

Exploration & development of high-grade gold mineralisation in world-class terranes of Côte d'Ivoire

Updated Ouarigue Mineral Resource and integrated open-pit and underground Scoping Study underway

INVESTOR PRESENTATION

November 2026

MANY PEAKS

ASX:MPK

Not for release to US wire services or distribution in the United States

Disclaimer and Cautionary Statement

This Presentation has been prepared as a summary only and does not contain all information about Many Peaks Minerals Limited's ("MPK", "Many Peaks" or the "Company") assets and liabilities, financial position and performance, profits and losses, prospects and rights and liabilities. The information in this Presentation and made to you verbally is subject to updating, completion, revision, further verification and amendment without notice.

The information contained in this Presentation or subsequently provided to the Recipient of this Presentation whether orally or in writing by or on behalf of the Company or its employees, agents or consultants ("Information") is provided to the Recipients on the terms and conditions set out in this notice. The purpose of this Presentation is to provide Recipients with Information relating to the Company. The Presentation has been prepared by the Company and each Recipient must make his/her own independent assessment and investigation of the Company and its business and assets and should not rely on any statement or the adequacy and accuracy of any Information contained in this Presentation.

The Company makes no representation or warranty (express or implied) as to the accuracy, reliability or completeness of the Information. The Company and its directors, employees, agents and consultants shall have no liability (including liability to any person by reason of negligence or negligent misstatement) for any statements, opinions, information or matters (express or implied) arising out of, contained in or derived from, or for any omissions from the Presentation, except liability under statue that cannot be excluded.

The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. This Presentation does not constitute in any way an offer or invitation to subscribe for securities in the Company pursuant to the Corporations Act.

Statements regarding the Company's plans with respect to its mineral properties are forward-looking statements. There can be no assurance that the Company's plans for development or proposed exploration activity will proceed as currently expected. There can also be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

The information in this report that relates to Exploration Results is based on, and fairly represents, information compiled by Mr Travis Schwertfeger, who is a Member of the Australasian Institute of Geoscientists. Mr Schwertfeger is the Managing Director of the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a competent person as defined in the 2012 Edition of the "Australasian Code for reporting of Exploration Results, Exploration Targets, Mineral Resources and Ore Reserves" (JORC Code). Mr Schwertfeger consents to the inclusion in this report of the matters based upon his information in the form and context in which it appears.

The information in this report that relates to Mineral Resources is based on information compiled and audited by Mr Stuart Hutchin, who is a Member of the Australian Institute of Geoscientists (AIG). Mr Hutchin is the Geology Manager at Mining One Consultants and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the JORC 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code). The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

References may have been made in this announcement to certain past ASX announcements, including references regarding exploration results. For full details, refer to the referenced ASX announcement on the said date. The Company confirms that it is not aware of any new information or data that materially affects the information included in these earlier market announcements.

Disclaimer and Cautionary Statement

Canaccord Genuity (Australia) Limited, SCP Resource Finance LP and Barrenjoey Markets Pty Limited (the "Lead Managers") are acting as lead managers to the Placement. The Lead Managers are acting for and providing services to the Company in relation to the Placement and will not be acting for or providing services to the Company's shareholders or creditors. The Lead Managers have been engaged solely as independent contractors and are acting solely in a contractual relationship on an arm's length basis with the Company. The engagement of the Lead Managers by the Company is not intended to create any agency, fiduciary or other relationship between the Lead Managers and the Company's shareholders or creditors.

To the maximum extent permitted by law, the Lead Managers and their respective related bodies corporate and affiliates, and each of their respective officers, directors, employees, agents and advisers (each a "Limited Party"): (i) expressly exclude and disclaim all duties, responsibility and liability (including, without limitation, any liability arising from fault, negligence or negligent misstatement) for any loss arising from this Presentation or reliance on anything contained in or omitted from it or otherwise arising in connection with this Presentation, including for any indirect, consequential, special or economic loss or damage (including, without limitation, any loss of profit or anticipated profit, fines or penalties, loss of business or anticipated savings, loss of use, business interruption or loss of goodwill, bargain or opportunities); (ii) disclaim any obligations or undertaking to release any updates or revision to the information in this Presentation to reflect any change in expectations or assumptions; and (iii) do not make any representation or warranty, express or implied, as to the reasonableness, fairness, accuracy, reliability or completeness of the information in this Presentation or that this Presentation contains all material information about the Company, the Placement or that a prospective investor or purchaser may require in evaluating a possible investment in the Company or acquisition of shares in the Company, or likelihood of fulfilment of any forward-looking statement, forecast, prospects, returns or any event or results expressed or implied in any forward-looking statement or any information in this Presentation.

The Lead Managers and their respective Limited Parties have not independently verified the information in this Presentation and take no responsibility for any part of this Presentation. They make no recommendations as to whether you or your related parties should participate in the Placement, nor do they make any representations or warranties to you concerning the Placement. None of the Lead Managers nor any of their respective Limited Parties has authorised, permitted or caused the issue, submission, dispatch or provision of this Presentation and they do not make or purport to make any statement in this Presentation and there is no statement in this Presentation which is based on any statement by any of them (except for references to the Lead Managers' names).

You represent, warrant and agree that you have not relied on any statements made by the Lead Managers or their respective Limited Parties. You undertake that you will not seek to sue or hold the Lead Managers or their respective Limited Parties liable in any respect in connection with this Presentation or the Placement (to the maximum extent permitted by law). The Lead Managers and their respective affiliates and related bodies corporate (collectively, LM Group and each a LM Group Member) are full service financial institutions engaged in various activities, which may include (but are not limited to) underwriting, trading, financing, corporate advisory, financial advisory, investment management, investment advisory, research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services including for which they have received or may receive customary fees and expenses or other transaction consideration. Members of the LM Group and their respective officers, directors, employees, agents and advisers may at any time for their own account and for the accounts of their clients make or hold investments in equity securities or other financial products of the Company or its related entities and receive customary fees and expenses or other transaction consideration in respect of such activities. The Lead Managers may receive fees for acting in their capacity as lead managers to the Placement. You acknowledge and agree that the determination of eligibility of investors for the purposes of the Placement is determined by reference to a number of matters, including legal and regulatory requirements, logistical and registry constraints and the discretion of the Company and the Lead Managers. Each of the Company, the Lead Managers and their respective Limited Parties disclaim any duty or liability (including for negligence) in respect of the exercise or otherwise of that discretion, to the maximum extent permitted by law. None of the Lead Managers nor any of their respective Limited Parties have any obligation to update the statements in this Presentation. For the avoidance of doubt, the Placement is not underwritten.

Authorised by the Board of Many Peaks Minerals Limited.

Investment Highlights

Key Milestones

Ferké Gold Project – Interim MRE

34.6 Mt at 1.87 g/t Au

100% project basis (see Note 1)

- Open pit: 1.108 Moz at 1.42 g/t Au
- Underground: 970 koz at 2.93 g/t Au

2.077 Moz Au (+57%)

Over 55,400m drilled in CY2026 by 30 September against a 60,000m target

Deep drilling extended known mineralisation to over 900m vertically

Strategy & Key Objectives

Ouarigue Interim MRE – November 2026

Integrated open-pit and underground Scoping Study

Study targeted for late Q4 2026

Feasibility Study planned for 2027

Post Maiden MRE results at Ferké:

- **188.9m @ 3.58g/t Au from 633m** [9]
- **116.0m @ 2.78g/t Au from 524m** [5]
- **116.5m @ 1.76g/t Au from 969.5m**[5]
- **36.0m @ 2.64g/t Au from 600m** [6]
- **39.8m @ 3.94g/t Au from 53.5m**[7]
- **106.7m @ 2.52g/t Au from 154.75m**[8]
- **95.0m @ 2.28g/t Au from 253m**[8]

The Team

Experienced Board with an exceptional mine development and exploration discovery track record

Francis Harper, *Non-Exec Chairman*

- Blackwood Capital Co-founder, Previously with TIE, MSR, WAF, PDI

Travis Schwertfeger, *MD*

- Many Peaks Founder, Previously with AQI, EXR, Current NED with ASX:LIB

Matt Scully, *COO & Exec Director*

- Experienced West African Mine Builder, Commissioned gold projects with WAF, PRU, EVN

Marcus Harden, *NED*

- A founding NED with MPK and Currently President of TSX-V:GLAD & NED with ASX:PKO

Ben Phillips, *NED*

- Executive Chair of ASX:NFL & NED & Non-Exec Chair of ASX:MHM

Management Team

Successful West Africa Background

Travis Schwertfeger

Managing Director

Geologist, with +25yrs global minerals sector experience in project development, mining operations, exploration and resource estimation; over 10 years' operating in West Africa.

A Former Director of Exore Resources and previously held exploration and underground roles with Newmont Mining Corp. and Hecla Mining. Also, executive and non-exec roles with various ASX and TSX listed companies. Currently a NED with Eldorado Goldfields (ASX:EDO).

Matthew Scully

COO & Exec Director

Mr. Scully brings over 20 years of technical and operational leadership in the minerals sector, with deep expertise in feasibility studies, project development and mine operations.

Most recently Project Director with West African Resources, where he commissioned the 8.4 Mtpa Kiaka Gold Project in Burkina Faso, and prior to that built both Sissingué and Yaoré for Perseus, delivering all projects ahead of schedule and under budget.

Jamie Byrde

CFO & Company Secretary

Mr. Byrde has over 20 years' experience in corporate governance, audit and company secretarial roles. Previously held senior financial positions with several ASX-listed companies and is an experienced CFO and Company Secretary with experience in management, Board governance, ASX/ASIC compliance and reporting for resource-focused businesses.

Mr. Byrde is Company Secretary of Killi Resources and a Non-Executive Director of Codrus Minerals.

Mohamed Niaré

Country Manager

With over 25 years' experience in the mining and exploration sector, Mr. Niaré has provided tenement management, corporate governance, logistical support and community engagement for multiple public and private West African focused companies.

Previous senior administrative roles with West African focussed mining companies including Newmont, Randgold and Resolute.

Tidiane Konaté

Principal Geologist

Qualified Geologist with over 10 years' exploration experience, holding a degree in geological engineering from the Institut National Polytechnique-Félix Houphouët-Boigny (INP-HB).

Previous exploration experience includes former role with Barrick Mining and spans across opportunities in Egypt, Mali and Côte d'Ivoire.

Ricardo Rodrigues

Project Development Manager

Mr. Rodrigues has spent the last 15 years predominately in West Africa in various on site and corporate roles. Focused on construction management and project delivery.

Previous senior roles include Construction Management positions at Grande Cote Operations, Perseus Mining (Sissingué, Yaouré and recently Nyanzaga) and also as Vice President Project Development for Orezone specifically focused on delivery of the Bomboré Project in Burkina Faso. Mr. Rodrigues brings a wealth of experience and energy to our development team.

Côte d'Ivoire

Top tier Jurisdiction for mineral development in West Africa

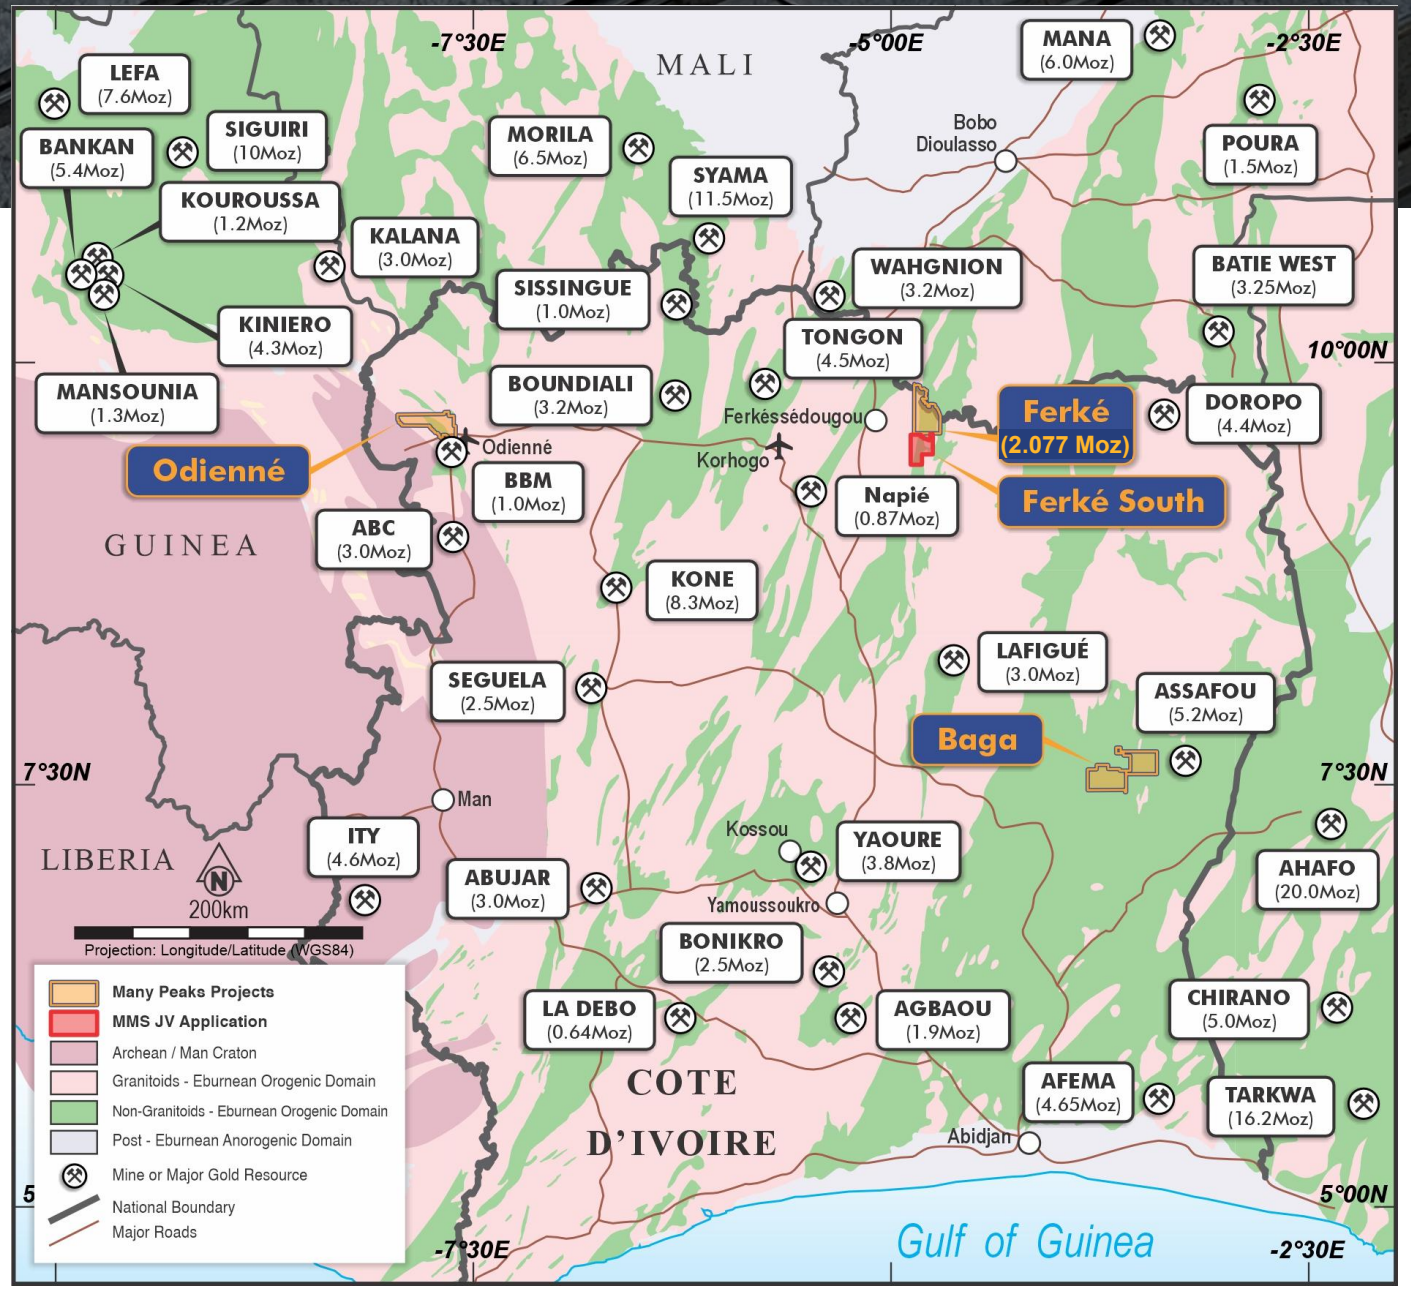

Stable and attractive mining investment jurisdiction

Reported National gold production of approximately **59.33 tonnes Au in 2025** Note 2

- *Over 3x increase from ~18 tonnes Au in 2014* Note 3

Government target stated of **100 tonnes of annual gold production by 2030** Note 2

Equity Raising Overview

Equity Raising Summary

Offer Structure and Size	• Many Peaks is undertaking a two-tranche non-underwritten institutional placement to raise ~A$70.0 million ("**Placement**" or "**Offer**") comprising: – an unconditional tranche of approximately 42.6 million fully paid ordinary shares ("**New Securities**") (equating to approximately A$42.6 million), issued pursuant to the Company's existing placement capacity under ASX Listing Rules 7.1 and 7.1A ("**Tranche 1**"); and – a conditional tranche of approximately 27.4 million New Securities to be issued to institutional investors (equating to approximately A$27.4 million), including 160,000 New Securities proposed to be issued to Directors. The conditional tranche subject to the approval of the Company's shareholders at an Extraordinary General Meeting of the Company's shareholders for the purposes of ASX Listing Rules 7.1 and (if required) 10.11 ("**EGM**") ("**Tranche 2**"). • Up to approximately 70.0 million New Securities to be issued under the Placement, representing ~41.0% of existing securities on issue. • New Securities issued under the Placement will rank equally with the Company's existing securities on issue.
Offer Price	• Fixed price of A$1.00 per New Security ("**Offer Price**"), which represents a: – 12.3% discount to the last traded price on Wednesday, 11 November 2026 of A$1.14 per security; and – 8.3% discount to the 10-day VWAP up to and including Wednesday, 11 November 2026 of A$1.09.
Use of Proceeds	• Proceeds from the Offer will be applied to: – ongoing expansion and delineation resource drilling to grow and improve confidence in the existing 2.1Moz Ouarigue MRE at the Ferké Gold Project; – feasibility study activities at the Ouarigue Deposit, targeting completion in December Quarter 2027; – planned +30,000m drilling at multiple high-priority targets along the +37km Leraba mineralised corridor to develop a pipeline of prospects to drive near term MRE growth; – continuation of exploration activity across Many Peaks' pipeline of projects including advancement of drilling, geochemistry and geophysical surveys at the Odienné and Baga Gold Projects; and – general working capital and costs of the Offer.
Broker Syndicate	• Canaccord Genuity (Australia) Limited ("**Canaccord**") as Global Coordinator and Sole Bookrunner. • Canaccord, Barrenjoey Markets Pty Limited ("**Barrenjoey**") and SCP Resource Finance LP ("**SCP**") as Joint Lead Managers (together, the "**Joint Lead Managers**").

Timetable and Pro-forma Capital Structure

Indicative Timetable[1]

Event	Date
Trading halt lifted and announcement of completion of the Placement	Pre-Market Monday,16 November 2026
Settlement of New Securities under Tranche 1	Thursday, 19 November 2026
Allotment, quotation and trading of New Securities under Tranche 1	Friday, 20 November 2026
Extraordinary General Meeting to approve Tranche 2	Early-January 2027
Settlement of New Securities under Tranche 2	Early-January 2027
Allotment, quotation and trading of New Securities under Tranche 2	Early-January 2027

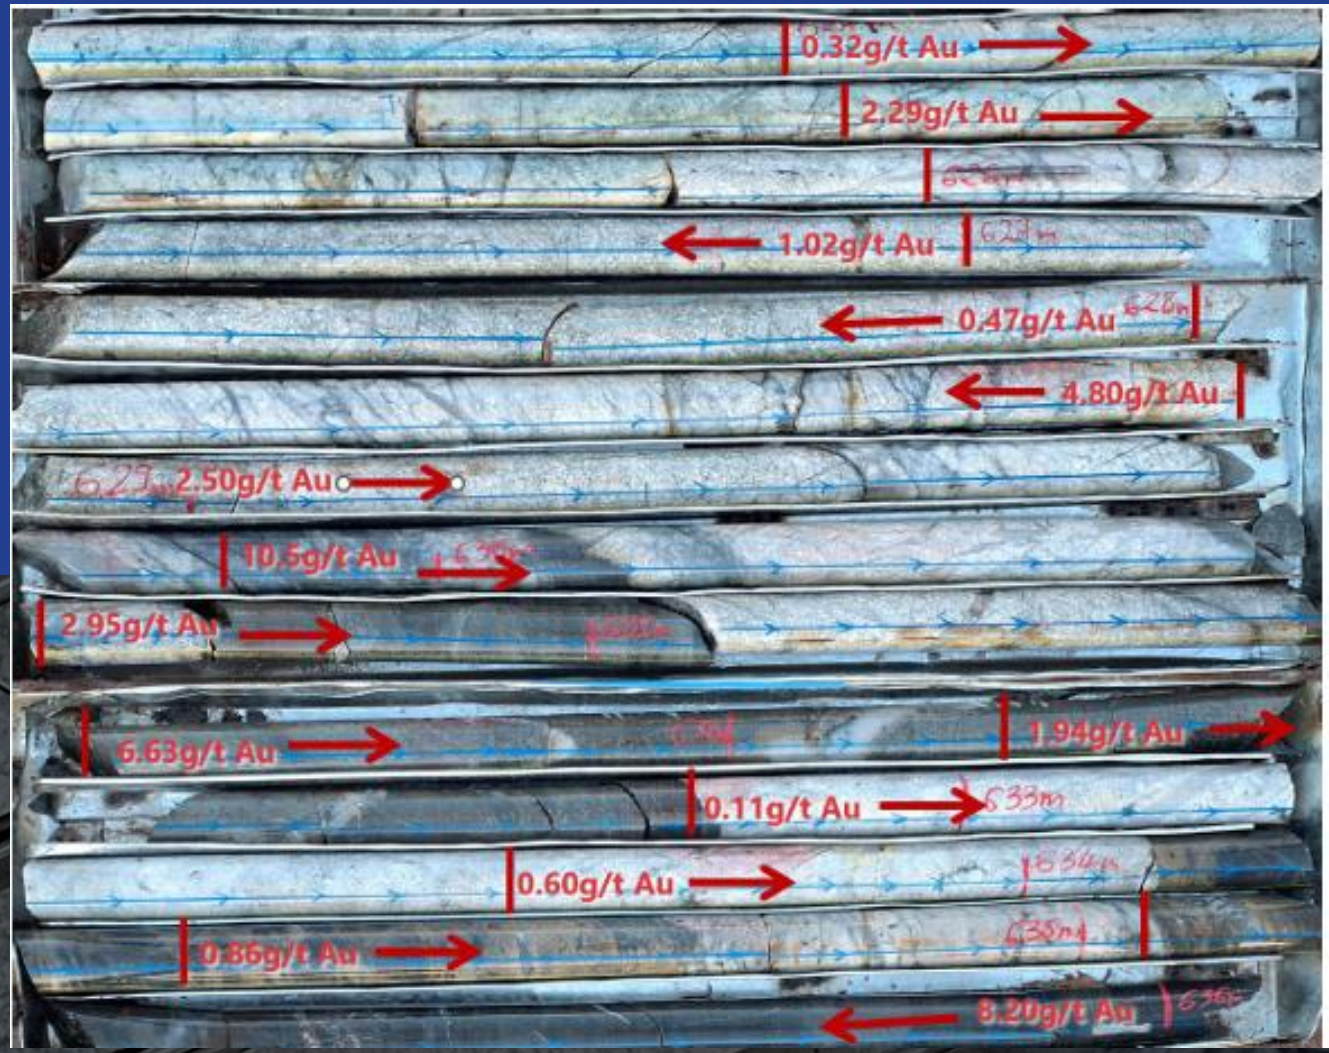

Pro-forma Capital Structure

	Shares	Cash
Current[2]	170.9m	A$20.1m
Placement[3]	70.0m	A$70.0m
Pro-forma[3]	**240.9m**	**A$90.1m**

[1] Indicative only and dates are subject to change by the Joint Lead Managers and/or the Company.
[2] As at 30 September 2026.
[3] Shown before costs of the Offer and includes approximately A$27.4 million targeted to be raised under Tranche 2 subject to receipt of shareholder approval.

Ferké Gold Project

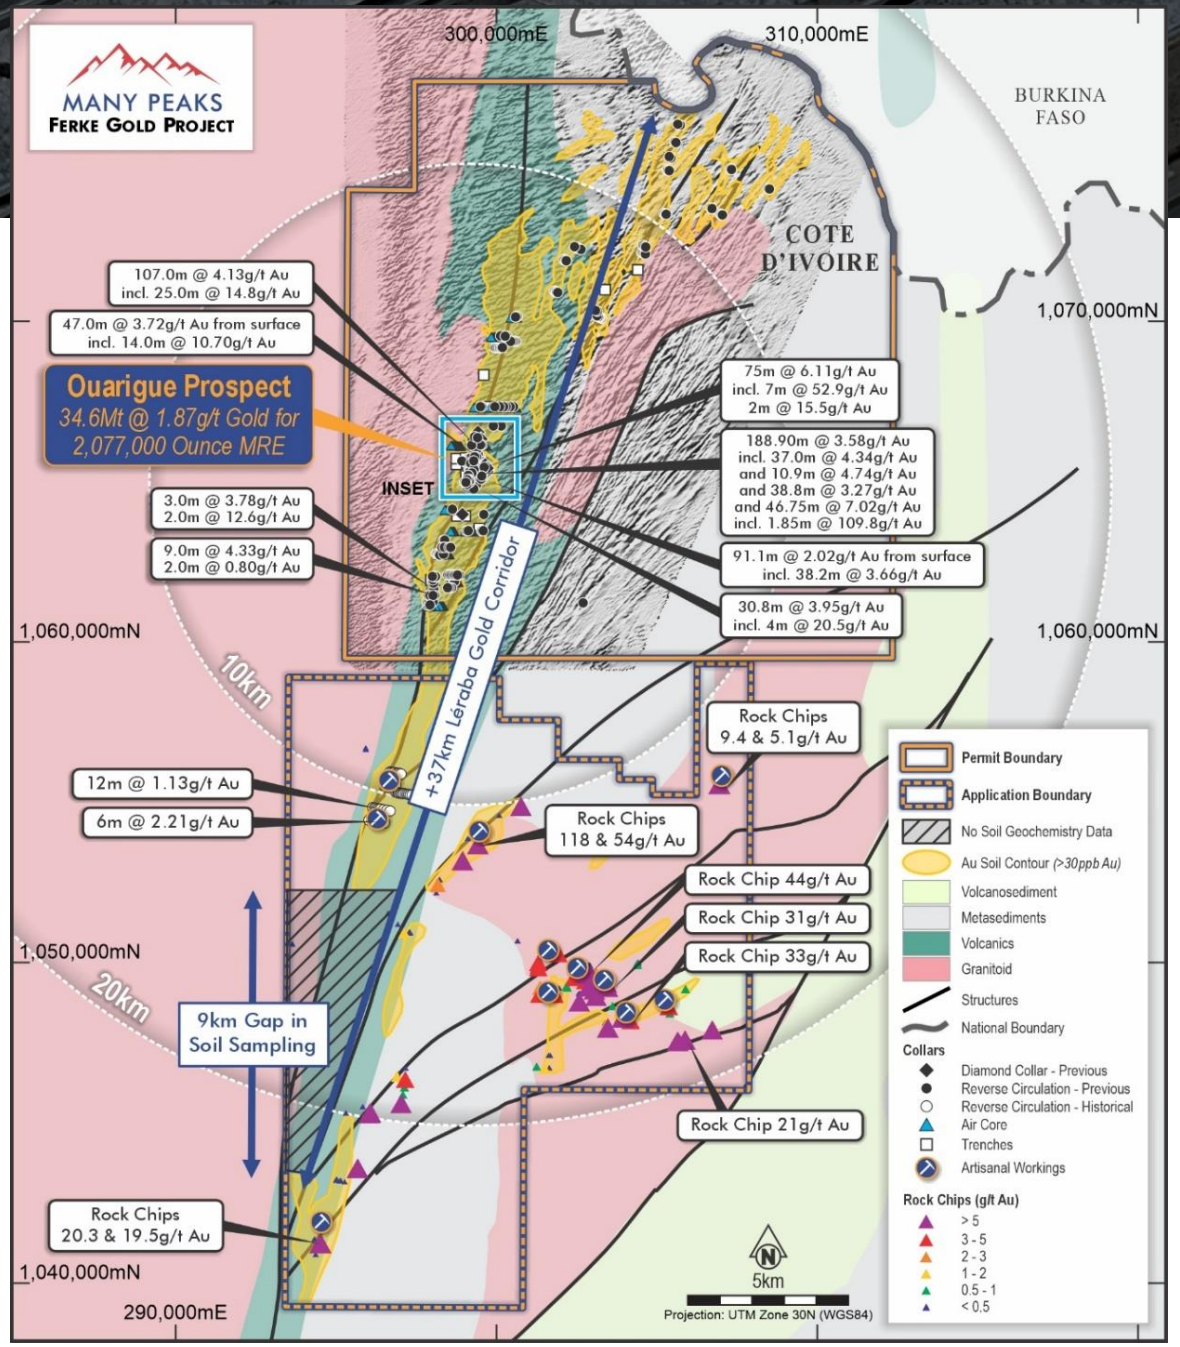

FNDC135, 12m @ 3.07g/t gold viewed at 624m to 636m depth. Located within a broader reported significant intercept of 36m @ 2.64g/t gold

Ferké Gold Project

Interim Mineral Resource and Exploration

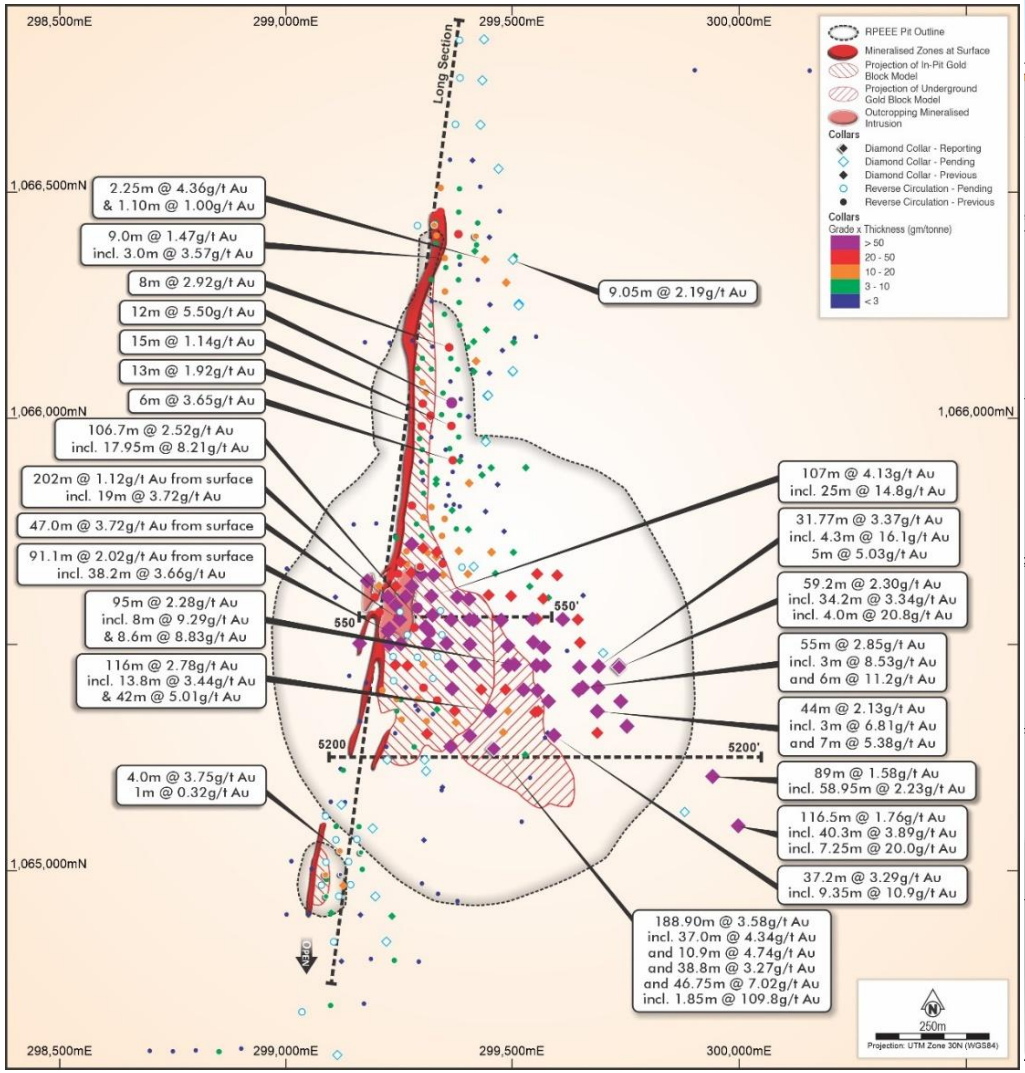

- **Ouarigue Interim MRE of 2.077 Moz at 1.87 g/t Au, up 57%**
  (100% project basis, Note 1)
- **Diamond drilling extended known mineralisation to over 900m vertical depth. Select intercepts include:**
  - 188.9m at 3.58 g/t Au from 633m (95.3m est. true width), incl. 46.75m at 7.02 g/t Au
  - 116.0m at 2.78 g/t Au from 524m (63.5m est. true width), incl. 42.0m at 5.01 g/t Au
  - 75m at 6.11 g/t Au from 427m (64.5m est. true width), incl. 7.07m at 52.9 g/t Au
- **MRE assumes interim 85% metallurgical recovery, study work continues to quantify upside potential highlighted in initial tests**
- **Integrated Scoping Study targeted for late Q4 2026**
- **Regional Exploration:**
  - Regional RC drilling planned for November 2026
  - Ferké South (PR1087) drilling subject to grant of the exploration permit

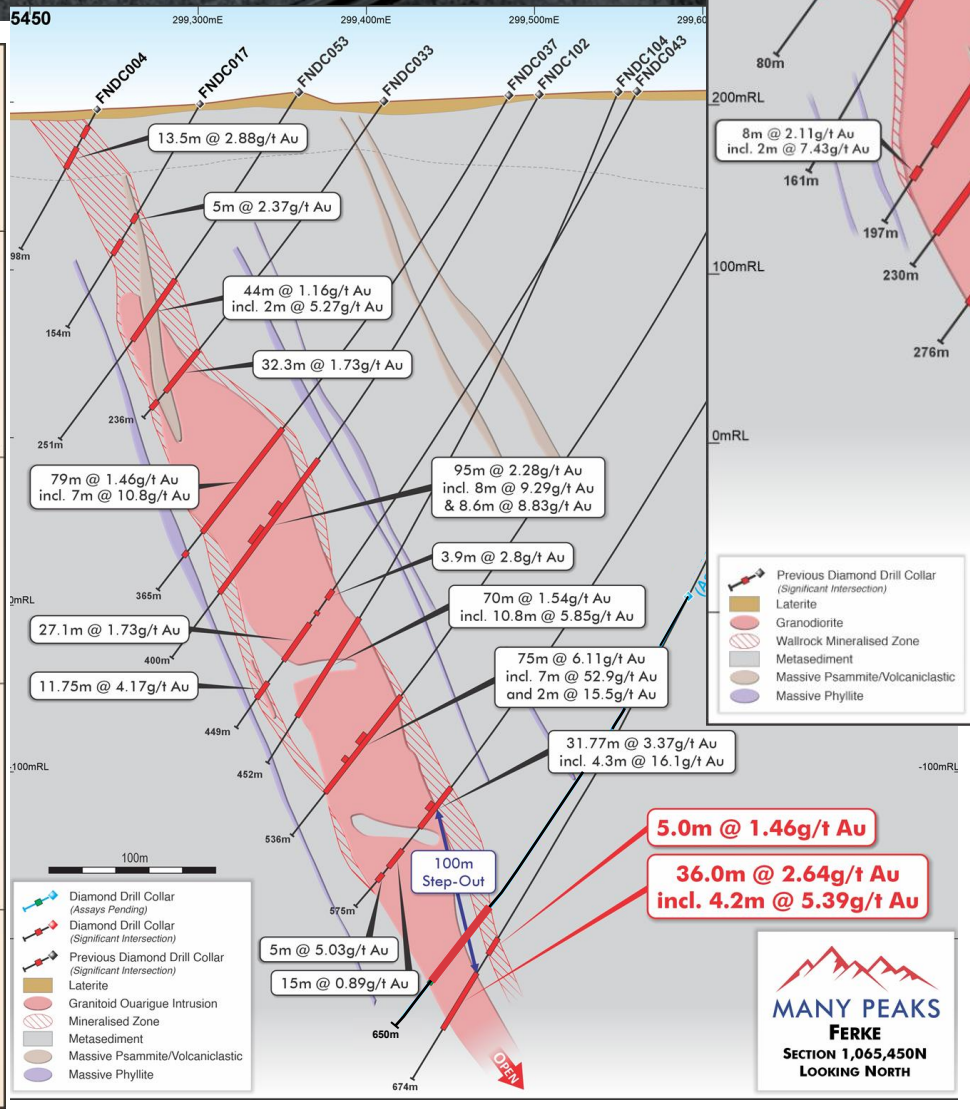

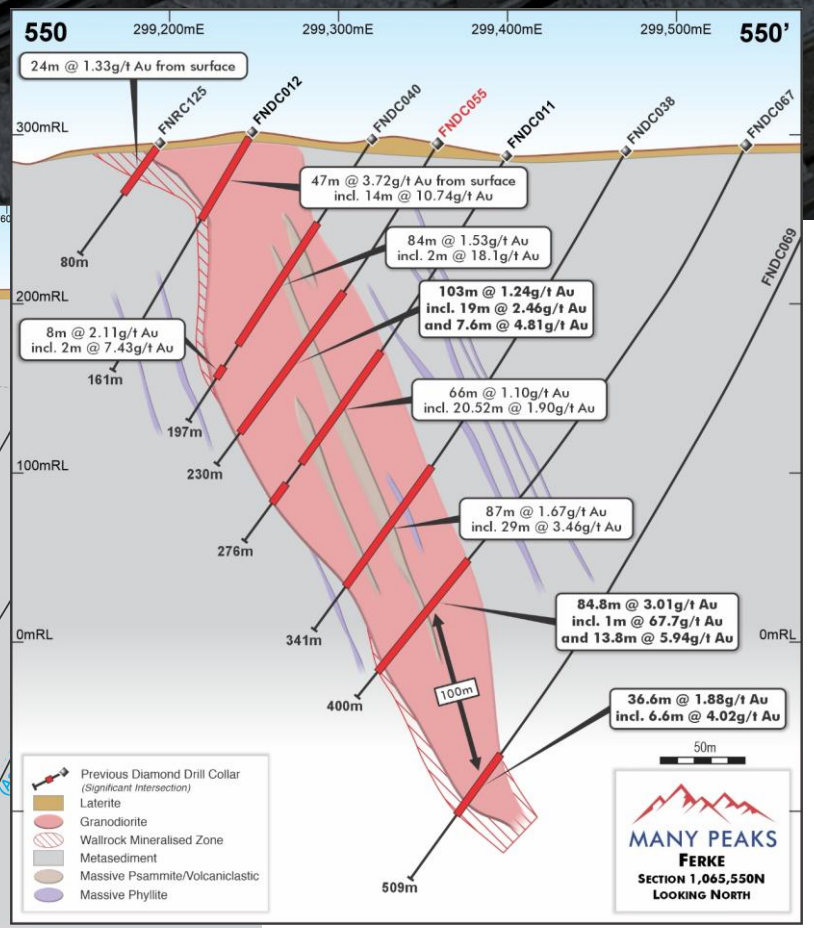

Sources: 5 November 2026 MRE release and drill results in Notes 5 and 9 and 11 August 2025.

Ferké Gold Project

Ouarigue Interim MRE – Long Section

2.077 Moz at 1.87 g/t Au

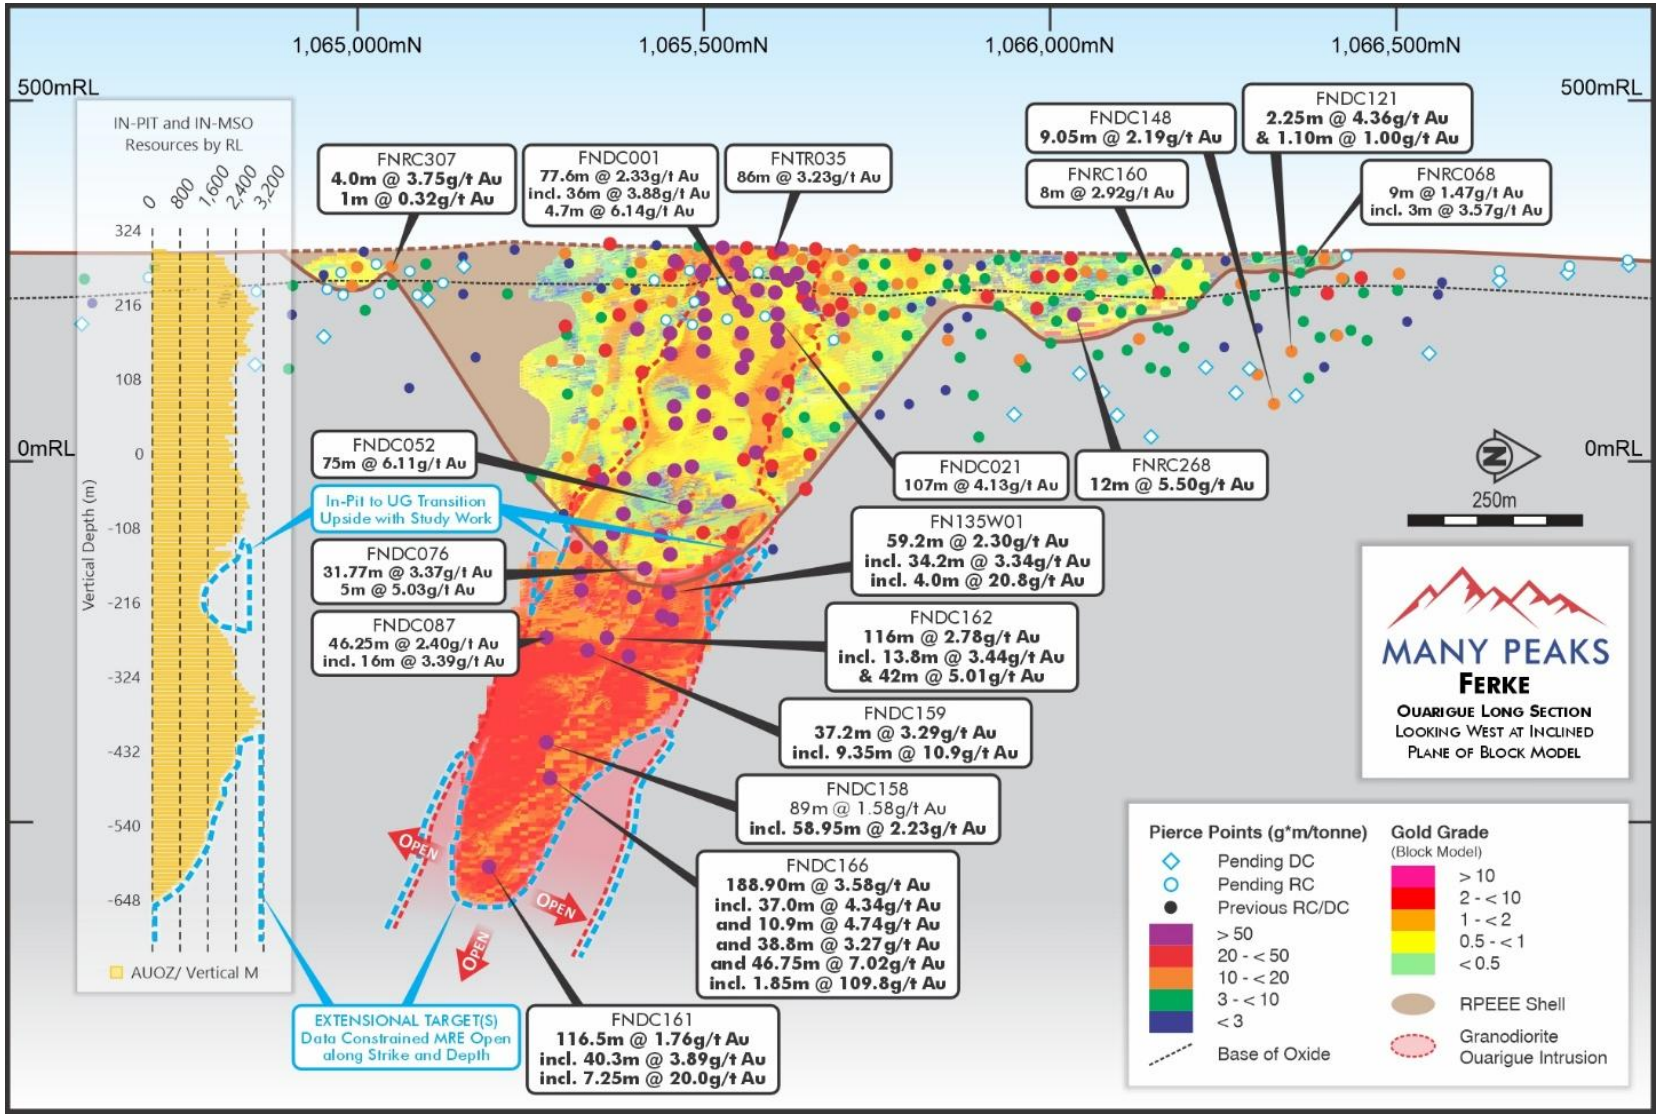

up 57% / 754koz increase over 6 months

Select drill results since the April MRE

- **188.9m @ 3.58g/t Au from 633m** [9]
- **116.0m @ 2.78g/t Au from 524m** [5]
- **116.5m @ 1.76g/t Au from 969.5m**[5]
- **36.0m @ 2.64g/t Au from 600m** [6]
- **39.8m @ 3.94g/t Au from 53.5m**[7]
- **106.7m @ 2.52g/t Au from 154.75m**[8]
- **95.0m @ 2.28g/t Au from 253m**[8]

Resource	Tonnes (Mt)	Au (g/t)	Gold (oz)
Open pit	24.32	1.42	1,108,000
Underground	10.31	2.93	970,000
Total	**34.6**	**1.87**	**2,077,000**

100% project basis. Rounding applies.
Cut-offs (g/t Au): 0.31 pit, 1.35 underground.
MPK holds 65% via the Gold Ivoire Minerals JV and is earning up to 85%.

Source: 5 November 2026 Interim MRE release (Figure 1 and Table 1). See Note 1.

Ouarigue Interim MRE Highlights

34.6Mt at 1.87 g/t Au: + 754koz (+57%) since April 2026

Open pit

1.1 Moz at 1.42 g/t Au, with 97% of ounces Measured & Indicated

63% of in-pit gold ounces in Measured category

Underground

970,000 oz at 2.93 g/t Au, including 912,000 oz Inferred

3,000 oz gold per vertical metre in Underground
(*48m vertical extent to ~690m depth / -396m RL, where mineralised intrusion drilled to extent*)
Resource growth anticipated, with depth and along strike from ~690m depth

Processing

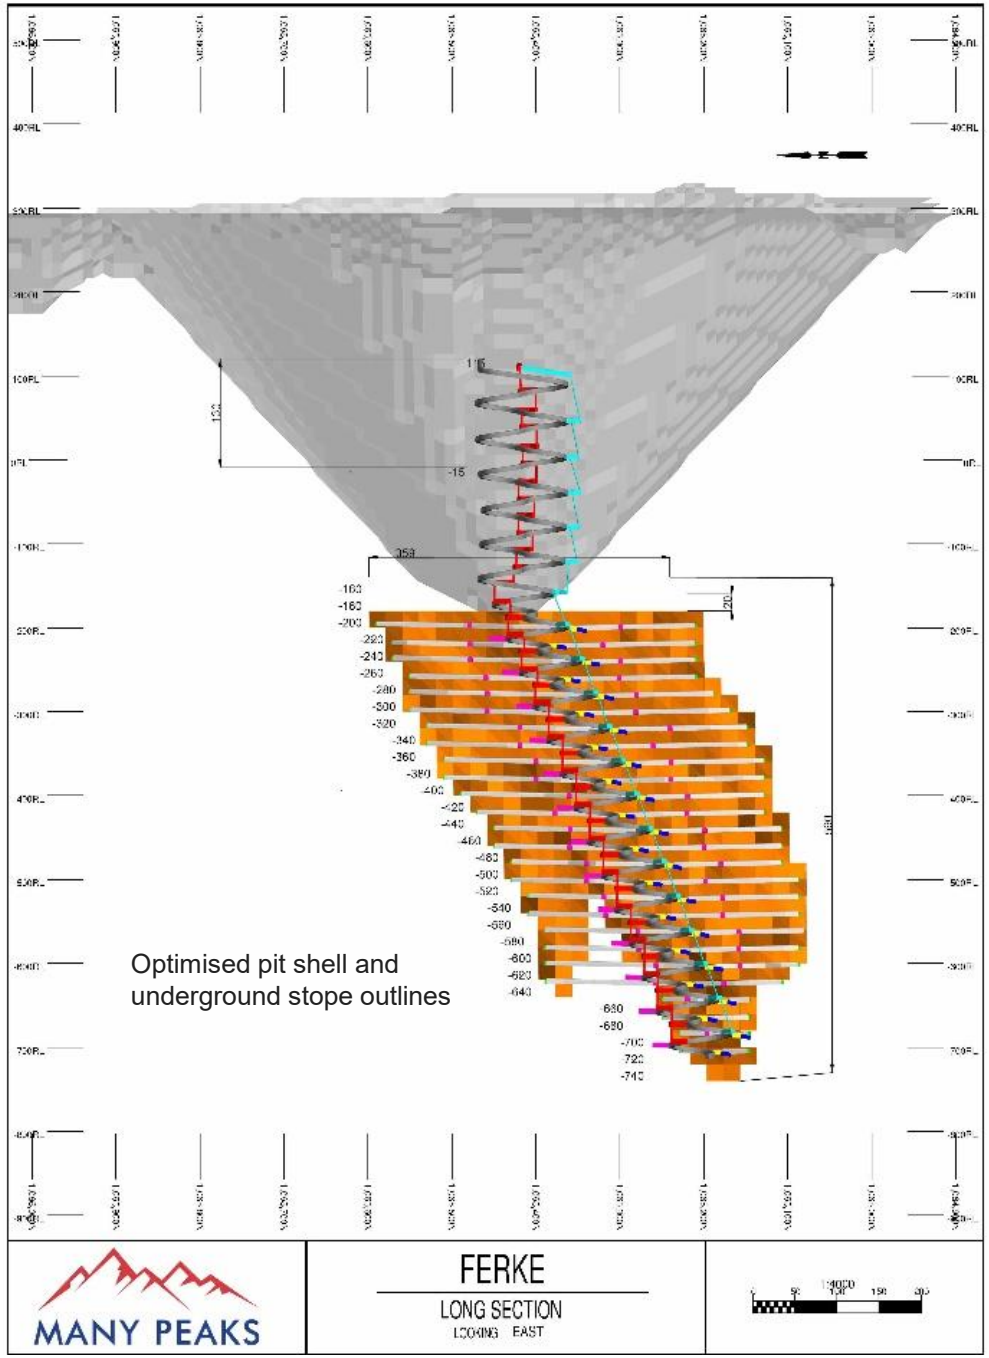

Bond Ball Mill Work Index values ranged from 12.3 to 16.6kWh/t, with 15.4kWh/t measured for the LOM blend

Recovery not sensitive to grind size – coarser (150µm) preferred grind size
- lower energy input / lower OPEX

Development studies

Integrated Scoping Study targeted for late Q4 2026, combining pre-feasibility-level open-pit work and scoping-level underground work

On-Track to go directly into Feasibility Study through 2027

Optimised pit shell and underground stope outlines

Cut-offs of 0.31 g/t Au (open pit) and 1.35 g/t Au (underground) at US$3,500/oz Au.
Source: 5 November 2026 MRE release (Note 1).

Ouarigue Interim MRE

2.077 Moz at 1.87 g/t Au

Metallurgical Study Programme – Interim Update [NOTE 1]

Interim metallurgical assumption at 85% recovery for MRE

Optimisation tests continue, with upside potential highlighted in

74.1 – 91.5% laboratory extraction across eight variability composites, initial tests

Follow-up reagent testing and optimisation in progress:

Poorest performing leach result of 74%, delivered an increase to 85.6% recovery (over 11% uplift in recovery) in unoptimised test

Follow-up testing – dosage optimisation for lead nitrate in progress across all metallurgical domains to **quantify an uplift to metallurgical recovery assumptions**, before progressing with additional studies for further benefit to parameters

Key Items in Planned Metallurgy Programme include:

- lead nitrate dosage and replicate testing
- extended 72-hour leaching (extraction not complete in initial tests)
- pre-oxidation testing
- LOM flowsheet optimisation

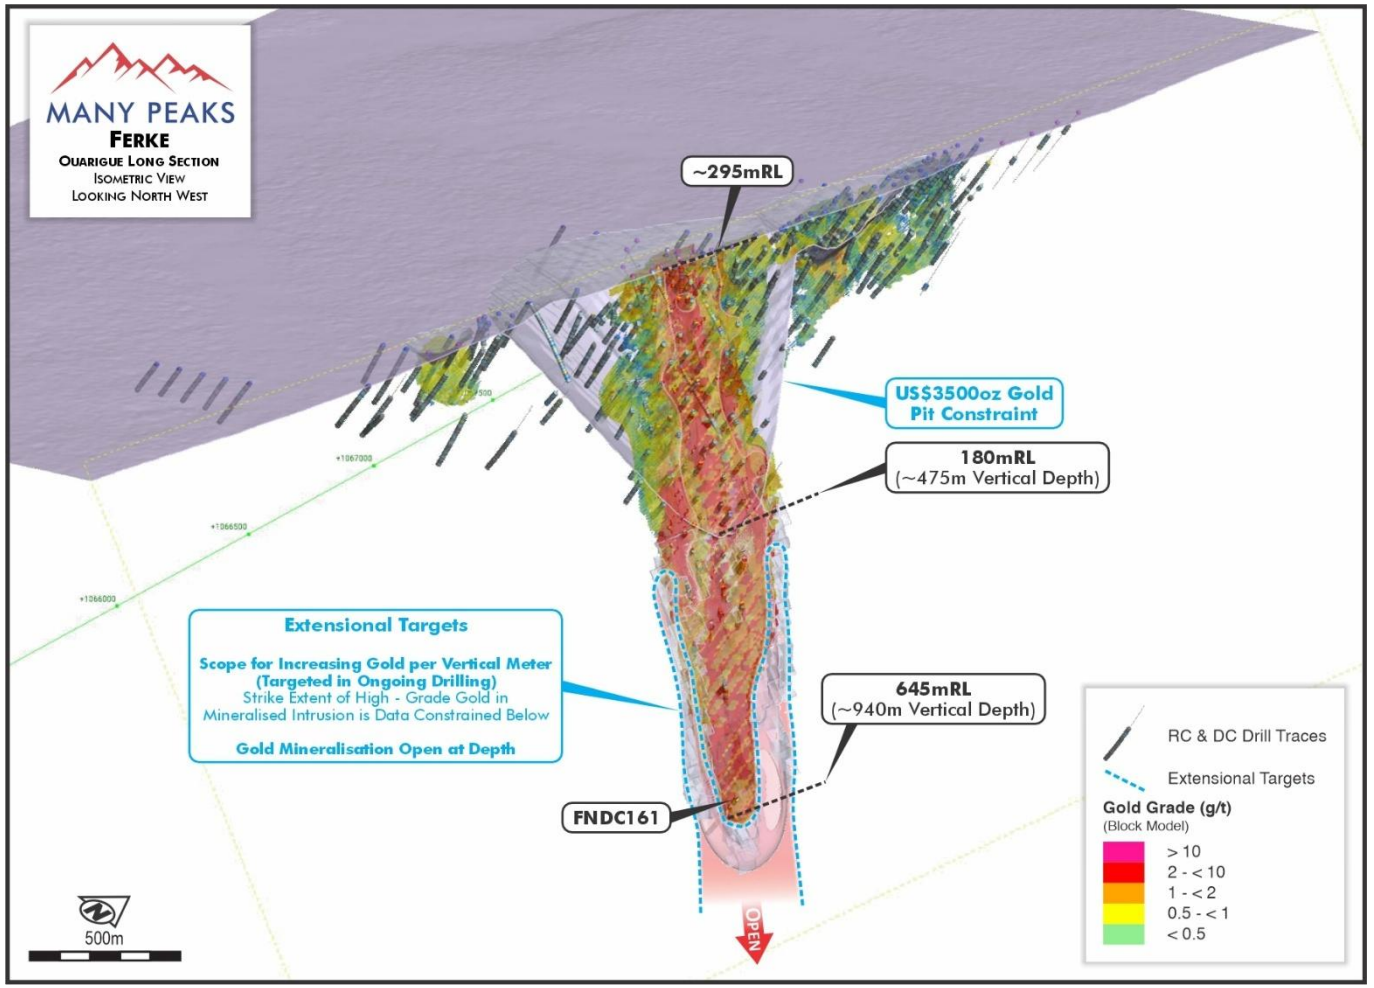

Figure 15 of Announcement Dated 5 November 2026 | Oblique Perspective View, looking northwest (330 azimuth) at Ordinary Kriging block model results with drill holes and LG optimised pit shell constraining MRE.

Ferké Gold Project

Ferké North Regional Exploration

2025 reconnaissance RC and AC returned gold intercepts on wide-spaced lines (800–2,400m)

Follow-up RC on 200m-spaced lines returned 9m at 4.33 g/t Au from 30m, about 3km south of Ouarigue

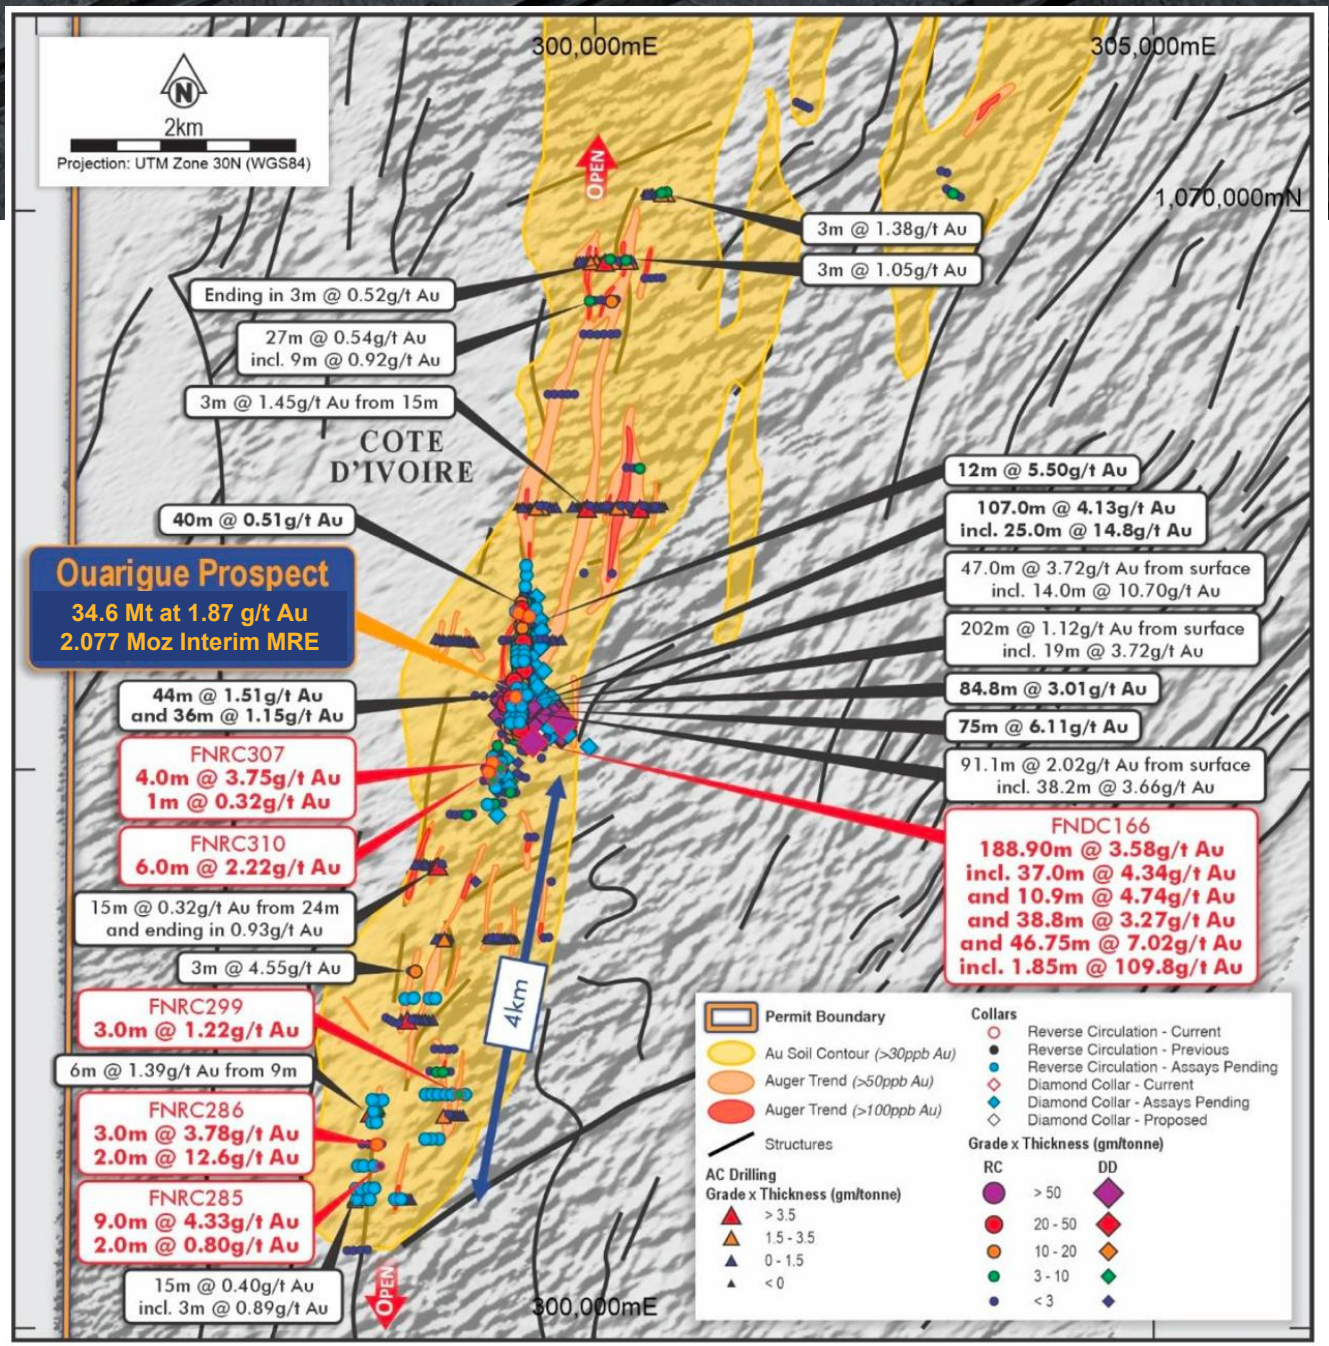

31 regional RC holes totalling 3,350m were reported after quarter-end

Nearby FNRC286 returned 3m at 3.78 g/t Au from 33m and 2m at 12.6 g/t Au from 146m

- The results identify a prospective trend 3 - 4km south of Ouarigue
- Further drilling is needed to establish continuity
- RC follow-up planned for November 2026

Follow-up targets include the southern step-outs and other Leraba corridor anomalies

The >37km Leraba corridor extends onto the Ferké South application

Regional collar map: September 2026 Quarterly Activities Report, Figure 7.

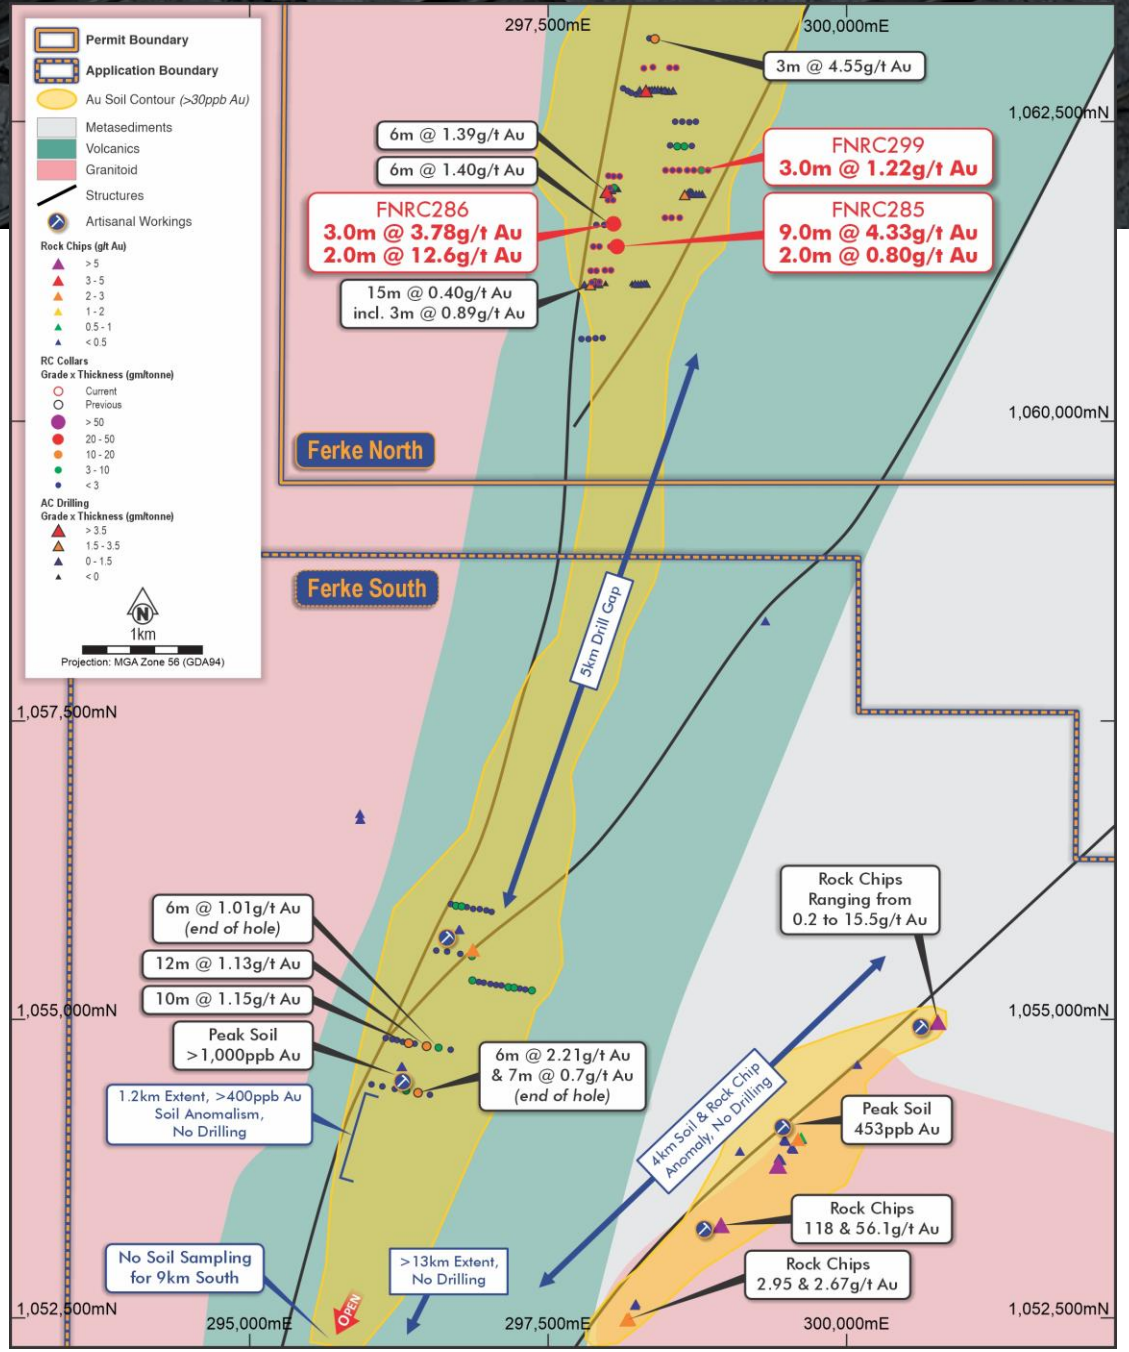

Drill results: 13 October 2026 ASX release and September 2026 Quarterly Activities Report.

Ferké Gold Project

Ferké South – Historical Drilling

2010 Reconnaissance RC – Auger, Air Core, and RC drilling highlights multiple drill-ready targets

- **Historical reconnaissance RC tested only 1.6km of the >37km Leraba gold corridor**
- Ferké South PR1087 remains an application. RC drilling is planned after grant
- Ferké South historical drilling, **remains open in all directions** and confirms the mineralised Leraba gold corridor extends south
- **Historical drilling 10km south of the Ouarigue MRE returned,**
  - **6m @ 2.21g/t gold** from 4m, and **7m @ 0.7g/t from 50m** (end of hole)
  - **12m @ 1.13g/t gold** from surface
  - **10m @ 1.15g/t gold** from surface
  - **6m @ 1.01g/t gold** from 60m (end of hole)

Refer to ASX release dated 26 March 2026.

Odienné Gold Project

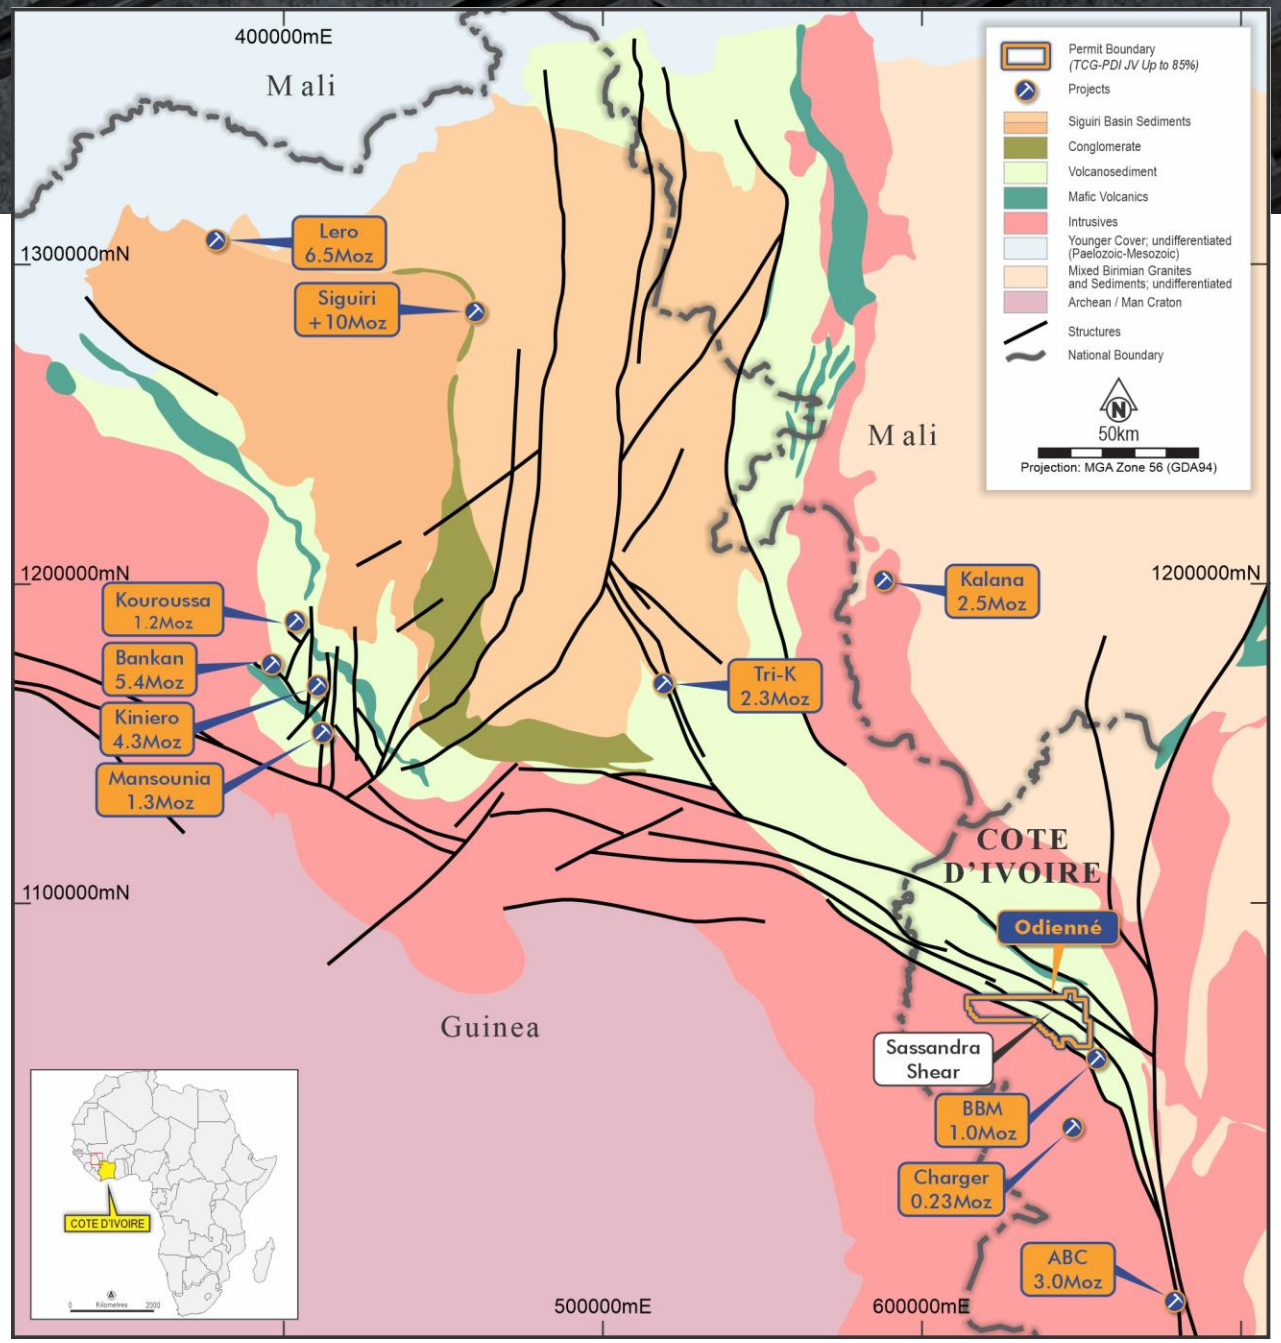

Odienné Gold Project

Key Land Position in an emerging gold district

- Project covers significant extent of high strain corridor (Sassandra Shear) along Archean domain margin
- Odienné South (PR865) hosts Zones A and C along the >18km Sassandra shear corridor
- **Same tectonic corridor hosting:**
  - PDI Gold's 5.4Moz Bankan gold discovery and 1.5Moz Kineiro Mine [Note 10]
  - Resolute's 2.2Moz ABC Project [Note 11]
  - Awalé-Newmont JV, 1.36Moz AuEq BBM project [Note 12]
- **Initial RC Drill Test completed in 2025,** returned **21m @ 1.21g/t gold** - open gold anomalies
- **GAIP completed 11,200m of air core drilling in 543 holes completed, with assays pending**
- **RC follow-up rig contracted and planned for November 2026**

PR866 (Odienné North) relinquished. Source: September Quarterly Report.

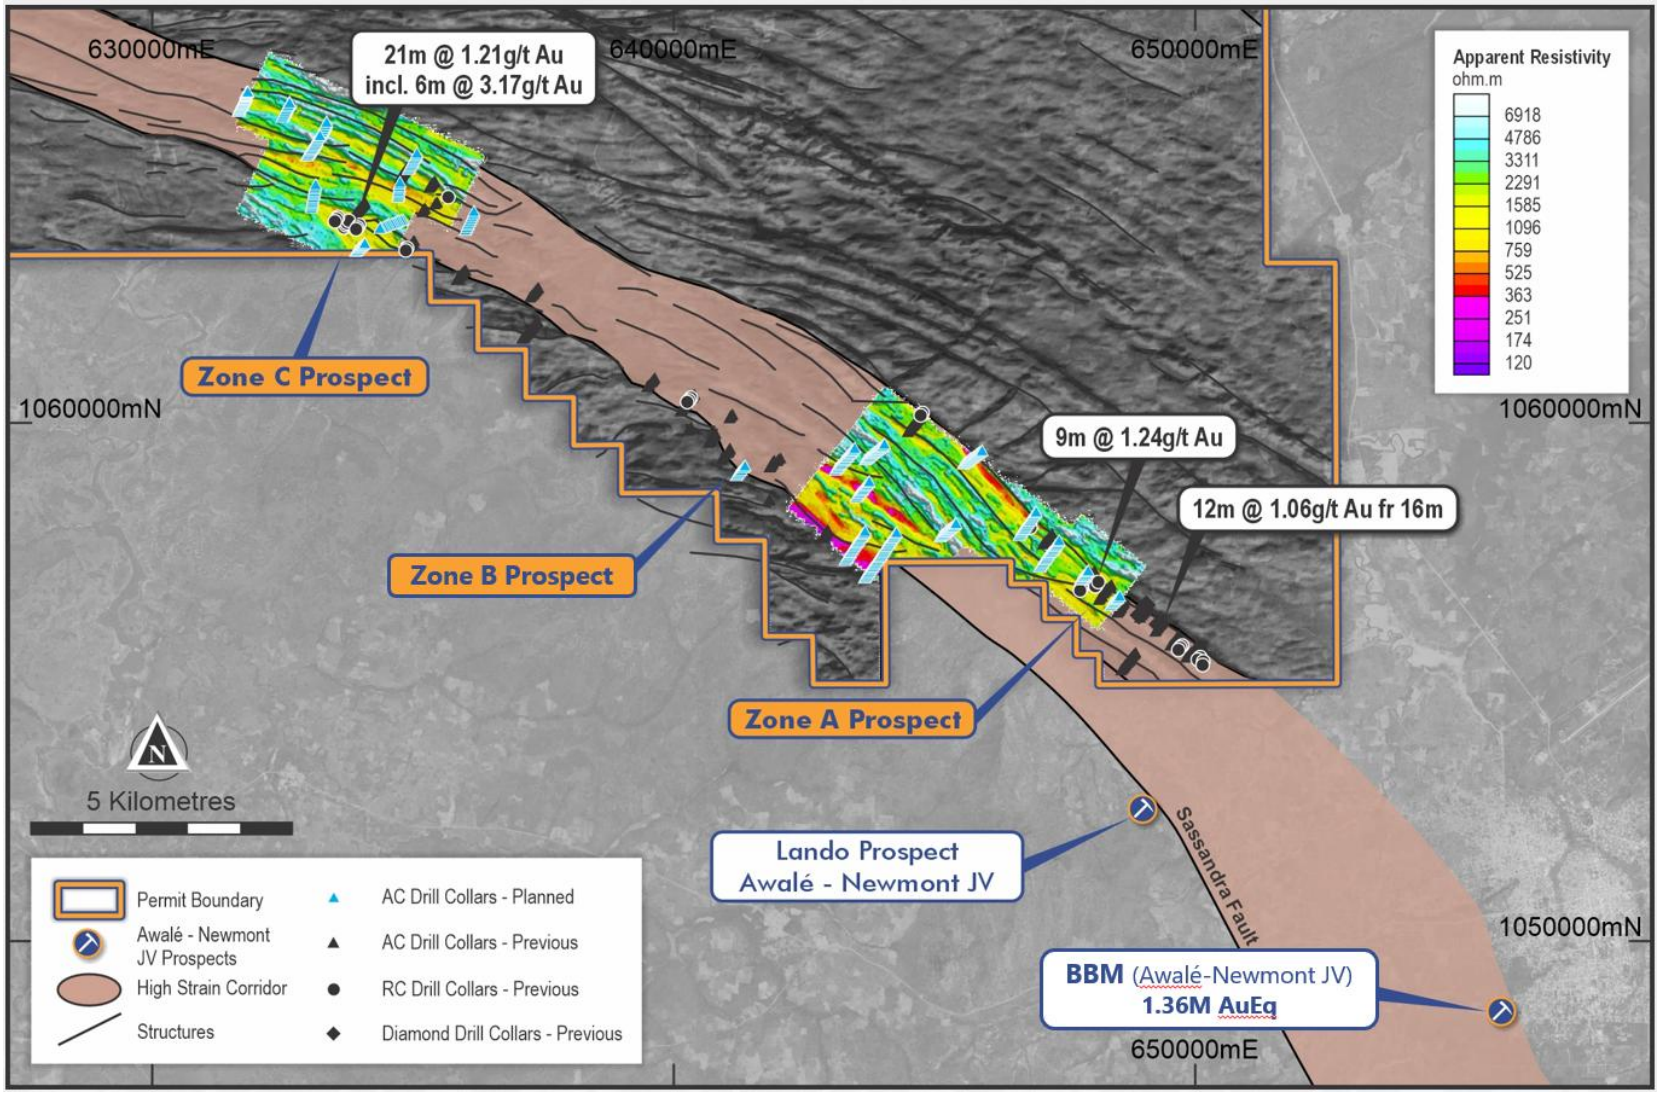

Odienné Gold Project

Air core drilling and first-pass RC results

- First RC drilling completed mid-2025 comprised 3,794m in 32 drill holes including, **21m @ 1.21g/t gold**
- Multiple gold intercepts confirm and extend, extensive gold corridors at Zone A and Zone C targets

Ground geophysics (GAIP survey) completed early 2026

11,200m of air core drilling in 543 holes completed – assays pending

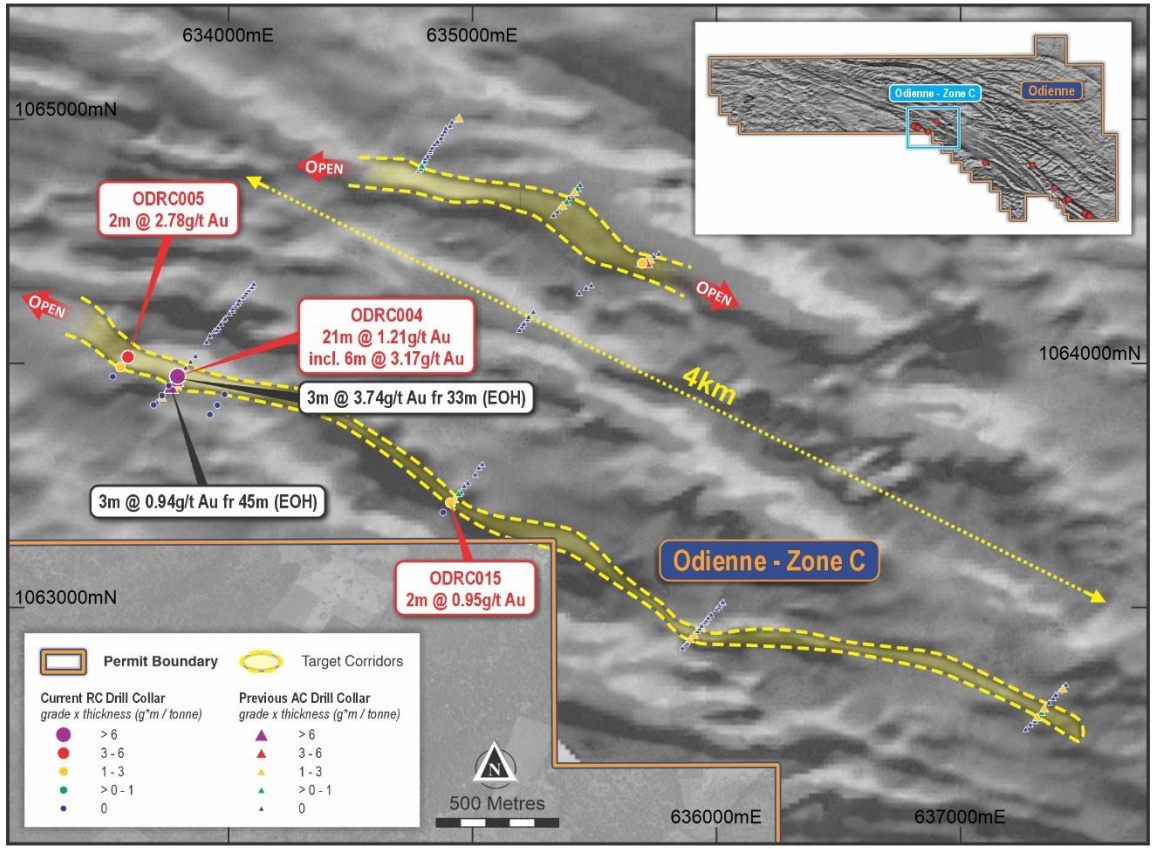

Sources: September 2026 Quarterly Activities Report and ASX releases dated 5 August 2025 and 2 June 2026.

Odienné Gold Project – Air Core & RC Drilling Results

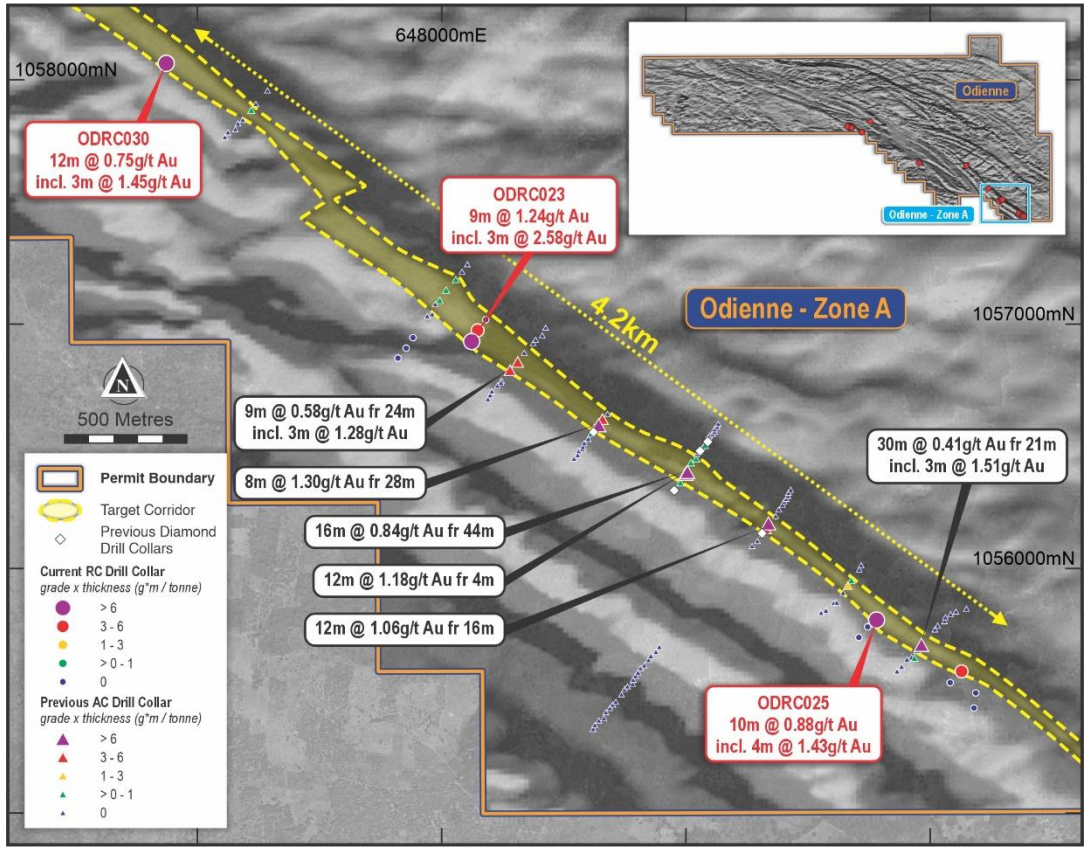

Zone C, >3.8km of gold anomalism, OPEN IN ALL DIRECTIONS

Multiple AC holes ending in gold mineralisation return a wider zone of gold mineralisation of **21m @ 1.21g/t gold** in first-pass RC drilling

Zone A, >4km of gold anomalism, OPEN IN ALL DIRECTIONS

Undrilled target in magnetics ties into mineralised structure confirmed in reconnaissance RC and air core drilling

Baga Gold Project

Baga Gold Project

Baga is west of Endeavour Mining's 5.2 Moz Assafou deposit (Note 13)

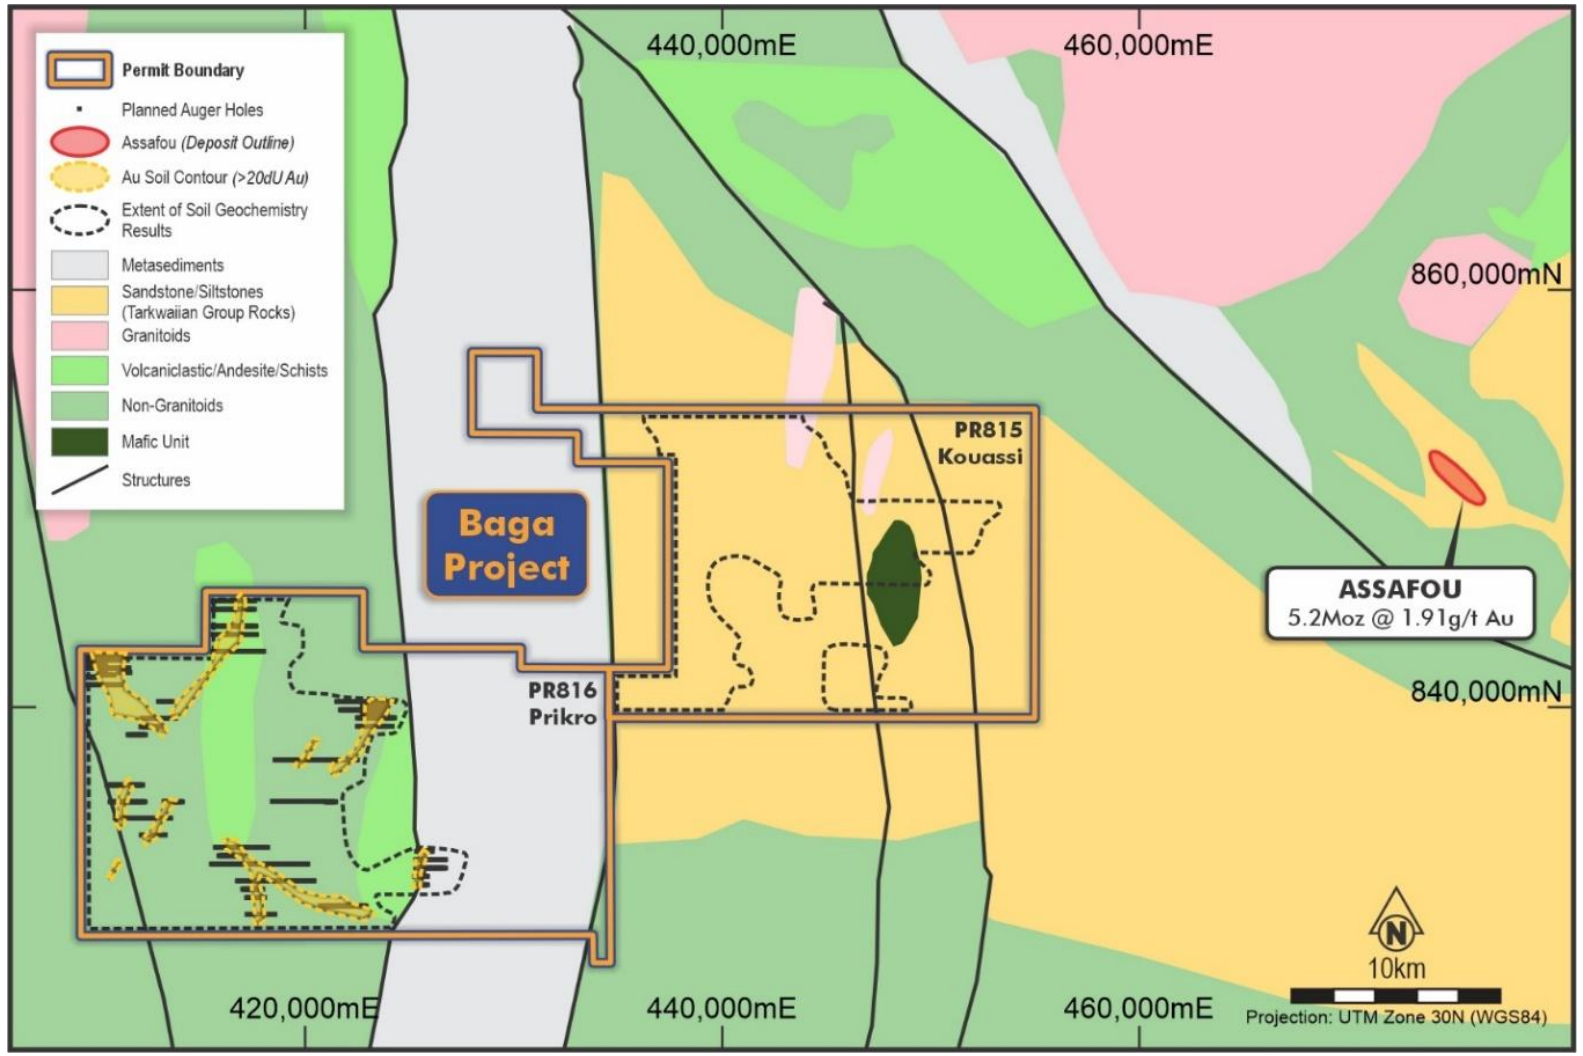

- 100% acquisition settled in August 2026
- 644km² across PR815 (Kouassi) and PR816 (Prikro)

Soil and Auger Results

- Over 7,500 soil samples defined nine coherent anomalies over more than 16km
- Soils collected on 400–800m lines and analysed using DetectORE™
- Prikro auger campaign complete: 14,800m at 2,700 sites – assays pending

Next Steps

- Potential follow-up soils at Kouassi
- Prikro auger and trench follow-up subject to assay review

Source: September 2026 Quarterly Activities Report, Figure 8 (planned auger sites).

2026 to 2028 Strategy & Planned Work

Key Messages

- **Côte d'Ivoire a top tier Jurisdiction for mineral development in West Africa**
  - West Africa emerging as the largest global gold producing region Note 14
  - Strong government and regional community support towards development
  - Many Peaks Development objectives tie in with Côte d'Ivoire stated objectives to increase gold production over 100 tonnes per annum by 2030 Note 3
- Exposure to **World Class West African Birimian Gold Terranes**, with Côte d'Ivoire's >34% portion of the highly gold endowed region significantly under-explored

Resource	Tonnes (Mt)	Au (g/t)	Gold (oz)
Open pit	24.32	1.42	1,108,000
UG	10.31	2.93	970,000
Total	34.6	1.87	2,077,000

Cut-offs 0.31 g/t (open-pit) and 1.35 g/t (UG).

Interim Ouarigue Mineral Resource (Note 1)

- **97% of in-pit ounces in Measured & Indicated**
- **2.1 Moz total, up 754,000 oz (+57%) since April**
- **Many Peaks holds 65% in GIV-JV, earning to 85% with feasibility study** *(Reported 100% project basis)*

- **Metallurgy: Interim >85% demonstrated with upside from ongoing studies**
- **Integrated open-pit and underground Scoping Study targeted for late Q4 2026**
- **Feasibility study planned for 2027, with a development decision targeted for early 2028**
- **Experienced Board with an exceptional mine development and exploration discovery track record**
- **A$20.1 million cash at 30 September 2026**

MANY PEAKS

Appendix A Key Risks

Key risks - company

Exploration risk

Mining exploration is high risk, and success at Ouarigue does not mean other targets will succeed. Regional drilling at Ferké and work at Odienné and Baga, where assays are pending, are at an early stage. There is no guarantee of further discoveries or of an economic deposit. Land access, the wet season, rig availability and laboratory delays may also affect programmes.

Joint venture interests and tenure

The Company's Ferké, and Odienné projects are held through a joint venture with Gold Ivoire Minerals SARL (**GIV Joint Venture**), in which the Company holds a majority interest and can increase that interest by sole funding a project to feasibility study. The Company is therefore subject to the risk that changes in the status of the GIV Joint Venture may adversely affect the operations and performance of the Company. A partner default or dispute, or a failure to renew the permits or obtain an exploitation permit, could lead to delays in the Company's proposed development activities or financial loss and/or could result in the loss of some or all of the Company's interest in the Projects. While the Company holds all approvals necessary to operate its current business, the Company will also require various approvals, licences and permits before it will be able to mine any of its Projects and specifically the Ferké permit will be required to apply for a Mining Licence prior to September 2027. There is no guarantee that the Company will be able to obtain all required approvals, licences and permits to mine the Projects, including the Mining Licence. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.

Environmental regulations and risk

The Company's activities are subject to Ivorian environmental laws. Mine development requires an environmental and social impact assessment (**ESIA**) and funded rehabilitation. ESIA studies for Ferké are underway. Adverse environmental findings, breaches or changes in law could delay or prevent activities, or result in significant costs and penalties. Part of Ferké North is overlapped by a classified forest and activities in the area require a memorandum of understanding with the Côte d'Ivoire Ministry of Mines, Petroleum and Energy and the Ministry of Water and Forests covering restoration, reforestation and monitoring costs. None has yet been signed and the associated costs are currently unknown. Failure to agree acceptable terms could restrict, delay or increase the cost of exploration and development in the relevant area.

Mineral Resource estimates

Mineral Resource estimates are judgements based on the data available and may change materially as new information emerges. The interim Mineral Resource estimate for the Ouarigue deposit was announced on 5 November 2026 (**Interim MRE**). The Interim MRE is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

Exploration success

The Company's Projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are speculative and high-risk undertakings that may be impeded by circumstances and factors beyond the control of the Company. There can be no assurance that exploration of the Projects, or any other exploration properties that may be acquired in the future, will result in the discovery of an economic mineral resource. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. There is no assurance that exploration or project studies by the Company will result in the definition of an economically viable mineral deposit or that the relevant exploration tonnage estimates and conceptual project developments are able to be achieved. The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, changing government regulations and many other factors beyond the control of the Company.

Key risks - company

Exploration costs

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

Results of studies

Subject to the results of exploration and testing programs to be undertaken, the Company may progressively undertake a number of studies in respect to its Projects. These studies may include scoping, prefeasibility, definitive feasibility and bankable feasibility studies. These studies will be completed within parameters designed to determine the economic feasibility of the Projects within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Projects or the results of other studies undertaken by the Company. Even if a study confirms the economic viability of the Projects, there can be no guarantee that a project will be successfully brought into production as assumed or within the estimated parameters in the feasibility study once production commences.

Availability of capital

The Company will need further funding to complete its studies and, in particular, to develop Ferké, the capital cost of which has not yet been estimated. Funding may not be available when needed or on acceptable terms. A failure to raise funds may force the Company to scale back its activities and could affect its ability to increase its interest in the GIV Joint Venture.

Sovereign and political risk

All of the Company's material Projects are in Côte d'Ivoire, which has experienced civil unrest in the past. Political instability, changes in government policy, resource nationalism, expropriation, restrictions on repatriating funds or difficulty enforcing legal rights could adversely affect the Company. Under Côte d'Ivoire's Mining Code, the State receives a free-carried interest in any exploitation permit holder which is subject to change. The 2025 Finance Act increased the State's ad valorem royalty on gold which existing producers have been required to pay. Final adoption of a new Mining Code and its implementing decrees was a stated government priority for 2026. Further fiscal or regulatory change could adversely affect project economics for Ferké. Additionally, Ferké is in northern Côte d'Ivoire and Odienné is in the north-west, in proximity to the borders with Burkina Faso, Mali and Guinea. Extremist groups have previously crossed from Burkina Faso to conduct attacks in northern Côte d'Ivoire, including in the Savanes District. Security incidents could harm personnel, damage equipment, suspend activities and increase costs.

Key personnel

The Company depends on its Directors and senior management, in particular Managing Director Travis Schwertfeger and Chief Operating Officer Matthew Scully, and on its in-country team. The loss of key personnel, or a failure to attract development expertise in a competitive West African market, could adversely affect the Company.

Counterparty and contractual risk

The Company relies on its GIV Joint Venture partner and its contractors, laboratories and consultants. Default, financial failure or disputes involving any of them could disrupt operations, and enforcing rights in Côte d'Ivoire may be costly, slow and uncertain.

Exchange rate risk

The Company reports in Australian dollars, but its Ivorian costs are incurred in West African CFA francs (pegged to the euro), some obligations are in US dollars and gold is priced in US dollars. Currency movements may increase costs or reduce future revenue.

Litigation

The Company may become involved in tenure, joint venture, contractual, environmental, community, safety or employment disputes, which could adversely affect its operations and financial position. The Company is not aware of any current material litigation.

Key risks - company

Gold price

The Company's prospects, project values and ability to raise funds depend heavily on the gold price, which is volatile and driven by factors outside the Company's control, including investment and central bank demand, interest rates, inflation, the US dollar and geopolitical events. A significant fall in the gold price could reduce Mineral Resources, weaken study outcomes and impair the Company's ability to fund development.

Operational risks

Operations may be affected by factors outside the Company's control, including failure to achieve predicted grades, technical and metallurgical difficulties, equipment failure or unavailability, adverse weather, accidents, industrial disputes and cost increases. The Company also relies on consultants and contractors for technical work, and errors in that work could cause delays or additional costs.

Climate

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation; and

b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns.

All these risks associated with climate change may significantly change the industry in which the Company operates.

Mine development

Developing a mine at Ferké depends on positive studies, an exploitation permit, a mining convention, project funding, infrastructure (including power and water), and skilled personnel and contractors. Construction is exposed to cost overruns, delays, contractor default and commissioning difficulties, and a project may not achieve forecast production or costs, or may not proceed at all.

Insurance

The Company maintains insurance policies which it deems appropriate for its current size and operations, but it cannot insure against all risks, and cover may be unavailable, inadequate or uneconomic. An uninsured loss, or an insurer's failure to pay a legitimate claim, could materially affect the Company's financial position.

Key risks - general

Placement risk

Tranche 2 of the Placement is conditional on shareholder approval under ASX Listing Rule 7.1 and, if required, Listing Rule 10.11. If it is not approved, the Company will not receive the funds under Tranche 2 and may need to scale back its activities or seek other funding.

Share price fluctuations

The shares of exploration and development companies can be highly volatile. The Shares may trade below the price of the Placement after completion of the Placement, regardless of the Company's performance, because of market conditions, investor sentiment, interest rates, the gold price and other factors.

Global economic conditions

Changes in economic conditions in Australia, Côte d'Ivoire and globally, including inflation, interest rates, exchange rates, equity market conditions, government policy and geopolitical events, may adversely affect the Company's costs, funding and financial performance.

Taxation

Changes to tax laws or their interpretation in Australia or Côte d'Ivoire may adversely affect the Company. The tax consequences of investing will differ for each investor, who should obtain their own advice.

Accounting standards

Changes to accounting standards, or to management's estimates and judgements, may affect the Company's reported results, including the carrying value of its capitalised exploration and evaluation expenditure.

Use of funds

Actual expenditure may differ from the intended use of the Placement proceeds because of exploration and study outcomes, cost increases or unforeseen expenses, and the Board may vary how funds are applied.

Appendix B International Offer Restrictions

International offer restrictions

This document does not constitute an offer of new ordinary shares ("New Shares") of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

Canada (British Columbia, Ontario and Quebec provinces)	This document constitutes an offering of New Shares only in the Provinces of British Columbia, Ontario and Quebec (the "Provinces"), only to persons to whom New Shares may be lawfully distributed in the Provinces, and only by persons permitted to sell such securities. This document is not a prospectus, an advertisement or a public offering of securities in the Provinces. This document may only be distributed in the Provinces to investors that are both (i) "accredited investors" (as defined in National Instrument 45-106 – Prospectus Exemptions) and (ii) "permitted clients" (as defined in National Instrument 31-103 – Registration Requirements, Exemptions and Ongoing Registrant Obligations). No securities commission or authority in the Provinces has reviewed or in any way passed upon this document, the merits of the New Shares or the offering of the New Shares and any representation to the contrary is an offence. No prospectus has been, or will be, filed in the Provinces with respect to the offering of New Shares or the resale of such securities. Any person in the Provinces lawfully participating in the offer will not receive the information, legal rights or protections that would be afforded had a prospectus been filed and receipted by the securities regulator in the applicable Province. Furthermore, any resale of the New Shares in the Provinces must be made in accordance with applicable Canadian securities laws. While such resale restrictions generally do not apply to a first trade in a security of a foreign, non-Canadian reporting issuer that is made through an exchange or market outside Canada, Canadian purchasers should seek legal advice prior to any resale of the New Shares. The Company as well as its directors and officers may be located outside Canada and, as a result, it may not be possible for purchasers to effect service of process within Canada upon the Company or its directors or officers. All or a substantial portion of the assets of the Company and such persons may be located outside Canada and, as a result, it may not be possible to satisfy a judgment against the Company or such persons in Canada or to enforce a judgment obtained in Canadian courts against the Company or such persons outside Canada. Statutory rights of action for damages and rescission. Securities legislation in certain Provinces may provide a purchaser with remedies for rescission or damages if an offering memorandum contains a misrepresentation, provided the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's Province. A purchaser may refer to any applicable provision of the securities legislation of the purchaser's Province for particulars of these rights or consult with a legal adviser. Certain Canadian income tax considerations. Prospective purchasers of the New Shares should consult their own tax adviser with respect to any taxes payable in connection with the acquisition, holding or disposition of the New Shares as there are Canadian tax implications for investors in the Provinces. Language of documents in Canada. Upon receipt of this document, each investor in Canada hereby confirms that it has expressly requested that all documents evidencing or relating in any way to the sale of the New Shares (including for greater certainty any purchase confirmation or any notice) be drawn up in the English language only. Par la réception de ce document, chaque investisseur canadien confirme par les présentes qu'il a expressément exigé que tous les documents faisant foi ou se rapportant de quelque manière que ce soit à la vente des valeurs mobilières décrites aux présentes (incluant, pour plus de certitude, toute confirmation d'achat ou tout avis) soient rédigés en anglais seulement.
European Union (excluding Austria)	This document has not been, and will not be, registered with or approved by any securities regulator in the European Union. Accordingly, this document may not be made available, nor may the New Shares be offered for sale, in the European Union except in circumstances that do not require a prospectus under Article 1(4) of Regulation (EU) 2017/1129 of the European Parliament and the Council of the European Union (the "Prospectus Regulation"). In accordance with Article 1(4)(a) of the Prospectus Regulation, an offer of New Shares in the European Union is limited to persons who are "qualified investors" (as defined in Article 2(e) of the Prospectus Regulation).
Hong Kong	WARNING: This document has not been, and will not be, registered as a prospectus under the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong, nor has it been authorised by the Securities and Futures Commission in Hong Kong pursuant to the Securities and Futures Ordinance (Cap. 571) of the Laws of Hong Kong (the "SFO"). Accordingly, this document may not be distributed, and the New Shares may not be offered or sold, in Hong Kong other than to "professional investors" (as defined in the SFO and any rules made under that ordinance). No advertisement, invitation or document relating to the New Shares has been or will be issued, or has been or will be in the possession of any person for the purpose of issue, in Hong Kong or elsewhere that is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to New Shares that are or are intended to be disposed of only to persons outside Hong Kong or only to professional investors. No person allotted New Shares may sell, or offer to sell, such securities in circumstances that amount to an offer to the public in Hong Kong within six months following the date of issue of such securities. The contents of this document have not been reviewed by any Hong Kong regulatory authority. You are advised to exercise caution in relation to the offer. If you are in doubt about any contents of this document, you should obtain independent professional advice.

International offer restrictions

New Zealand	This document has not been registered, filed with or approved by any New Zealand regulatory authority under the Financial Markets Conduct Act 2013 (the "FMC Act"). The New Shares are not being offered or sold in New Zealand (or allotted with a view to being offered for sale in New Zealand) other than to a person who: • is an investment business within the meaning of clause 37 of Schedule 1 of the FMC Act; • meets the investment activity criteria specified in clause 38 of Schedule 1 of the FMC Act; • is large within the meaning of clause 39 of Schedule 1 of the FMC Act; • is a government agency within the meaning of clause 40 of Schedule 1 of the FMC Act; or • is an eligible investor within the meaning of clause 41 of Schedule 1 of the FMC Act.
Singapore	This document and any other materials relating to the New Shares have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore. Accordingly, this document and any other document or materials in connection with the offer or sale, or invitation for subscription or purchase, of New Shares, may not be issued, circulated or distributed, nor may the New Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore except pursuant to and in accordance with exemptions in Subdivision (4) Division 1, Part 13 of the Securities and Futures Act 2001 of Singapore (the "SFA") or another exemption under the SFA. This document has been given to you on the basis that you are an "institutional investor" or an "accredited investor" (as such terms are defined in the SFA). If you are not such an investor, please return this document immediately. You may not forward or circulate this document to any other person in Singapore. Any offer is not made to you with a view to the New Shares being subsequently offered for sale to any other party in Singapore. On-sale restrictions in Singapore may be applicable to investors who acquire New Shares. As such, investors are advised to acquaint themselves with the SFA provisions relating to resale restrictions in Singapore and comply accordingly.
Switzerland	The New Shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange or on any other stock exchange or regulated trading facility in Switzerland. Neither this document nor any other offering or marketing material relating to the New Shares constitutes a prospectus or a similar notice, as such terms are understood under art. 35 of the Swiss Financial Services Act or the listing rules of any stock exchange or regulated trading facility in Switzerland. No offering or marketing material relating to the New Shares has been, nor will be, filed with or approved by any Swiss regulatory authority or authorised review body. In particular, this document will not be filed with, and the offer of New Shares will not be supervised by, the Swiss Financial Market Supervisory Authority (FINMA). Neither this document nor any other offering or marketing material relating to the New Shares may be publicly distributed or otherwise made publicly available in Switzerland. The New Shares will only be offered to investors who qualify as "professional clients" (as defined in the Swiss Financial Services Act). This document is personal to the recipient and not for general circulation in Switzerland.
United Kingdom	This document has not been delivered for approval to the Financial Conduct Authority in the United Kingdom and no prospectus (within the meaning of Regulation 21 of The Public Offers and Admissions to Trading Regulations 2024 ("POATRs")) has been published or is required to be published in respect of the New Shares. This document is issued on a confidential basis to "qualified investors" (within the meaning of paragraph 2 of Schedule 1 to the POATRs) in the United Kingdom. The New Shares may not be offered or sold in the United Kingdom by means of this document or any other document except pursuant to an exemption from the general prohibition on offers of relevant securities to the public in the United Kingdom. This document should not be distributed, published or reproduced, in whole or in part, nor may its contents be disclosed by recipients to any other person in the United Kingdom. Any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000, as amended ("FSMA")) received in connection with the offer or sale of the New Shares has been, and only will be, communicated or caused to be communicated in the United Kingdom in circumstances in which section 21(1) of the FSMA does not apply to the Company. In the United Kingdom, this document is being distributed only to, and is directed at, persons (i) who have professional experience in matters relating to investments falling within Article 19(5) (investment professionals) of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 ("FPO"), (ii) who fall within the categories of persons referred to in Article 49(2)(a) to (d) (high net worth companies, unincorporated associations, etc.) of the FPO or (iii) to whom it may otherwise be lawfully communicated ("relevant persons"). The investment to which this document relates is available only to relevant persons. Any person who is not a relevant person should not act or rely on this document.

International offer restrictions

United States	This document does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States. The New Shares have not been, and will not be, registered under the US Securities Act of 1933 or the securities laws of any state or other jurisdiction of the United States. Accordingly, the New Shares may not be offered or sold in the United States except in transactions exempt from, or not subject to, the registration requirements of the US Securities Act and applicable US state securities laws. This document may be distributed, and the New Shares may be offered and sold, in the United States only to: • "qualified institutional buyers" (as defined in Rule 144A under the US Securities Act); and • dealers or other professional fiduciaries organized or incorporated in the United States that are acting for a discretionary or similar account (other than an estate or trust) held for the benefit or account of persons that are not US persons and for which they exercise investment discretion, within the meaning of Rule 902(k)(2)(i) of Regulation S under the US Securities Act.
