Gold Transaction", 11 April 2025.
4 Market valuations on 5 November 2026; Agnico-Eagle news release 20 April 2026, refer also to Nordic peer comparison slide and Corporate Snapshot later in this document and Appendix III.

NNL IN FINLAND: AT A GLANCE

Flagship: Kopsa

- 1.52Moz AuEq[1] in single pit shell
- Up 86% in 2026
- More drilling underway

1 AuEq information provided on previous slide. For full Central Finland Project gold resources information, including Kopsa, refer to Resources Table in Appendix II.
2 For Pulju Project (Hotinvaara deposit) resource information, refer to ASX release "Substantial Increase in Hotinvaara Resource", 11 March 2024 and Appendix I.
Note: NNL confirms all material assumptions and technical parameters underpinning the Resource Estimates continue to apply and have not materially changed as per Listing Rule 5.23.2.

JURISDICTION

FINLAND. GOLD. NNL.

3
Operating gold mines

Including Kittilä, Europe's largest gold mine (~220koz/a)[1]

Lowest
power cost in EU[2]

And among the lowest in the OECD[2].

A$3.6bn
Gold M&A in 2026

Agnico Eagle's acquisitions of Rupert and Aurion[3].

A$740m
TSX listed peer

Goldsky Resources market cap[4].

Fastest
growing Gold deposit

Kopsa has grown 4.5x in just three years.

#2
Finland Gold resources

Kopsa the largest gold deposit outside Agnico's Kittila and Ikkari[5].

1 Agnico-Eagle company website (NYSE:AEM).
2 Eurostat non-household electricity price statistics – 1H 2026 (Oct 2026); OECD Economic Survey – Finland 2025.
3 Agnico-Eagle news releases on RUP and AUR acquisitions 20 April 2026.
4 GSKR valuation on 5 November 2026.
5 Refer Agnico and GSKR resource info in Appendix II and Laiva Gold Website Presentation, June 2026.

DISTRICT SCALE

REGIONAL PRODUCTION HUB POTENTIAL

NNL has Three

Neighbouring gold deposits for 1.93Moz AuEq[1]

Compelling growth potential across the assets.
13,000m of new drilling underway, Kopsa the focus.

Road + Rail

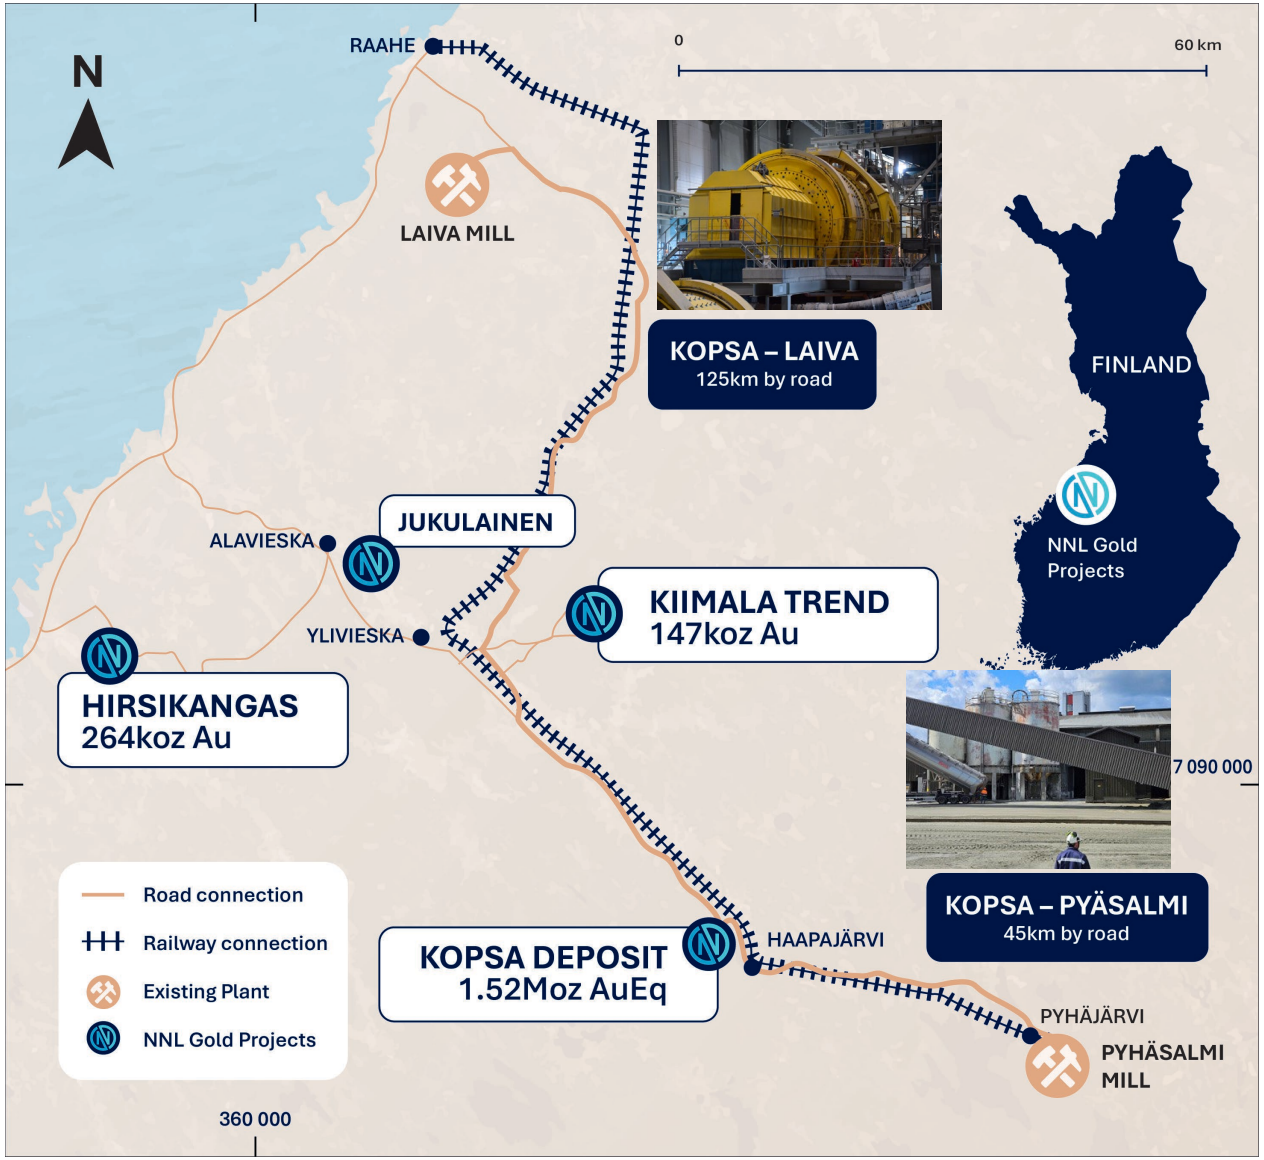

Throughout the district

Sealed roads, rail and grid power across the NNL projects.

Proximity

To existing plants

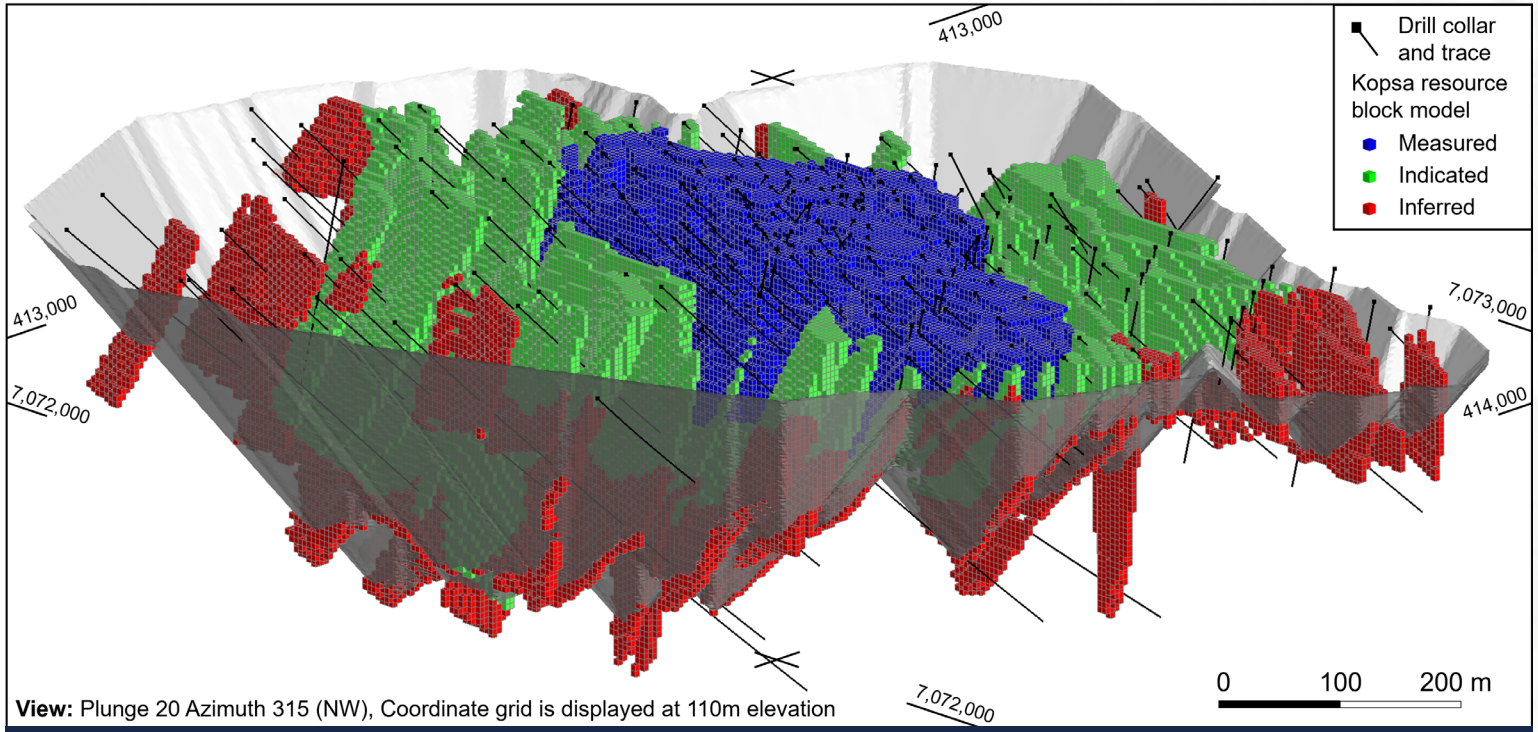

All NNL projects within reach of existing plants.
Kopsa the key asset in any district consolidation.

1 AuEq information provided on earlier slide. Refer to complete resource table in Appendix II within this Presentation.

KOPSA

A SINGLE, SHALLOW, ROYALTY FREE OPTIMISED PIT SHELL[1]

Kopsa block model by classification (blue Measured, green Indicated, red Inferred) in the optimised pit shell. View NW.

Central Zone has near-surface, higher-grade starter pit potential:

99m @ 3.90g/t Au

from 6m, plus 0.19% Cu (NKOP22001)

55m @ 2.49g/t Au

from 19m, plus 0.18% Cu (BELKOPDD102)

1.52Moz AuEq

44.0Mt @ 1.07g/t AuEq, pit-constrained

86%

Measured & Indicated

90%

of the resource 0-215m below surface

~4:1

strip ratio in a single pit

0%

royalty across 34km^2 of tenure

1 AuEq information provided on earlier slide and in Appendix II. NNL ASX release "Interim MRE Lifts Kopsa to 1.52Moz in an Optimised Pit Shell", 12 October 2026.

KOPSA

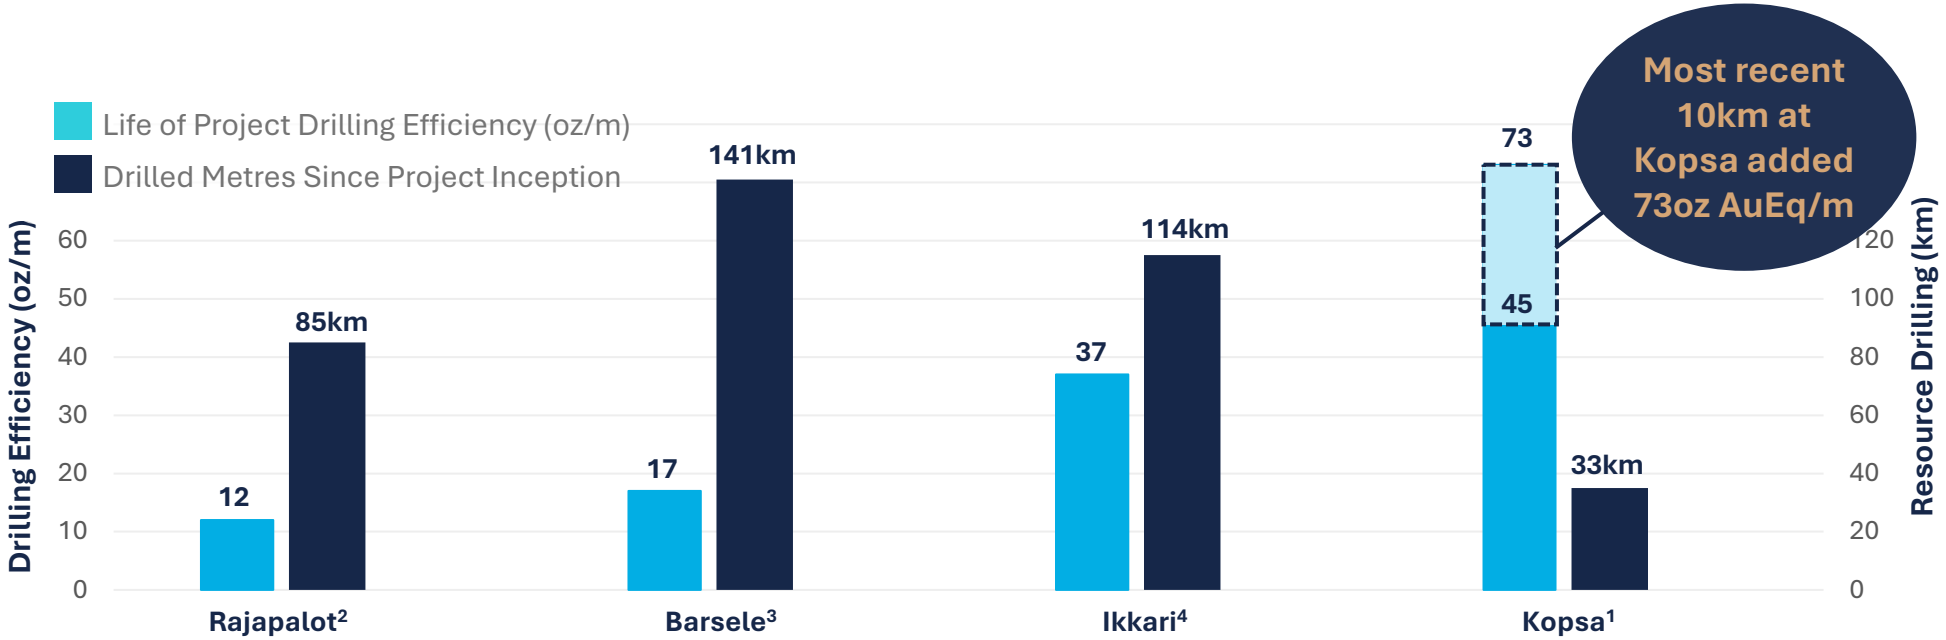

DE-RISKED ON THE MAJOR ISSUES

ISSUE	KOPSA	STATUS
MINING[1]	1.52Moz @ 1.07g/t AuEq resource in single pit, ~4:1 strip ratio, 86% Measured & Indicated. 90% of the resource within 215m of surface.	**Pit optimisation**
METALLURGY[2]	Non-refractory. Cu float then leach: 88-90% Au, 88-91% Cu, 80% Ag recovery. **Gold recovery holds at 88-90% across the grade range**. Further optimisation expected.	**PEA level**
PROCESSING	Existing infrastructure options. 2x processing plants within truck/rail distance.	**Optionality**
PERMITTING	Conditional mining concession in place. Zoning, road access and baseline studies underway.	**Advancing**
ROYALTIES	No third-party commercial royalties over 34km^2 of tenure.	**Clear**
POWER AND LOGISTICS	Reliable, low-cost grid power; road and rail through the belt.	**In place**

1 NNL ASX release “Interim MRE Lifts Kopsa to 1.52Moz in an Optimised Pit Shell”, 12 October 2026.
2 NNL ASX release “Strong Metallurgical Results Further Boost the Kopsa Gold-Copper Project”, 24 September 2026

KOPSA

BEST IN CLASS DRILLING EFFICIENCY... ACCELERATING

	Rajapalot[2]	Barsele[3]	Ikkari[4]	Kopsa[1]
Resource	9.8Mt @ 3.24g/t AuEq	31.1Mt @ 2.41g/t Au	62Mt @ 2.12g/t Au	44Mt @ 1.07g/t AuEq

KOPSA

BUILDING AN EXCEPTIONAL DEPOSIT

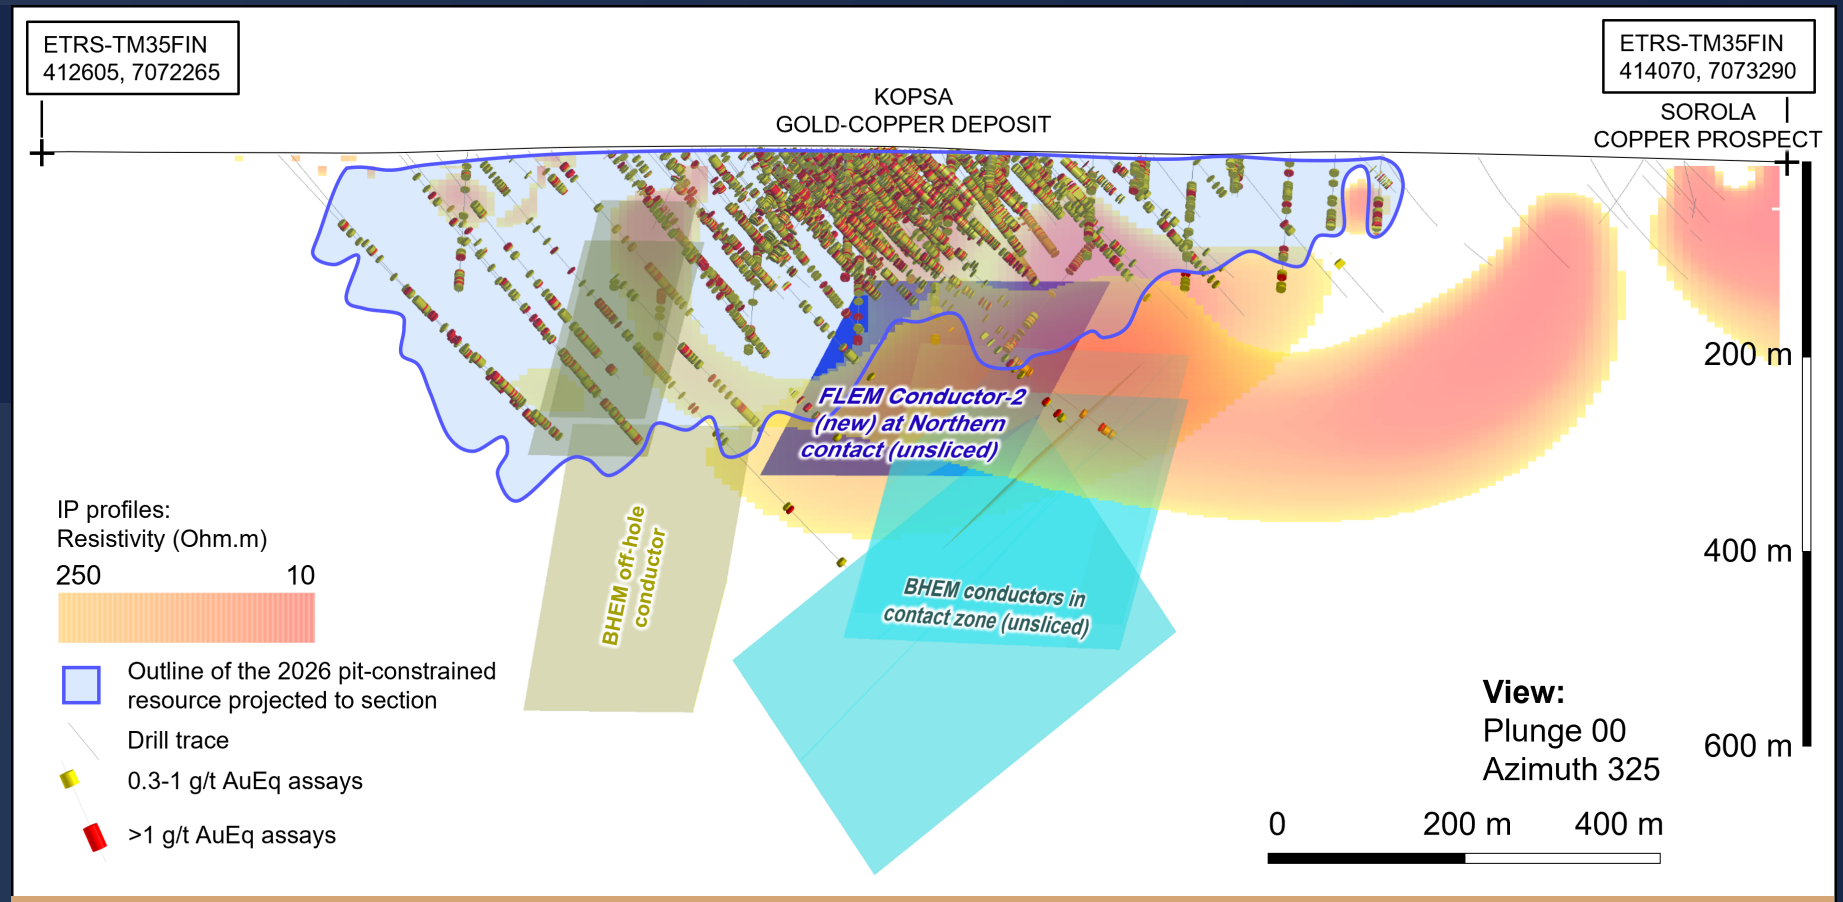

Wide Section

Favourable Geometry

Multiple growth paths

Geophysics shows widespread IP anomalism and undrilled FLEM conductors[1].

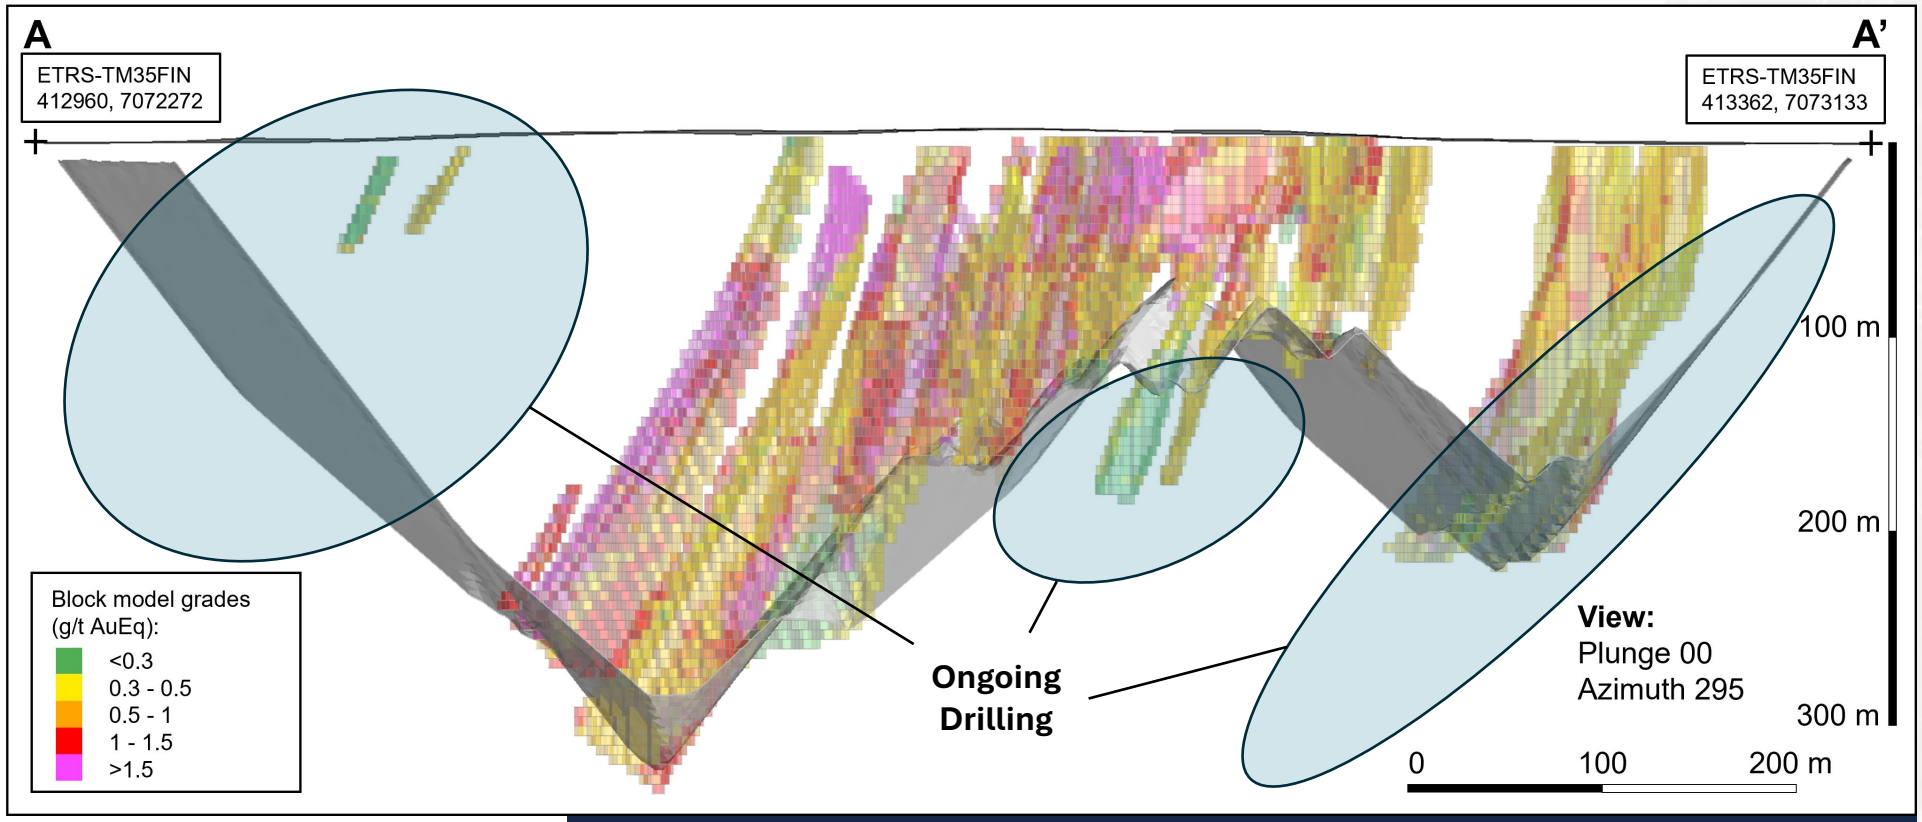

Significant undrilled zones remain along strike and at depth.

300m wide oblique section at Kopsa with mineralised drill traces and interpreted geophysical anomalism. Coordinates presented in ETRS-TM35FIN system.

1 Refer NNL ASX Announcements "Interim MRE Lifts Kopsa to 1.52Moz AuEq Within an Optimised Pit Shell", 12 October 2026 for Kopsa resource information and to "Major Finland Gold Transaction", 11 April 2025 and "Further Mineralised Extensions and Depth Potential at Kopsa North", 17 July 2026 for geophysical information.

ONGOING PIT SHELL ENHANCEMENT AND EXTENSIONS

Kopsa block model – 100m wide in-pit section view[1]. Coordinates presented in ETRS-TM35FIN system (EPSG:3067).

- **Wide mineralised zones in a single, low-strip pit (currently estimated 4:1).**
- **In-pit resource is constrained by drilling data, not economics.**
- **Targeting Improvements to Strip Ratio: ongoing 'near-resource' drilling to convert 'waste' into ore blocks.**
- **Targeting Further Extensions: along strike, at depth and to the new northern higher-grade zone.**

1 Refer to NNL ASX Announcement "Interim MRE Lifts Kopsa to 1.52Moz AuEq Within an Optimised Pit Shell", 12 October 2026.

KOPSA. GROWTH

OPEN HIGH GRADE ZONE

Northern zone discovery[1]

71m @ 3.04g/t AuEq

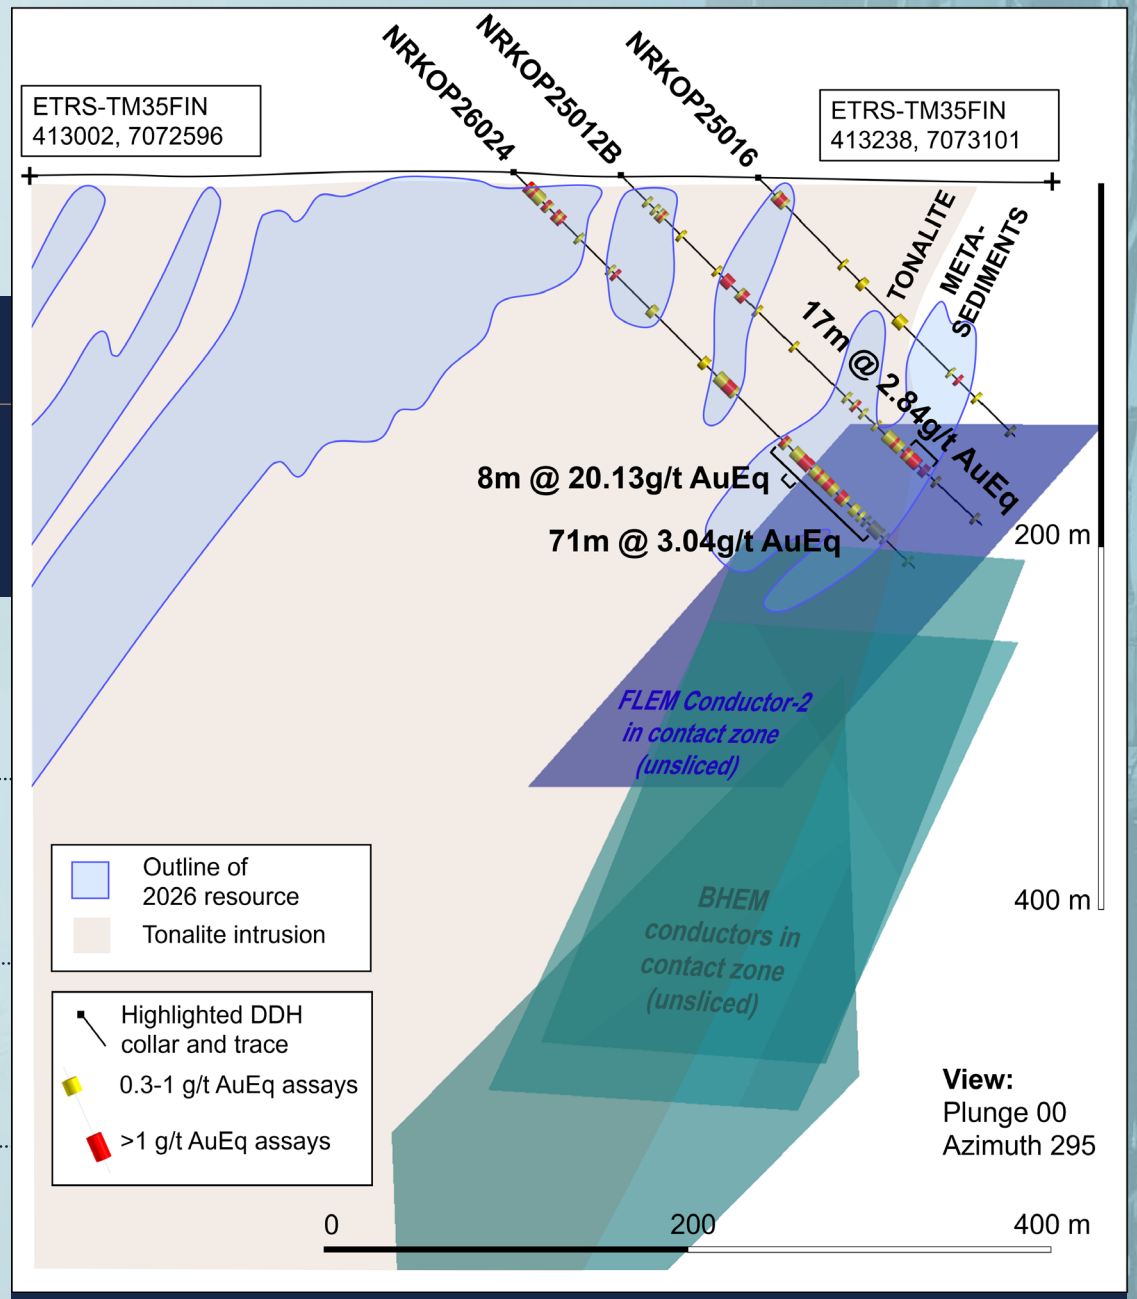

including 8m @ 20.13g/t AuEq

Discovery hole was testing modelled EM plates at the northern footwall contact.

Undrilled zones around this discovery are well inside the optimal pit shell...

...but the modelled EM conductors extend to over 600m vertical depth.

9,000m now drilling at Kopsa.

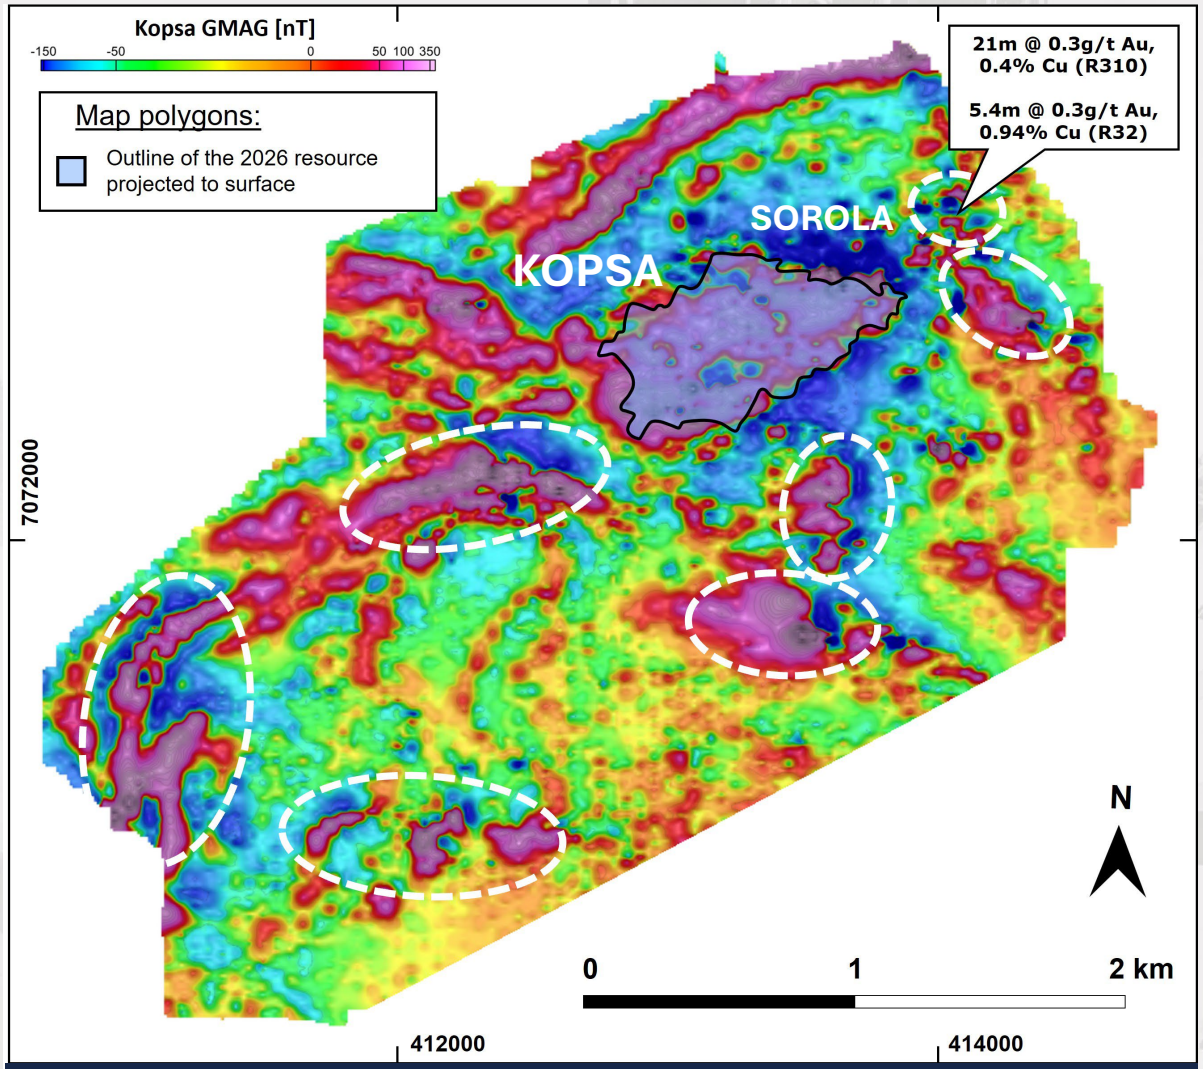

Sources: NNL ASX 15 Jun 2026 and 17 Jul 2026 (northern zone, geophysics); 12 Oct 2026 (pit shell).

1 Refer ASX release "Further Mineralised Extensions and Depth Potential at Kopsa North", 17 July 2026. AuEq information provided on earlier slide and in Appendix II.

NEARBY EXPLORATION UPSIDE

- **The host intrusion at Kopsa has a distinct magnetic signature[1].**
- **Numerous high priority 'near-deposit' (satellite) targets within 2km.**

- **Sorola the only area outside Kopsa with any historical drilling.**
- **Anomalies to be tested for satellite pit potential.**

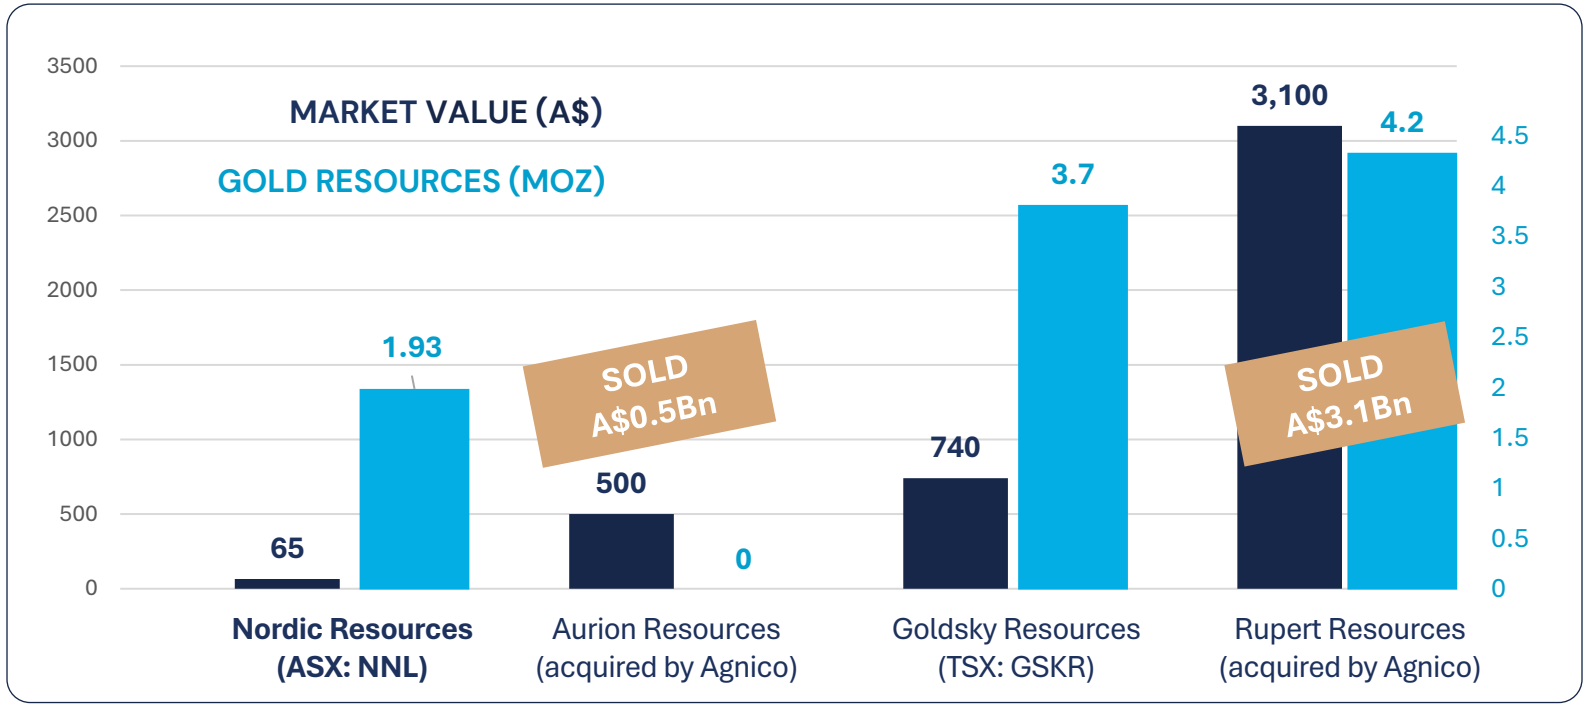

RMI map of the GMAG results highlighting the Kopsa tonalite magnetic anomaly and other high priority magnetic anomalies (dashed white line ovals). Coordinates ETRS-TM35FIN system (EPSG:3067).

PEOPLE

TEAM HAS DISCOVERED AND BUILT... AND SOLD IN FINLAND

Board and Corporate

Malcolm Norris
Non-Executive Chairman

40 years; discoveries incl. Cascabel (SolGold) and Tujuh Bukit (Intrepid)

Dr Robert Wrixon
Managing Director

25 years in strategy, mining M&A and exploration; PhD in Mineral Engineering, UC Berkeley

Graham Crew
Non-Executive Director (newly appointed)

Mine builder. Ex-CEO of Rupert Resources, sold to Agnico for A$3.1bn.

Juho Haverinen
Non-Executive Director

15 years in Finnish exploration; ex-Board of Finnish Mining Association

Marcello Cardaci
Non-Executive Director

Former partner, Gilbert + Tobin; 25 years in raisings and M&A

Aaron Bertolatti
CFO and Company Secretary

Chartered Accountant; 20 years in ASX company administration

Senior Project Team

Henrik Grind
Country Manager

35 years Finland and Sweden; former GM of the 10Mtpa Kevitsa mine; ex Boliden

Ray Robinson
GM Technical and Commercial

Mine developer and studies manager; leads Kopsa's technical studies

Simo Piippo
Exploration Manager

Led Kopsa's growth; ex First Quantum, Rio Tinto, Dragon Mining

SUMMARY

OUTLOOK FOR NNL SHAREHOLDERS

Valuation Upside

At A$30/oz NNL is still a fraction of Nordic peers.

Agnico paid A$738/oz for Rupert Resources in Finland.

Growing

1.93Moz AuEq and rising: Kopsa recently up 86% on just 9.6km.

13km of drilling now, plus a new high-grade zone.

De-risked

Shallow, royalty-free, 86% M&I, 88-90% recovery, conditional mining concession.

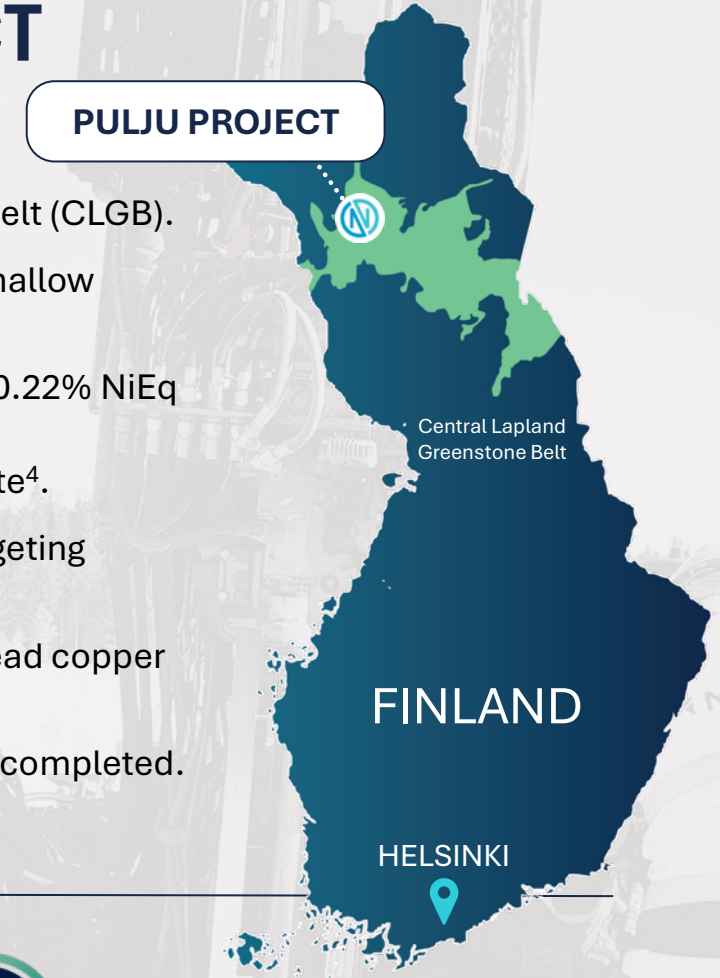

Two mills within trucking distance. Process options studies underway.

Next 12 Months

- Assays from at least 13km of drilling
- MRE updates for Kopsa, Ängesneva, others
- Processing studies and 3rd party deal options review
- Progress zoning, road access and EIA

Sources: as cited on preceding slides. Market data at 5 November 2026.

APPENDIX I: PULJU COPPER-NICKEL PROJECT

- District-scale (170km^2) copper-nickel exploration assets in the Central Lapland Greenstone Belt (CLGB).
- Hotinvaara Deposit - known high-grade massive sulphides (5-10% Ni) exist within extensive shallow disseminated nickel-cobalt zones, an extremely fertile magmatic nickel-copper belt.
- Only 3km^2 at Hotinvaara drilled thus far: JORC (2012) Mineral Resource Estimate of 418Mt @ 0.22% NiEq containing 862,800t Ni, 40,000t Co and 22,100t Cu[1,2,3]
  - Over 75% of Ni is in sulphides, almost entirely pentlandite, produces 18% Ni concentrate[4].
- Numerous company-making targets – prioritising high-grade massive sulphide potential – targeting analogues to world-class Sakatti copper-nickel deposit, also located in the CLGB.
- CLGB better known for copper and gold - Pulju drilling and trenching results confirm widespread copper mineralisation.
- Selected by BHP to participate in 2023 Xplor Program; Regional Ionic Leach™ survey recently completed.

Pulju Project Highlights

District Scale Potential

- ✓ UAV Mag survey and Base of Till drilling identified numerous large copper and nickel zones across Pulju.

Extensive Vertical Continuity

- ✓ Semi-continuous Ni-S mineralisation visible & drilled to over 1,000m at Hotinvaara prospect within the large ultramafic host unit.

Broad Lateral Continuity

- ✓ 2km continuous mineralised strike delineated and extensively drilled at Hotinvaara deposit.
- ✓ But over 35km semi-continuous mineralised strike in total.

1 ASX – Substantial Increase in Hotinvaara Resource, 11 March 2024: *Indicated Resource of 42Mt @ 0.22% Ni, 0.01% Co, 56ppm Cu; Inferred Resource of 376Mt @ 0.20% Ni, 0.01% Co, 52ppm Cu.*
2 NNL confirms all material assumptions and technical parameters underpinning the Resource Estimate continue to apply and have not materially changed as per Listing Rule 5.23.2
3 NiEq formula per ASX release on metallurgical results 23 October 2024. NiEq = Ni(%) + Co(%)*1.23. Assumes (recovery / US$ prices per t): Ni 62% / $17,500, Co 51% / $26,000. In the Company's opinion, the metals included in the NiEq calculation (Ni and Co) have reasonable potential to be recovered and sold.
4 ASX – Excellent Metallurgical Results at Hotinvaara Enhance Entire Pulju Project, 23 October 2024

APPENDIX II: COMPANY GOLD RESOURCES TABLE[1]

Total Resources of 1.93Moz AuEq (80% Measured & Indicated).

Mineral Resources	Tonnes (Mt)	Au (g/t)	Cu (%)	Ag (g/t)	AuEq (g/t)	Au (Moz)	Cu (kt)	Ag (Moz)	AuEq (Moz)
Kopsa

Angesneva (Kiimala Trend)									
Indicated Resources	3.85	1.19	-	-	1.19	0.15	-	-	0.15
Angesneva Total	**3.85**	**1.19**	**-**	**-**	**1.19**	**0.15**	**-**	**-**	**0.15**
Hirsikangas									
Indicated Resources	2.69	1.17	-	-	1.17	0.10	-	-	0.10
Inferred Resources	4.60	1.10	-	-	1.10	0.16	-	-	0.16
Hirsikangas Total	**7.29**	**1.13**	**-**	**-**	**1.13**	**0.26**	**-**	**-**	**0.26**
Combined Measured Resources	14.15	0.90	0.15	2.34	1.13	0.41	22	1.06	0.51
Combined Indicated Resources	29.60	0.90	0.12	1.88	1.09	0.86	37	1.79	1.03
Combined Inferred Resources	11.40	0.88	0.11	1.77	1.05	0.32	13	0.65	0.38
Combined Project Resources	**55.2**	**0.90**	**0.13**	**1.97**	**1.09**	**1.59**	**71**	**3.50**	**1.93**

AuEq figures for the Kopsa Resource were calculated using US$3,500/oz gold price, US$14,000/t copper price and US$60/oz silver price. Recovery factors of 88%, 89% and 79% are applied for Au, Cu and Ag respectively based on 2026 Kopsa metallurgical results and as recommended by NNL's consultant Mr Chris Martin. Resultant formula applied is AuEq (g/t) = Au (g/t) + 1.258*Cu (%) + 0.0154*Ag (g/t). In the Company's opinion, the metals included in the equivalent calculation (Au,Cu,Ag) have reasonable potential to be both recovered and sold.

Kopsa is reported inside an optimal pit shell. Resources for Angesneva and Hirsikangas should be considered *in situ* in accordance with JORC (2012) reporting guidelines. NNL confirms all material assumptions and technical parameters underpinning the Resource Estimates continue to apply and have not materially changed as per Listing Rule 5.23.2.

1 *Refer to NNL ASX releases "Interim MRE Lifts Kopsa to 1.52Moz AuEq Within an Optimised Pit Shell", 12 October 2026, "Kiimala Project Review adds further 147koz Gold in Indicated Resources", 29 May 2025 and "Hirsikangas Increases Gold Resources by 34% to over 1Moz", 14 July 2025..*
