GATEWAY MINING LTD
ASX Code:GML

ASX: GML | 2026 AGM PRESENTATION | NOVEMBER 2026

Major Discovery Underway

Yandal — building Australia's next multi-million-ounce gold camp

41m @ 2.0 g/t Au
incl. 9m @ 7.5 g/t Au.
Cowza RC discovery (CZRC057)

13km+
of mineralised strike on the Celia Shear Zone.

400koz Au
Inferred Mineral Resource — open at depth.

Richard Pugh, Chief Executive Officer

Important Information and Disclaimer

Forward Looking Statements

- This presentation has been prepared by Gateway Mining Ltd (GML). The information contained in this presentation is a professional opinion only and is given in good faith. Certain information in this document has been derived from third parties and through GML has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by GML.
- This presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and the completeness of the information, statements and opinions contained.
- This is for information purposes only. Neither this nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of GML shares in any jurisdiction. This does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments.
- To the fullest extent permitted by law, GML, its officers, employees, related bodies corporate, agents and advisors do not make any representations or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimated, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this arising out of negligence or otherwise is accepted.

In particular they speak only as of the date of this document, they assume the success of GML's strategies, and they are subject to significant regulatory business, competitive and economic uncertainties and risks. Actual events may vary materially from the forward-looking statements and the assumptions on which the forward-looking statements are based. Recipients of this document are cautioned to not place undue reliance on such forward-looking statements.

Important Information

- Nothing in this material should be construed as either an offer to sell or a solicitation of an offer to buy or sell securities.
- Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and the completeness of the information, statements and opinions contained.
- By receiving the Presentation, you acknowledge and represent to the Company that you have read, understood and accepted the terms of this disclaimer. This Presentation is not a prospectus, product disclosure statement or other offering document under Australian law or any other law (and will not be lodged with the Australian Securities and Investments Commission (ASIC) or any other foreign regulator) and is not, and does not constitute, an invitation or offer of securities for subscription, purchase or sale in any jurisdiction. In particular, this Presentation does not constitute an invitation or offer of securities for subscription, purchase or sale in the United States or any other jurisdiction in which such an offer would be illegal. The securities referred to in this Presentation have not been, and will not be, registered under the US Securities Act of 1933 as amended or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold, directly or indirectly in the United States.
- The presentation has been authorised for release by the Executive Chairman of the Company.

Competent Person Statement

- The information in this presentation that relates to Exploration Results and Mineral Resources has been extracted from various GML ASX announcements and are available to view on the GML website at www.gatewaymining.com.au or through the ASX website at www.asx.com.au (using ticker code "GML").
- GML confirms that it is not aware of any new information or data that materially affects the information included in the original market announcementand that all material assumptions and technical parameters underpinning the Mineral Resources in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The Team That Identified, Acquired and Advanced Yandal

Andrew Bray Executive Chairman	15+ years in the formation, financing and development of natural resources companies including Strickland Metals, Silver Mines and Futura Resources. Former CEO of Strickland Metals (previous owner of the Yandal Gold Project).
Richard Pugh Chief Executive Officer	20+ years of geology experience across several ASX mineral exploration companies. Current NED of Norfolk Metals Limited; former Executive Technical Director, Strickland Metals.
Anthony McClure Non-Executive Director	30+ years of technical, management and financial experience in the resources sector worldwide. Current Executive Chair of Norfolk Metals Limited; former director of Silver Mines, Strickland Metals Bolnisi Gold, Nickel Mines, European Gas and Santana Minerals.
David Morgan Non-Executive Director	Mining and mechanical engineer with 40+ years in Australia and Africa, including Rio Tinto, Macmahon and WMC Resources. Former GM at Equigold and Sundance Resources; former director of Discovex and Strickland Metals; current NED of Nagambie Resources.
David Crook Non-Executive Director	Geologist and company director with 40+ years' experience. Inaugural Managing Director of Pioneer Resources; current Managing Director of Tyranna Resources.

YANDAL GOLD PROJECT

Key Project Areas

- Within 50km of Northern Star's Yandal Operations Centre.
- >400koz Au Mineral Resource Estimate.[1]

1. Refer to Appendix A for further details regarding Yandal Mineral Resource Estimate.

THE PAST TWELVE MONTHS

Foundations Laid, Targets Defined, Drilling Underway

Since the Yandal acquisition and management change in mid-2025, Gateway has run a systematic, belt-scale exploration program

WORK COMPLETED

>160,000m
of aircore drilling across the belt

>20,000
multi-element drill samples analysed

Belt-scale
magnetic and gravity data processed to map the key mineralised structures

GML SHARE PRICE (A$) — JULY 2025 TO SEPTEMBER 2026

Last price A$0.096 (4 September 2026)..

OUTCOMES

2 gold systems
Orogenic gold and gold–silver "splay structure" mineralisation.

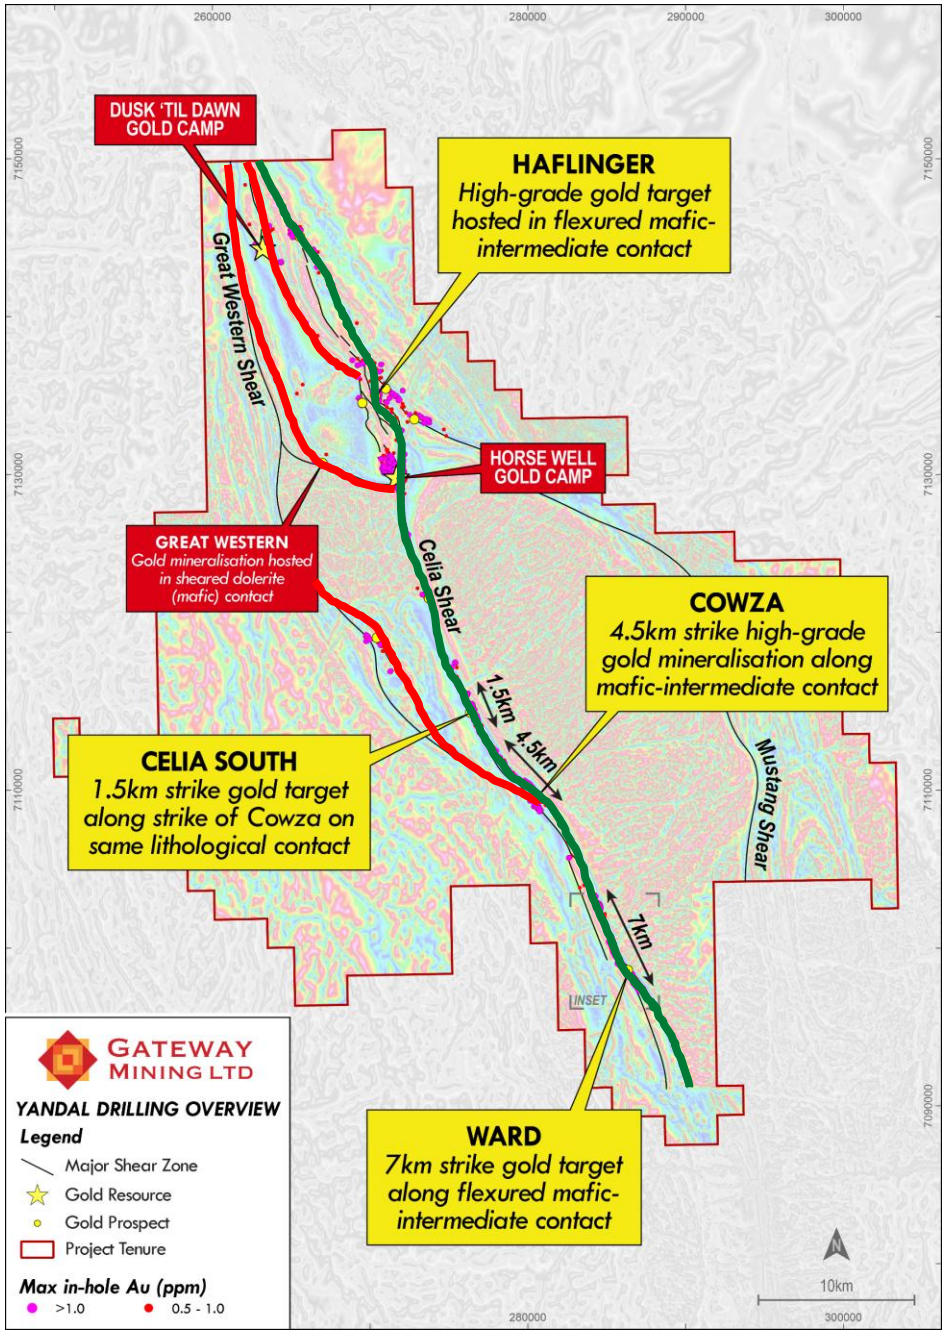

5 orogenic targets
Cowza, Haflinger, Celia South, Pewy and Horse Well.

3 Au–Ag targets
Great Western, Great Western South and Dusk 'til Dawn.

Drill Rigs
Multiple rig campaign underway with more details to follow.

Project Overview

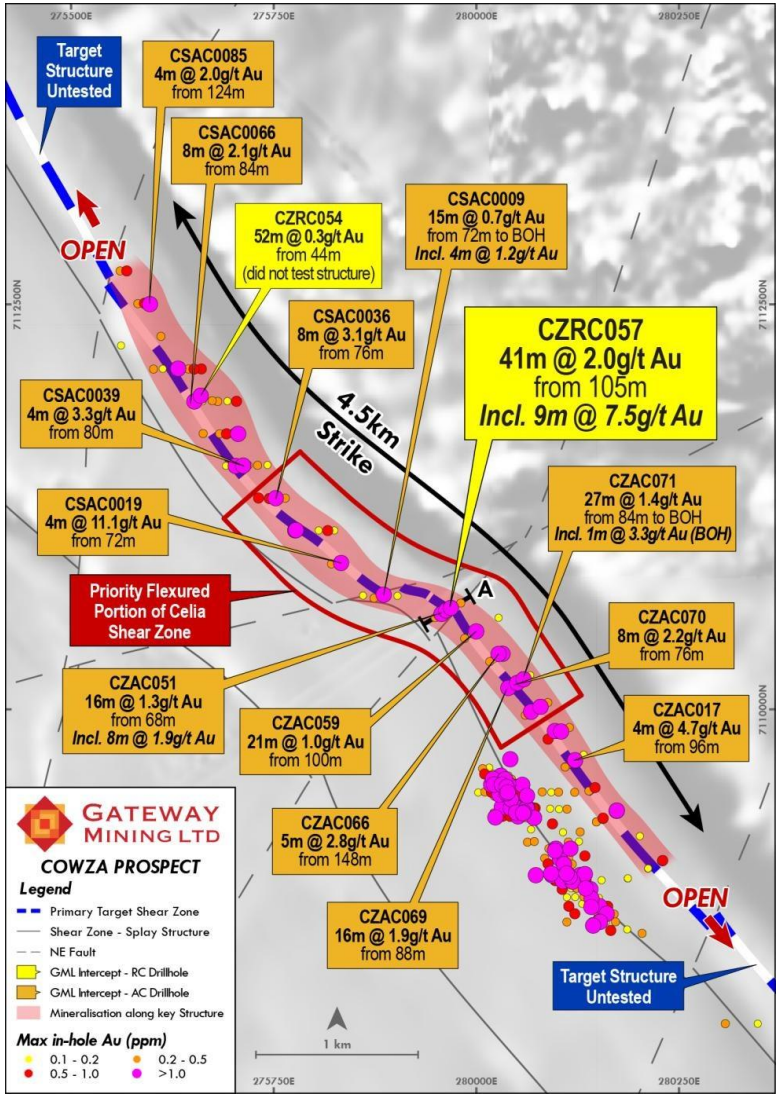

- 70km of prospective greenstone belt.
- **Orogenic Gold Targets**
  - *Significant gold mineralisation based on four key factors:*
    1. ***Mafic-intermediate contact*** **-** *creates the perfect rheological contrast for significant gold mineralisation to be deposited.*
    2. ***Northeast trending structures*** *– creating zones of dilation required for hydrothermal gold bearing fluids to infiltrate.*
    3. ***Zones of de-magnetization*** **–** *evidence of magnetic destruction of host rocks as part of the hydrothermal gold system.*
    4. ***Deep seated basinal structure*** **–** *Celia Shear Corridor.*
- **Gold-Silver 'Splay Structure' Targets**
  - *Positioned along regional 'splay structures' and associated 'late intrusions'.*
    - *Great Western*
    - *Dusk 'til Dawn*
    - *Great Western South*

First Hole Into the Primary Structure

41m @ 2.0 g/t Au
Incl. 9m @ 7.5 g/t Au from 105m
CZRC057[1]

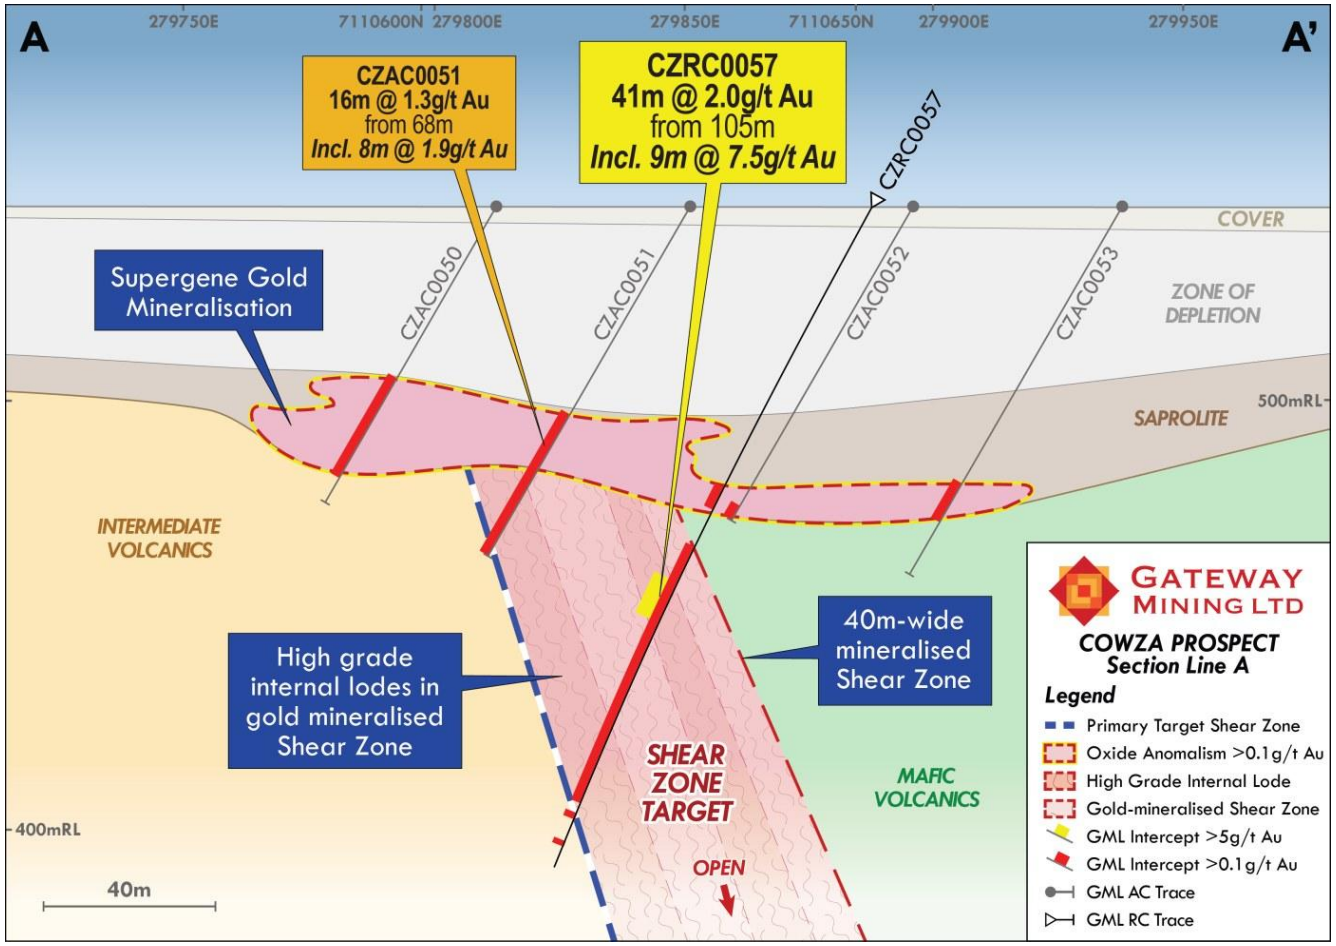

- High-grade gold mapped over 4.5km along the favourable mafic–intermediate contact, hosted within a 4.5km de-mag zone.
- Historic drilling focused on "footwall" mineralisation and never tested the main primary structure.
- Gateway's aircore drilling defined a coherent, continuous trend of high-grade gold — the target had never been drill-tested before Gateway's involvement.
- RC drilling has now confirmed the discovery in fresh rock; the structure remains open along strike in both directions.

1. Refer to ASX announcement 2 September 2026.

Oxide Grade Becomes Fresh-Rock Grade

Aircore oxide mineralisation directly overlies a 40m-wide gold-mineralised shear zone

8m @ 1.9 g/t Au in oxide

… becomes 41m @ 2.0 g/t Au in fresh rock directly beneath (CZRC057) — a demonstration of what oxide grade turns into at depth.[1]

A 40m-wide mineralised shear zone

High-grade internal lodes within a broad, gold-mineralised shear zone on the primary target structure.

CZRC054 (~2km north): 52m @ 0.3 g/t Au[1]

Did not intersect the target structure — that position remains untested and open.

Next steps

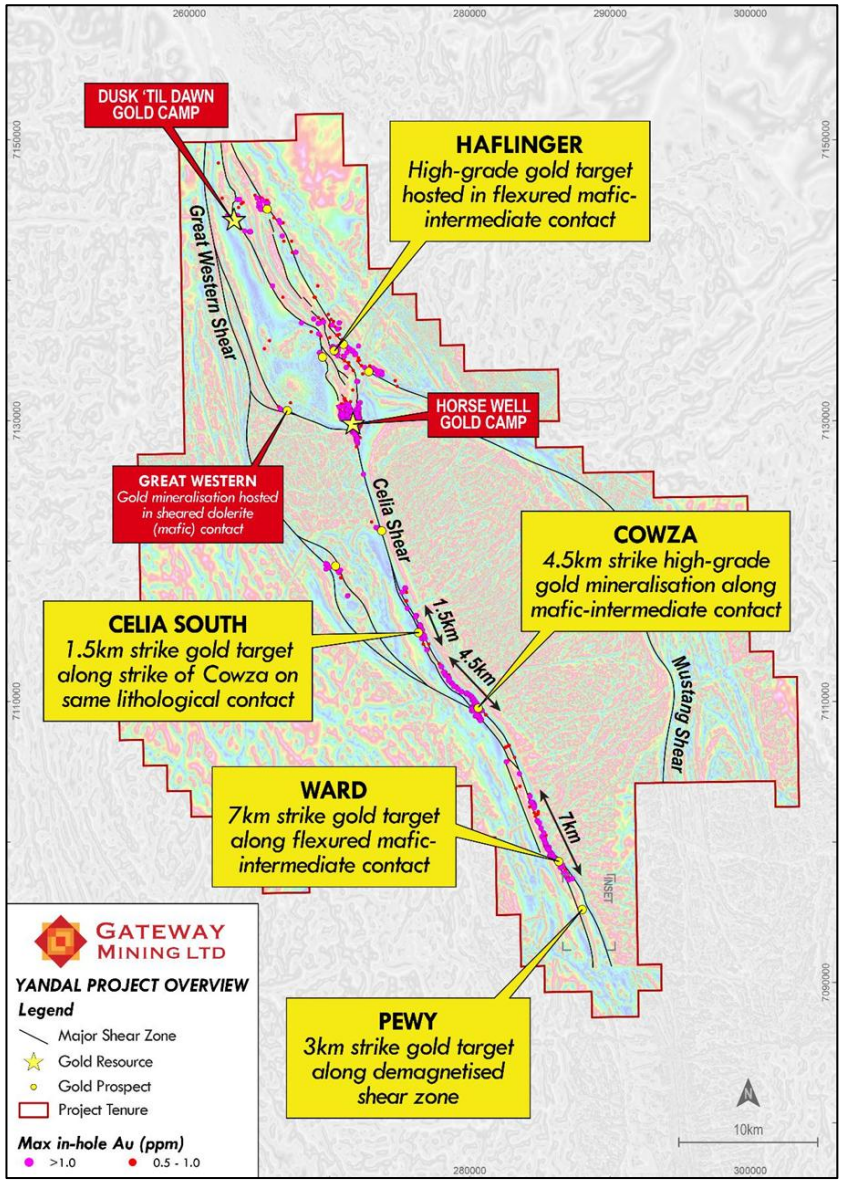

Multiple rig campaign underway.

1. Refer to ASX announcement 2 September 2026.

CELIA SHEAR ZONE

Emerging Gold System

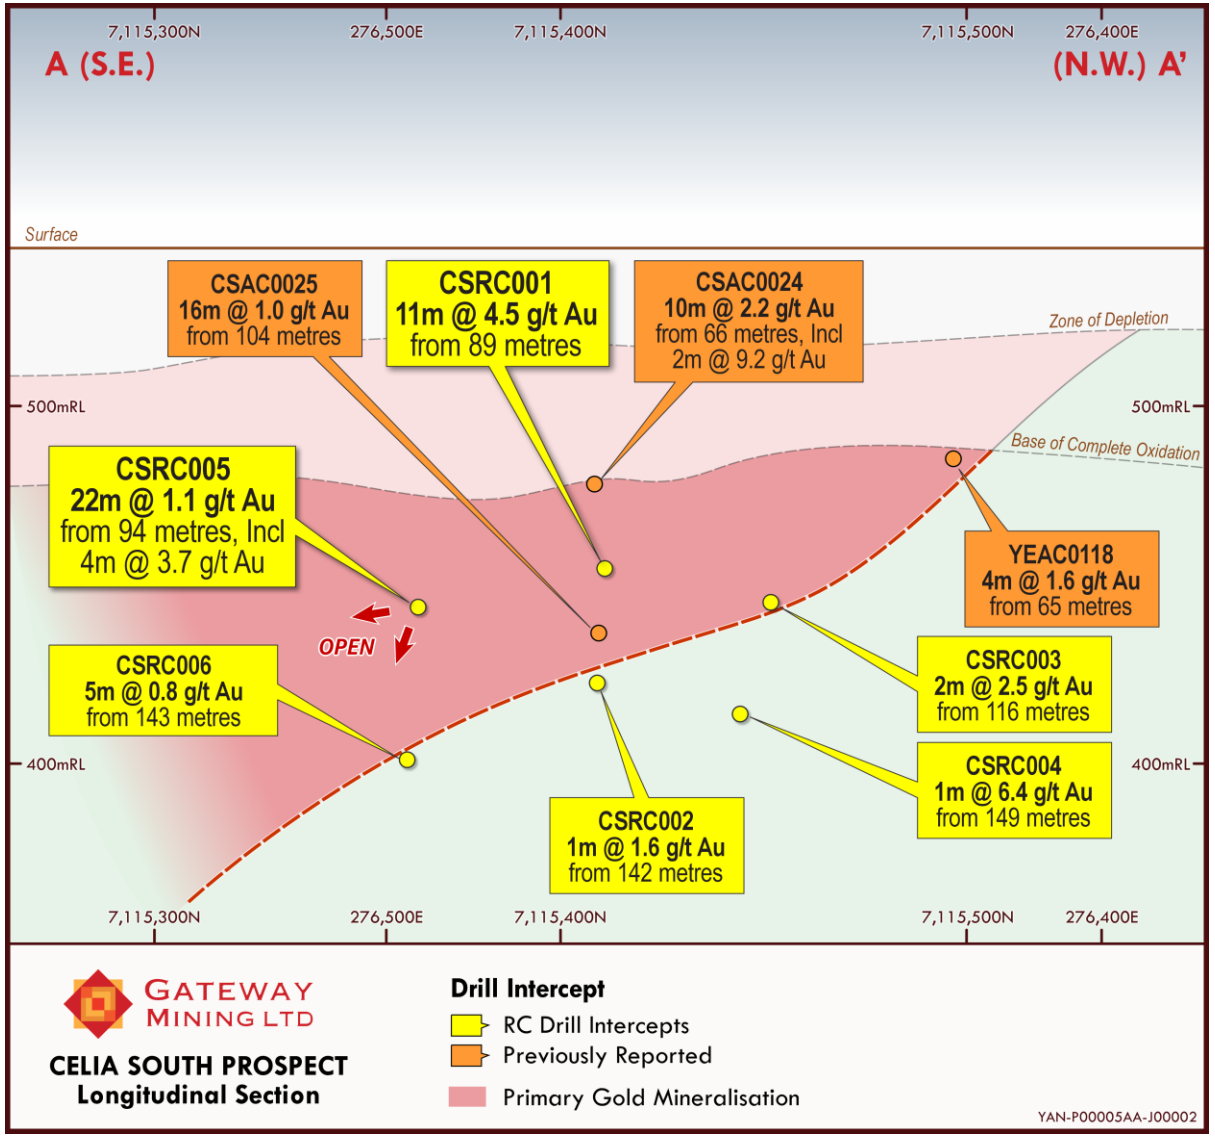

- Cowza, Celia South and Ward prospects comprise of more than **13km of mineralised strike**, hosted within a favourable sequence of mafic and intermediate volcanic rocks.
- Extensive oxide mineralisation is proven to be underpinned by high grade primary gold mineralisation.
- Large portions of the Cowza, Celia South and Ward trends are yet to be tested by deeper drilling - potential to define additional high-grade gold mineralisation along strike and at depth.
- **Pewy** emerging as the next high-priority drill target.

CELIA SHEAR ZONE

Celia South Discovery

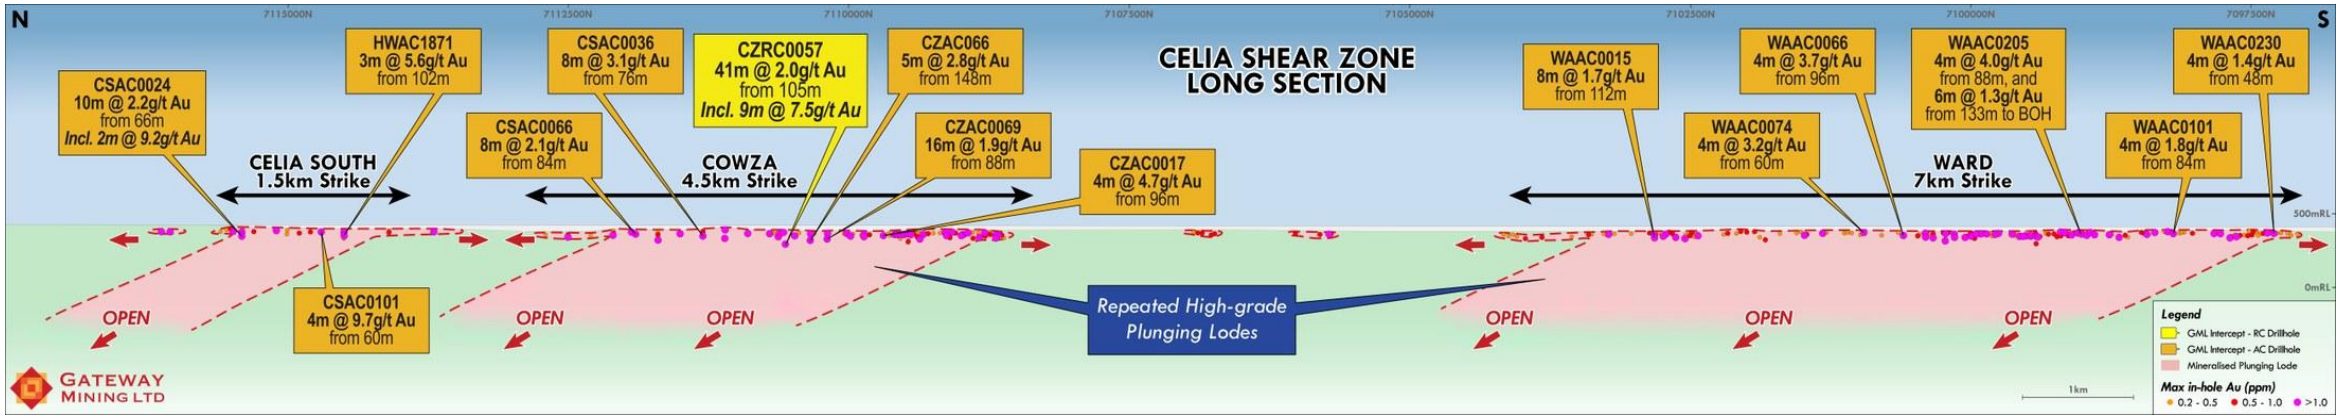

- RC drilling has confirmed high-grade gold mineralisation in fresh rock with assays returning:[1]
  - 11 metres @ 4.5g/t Au from 89 metres (CSRC001)
  - 22 metres @ 1.1g/t Au from 94 metres Incl. 4 metres @ 3.7g/t Au (CSRC005)
- Gold mineralisation occurs as a series of plunging shoots, developed within a broader mineralised corridor.
- This exploration model closely resembles the geological architecture observed at a number of significant Yandal deposits, where multiple mineralised shoots collectively contribute to substantial resource growth.

1. Refer to ASX announcement dated 16 November 2026.

13 Kilometres of Mineralised Strike on One Structure

Repeated high-grade plunging lodes from Celia South through Cowza to Ward — large portions untested by deeper drilling

Celia South · 1.5km	Cowza · 4.5km	Ward · 7km

N S

CELIA SOUTH[1]

- CSRC001 11m @ 4.5 g/t Au
- CSRC005 22m @ 1.1 g/t Au incl. 4m @ 3.7 g/t
- CSAC0024 10m @ 2.2 g/t Au incl. 2m @ 9.2 g/t
- CSAC0101 4m @ 9.7 g/t Au
- HWAC1871 3m @ 5.6 g/t Au (historic)

COWZA[2]

- CZRC057 41m @ 2.0 g/t Au incl. 9m @ 7.5 g/t (RC)
- CSAC0036 8m @ 3.1 g/t Au
- CZAC017 4m @ 4.7 g/t Au

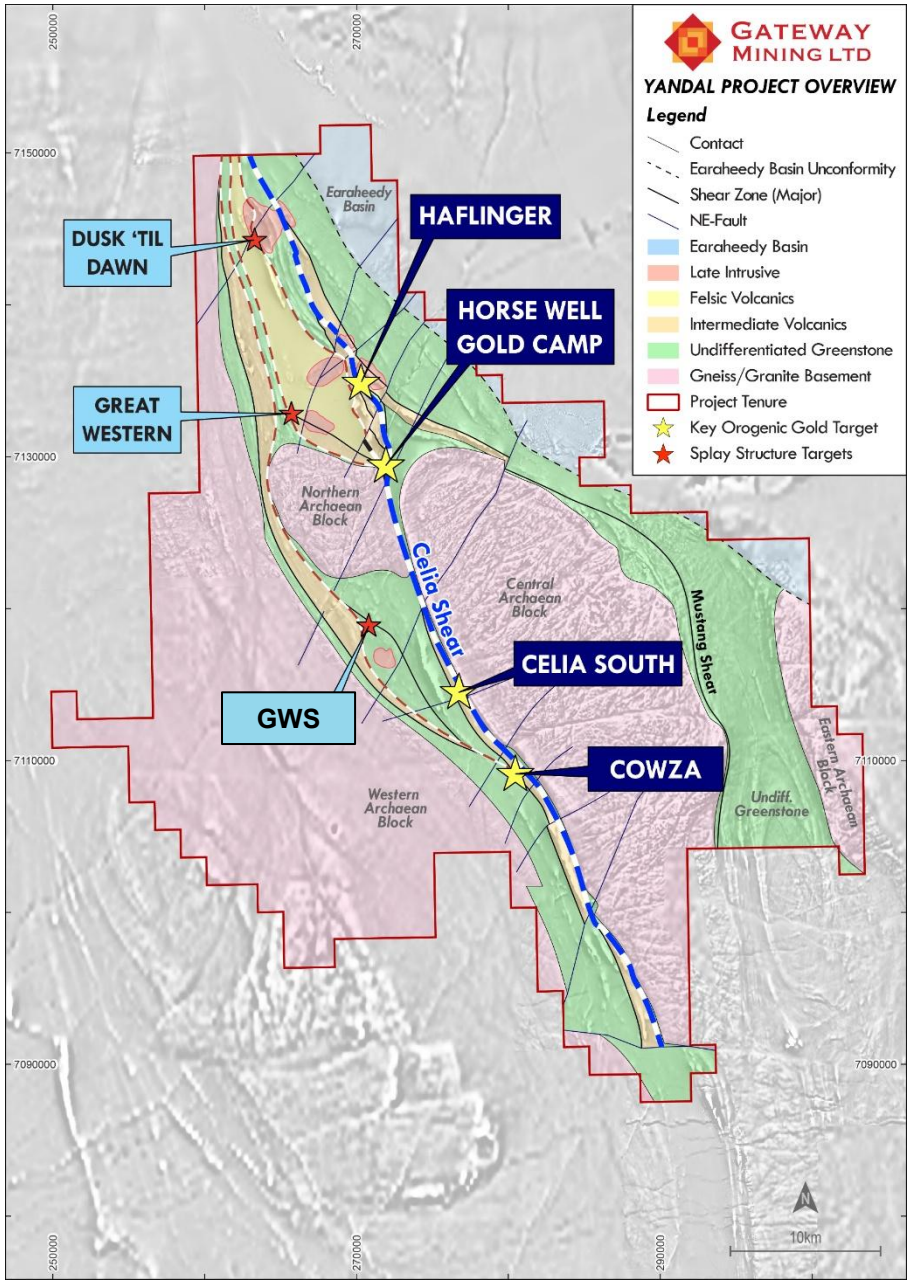

WARD[3]

- WAAC0205 4m @ 4.0 g/t Au and 6m @ 1.3 g/t to end of hole
- WAAC0066 4m @ 3.7 g/t Au
- WAAC0074 4m @ 3.2 g/t Au

    - *Dusk 'til Dawn*

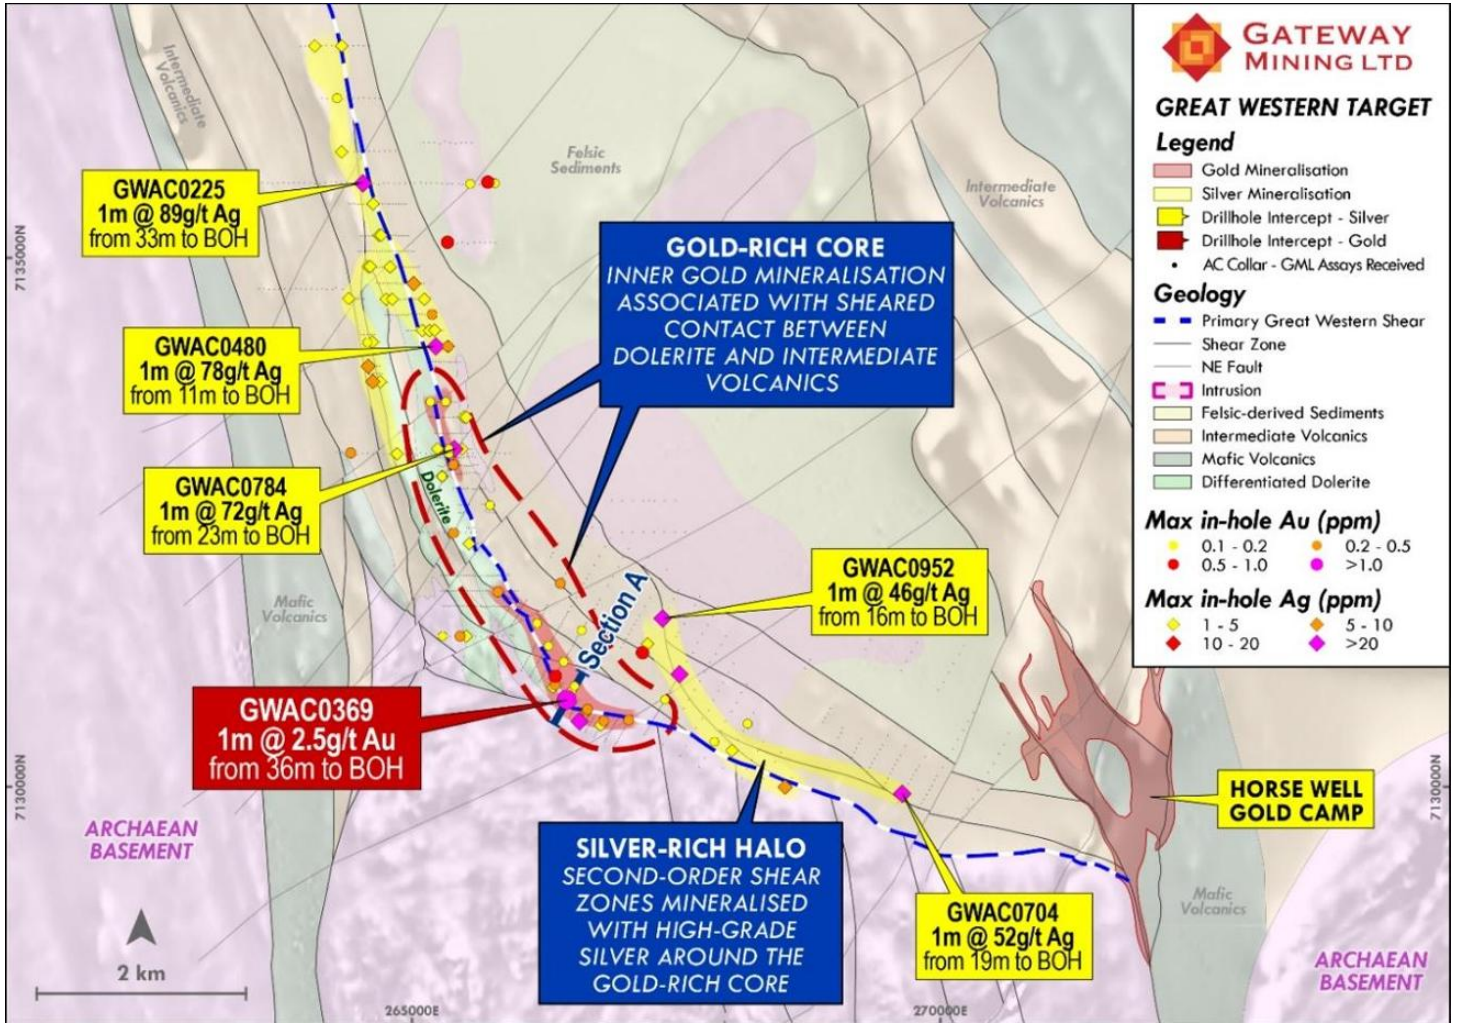

AU–AG SPLAY STRUCTURE TARGETS

Great Western — A Large Gold–Silver System, Barely Skimmed

Golden Mile-style zonation: gold in the hot, ductile core; silver in the cooler, brittle halo

- Large scale gold-silver system defined by drilling.[1]
- Extensive BOH gold anomalism in intensely sheared dolerite.
- Unexpectedly, high grade BOH silver intersected along the shear corridor
- Evidence of a very substantial. hydrothermal – drilling has only 'skimmed' across the top.
- Highly analogous to the Golden Mile – gold concentrated in ductile intensely sheared dolerite margin (hotter part); silver in the outward more brittle deformation zones (cooler part).
- Exploration work ongoing – RC drilling later this year.

1. Refer to ASX announcements dated 23 June 2026.

Great Western — Nuggets Galore!!

Golden Mile-style zonation: gold in the hot, ductile core; silver in the cooler, brittle halo

Cautionary Statement:

Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

The gold mineralisation reported is in nuggety form. The minerals visually observed is native free gold, however, being nuggets, they have not been assayed to confirm purity and if any other trace elements may be present. The Company notes gold nuggets showing this colour typically have a high gold purity.

The abundance of gold is constrained to the 134 nuggets reported. The nuggets range in size from 1.5 grams to approximately 26.5 grams and have an angular habit. The nuggets were discovered near surface on tenement E69/2765 to a maximum depth of approximately 40cm using metal detecting equipment. The nuggets are not representative of the entire area with approximately 60% of the nuggets confined to an area approximately 200m (north-south) x 100m (east-west) – centered around 265,380mE and 7,133,110mN (Grid MGA94 Zone 51). The remainder of the nuggets were dispersed along the recently defined surface sampling gold anomaly for approximately 1.2 kilometres of strike on tenement E69/2765.

The Company will undertake additional exploration activities to further assess the abundance of gold within the area where the nuggets were discovered, and across the wider Yandal Project. As previously announced, a wider soil sampling program is ongoing, to map this new anomalous gold trend to Horse Well. A trial 2D IP survey line will also be undertaken across the peak gold anomaly defined to date across Great Western. This survey will be completed once the 3D IP survey across Dusk ‘til Dawn has been finalised. Both set of results will be released to the market in due course. Drilling plans will be released to the market after the Company receives and reports these results.

Refer to ASX Announcement dated 17 September 2025 for full details regarding nugget samples.

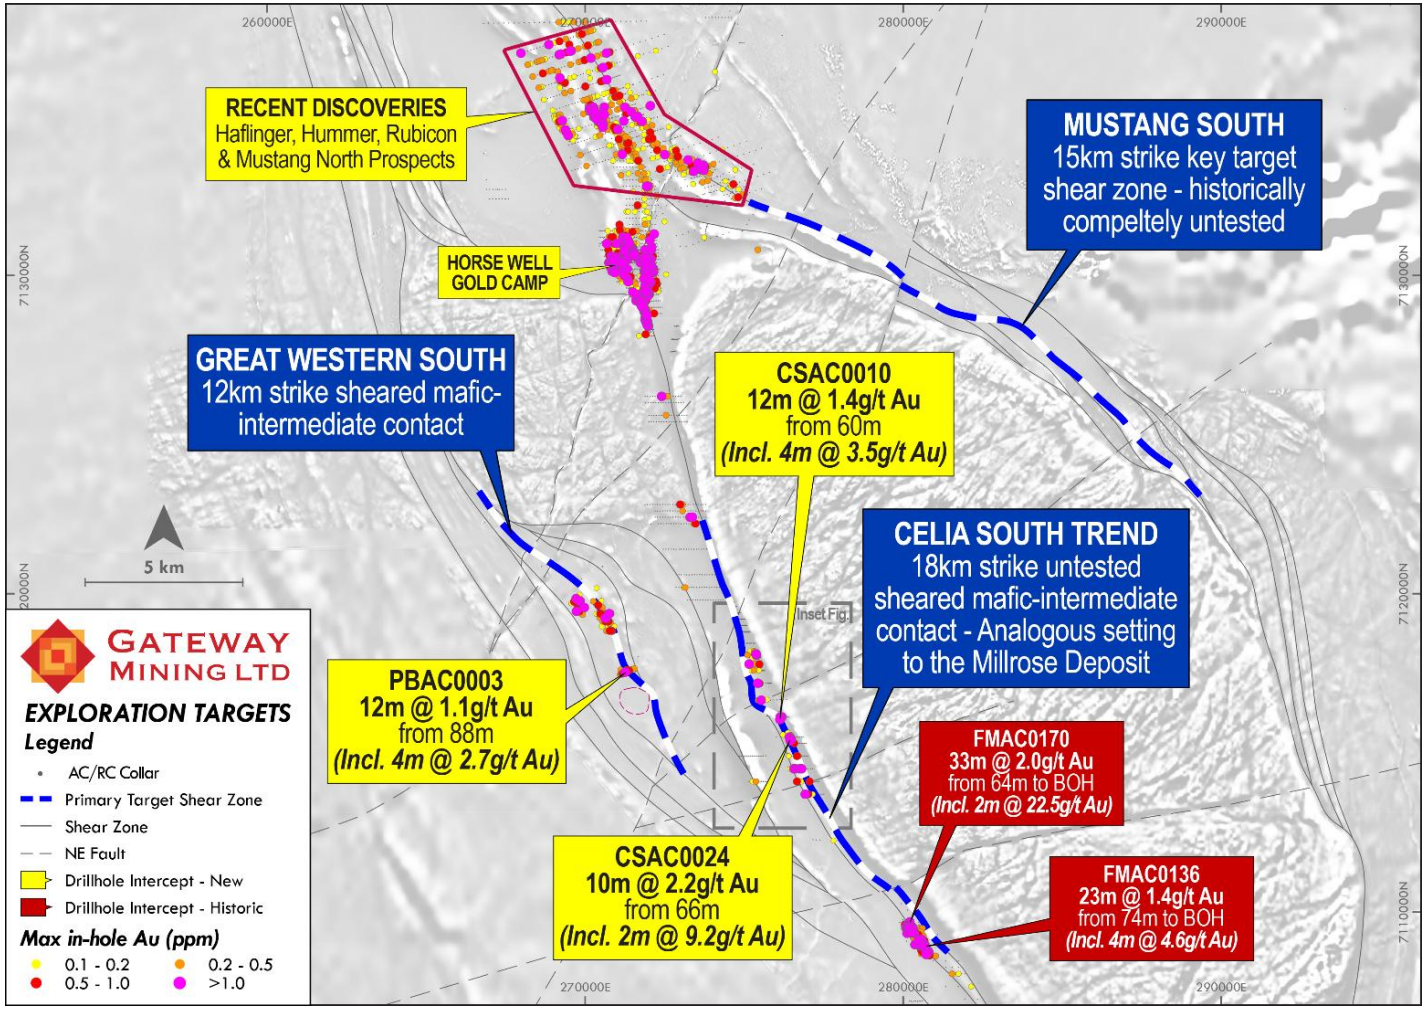

AU–AG SPLAY STRUCTURE TARGETS

Great Western South

The southern extension of the shear corridor that hosts Great Western

- Southern extension of the shear corridor that hosts Great Western.[1]
- 12km strike of sheared mafic-intermediate contact (the key contact).
- First pass drilling intersected[1] :
  - PBAC0003: 12m @ 1.1g/t Au incl 3m @ 2.7g/t Au.
- Follow-up AC drilling is underway, with first assays expected in the coming weeks.

1. Refer to ASX announcement dated 3 June 2026.

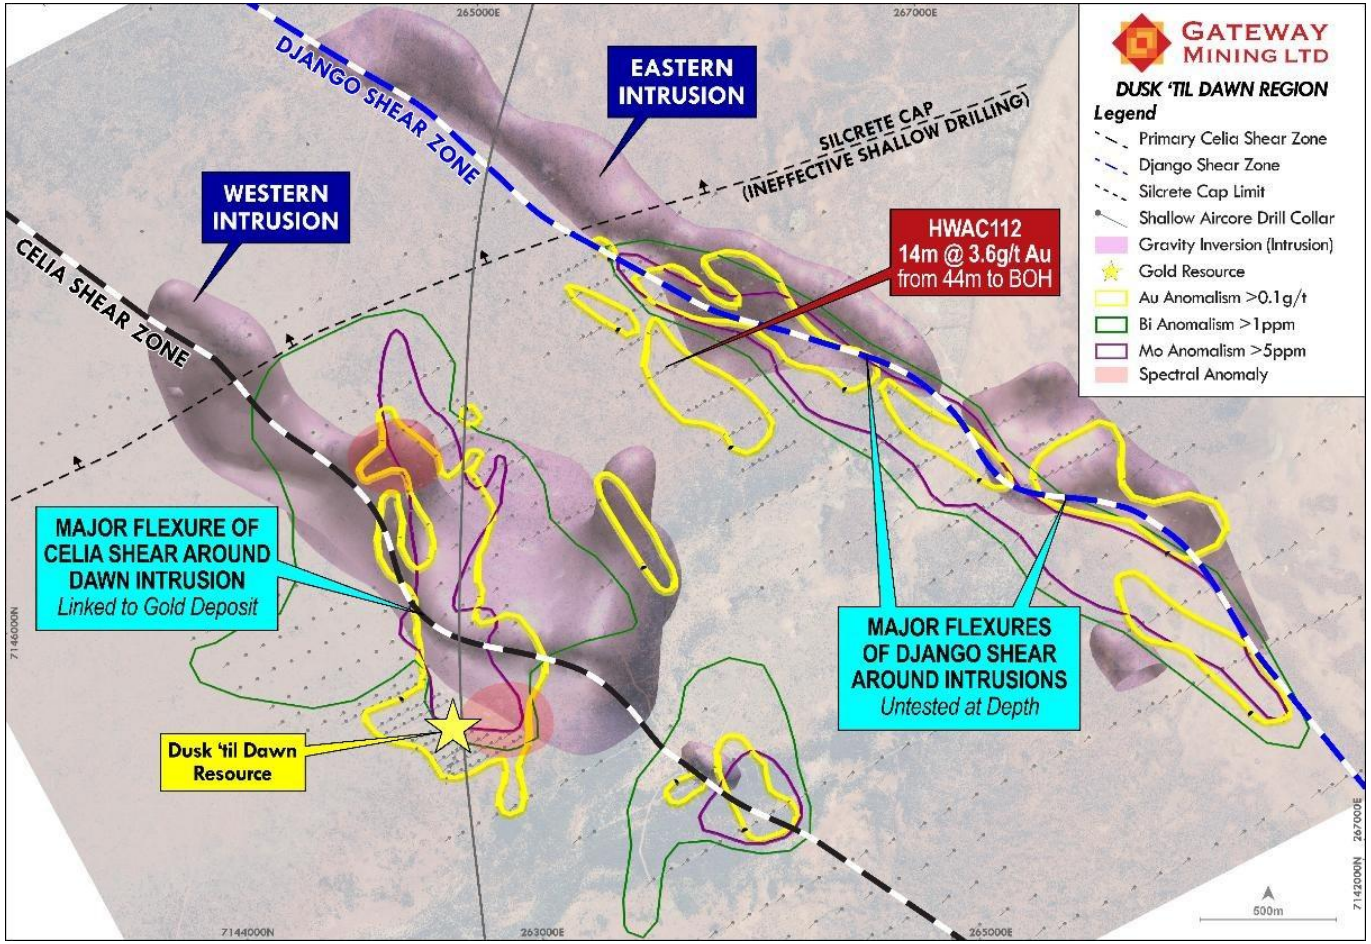

AU–AG SPLAY STRUCTURE TARGETS

Dusk 'til Dawn — A 109koz Resource With Intrusion-Related Upside

Extensive geophysics has defined key intrusions either side of the Celia Shear Zone — a very large hydrothermal system

- Extensive geophysical work has defined the key Western and Eastern intrusions.
- Alteration and large Au–Ag–Mo–Cu–Bi–Te geochemical trends coincide with the intrusive features.
- Major flexures of the Celia and Django shear zones around the intrusions — linked to the existing gold deposit and untested at depth.
- **Resource:** 3.5Mt @ 1.0 g/t Au for 108,900oz Inferred (0.5 g/t cut-off).

PEAK RESULTS[1]

33m @ 3.6 g/t Au
from 61m — DTDR001

14m @ 10.0 g/t Au
from 50m — DDRC001

13m @ 8.8 g/t Au
from 111m — DDRC014

30m @ 2.0 g/t Au
from 144m — ACDR003

1. Refer to ASX announcement 2 July 2025.

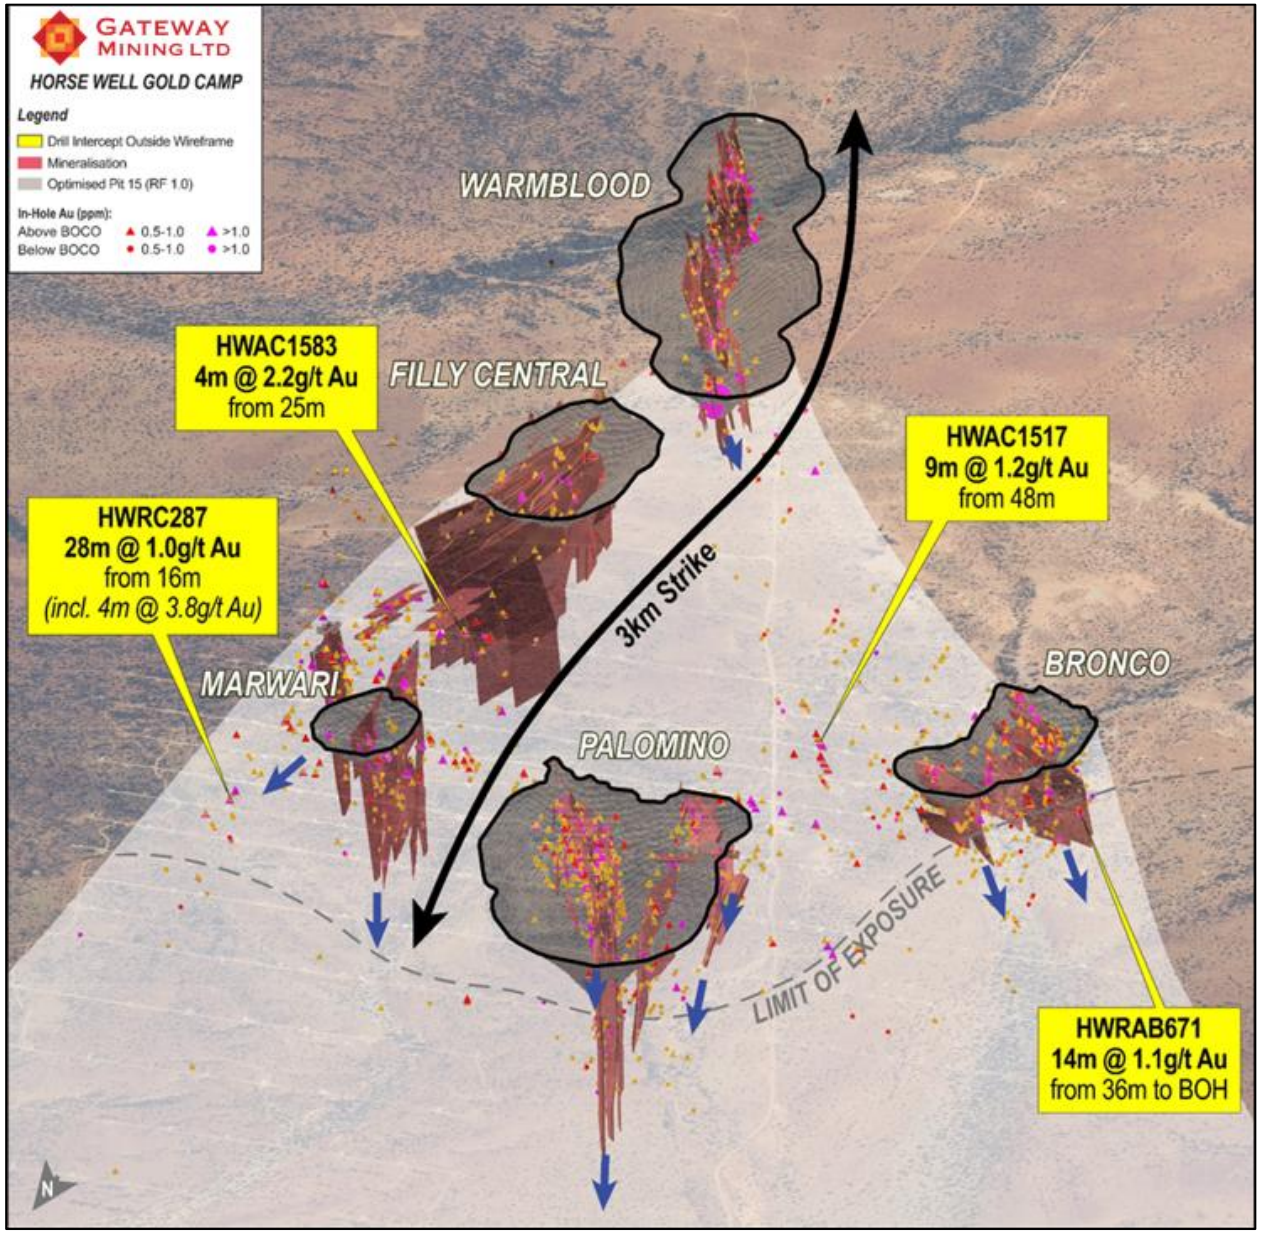

The 400koz Resource Foundation

Inferred Mineral Resources across Palomino, Warmblood, Filly, Bronco and Dusk 'til Dawn — all from surface, open down-dip and down-plunge

- Mineral resource estimates have been completed across Palomino, Warmblood, Bronco and Filly Central.
- All resources are from surface and remain open down dip and plunge.
- Large portions of modelled mineralisation remains 'unclassified' and is excluded from MREs.
- Oxide + transition inferred mineral resource of 103k ozs @ 1.8 g/t Au.[1]
- Combined open pit mineralisation of 278k ozs @ 1.9g/t Au (at AUD4k pit optimisation).[2]

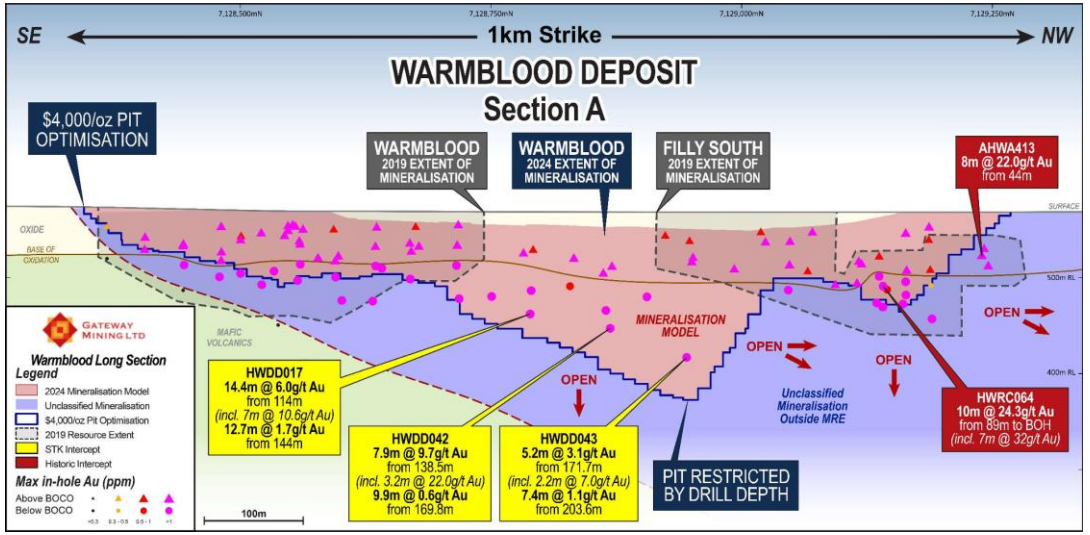

Prospect	Tonnes (t)	Au (g/t)	Au (oz)	Cut-off
Palomino Pit	1,963,000	1.84	116,000	0.5
Palomino UG	155,000	2.69	13,500	2.0
Palomino Total	**2,118,000**	**1.90**	**129,500**	**-**
Warmblood	1,656,000	2.37	126,000	0.5
Filly	581,000	1.15	21,500	0.5
Bronco	324,000	1.38	14,500	0.5
HWGC Subtotal	**4,679,000**	**1.94**	**291,500**	**-**
Dusk 'til Dawn	3,495,600	1.00	108,900	0.5
Yandal Project Total	**8,174,600**	**1.52**	**400,400**	

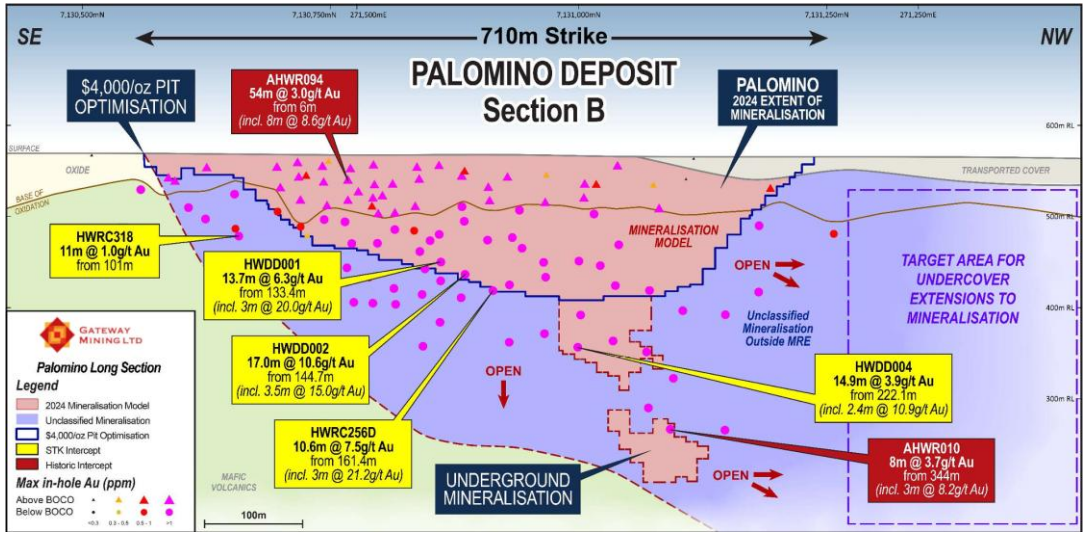

1. 1.9Mt @ 1.8 g/t Au for 108k oz Au Inferred.
2. 4.52Mt @ 1.9 g/t Au for 278k oz Au Inferred.
Refer to "Appendix A: Yandal Inferred Mineral Resource Estimates" for further details regarding the Yandal Mineral Resource.

Focus and Strategy

- RC and DDH drilling to map high-grade down-plunge extension across Warmblood and Palomino – determine the extents of high-grade gold mineralisation across the Horse Well Gold Camp.
- Infill drilling aiming to re-classify existing resource material.
- Progress Horse Well Mining Lease Application through to approval.

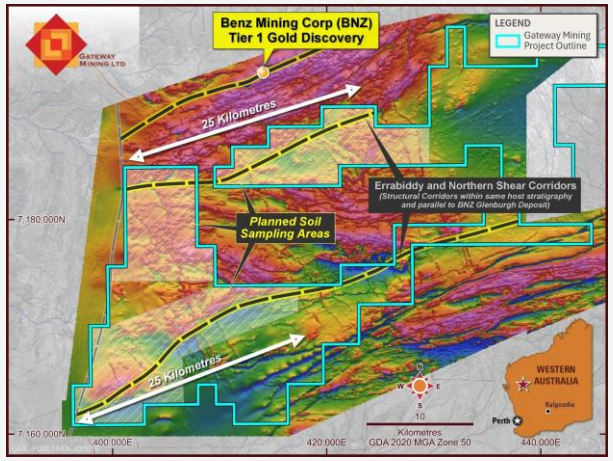

PORTFOLIO

Beyond Yandal — Two More Gold Projects in WA

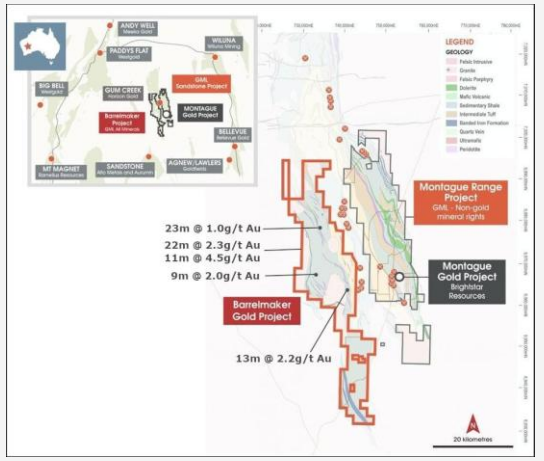

Early-stage optionality across two additional Western Australian gold belts

Glenburgh South

Strategic acquisition in a highly prospective location[1]

- Adjacent to Benz Mining Corp's Tier 1 Glenburgh gold discovery, with early signs of similar mineralisation
- Repeat fault structures south of Glenburgh — the Errabiddy and Northern shear corridors (~25km each) sit within the same host stratigraphy, parallel to the Glenburgh deposit
- Airborne magnetic survey completed[2]; surface sampling currently underway

Barrelmaker

80km of prospective strike in the Gum Creek Greenstone Belt

- Historic intercepts include 22m @ 2.3 g/t Au, 11m @ 4.5 g/t Au, 23m @ 1.0 g/t Au and 13m @ 2.2 g/t Au[3]
- Geological model built across the project area with a strong focus on drill-target testing
- First-pass drilling programs scheduled for later this year

1. Refer to ASX announcement dated 15 September 2026 for full transaction details.
2. Refer to ASX announcement dated 9 March 2026.
3. Refer to ASX announcement dated 9 December 2024.

INVESTMENT CASE

Why Gateway, Why Now

GATEWAY MINING LTD
ASX Code:GML

1. A district-scale position in the Yandal belt — 70km of prospective greenstone, 50km from Northern Star's Yandal Operations Centre.
2. Cowza: a high-grade fresh-rock discovery on a primary structure that historic drilling never tested — 41m @ 2.0 g/t Au incl. 9m @ 7.5 g/t Au.
3. 13km of mineralised strike, seven drill-defined targets and an existing 400koz Inferred resource base, open at depth.
4. A four-factor targeting model validated by discovery — now being applied across the belt.
5. An aligned, experienced team, A$52.18 in cash (30 September 2026) and a steady flow of drill results ahead.

Yandal — Australia's next multi-million-ounce gold camp

APPENDIX A

Yandal Inferred Mineral Resource Estimates

Prospect	Tonnes (t)	Au (g/t)	Au (oz)	Cut-off (g/t Au)
Palomino Pit	1,963,000	1.84	116,000	0.5
Palomino UG	155,000	2.69	13,500	2.0
Palomino Total	**2,118,000**	**1.90**	**129,500**	**-**
Warmblood	1,656,000	2.37	126,000	0.5
Filly	581,000	1.15	21,500	0.5
Bronco	324,000	1.38	14,500	0.5
HWGC Subtotal	**4,679,000**	**1.94**	**291,500**	**-**
Dusk 'til Dawn	3,495,600	1.00	108,900	0.5
Yandal Project Total	**8,174,600**	**1.52**	**400,400**	

TABLE NOTES

- Mineral Resources are based on JORC Code definitions as defined by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.
- All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding.
- The Mineral Resource Estimate has been estimated using appropriate high-grade cuts, minimum mining widths and dilutions.
- Tonnes rounded to the nearest 1,000t, ounces rounded to the nearest 500oz.
- Refer to ASX announcement dated 2 July 2025 titled “Acquisition of Yandal Gold Project from Strickland Metals Ltd” for further details regarding the MRE.
