NTA backing

	2026 (cents)	2025 (cents)
Net tangible asset backing per ordinary share[1]	**8.64**	29.69
Adjusted Net tangible asset backing per ordinary share (excluding deferred revenue)[2]	**112.08**	119.90

1 The year-on-year decrease in net tangible assets primarily reflects higher deferred revenue associated with strong business growth. The decrease also reflects lower cash balances following capital management initiatives undertaken in shareholders' interests, including on-market share purchases to satisfy employee equity awards without issuing new shares, and the payment of a special dividend.

2 Adjusted NTA excludes deferred revenue, which primarily reflects customer payments received in advance for SaaS services. This adjustment provides additional insight into the Group's tangible net asset position by removing the impact of a liability that increases with business growth and is settled through the delivery of services rather than cash repayment.
